Constructing a landing at Crofton, Nanaimo District, B.C. Name of contractors, James McDonald Construction Co., Ltd., Victoria, B.C. Date of contract, February 10, 1940. Amount of contract, approximately $4,397.10. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile Driver Foreman	$1 25
Pile Driver Engineer	1 12½
Pile Driver Man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Construction of a collecting sewer at Quebec City, P.Q. Name of contractors, Pacifique Marcotte, Quebec, P.Q. Date of contract, March 12, 1940. Amount of contract, approximately $317,410.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' Helpers	0 45
Brick and Hollow Tile Layers	0 80
Brick and Hollow Tile Layers' Helpers (mixing and tempering mortar)	0 45
Carpenters and Joiners	0 60
Cement Finishers	0 55
Cement and Concrete Mixer Operator:—	
Steam	0 60
Gas. or Elec.	0 55
Compressor Operators—Gas. or Elec.	0 55
Drivers	0 40
Driver, Horse and Cart	0 55
Driver, Team and Wagon	0 65
Drill Runners	0 50
Electricians (Inside wiremen)	0 65
Engineers, Operating, Steam:—	
Single or Double Drum	0 60
Three or more Drums	0 70
Engineers on Steel Erection	0 75
Engineer, Crane (Steam, Gas. or Elec.)	0 65
Firemen—Stationary	0 45
Hoist Operators—Tower (Gas. or Elec.)	0 55
Labourers	0 40
Lathers—Metal	0 65
Lathers—Wood	0 55
Machinists	0 65
Machinists' Helpers	0 45
Motor Truck Drivers	0 45
Motor Truck Driver and Truck	1 45
Painters—Spray	0 65
Painters and Glaziers	0 55
Patternmakers	0 60
Pipe Fitters—Surface—Temporary Work	0 55
Pipe Layers, Caulkers and Solderers	0 50
Pile Driver and Derrick Foremen	0 70
Pile Driver and Derrick Engineers	0 60
Pile Driver and Derrick Men (rigging, setting and signalling)	0 55
Pile Driver and Derrick Firemen	0 45
Pile Driver and Derrick Labourers	0 45
Plasterers	0 75
Plasterers' Helpers (mixing and tempering material)	0 45
Plumbers and Steamfitters	0 65
Powdermen	0 50
Pumpmen	0 50
Riggers—General	0 50
Road Grader Operators, Horsedrawn	0 45
Road Grader Operator, Including team	0 70
Road Grader Operator, Gas.	0 50
Road Roller Operators, Steam or Gas.	0 60
Roofers—Composition	0 50
Roofers—Felt and Gravel: Patent	0 45
Roofers—Sheet Metal	0 65
Roofers—Shingles (Wood, Asbestos)	0 60
Rodmen—Reinforced steel	0 50
Sheet Metal Workers	0 65
Sprinkler Installers	0 85
Steam Shovel Engineers	0 85
Steam Shovel Cranemen	0 65
Steam Shovel Firemen	0 55
Steam Shovel Oilers	0 50
Shovel Operators—Gas.	0 85
Stone Cutters	0 70
Stonemasons	0 80
Stonemasons' Helpers (mixing and tempering mortar)	0 45
Structural Steel Workers	0 75
Terrazzo Layers	0 70
Terrazzo Finishers and Helpers	0 55

	Per hour
Timbermen and Cribmen (measuring, scribing, and, by the use of the axe, adze, etc., cutting and fitting timber)	0 50
Tractor Operators	0 50
Watchmen	0 35
Welders and Burners—Acetylene or Elec.	0 60
Welders and Burners—on Steel Erection	0 75

Construction of Pavilion "A", Camp Hill Hospital, Halifax, N.S. Name of contractors, Fundy Construction Co., Ltd., Halifax, N.S. Date of contract, March 14, 1940. Amount of contract, $23,350 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers—walls	0 80
Cement finishers—floors	0 60
Cement and concrete mixer operators:—	
Steam	0 65
Gas. or Elec.	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver team and wagon	0 75
Electricians (inside wiremen)	0 85
Engineers, operating, steam (single or double drum)	0 65
Firemen, stationary	0 45
Hoist operators-tower (gas. or elec.)	0 50
Labourers	0 40
Lathers (metal)	0 60
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 85
Roofers, felt and gravel: patent	0 45
Roofers, sheet metal	0 70
Roofers, shingles (asbestos, wood)	0 70
Sheet metal workers	0 70
Watchman	0 35

Construction of a wharf at Rivière Noire (St. Siméon), Charlevoix Co., P.Q. Name of contractor, Mr. Alphonse Montminy, St. François, P.Q. Date of contract, March 20, 1940. Amount of contract, approximately $13,440.

	Per hour
Blacksmiths	$0 55
Blacksmiths' Helpers	0 40
Boatmen (rowboat)	0 35
Cement Finishers	0 50
Cement and Concrete Mixer Operators—Gas. or Electric	0 45
Compressor Operators—gas or elec.	0 45
Driver, horse and cart	0 50
Driver, team and waggon	0 60
Drivers	0 35
Drill Runners	0 45
Engineers, Operating Steam, sgl. or dbl. drums	0 60
Firemen—stationary	0 40
Hoist Operators—gas. or elec.	0 45
Labourers	0 35
Motor Boat Operators	0 40
Motor Truck Driver and Truck	1 35
Motor Truck Drivers	0 40
Powdermen	0 45
Steam Shovel Engineers	0 85
Steam Shovel Cranemen	0 65
Steam Shovel Fireman	0 55
Steam Shovel Oilers	0 50
Shovel Operators—gasoline	0 85
Timbermen and Cribmen (Measuring, Scribing and, by the use of the adze, axe, etc., cutting and fitting timber)	0 42
Watchman	0 30

Installation of a new passenger elevator and construction of alterations to penthouse in the Examining Warehouse at Calgary, Alta. Name of contractors, Messrs. Walfrid Hornstrom and Bror Herman Hornstrom, Calgary, Alta. Date of contract, March 14, 1940. Amount of contract, $16,748. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operators:—	
Steam	0 70
Electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 90
Elevator constructors	1 00
Elevator constructors' helpers	0 70
Engineers on steel erection	0 90
Fireman, stationary	0 50
Labourers	0 45
Lathers (metal)	0 75
Lathers (metal furring, tied-on lath work and attached ceilings)	0 90
Motor truck driver	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	0 75
Painters and glaziers	0 80
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 60
Roofers, felt and gravel	0 50
Roofers, sheet metal	0 80
Sheet metal workers	0 80
Stonecutters	1 00
Stonemasons	1 10
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 90
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters (ceramic)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40
Welders and burners on steel erection	0 90

Construction of repairs, etc., to the hull, machinery and boiler of Dredge *P.W.D. No. 9* at Pictou, N.S. Name of contractors, Pictou Foundry and Machine Co., Ltd., Pictou, N.S. Date of contract, March 11, 1940. Amount of contract, $8,727. A fair wages schedule was included in the contract as follows:—

	Per hour
Anglesmith	$0 58
Anglesmith's helper	0 45
Blacksmith	0 58
Blacksmith's helper	0 40
Caulker and chipper	0 58
Carpenter (ship)	0 58
Crane operator	0 48
Driller and reamer	0 45
Labourer	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Moulder	0 58
Machinist	0 58
Machinist's helper	0 40
Painter	0 48
Patternmaker	0 58
Plater	0 58
Punch and shear men	0 45
Riveter	0 58
Rivet heater	0 40
Template maker	0 58
Welder (electric)	0 58

Construction of repairs, etc., to the hull, machinery and boiler of Dredge *P.W.D. No. 12* at Pictou, N.S. Name of contractors, Pictou Foundry and Machine Co., Ltd., Pictou, N.S. Date of contract, March 11, 1940. Amount of contract, $7,315. A fair wages schedule was included in the contract as follows:—

	Per hour
Anglesmith	$0 58
Anglesmiths' helpers	0 45
Blacksmith	0 58
Blacksmiths' helpers	0 40
Caulker and chipper	0 58
Carpenter (ship)	0 58
Crane operator	0 48

Scales..	Gurney-Scale Co., Ltd., Hamilton, Ont.

Royal Canadian Mounted Police

Blue Serge Cloth..	Paton Mfg., Co., Ltd., Montreal, P.Q.
Dressing Buffalo Hides.. ..	Edmonton Tannery, Edmonton, Alta.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Metal Products

Brockville, Ontario.—A Certain Manufacturer of Copper Wire, Cables, Etc. and the United Electrical and Radio Workers of America, Local 510 (Electric Wire Workers).

This agreement made following the strike mentioned on page 332 of this issue. Agreement to be in effect from March 18, 1940 to February 1, 1941, and thereafter subject to 60 days' notice.

The agreement is similar to the one previously in effect and summarized in the Labour Gazette, August, 1939, page 855.

Overtime is to be paid at time and one half with double time for Sundays and holidays, as in the previous agreement. Overtime is to be distributed among the employees on a fair and equitable basis. Any night shift working fewer hours than the corresponding day shift, to be paid at time and one tenth for the hours worked.

Wages to be increased from January 1, 1940, by 5 cents per hour for male employees and 3 cents per hour for female employees. New male employees to start at a minimum of 35 cents per hour, to be increased after six weeks' employment to 40 cents; new female employees to start at a minimum of 28 cents per hour, to be increased after six weeks' employment to 33 cents. These rates to constitute the minimum rates of pay for employees in the shop.

A detailed plan for the reduction of staff when necessary and the rehiring of employees according to seniority is made part of the agreement.

Construction: Buildings and Structures

Toronto, Ontario.—General Contractors' Section of the Builders' Exchange and Construction Association of Toronto and the Bricklayers, Masons and Plasterers' International Union, Local No. 2 (Bricklayers) and Local No. 26 (Stonemasons).

Agreement to be in effect from March 23, 1940 to March 1, 1941.

This agreement is the same as the one previously in effect and summarized in the Labour Gazette, June, 1939, page 624 and May, 1938, page 572, with this change:

The minimum wage rate from April 15, 1940, is $1.05 per hour (an increase of 5 cents over the previous rate).

Construction: Shipbuilding

Vancouver, B.C.—Certain Dry Dock and Shipbuilding Firms and the Amalgamated Building Workers of Canada, Shipyard Section (Shipwrights, Caulkers, Etc.).

Agreements to be in effect from March 7, 1940 for the duration of the war, and thereafter until completion of any contracts entered into previous to the cessation of hostilities.

Only members of this union to be employed, as long as the conditions of the agreement are adhered to.

Hours: 8 per day, 44 per week for men on the day shift; second shift to be from 4.50 p.m. to 12.30 a.m. with a 20 minute period for lunch, for which 8 hours' pay will be allowed; third shift from 12.30 a.m. to 8 a.m. with a 20 minute period for lunch, for which 9 hours' pay will be allowed; 40 hours to constitute a week's work for the second and third shifts.

Overtime: time and one half for first four hours and double time thereafter; double time for work on Sundays and nine specified holidays.

Wages: shipwrights, joiners and boatbuilders $6.64 per day; caulkers $6.89 per day. (These are the same rates as paid under the previous agreement.) These rates are subject to adjustment quarterly in accordance with the cost of living, and wages to be increased or decreased in an equal percentage to the increase or decrease in cost of living, as ascertained by the Department of Labour of the provincial government, it being understood that the cost of living figures as at December 1, 1939, be the basis of this arrangement, but the wage rates above stated ($6.64 and $6.89 per day) are minimum rates during the life of the agreement.

Time and one quarter to be allowed for all dirty work; the foreman, shop steward and committee to decide if work in question is to be so classed.

Transportation and Public Utilities: Water Transportation

Vancouver, B.C.—Shipping Federation of British Columbia and the Burrard Coastwise Longshoremen's Association (Longshoremen, Coastwise Vessels).

Agreement to be in effect from March 12, 1940 to March 11, 1942, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, May, 1938, page 574 and April, 1937, page 455, with this exception:

Hours and overtime: straight time is all time between 8 a.m. and 5 p.m. Monday to Friday inclusive and between 8 a.m. and 1 p.m. Saturday; overtime is all time on Sundays and holidays and between 5 p.m. and 8 a.m. on other days and also between 1 p.m. and 5 p.m. on Saturdays, except that straight time is payable on Saturdays between 1 p.m. and 5 p.m. in case of regular passenger vessels. (Under the previous agreement, straight time was payable for all work on Saturday afternoon.)

The wage rates for general cargo are unchanged at 90 cents for straight time and $1.20 for overtime.

Collective Labour Agreements Act, Quebec

The following agreements, amendments and correction to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Printing Trades, Quebec City and District.
Men's and Boys' Hat and Cap Industry, Province of Quebec.
Millinery Industry, Montreal (amendment).
Aluminum Industry, Shawinigan Falls (amendment).
Railway and Tramway Car and Bus Manufacturing Industry, Montreal (correction).
Building Trades, Chicoutimi and Lake St. John District (amendment).
Building Trades, Sherbrooke and Eastern Townships (including Arthabasca) (amendment).
Longshoremen inland and coastal navigation, Montreal (amendment).
Retail Stores, Quebec (amendment).
Hardware and Paint Stores, Quebec.
Garages and Service Stations, Sherbrooke (repeal).
Horseshoers and Wheelwrights, Victoriaville and District (repeal).
Barbers and Hairdressers, St. John and Iberville (amendment).
Barbers and Hairdressers, St. Jerome (repeal).

98853—6½

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

New Brunswick

Bricklayers, Masons and Plasterers, St. John.
Carpenters and Joiners, St. John.
Painters, St. John.
Plumbers and Steamfitters, St. John.

Saskatchewan

Taxi Drivers, Regina.

Alberta

Carpenters, Edmonton.

The Canadian Kodak Co. Ltd, in pursuance of its extensive employees' relations program, recently opened a new building in Toronto providing a recreational and social centre for its employees. The building, which is equipped with many recreational facilities, contains an auditorium with seating accommodation for over 1,000 and is so designed that it can be readily converted into a gymnasium with facilities for badminton, basketball and other indoor sports. There is also a well equipped stage for theatrical performances or concerts. A restaurant is provided as well as men's and women's recreational rooms which afford facilities for reading, writing, table tennis and billiards. A library is also included and a well equipped model dark room is provided for the company's camera club.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the Labour Gazette, page 503. Amendments to the Act are noted in the Labour Gazette, June, 1939, page 576. Agreements and regulations under the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issue beginning May, 1938.

Recent proceedings under the Act include the extension of three new agreements, the amendment of seven other agreements, the repeal of three agreements and the correction of another, all of which are noted below. Requests for the extension of new agreements were published in the *Quebec Official Gazette* as follows: one affecting building trades at St. Jerome was published in the issue of March 2; one affecting work glove operators and blockers throughout the Province in the issue of March 9; funeral undertakers at Montreal in the issue of March 16; building trades at Quebec in the issue of March 30. In addition, Orders in Council were published in the *Quebec Official Gazette* during March approving the constitution and by-laws of certain joint committee and others authorizing certain joint committees to levy assessments, as listed below.

Manufacturing: Printing and Publishing

Printing Trades, Quebec City and District. —An Order in Council, approved March 13, and published in the *Quebec Official Gazette,* March 23, makes binding the terms of an agreement between Le Syndicat patronal de l'imprimerie de Québec, Inc. (The Employers' Union of the Printing Industry of Quebec, Inc.) and l'Union catholique des imprimeurs et relieurs de Québec (the Catholic Union of Printers and Bookbinders of Quebec), l'Union typographique de Québec Local No. 302 (The Typographical Union of Quebec, Local No. 302), l'Union des Pressiers et Clicheurs de Québec Local 152 (the Union of Pressmen and

Stereotypers of Quebec, Local 152), l'Union des Relieurs, Local 152, Québec (the Union of Bookbinders, Local 152, Quebec), le Syndicat catholique des Imprimeurs de Rimouski et Rivière du Loup (the Catholic Union of Printers of Rimouski and Rivière du Loup), le Syndicat catholique des ouviers imprimeurs de la Beauce (The Catholic Union of Printing Workers of Beauce).

Agreement to be in effect from April 1, 1940 to April 1, 1942 and thereafter from year to year, subject to notice.

(The previous agreement was summarized in the Labour Gazette, September, 1938, page 1044, March, 1939, page 335 and October, page 1065).

The territorial jurisdiction is enlarged and now comprises the judicial districts of Quebec, Beauce, Montmagny, Kamouraska, Rimouski, Gaspé and those parts of the districts of St. François and Arthabasca not included in the Montreal printing trades agreement.

The professional jurisdiction includes all persons of both sexes employed in producing printed matter, including bookbinders, finishers, rulers, cutters, photoengravers and newspaper employees whether employed in a trade plant, in a private or industrial enterprise using normal presses, offset, photo-litho and lithographic presses, stencil duplicators (mimeograph), multigraphers and any other graphic reproduction process including silk impressions and photogravures, whether they are working in an institution, commercial enterprise or any other establishment and whether such operation constitute its principal business or not.

(This agreement supersedes the agreement governing the lithographic industry throughout the province (Labour Gazette, April, 1938, page 451) insofar as this Quebec zone is concerned.)

Establishments are classified into: class A, daily newspapers; class B, mechanized typography and press establishments having one or more composing machines, linotype or monotype, or operating two or more cylinders, and the photo-engraving, photo-litho and bookbinding establishments not included in class D, as well as lithography and ruling plants; class C, those not included in any of the other three categories; class D, those making bookbinding work exclusively (library volumes, binders).

Hours: for day work, hours not to exceed 9 per day, with a 46 hour week (ending at noon Saturday) for establishments of class A, B, and D, 48 hours for class C; for night work hours not to exceed 9 per day, with a 43 hour week except for rural judicial districts where hours for night work are 45 per week.

Overtime: time and one half except for the rural judicial districts. In rural judicial districts, overtime to be paid at time and one quarter. However, regular rates to be paid for overtime where the employee has paid holidays (one week per year) and receives his pay when absent on account of illness (two weeks per year). Double time for work on Sundays and four specified holidays. Employees engaged in printing morning newspapers may, however, work Sunday evening at the regular rates.

Minimum weekly wage rates (for all except the rural judicial districts) for day work: For class A establishments—journeymen typographers, linotypists and monotypists $32 (an increase of $1.50 per week over the previous rates); journeymen pressmen and stereotypers $28.50 (an increase of $2) from April 1, 1940 to December 31, 1940, and $29 from January 1, 1941 to March 31, 1942; all other journeymen $28 (an increase of $1.50). For class B establishments—journeymen typographers, linotypists and monotypists $29.50 (an increase of $1.50); all other journeymen $28 (an increase of $1.50). For class C, all journeymen $22.08 or 46 cents per hour. For class D, all journeymen $26.50. Journeymen on night shifts to be paid $2 per week over day scale. Foremen to be paid $3 per week more than journeymen. In the rural judicial districts these wage rates may be reduced by 20 per cent.

Apprentices to serve five years except bindery girls who serve three years. Apprentices to be paid from $5 per week during first year to $18 during second half of fifth year; apprentice bindery girls from $5.06 during first six months to $11.04 during second half of third year. After four years, wages for castermen's helpers to be increased by 5 per cent every year until they have attained those established for journeymen. Apprentices in their first, second and third year to be paid $1 per week extra for night work; apprentices in their fourth and fifth year to be paid $2 per week extra.

Apprentices are limited to one apprentice to three journeymen or fraction thereof regularly employed in the composing, bookbinding and photogravure departments; one to each two journeymen or fraction thereof in the press or stereotyping department; for girls in the bookbinding department, the number of those with less than two years' experience not to exceed one third of their total number. In plants employing less than ten workers, journeymen and apprentices included, if one journeyman, one apprentice allowed; if two to five journeymen, two apprentices; if six journeymen, three apprentices; such apprentices may be typographers, pressmen or bookbinders.

If the employer supplies board or lodging, he may not charge the employee more than $4 per week for meals. $1.50 for lodging or $5 for both board and lodging.

Manufacturing: Textiles and Clothing

Men's and Boys' Hat and Cap Industry, Province of Quebec.—An Order in Council, approved March 7, and published in the *Quebec Official Gazette,* March 16, makes obligatory the terms of an agreement between certain hat and cap manufacturers and the United Hatters, Cap and Millinery Workers International Union, Local No. 36.

The agreement which is effective throughout the province of Quebec is to be in effect from January 1, 1940 to January 1, 1941 and thereafter from year to year, subject to notice.

The industrial jurisdiction governs the manufacture of hats and caps for men, boys and children except babies' bonnets, head wear of same materials as children's coats, etc. and except the making of headwear for men and boys made of fur felt, woollen felt or straw.

Hours: 44 per week, either 9 per day from Monday to Thursday, 8 on Friday and no work on Saturday, or 8 per day from Monday to Friday and 4 on Saturday.

Overtime is limited to 2 hours in any day, 10 hours in any week and is never allowed Saturday afternoon or Sunday.

Minimum weekly wage rates from January 1 to July 1, 1940: cutters $23, operators $21, blockers $16.40, lining makers $13.50 (increases of $1 per week in each case over the previous minimum rates). From July 1, 1940, the minimum rates are further increased by $1 per week, making the rates $24 for cutters, $22 for operators, $17.40 for blockers, $14.50 for lining makers. In any establishment where the piece work system was in force when this decree came into force, piece work prices to be fixed at such rates as to assure the workers at least the above minimum rates. Workers who have not acquired the necessary skill in their classification to entitle them to be rated as skilled workers or whose productivity is below the average for any reason may be paid at lower wage rates to be fixed by the joint committee, such rates to be revised each three months so that the worker may receive the above minimum rates as soon as able to qualify.

Millinery Industry, Montreal.—An Order in Council, approved March 7, and published in the *Quebec Official Gazette,* March 16, amends the previous Orders in Council for this industry (Labour Gazette, August, 1935, page 732, March, 1936, page 275, June, 1937, page 695 and June, 1938, page 691).

The minimum wage rates are increased from February 15, 1940 by $1 to $2.20 per week, making the following rates in effect for a 40 hour week: hand blockers $34.20; blockers, straw operators, fabric operators and cutters $31; drapers $21.40; trimmer-drapers $18.20; trimmers $16. As in the previous agreement employees who have not the necessary skill for any reason may be paid at lower rates set by the joint committee, but in no case may the number of such lower paid employees be more than 20 per cent of the total number of employees.

Manufacturing: Metal Products

Aluminum Industry, Shawinigan Falls.—An Order in Council, approved March 20, and published in the *Quebec Official Gazette,* March 30, amends the previous Orders in Council for the industry, (Labour Gazette, November, 1937, page 1273) by providing that from April 1, 1940, a new wage scale be in force. The rates in some cases are higher, in a few cases lower, and in others unchanged from the previous wage scale.

Minimum hourly rates for certain classes of work: analyst 40 cents, analyst assistant 26 cents, apprentices from 26 cents in first year to 40 cents in fourth year, blacksmith 50 cents, cabler 46 cents, carbon changer 48 cents, carter 40 cents, catcher (rolling mill) 46 cents, chemist assistant 50 cents, clerk 44 cents, craneman 50 cents, electrician 50 cents, electrician assistant 40 cents, fireman (remelting) 46 cents, headpotman 60 cents, headpotman helper 54 cents, potman 48 cents, machinist 50 cents, millwright 50 cents, painter 46 cents, pourer (remelting) 46 cents, power house and rotary operator 50 cents, power house and rotary operator assistant 34 cents, reelman 42 cents, rigger 50 cents, sweeper 40 cents, tapper 48 cents, tester 40 cents, trucker 46 cents, watchman 40 cents, weigher 42 cents, welder 50 cents, drawer (wire, rod, bar and tubing) 48 cents, labourer 40 cents.

Railway and Tramway Car and Bus Manufacturing Industry, Montreal.—A correction was published in the *Quebec Official Gazette,* March 9, to the agreement noted in the Labour Gazette, March, 1940, page 282, substituting the word "enginemen" for the word "engineers" in that agreement.

Construction: Building and Structures

Building Trades, Chicoutimi and Lake St. John District.—An Order in Council, approved March 7 and published in the *Quebec Official Gazette,* March 23, amends the previous Orders in Council for these trades (Labour Gazette, January, 1937, page 103, January, 1939, page 96 and October, page 1065).

The wage rates for all trades except plumbers in zone I are increased by 5 cents per hour.

Notwithstanding the Order in Council for the Montreal district which sets rates for the structural iron industry and the sprinkler fitters' trade in the whole province, the following hourly wage rates shall govern this industry and trade in the Chicoutimi and Lake St. John District: painters including spraying machines 55 cents, welders 75 cents, kettlemen 50 cents, metal brace workers and erectors (on field) 50 cents, tinsmiths (erector) 50 cents, sprinkler fitters 85 cents, structural iron erectors (all categories including welders with the exception of painters) 75 cents, boiler makers 75 cents, concrete iron brace erectors 50 cents, water carriers 25 cents.

This amendment does not apply to building contracts signed before the date of its publication.

Building Trades, Sherbrooke and Eastern Townships (Including Arthabaska).—An Order in Council, approved March 7 and published in the *Quebec Official Gazette,* March 16, amends the previous Orders in Council (Labour Gazette, June, 1938, page 693, October, page 1173, November, page 1299, July, 1939, page 729 and November, page 1183).

For the three zones which were included in the previous agreement, a new wage scale is put in effect. These zones are: zone I the city of Sherbrooke and within five miles of its limits; zone II the towns of Granby, Magog, Asbestos and Drummondville and within five miles of them; zone III the remaining territory in the counties of Sherbrooke, Compton, Frontenac, Stanstead, Shefford, Brome, Missisquoi, Richmond, Wolfe and Drummond. These rates are 15 cents per hour higher than the previous rates for bricklayers and plasterers, 5 cents per hour for most other trades, except for enginemen, marble setters, etc., structural and ornamental iron workers and sprinkler fitters whose rates are unchanged.

Trades	Minimum hourly rates Zone I cents	Zone II cents	Zone III cents
Bricklayers, plasterers and masons:			
Contractors (personal services)..	.90	.85	.80
Journeymen..	.80	.75	.70
Masons (basement stones):			
Contractors (personal services)..	.80	.75	.70
Journeymen..	.70	.65	.60

Trades	Minimum hourly rates Zone I cents	Zone II cents	Zone III cents
Cement finishers (journeymen)	.60	.55	.50
Carpenters:			
Contractors (personal services)	.70	.65	.60
Journeymen	.60	.50*	.45
Painters and paper hangers:			
Contractors (personal services)	.60	.55	.50
Journeymen	.50	.45	.40
Pipe mechanics:			
Contractors (personal services)	.90	.80	.70
Journeymen	.60	.50	.45
Junior Journeymen:			
First 6 months	.45	.40	.35
2nd 6 months	.50	.45	.40
Tinsmith-roofers:			
Contractors (personal services)	.90	.80	.70
Journeymen	.60	.50	.45
Electricians:			
Contractors (personal services)	.85	.80	.75
Journeymen	.60	.55	.50
Enginemen—stationary or portable steam engines (or $30.00 per week in zone I)	.60	.50	.40
Boiler firemen	.50	.40	.30
Enginemen—steam mixers	.60	.50	.40
Enginemen—steam cranes	.60	.50	.40
Enginemen—gas or electric cranes	.50	.40	.30
Marble setters, terrazzo layers or tile setters	.60	.50	.45
Terrazzo polishers (dry)	.55	.50	.45
Men on terrazzo polishing machines (wet)	.50	.45	.40
Structural iron workers:			
Erectors	.65	.55	.50
Helpers	.40	.30	.30
Sprinkler fitters	.65	.55	.50
Ornamental iron workers (erection)	.50	.40	.40
Common labourers	.40	.35	.30
Night watchmen (per week, maximum of 72 hours)	15.00	14.00	12.50

*For Granby, 55 cents.

The territorial jurisdiction is enlarged to include Arthabasca County, which since August 1, 1938 had been governed by an order under the Fair Wage Act.

Hours in Arthabasca County are 48 per week, 9 hours on Monday to Thursday, 8 on Friday and 4 on Saturday, except from October 1, to March 1 when hours will be 8 hours from Monday to Saturday inclusive.

Minimum wage rates in Arthabasca County are as follows. Arthabasca County is divided into two zones, of which zone I is Victoriaville and Arthabasca municipalities and within two miles of their limits; zone II, Princeville, Warwick and Tingwick municipalities and within 2 miles of their limits.

Trades	Minimum hourly rates Zone I cents	Zone II cents
Bricklayers, plasterers and masons:		
Contractors (personal services)	.70	.65
Journeymen	.60	.55

Structural iron workers:		
Erectors	.55	.50
Helpers	.30	.30
Ornamental iron workers:		
Erectors	.45	.40
Sprinkler fitters	.55	.50
Common laborers	.30	.25
Carters—one or two horses:		
One horse	.45	.40
Two horses	.60	.50
$0.04 per cubic foot or $0.80 per ton shall be paid for the conveying of sand, gravel and stone.		
Night watchmen (per week of 72 hours)	14.00	12.00

Apprentices in the bricklayer, plasterer, mason, carpenter and painter trades are limited to one apprentice to each three journeymen or fraction thereof. Wage rates for apprentices are fixed for the different trades and zones for each of the four years of apprenticeship.

Transportation and Public Utilities: Water Transportation

Longshoremen (Inland and Coastal Navigation), Montreal.—An Order in Council, approved March 13, and published in the *Quebec Official Gazette*, March 23, amends the previous Order in Council for these workers (Labour Gazette, June, 1939, page 629 and February, 1940, page 173) by providing that the agreement remain in effect until May 15, 1940. The regular wage rate for these longshoremen is 50 cents per hour for day work and 51 cents for night work.

Trade

Retail Stores, Quebec.—An Order in Council, approved March 7 and published in the *Quebec Official Gazette*, March 16, amends the previous Orders in Council (Labour Gazette, January, 1939, page 96, March, page 336, July, page 729 and October, page 1067 and January, 1940, page 69) by extending the period of the agreement to June 17, 1940.

Hardware and Paint Stores, Quebec.—An Order in Council, approved March 7, and published in the *Quebec Official Gazette*, March 16, makes obligatory the terms of an agreement between the Hardware and Paint Section of the Retail Merchants' Association of Canada, Inc., District of Quebec, l'Association patronale du Commerce de Québec,

Inc. (the association of store owners of Quebec) and le Syndicat catholique et national des commis quincaillers, Inc. (The National Catholic Union of Hardware Store Clerks, Inc.) of Quebec.

Agreement to be in effect from March 16, 1940, to March 15, 1941 and thereafter from year to year, subject to notice.

This agreement covers wholesale and retail establishments in the city of Quebec whose main business is the sale of hardware, plumbing, wallpaper, paint, glass, sport and electric articles, electrical accessories and building materials.

Hours: 54 per week, to be worked between 7.30 a.m. and 6 p.m. on Monday to Friday inclusive, and between 7.30 a.m. and 10 p.m. on Saturdays. In establishments which, in addition to their ordinary business, sell furniture, electrical accessories, to work 49¼ hours in these departments. Employees to have one hour and one half for meals. Between December 20 and December 31, regular employees to work evenings without extra pay. Regular employees to be paid for holidays on which stores are closed.

Overtime: to be paid at regular rates up to 60 hours work in the week; all work in excess of 60 hours, time and one half. Work on Sundays, double time.

Minimum wages for a 54 hour week: department chief $26, delivery man $18, delivery man's helper $12, messenger (outside) $6, messenger (inside) $4.80; office clerk from $10 during first two years to $19 after six years and $22 after 8 years; sales clerk from $8 during first year to $18 after six years and $22 after eight years; clerk in goods reception, shipping, unpacking and checking departments, from $10 during first two years to $16 after six years and $18 after 8 years; clerk taking orders, from $10 during first two years to $17 after 6 years and $20 after 8 years. One half of the clerks in each of the above categories must receive the highest minimum rate; the other employees may continue at the rate set for "after six years" until a vacancy has occurred in the half of the employees who receive the highest minimum rates. Extra clerk (man), that is one working less than 5 hours a day or 30 hours a week, to be paid 40 cents per hour; clerks employed for busy season only, that is between April 15 and June 15 and between November 1 and December 31, to be paid 25 cents per hour; female employees 15 cents per hour. Skilled tradesmen to be paid $21 per week if holding a certificate of competency from their joint committee and $15 if they do not hold such certificate; trade apprentices $18. General work (service men) $18 per week; junior employee and store and elevator boy $8.

Vacation: one week's vacation with pay after three years' service.

Employees receiving higher than the above minimum rates may not have their wages reduced.

Service: Custom and Repair

Garages and Service Stations, Sherbrooke.—An Order in Council, approved March 7, and published in the *Quebec Official Gazette,* March 16, repeals the Order in Council extending the agreement (Labour Gazette, January, 1939, page 97).

Horseshoers and Wheelwrights, Victoriaville and District.—An Order in Council, approved March 15, and published in the *Quebec Official Gazette,* March 23, repeals the Order in Council for these trades (Labour Gazette, December, 1937, page 1388).

Service: Business and Personal

Barbers and Hairdressers, St. John and Iberville.—An Order in Council, approved February 23, and published in the *Quebec Official Gazette,* March 2, amends the previous Order in Council for these trades (Labour Gazette, May, 1939, page 529) by extending the term of the agreement to April 1, 1941, and thereafter from year to year, subject to notice.

Barbers and Hairdressers, St. Jerome.—An Order in Council, approved March 20, and published in the *Quebec Official Gazette,* March 30, repeals the Order in Council making this agreement obligatory (Labour Gazette, October, 1939, page 1068 and November, 1938, page 1300).

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette,* March 2, 16 and 23.

Paint Industry, Province.
Work Glove Industry, Province.
Fine Glove Industry, Province.
Tanneries, Province.
Passenger, Freight Car Industry, Montreal.
Plumbers, Three Rivers.
Paper Box Industry, Province.

Notices were published in the *Quebec Official Gazette,* March 2, 9, 16, 23 and 30, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Paint Industry, Province.
Work Glove Industry, Province.
Fine Glove Industry, Province.
Dairy Industry, Quebec.
Tanneries, Province.
Shoe Manufacturing Industry, Province, (amendment).
Building Trades, Sherbrooke.
Barbers, Montreal (amendment).
Plumbers, Three Rivers.
Retail Stores, Quebec.
Bakers, Granby.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in New Brunswick, Saskatchewan and Alberta

IN five provinces—Ontario, Alberta, Nova Scotia, Saskatchewan and New Brunswick—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour; in Saskatchewan under the Commissioner of Labour and Public Welfare; in New Brunswick under the Minister of Health and Labour. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581; New Brunswick, in the issue of October, 1939, page 996. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Similar legislation is in effect in Part II of the Fair Wages Act of Manitoba for certain industries (Labour Gazette, May, 1938, page 499, and June, 1939, page 570). Up to the end of March, however, no schedules had yet been made obligatory in Manitoba.

New Brunswick

Bricklayers, Masons and Plasterers, Saint John.—An Order in Council, approved March 20, and published in *The Royal Gazette*, New Brunswick, March 27, makes obligatory a schedule of wages and hours as agreed upon between the Saint John Branch of the Canadian Construction Association and the Bricklayers, Masons and Plasterers' International Union, No. 1, New Brunswick.

The schedule is to be in effect from April 1, 1940 to December 31, 1940, in the city of Saint John and within 15 miles of the county court house in Saint John.

Hours: 8 per day, 48 per week except from June to September inclusive, when hours on Saturday will be 4, with a 44 hour week. When necessary to work at any other time than between 8 a.m. and 5 p.m., 7½ hours to constitute a day's work, with 8 hours' pay.

Overtime: time and one-half for the first four hours; thereafter and all work on Sundays and six specified holidays, double time.

Minimum hourly wage rates: for bricklayers, plasterers, stone masons, marble masons, ceramic and clay tile setters, 90 cents; for cement finishers, terrazzo layers and setters of asphalt and composition floor and wall tile, 70 cents.

Carpenters and Joiners, Saint John.—An Order in Council, approved March 20, and published in *The Royal Gazette*, New Brunswick, March 27, makes obligatory a schedule of wages and hours as agreed upon between the St. John Branch of the Canadian Construction Association and the United Brotherhood of Carpenters and Joiners, Local 1386.

The schedule is to be in effect from April 1, 1940 to December 31, 1940, in the city of Saint John and within 15 miles of the county court house in Saint John.

Hours: 8 per day, 48 per week, except from June to September inclusive, when hours on Saturday will be 4, with a 44 hour week. When necessary to work at any other time than between 8 a.m. and 5 p.m., 7½ hours to constitute a day's work, with 8 hours' pay.

Overtime: time and one-half for first four hours: thereafter and all work on Sundays and six specified holidays, double time.

Minimum hourly wage rates: for carpenters and joiners, 60 cents; for apprentices, 30 cents during first year, 40 cents during second year and 50 cents during third year.

Painters, Saint John.—An Order in Council approved March 20, and published in *The Royal Gazette*, New Brunswick, March 27, makes obligatory a schedule of wages and hours as agreed upon between the employers of painters, decorators, paperhangers and

glaziers of the city of Saint John and vicinity and the Brotherhood of Painters, Decorators, Paperhangers, Local 1151.

The schedule is to be in effect from April 1, 1940 to December 31, 1940, in the city of Saint John and within 15 miles of the county court house in Saint John.

Hours: 8 per day, 48 per week, except from June to September inclusive when hours on Saturday will be 4, with a 44 hour week. When necessary to work at any other time than between 8 a.m. and 5 p.m., 7½ hours to constitute a day's work, with 8 hours' pay.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and six specified holidays, double time.

Minimum hourly wage rates: journeymen painting structural steel 65 cents, journeymen spray painting 65 cents, journeymen employed on all other work 55 cents.

Plumbers and Steamfitters, Saint John.—An Order in Council, approved March 20, and published in *The Royal Gazette,* New Brunswick, March 27, makes obligatory a schedule of wages and hours as agreed upon between the master plumbers and steamfitters of the city of Saint John and vicinity and the journeymen plumbers and steamfitters of Saint John and vicinity.

The schedule is to be in effect from April 1, 1940 to December 31, 1940, in the city of Saint John and within 15 miles of the county court house in Saint John.

Hours: 8 per day, 48 per week, except from June to September inclusive when hours on Saturday will be 4, with a 44 hour week. When necessary to work at any other time than between 8 a.m. and 5 p.m., 7½ hours to constitute a day's work, with 8 hours' pay.

Overtime: time and one half for first four hours; thereafter and all work on Sundays and six specified holidays, double time.

Minimum hourly wage rates for plumbers and steamfitters: 65 cents.

Saskatchewan

Transportation and Public Utilities: Local Transportation

Taxi Drivers, Regina.—An Order in Council, approved February 17, and published in *The Saskatchewan Gazette,* February 29, makes binding in the city of Regina and within 5 miles of it the terms of the schedule of wages and hours for the taxi industry.

Hours: 12 per day, to be worked in two shifts with one hour interval between shifts, 6 days per week, a 72 hour week.

Overtime: no employee to be required to work more than 6 hours' overtime in any week. No employee to be required to work more than 15 hours in any consecutive 21 hours. Overtime to be paid at 30 cents per hour.

Minimum wage rates: $15 for a regular working week. For part time employees, 30 cents per hour, with at least 90 cents in any one day.

An employer may hold back two weeks' wages from an employee to be deducted from the employees wages at a rate not in excess of one tenth of such wages each week. An employee to be responsible for any damage to an automobile while operated by him and any injury to any person or damage to property caused by his negligence or wrongful act, and the employer may deduct the amount of such damage from the wages held back by him, and if the damage exceeds this amount the employer may deduct one tenth of employee's wages each week until the damage is paid and a further two weeks' wages is held back. The wages held back to be returned to the employee when he terminates his employment.

Alberta

Construction: Buildings and Structures

Carpenters, Edmonton.—An Order in Council, dated March 15, and published in *The Alberta Gazette,* March 30, makes binding in the city of Edmonton and surrounding district the terms of a schedule governing the carpentry industry.

The schedule to be in effect from April 1, 1940 to March 31, 1941 and thereafter "during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, April, 1939, page 437, and April, 1938, page 454.

Hours and wages are unchanged at 90 cents per hour with a 44 hour week; overtime at time and one half and work on Sundays and holidays at double time.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MARCH, 1940

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, as in the previous month. The cost per week of a list of certain staple foods, fuel and lighting and rent entering into a family budget also the Dominion Bureau of Statistics weekly index number of wholesale prices were both somewhat higher.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was $8.76 at the beginning of March as compared with $8.74 for February; $8.17 for March, 1939; $8.69 for March, 1938; $8.49 for March, 1937; $6.67 for March, 1933, the low point in recent years; $11.67 for March, 1930; $10.54 for March, 1922; and $16.92 for June, 1920, the post war peak. Fourteen items in the list were higher in cost than in the previous month, eleven declined and four were unchanged. Changes in all cases were slight, the most important being advances in cheese, bread, flour, and potatoes and declines in butter and lard. Including the cost of fuel and rent with that of foods the total cost was $17.75 at the beginning of March as compared with $17.71 for February; $17.07 for March, 1939; $17.48 for March, 1938; $17.13 for March, 1937; $15.41 for June, 1933; $21.96 for March, 1930; $20.96 for March, 1922; and $26.92 for July, 1920, the post war peak. Fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 advanced slightly during March changes from week to week being small. Some comparative figures are 83·2 for the week ended March 29 as compared with 82·8 for the week ended March 1 and 82·2 for the week ended February 2. The latest figures available on a monthly basis are for February when the index number was 82·8 as compared with 73·2 for March, 1939; 83·1 for March, 1938; 85·4 for March, 1937; 63·5 for February, 1933, the low point in recent years; 95·6 for March, 1929; 98·3 for March, 1922; and 164·3 for May, 1920, the post war peak. In the classification according to chief component materials the Vegetable Products group advanced from 74·3 at the beginning of March to 75·3 for the week ended March 29. The Fibres, Textiles and Textile Products group rose from 82·6 to 83·4 in the same period. Two of the other six principal groups were at the same level at the end of the month as at the beginning and two showed minor advances and two minor declines. Among the commodities to advance in price during the month were grains, potatoes, livestock, cheese and certain textile fabrics. Raw silk, eggs, raw rubber, hides and certain non-ferrous metals were slightly lower.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of March of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon betwen landlords and tenants. It is reported in many of the cities that tenant's seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for

February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of food tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

(*Continued on page 404*)

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended March 29, 1940; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 396*)

Retail Prices

Changes in meat prices were slight. In beef sirloin steak was fractionally higher at the beginning of March at an average of 28·4 cents per pound while shoulder roast was down from 16·4 cents per pound to 16·2 cents. The price of mutton rose from 24·9 cents per pound in February to 25·5 cents in March. Fresh pork averaged slightly lower in March at 23·2 cents per pound and breakfast bacon was down from 30·2 cents per pound in February to 29·8 cents in March. Lard averaged 11·7 cents per pound in March as compared with 12·1 cents in February. Creamery butter was again somewhat lower at 31·3 cents per pound in March as compared with 32·2 cents in February. Cheese advanced in the average from 25·5 cents per pound to 26·5 cents. Flour was fractionally higher at 3·5 cents per pound. The price of potatoes averaged $1.90 per 100 pounds as compared with $1.86 in February.

The following are the prices reported for Welsh coal "cobbles" and "French nut" at the beginning of March, 1940; Halifax $17.75; Charlottetown $14.50-$15.50; Saint John $16; Quebec $14.75; Three Rivers, $16; Sherbrooke $16.75; St. Hyacinthe $15; Thetford Mines $17.50; Montreal $15-$15.25; Ottawa $16.75; Kingston $16; Belleville $16.50; Peterborough $17.50; Oshawa $15.50; Toronto $15; St. Catharines $15.75; Hamilton $15-$15.50; Galt $16-$16.50; St. Thomas $16.50; Cobalt $20; Timmins $19.75; Port Arthur $18; Fort William $18; Winnipeg $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices in several of these countries.

Great Britain and Northern Ireland

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 128·6 for February as compared to 125·6 for January, an increase of 2·4 per cent for the month. The index of food and tobacco prices increased 2·8 per cent to 126·4 during the month while the index of industrial materials and manufactures increased 2·2 per cent to 129·5. As compared with the figure for the corresponding month of 1939 the all commodities index number for February showed an increase of 32·9 per cent.

The *Statist* index number on the base 1867-1877=100, was 124·5 at the end of February as compared with 124·1 at the end of January, an increase of 0·3 per cent for the month. During the same period the index of prices of all foodstuffs declined 1·7 per cent, an increase of 1·5 per cent in the cost of animal foods being more than offset by a decrease of 2·4 per cent in the vegetable food group and a decrease of 0·4 per cent in the sugar, coffee and tea group. The industrial materials group increased 1·5 per cent during February, there having been increases in all its sub-groups except textiles. As compared with the figure for a year earlier the all commodities index for February, 1940, showed an increase of 40·5 per cent.

Cost of Living.—The Ministry of Labour index number on the base July, 1914=100 was 179 at the beginning of March as compared to 177 at the first of February, an increase of 1·1 per cent for the month. The index of food prices was unchanged at 161, increases in the prices of eggs, cheese and the higher priced grades of margarine having been offset by reductions in the prices of bacon and fish, other food prices entering into the index being practically unchanged. During the month the index of clothing prices increased from 260 to 265-270, that for fuel and lighting materials from 202 to 205 and that for sundries increased from 190 to 193. The index for rent has not changed since May, 1939, being still at 162. Under the Rent and Mortgage Restriction Acts rents cannot be raised unless there have been structural changes or improvements or increases in rates (Labour Gazette, November, 1939, page 1196).

India

Wholesale Prices.—The index number of Labour Office, Government of Bombay, on the base July, 1914=100, was 133 for November as compared with 121 for October, an increase of 9·1 per cent for the month. The index for all foods increased from 121 to 139 or 14·9 per cent, while that for non-foods increased from 122 to 129 or 5·7 per cent.

Cost of Living.—The official index number of the working class cost of living at Bombay on the base July, 1933, to June, 1934=100, was 113 for December, 1939, as compared with 109 for the previous month, an increase of 3·5 per cent. During the same period the food index rose 5·9 per cent to 126 while that for clothing rose 2·2 per cent to 91, and that for sundries rose 1·0 per cent to 99. The indexes for rent and for fuel and lighting materials showed no change, both standing at 100.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number on the base 1926=100, was 78·7 for February as compared to 79·4 for January, a decrease of 0·9 per cent for the month. With the exception of the chemicals and drugs group which was unchanged and the housefurnishings group which increased 0·3 per cent all the groups making up the index showed decreases. Textile products declined 3·2 per cent, hides and leather goods 1·2 per cent, foods 0·8 per cent, farm products, 0·6 per cent, metal and metal products and sundries 0·5 per cent each, fuel and ligthing materials 0·4 per cent, and building materials, 0·2 per cent. The all commodities index number for February, 1940, was 2·3 per cent higher than the corresponding figure for 1939.

Cost of Living.—The index number of the Industrial Conference Board, on the base 1923=100, was 85·4 for January, 1940, as compared to 85·3 for December, 1939, an increase of 0·1 per cent for the month. During the month, food prices increased 0·4 per cent, the index rising from 78·5 to 78·8. The index of rent was unchanged at 86·6. The index for clothing rose from 72·9 to 73, that for fuel and lighting materials from 85·6 to 85·8 and that for sundries from 96·8 to 96·9. The index for all items for January of this year was exactly the same as that for January, 1939.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Quebec Court Enforces Payment of Rates Fixed Under Collective Agreements Act Without Deductions for Purchase of Goods

MR. Justice Sévigny of the Superior Court of Quebec on January 25 allowed the action of the Joint Committee of the Construction Industry for Quebec against the defendant for $410, made up of $341 in wages due eight labourers covered by an agreement made binding on May 7, 1938, under the Collective Labour Agreements Act plus the 20 per cent which the Act allows the Joint Committee to collect from employers violating the provisions of a decree. The workmen had been employed in the construction of a shed for the Universal Auto Limited, practically all the interest in which company was vested in the defendant who was its manager.

The agreement fixed a 40-cent hourly rate for labourers. Actually the men received only 20 cents in cash for each hour's work. The defendant's foreman stated that men had offered to work for 15 cents an hour because they were starving and that he employed those recommended by the defendant, the company of which he was manager and its officers. The company made contracts with eight workers for the sale to them of used cars, the arrangement being that about one-half their salary was to be paid to the company on account and possession of the cars was to remain with the company until the full purchase price was paid. A clause provided that if default were made in any payments all prior payments were to be forfeited to the company as damages and interest. There was no obligation on the defendant to continue to employ these men whose ability to pay depended on their employment. Both transactions, the receipt by the worker of his wage and his payment on the car, took place on the same day in the defendant's office. Apparently none of the cars had ever been delivered. There was, however, no evidence of bad faith or undue exploitation. Except for the method of payment the terms of sale were the same as for other purchasers, and the defendant had in fact offered in January, 1939, to annul the contracts and return payments made up to that time.

Some of the original contracts provided that the payments were to be one-half the salary; later a definite sum was substituted. The Court considered the original contracts illegal as defeating the purposes of the decree under the Collective Labour Agreements Act since the Act is declared to be a matter of public order and section 13 of the Civil Code states that laws in the interest of public order cannot be altered by private agreements. Further, section 990 declares the consideration for which a contract is made is illegal when it is contrary to public order. The illegality of the original contracts was not wiped out when they were replaced by the second ones. In the Court's opinion, although the law does not expressly forbid a worker to contract with his employer for the purchase of goods which are ordinarily sold by him in the course of his business, it would be contrary to the spirit of the law to uphold a contract between employer and employee which would leave the latter open to losing part of his wages. *Comité Conjoint de l'Industrie de la Construction de Québec v. Guillemette et al.* (1940) Rapports Judiciaires de Québec, Cour Supérieure, 93.

Combining Wage Claims in One Action Under Quebec Fair Wage Act Cannot Allow Appeal Otherwise Barred

On February 20 the Quebec Court of King's Bench allowed the motion of eleven defendant employees who asked for dismissal as far as they were concerned of an appeal from a judgment in their favour on January 26 on the ground that the sum claimed by each appellant workman was under $200 which is the minimum amount that the Code of Civil Procedure requires to be involved in an appeal. Under the Fair Wage Act one action may be brought for the combined claims of several workmen which in this case exceeded $200. It was held that when the separate claims were too small to be subject to appeal, advantage could not be taken of a special law such as the Fair Wage Act to raise the sum to the amount required to permit an appeal. *Cousins et al, Appellants vs. Harding et al* (1940) Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel) 226.

Introductory Note

The present is the twenty-third report in the series on wages and hours of labour in Canada. The first report in this series was issued as a supplement to the Labour Gazette for March, 1921, and contained figures as to wages and hours of labour for certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. It also contained samples of wage rates for common labour in factories, miscellaneous factory trades in a small number of industries, and wages in lumbering from 1911 to 1920, with index numbers. Subsequent reports, in most cases issued as supplements to the Labour Gazette for January each year, brought these figures down to date with extensions from time to time to include additional industries and classes of labour. In most cases these additions contained data back to 1920. Wages and hours on steamships on the Atlantic and Pacific coasts and on the Great Lakes and St. Lawrence river were first covered in Report No. 21, with data for 1929, 1936 and 1937.

Certain of these reports, however, contained special features. Report No. 5 (1923) dealt with Hours of Labour in Canada and Other Countries. Report No. 3 (January, 1922) included an appendix with statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts. Report No. 7 (January, 1925) included an appendix with figures for agriculture from 1914 to 1923. Report No. 11 (January, 1928) contained an appendix on wages of employees of steam railways, considerably increasing the information for the years since 1917 with a more extensive record from 1901 to 1927 and also a new series of index numbers. Each report from No. 7 (January, 1925), to No. 14 (January, 1931), contained data not only for the previous year but back in 1920, except that figures for 1922, 1923 and 1924, the years of least change, were omitted from some of the tables owing to lack of space. Report No. 15, issued in January, 1932, contained data for the years 1926, 1930 and 1931, with figures for 1920 also in some cases. Report No. 16, issued in January, 1933, afforded figures for 1930, 1931 and 1932 with figures for 1920 and 1926 also in some tables. Subsequent reports in each case have included figures for the calendar year just ended, for the preceding year and for 1929.

In Report No. 15 (January, 1932) the number of cities for which data were given in Table I as to building trades and electric railways was increased to approximately forty, and in the case of printing trades to fifteen, and these cities have since been covered in subsequent reports. Previously this table covered only thirteen cities, except that data for building trades in Windsor, Ont., were included, beginning with the report for 1928. Sheet metal workers employed in building and construction have been included with building trades since 1927, while sheet metal workers in factories have been included in the table on manufacturing industries. The section of the table on metal trades previously given was omitted from Reports Nos. 15 and 16 for 1931 and 1932 but figures for these trades appeared in the tables of sample rates of wages and hours in the sections of Table X on foundries and machine shops and other metal manufacturing industries. This section of Table No. 1 was, however, included in Report No. 17 with figures for 1920, 1926 and 1930 to 1933 and has been continued in subsequent reports. As in previous reports figures on wages for the metal trades in mines and on railways appear in the tables in those industries.

The appendix on wages and hours under provincial minimum wage legislation, included first in Report No. 12, issued in January, 1929, was enlarged in Report No. 18, January, 1936, and in subsequent reports, to include also data as to wage rates in certain collective labour agreements enforceable under legislation in several of the provinces. Report No. 20, January, 1937, contained a section on hours of labour under provincial legislation. The present report contains a similar appendix with the information revised to date. Report No. 20 also included an appendix on average weekly earnings in merchandising and service establishments, containing a summary table compiled from a report issued by the Dominion Bureau of Statistics for 1935. Reports Nos. 21 and 22 contained similar data for 1936 and 1937. For subsequent years no data has been collected.

93444—1½

WAGES AND HOURS OF LABOUR IN CANADA

1929, 1938 and 1939

General Summary

THE present bulletin contains data for the years 1929, 1938 and 1939, but the tables on building, printing, metal trades and electric street railways give figures for 1920, 1926, and 1930 to 1939, while the table on steam railways is for the years 1920 to 1939, inclusive. In the appendices information is given as to minimum wage rates under provincial legislation, wages and hours of labour under collective agreements and schedules of wages and hours made obligatory by orders in council in certain provinces, also as to the federal government fair wage policy and hours of work under provincial legislation. There are also tables giving wages in agriculture in 1938 and certain previous years, average earnings of steam railway employees in recent years with numbers employed in 1938, average earnings of coal miners with numbers employed and days worked from 1921 to 1938.

The table of index numbers of rates of wages contains figures showing changes in a number of occupational groups, from 1901 to 1939, and for certain other groups from 1911 to 1939, the base year being 1913. Index numbers for other groups have not been calculated as figures back to 1913 have not been compiled and published.

TABLE OF INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA

* Average of previous six columns.
** Weighted according to average numbers of workers in each group in 1921 and 1931.
† Including some increases effected near the end of the year.
‡ Including a ten per cent decrease for certain classes toward the end of the year.
(a) Seven trades from 1901 to 1920, eight from 1921 to 1926, nine for 1927 to 1939; 13 cities to 1927, 14 cities to 1930, thereafter 31 to 42 cities.
(b) Five trades from 1901 to 1926, four for 1927 to 1939.
(c) Two trades from 1901 to 1920, four for 1921 and 1922, six from 1923 to 1939.
(d) Two classes from 1901 to 1920, five classes 1921 to 1939.
(e) Twenty-three classes.
(f) Four classes 1901 to 1920, twelve classes 1921 to 1939.
(g) The number of samples (and industries) increased from time to time since 1920; machine operators, helpers, etc., also included. §Erroneously printed as 199·4 in last report.

Changes in Wages

The recovery in wages, which first appeared in logging and sawmilling and in common factory labour in 1934 and extended to all groups in 1935, continued during 1936, 1937. 1938 and to a slight extent during 1939.

As the figures are obtained each year for the beginning of September or earlier the changes in wages after that month are not reflected in the report except in a few cases such as building trades and electric railways for which any later figures are usually available from new agreements. The index numbers showed average increases of somewhat less than one per cent in miscellaneous factory trades; building trades and for common labour in factories; half of one per cent or less for printing trades, electric railways, metal trades and coal mining. Decreases in logging and sawmilling averaged over one per cent (logging one and one half, sawmilling one per cent). The average increase for all groups (weighted according to the approximate number of employees) was one half of one per cent.

In manufacturing most of the industries had average increases of less than one per cent. Some, however, showed average increases of somewhat more than two per cent—leather tanning, production of electric batteries and shirt manufacturing. The increases averaged between one and two per cent in the bread and cake, biscuit, brewing, carriage and truck body, radio, sheet metal and rubber industries.

In the industries for which index numbers have not been calculated there were increases of ten per cent for longshoremen at Halifax and Saint John in the autumn. On the Great Lakes increases of one cent per hour were general but an increase of four cents had been made at Port McNicoll late in the 1938 season. In grain elevators the increases averaged over one per cent. In electric current production and transmission increases averaged almost one per cent, but were slightly more in the maritime and western provinces. For civic employees there were some increases by way of restoration of reductions made since 1931 gradually restored since 1934. For steamship and tug employees there were a few increases on the Great Lakes, these being usually in cases where increases were not made in 1937 or 1938, when increases of five to fifteen dollars per month were general. In metal mining there have been very few changes since 1937 when increases averaged five per cent. Many miners, however, receive bonuses based on the prices of metal as well as on production.

For previous years it will be seen from the table of index numbers that by 1920 wages had reached levels about 100 per cent higher than in 1913, in some groups the increase being over one hundred per cent while for building and printing trades the increases were appreciably less, being only about 80 per cent. After 1920 all groups showed some decreases, although printing trades and coal mining reached the peak in 1921 instead of 1920, declining somewhat thereafter. The decreases in coal mining in 1925 were comparatively steep and tended to reduce the average for the six groups averaged for the period back in 1901. From 1925 to 1930 the movement was upward in each group. In 1930 the index numbers for most of the groups were slightly higher but that for lumbering declined slightly. In 1931 all groups were downward except printing trades and coal mining. In 1932 and 1933 all groups were down, the greatest decreases being in lumbering and building trades. In 1934 lumbering showed substantial increases, factory labour also advanced appreciably and coal mining slightly while the other groups were lower. In 1935 all groups were appreciably higher and the upward movement has continued since but in 1939 the increases were slight in all groups except logging and sawmilling where decreases occurred.

The weighted index number (with wage rates in 1913 as 100) for all groups in 1939 at 198·3 was higher than in 1929 and in 1930 at 196·0 and 197·1 respectively, but lower than in 1920 at 207·7.

Building Trades

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10 cents per hour were general and in 1922 decreases of 5 cents per hour were numerous. In 1923, 1924 and 1925, while there were upward movements in the average, it was due to increases in particular trades and in certain cities, and not to a general upward movement for most of the trades and localities. From 1926 to 1930, the upward movement was somewhat more general. During 1931 there were numerous decreases, in some localities the reduction being general while in others it was confined to certain trades. During 1932 and 1933 the decreases were general, averaging about 10 per cent, while in 1934 there were decreases in some trades in certain cities but no general downward tendency appeared. In some cases there were increases so that the average decrease was about 3 per cent. In 1935, increases occurred chiefly in Quebec and Ontario, some of them due to the agreements which established minimum wages under provincial legislation as outlined in Appendix D. In 1936 the upward movement continued with, however, decreases in certain trades in a few

localities. In 1937 there were increases in several of the localities and in 1938 increases became fairly general. In 1939 there were increases in only a few cases.

Metal Trades

In the metal trades the increase in wage rates from 1915 to 1918 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases occurred. In 1923 and 1924 some recovery was experienced, in 1925 there was practically no change, from 1926 to 1930 there were some slight changes upward, but during 1931 the changes were downward, while during 1932 and 1933 the decreases averaged 5 per cent and 3 per cent respectively. In 1934 there were comparatively few decreases, with some increases, so that the average was down less than one per cent. In 1935 wages recovered, being slightly higher than in 1934, and this slight recovery continued in 1936 and became substantial in 1937. In 1938 and 1939, however, the advances were slight.

Printing Trades

In the printing trades up to 1920 increases were somewhat less than in most of the other industries but in 1921 when many of the three or five-year agreements between employers and the unions expired, rates were advanced and hours were reduced in many cases. Increases appeared each year thereafter down to 1931. During 1932 decreases of 10 per cent were general in the western provinces and were made in some cities in the east. In 1933 the decreases were general, averaging 5 per cent. In 1934 while there were further decreases, there were some increases, the average being down less than one per cent. In each year from 1935 to 1939 there were a few increases.

Electric Street Railways

In electric railway service, rates had almost doubled by 1920, but declined slightly in 1921 and 1922, recovering somewhat in 1923 and very gradually each year thereafter until 1931 after which reductions occurred until 1934.

Since 1930, on many of these railways, with reduced traffic, operating costs were lowered to some extent by reducing hours per day, and therefore daily wages, instead of reducing hourly rates. In 1934 very few changes in wages were made so that the index number was practically unchanged. Some increases occurred in each year from 1935 to 1939.

Steam Railways

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921, decreases averaging about 12 per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made, averaging about 10 per cent. In 1926, at the end of the year, wages of conductors, trainmen, brakemen, baggagemen, and yardmen were advanced about 6 per cent, that is, by half the amount of the reduction in 1921, and during 1927 similar increases were made in rates for other classes. In 1929, increases were secured by shop and maintenance of way employees and by certain classes of train crews on some lines. In 1931, while practically all classes were to a great extent on short time, changes in rates were not made until the end of the year when a 10 per cent deduction from each employee's pay was made for train, engine and telegraph service employees from December first. In the early months of 1932 the same deduction was applied to other classes.

In 1933, earnings of employees in engine, train and telegraph services were subjected to a deduction of 20 per cent from May to October, inclusive, and 15 per cent thereafter. The deduction for most of the other classes was increased to 15 per cent in December.

Toward the end of 1934 amendments to the agreements between the railway companies and the employees provided that the general deduction of 15 per cent would be changed to one of 12 per cent on January 1, 1935, and to 10 per cent on May 1, 1935. Early in 1937 an amendment to each agreement provided that the deduction would be as follows: February 1, 9 per cent; April 1, 8 per cent; June 1, 7 per cent; August 1, 6 per cent; October 1, 5 per cent; December 1, 4 per cent; February 1, 1938, 2 per cent; April 1, 1938, none.

Coal Mining

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in Nova Scotia and Vancouver Island and in 1923 and 1924 slight decreases occurred in the latter. A substantial decrease occurred in Alberta and southeastern British Columbia in 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia. Slight increases, however, were provided for a number of classes in some of the mines in Alberta toward the end of the year. In 1926, reductions were effected in

Nova Scotia but wages in the other fields were practically unchanged. Slight increases were made in some mines in Alberta in 1928. In Nova Scotia in February, 1930, rates for labourers were changed by increases of 5 cents to 15 cents per day and certain other datal classes were slightly increased. During 1931 rates of wages were steady but the industry suffered greatly from short time, that is, collieries were operated less than six days per week to a great extent. In 1932 in Nova Scotia rates were reduced 10 per cent in March, except that a minimum of $3.25 per day was provided for in the principal mines. In the other districts rates were reduced only in a few of the smaller mines. In 1933, wages in the Drumheller district in Alberta were reduced more than 10 per cent. In Nova Scotia, rates were unchanged in the principal mines but there were reductions of about 15 per cent in certain mines of medium size. In 1934 partial restorations of these reductions were made in some Nova Scotia mines, while decreases occurred in New Brunswick. In 1935, increases of about 5 per cent were made in Nova Scotia and in Alberta in the Drumheller and Edmonton districts. In 1937 datal rates in several of the principal mines in Nova Scotia were increased by nearly 10 per cent. In 1938 the rates were increased 5 to 10 per cent in the various districts in Alberta and in the Crow's Nest Pass district in British Columbia. In the principal mines in Vancouver Island in British Columbia average increases of 7 per cent were made. In 1939 there were practically no changes in rates except that in Saskatchewan the terms of settlement of a strike provided that the rates in a new agreement would be retroactive to December 11 with a minimum rate of 40 cents per hour for labourers. In Alberta in a small number of mines increases in wages were made similar to those in other mines in 1938.

The index number for 1901 to 1934 does not include New Brunswick, Saskatchewan and the Princeton district in British Columbia. The inclusion of these figures for 1934, when weighted according to numbers of miners employed, made no change in the result.

Factory Labour

Factory labour had shown almost the greatest percentage increases up to 1920, both for common labour and for the various trades, but steep decreases appeared from 1921 to 1923 after which the trend was upward until 1931 when a considerable number of decreases occurred. In 1932 decreases in rates were numerous and steep in some cases. There was, however, a pronounced tendency to reduce hours per week or per day or both, frequently on a short time basis, with relatively small reductions in hourly rates. In some cases, where hours per day were reduced more than daily wages, the hourly rate became higher. In 1933, rates were again generally downward but less steeply. In 1934 there were numerous increases in nearly all of the manufacturing industries but comparatively few decreases so that the index number rose by nearly 3 per cent. In 1935 the upward movement continued. In Ontario and Quebec this was due to some extent to agreements establishing minimum rates in various localities and industries under provincial legislation. In 1936 wages were increased in many establishments in all manufacturing industries and in 1937 and 1938 the upward movement continued. In 1939 there were comparatively slight increases in nearly all of the industries.

Logging and Sawmilling

In logging and sawmilling steep increases in wages appeared up to 1920, followed by particularly steep decreases in 1921, after which substantial increases occurred in 1923 and 1924, with a decrease in 1925 and slight increases each year thereafter until 1930 when more decreases than increases appeared. During 1931 decreases were general, and again in 1932, wage reductions of 20 per cent being quite common. In 1933, wages were still downward but there was a pronounced upward trend toward the end of the year for the ensuing season. In 1934, substantial increases in wages were general both in logging and in sawmills so that the index number rose by about 20 per cent. Provincial regulations as to wages in logging in New Brunswick and Quebec came into force that year. In 1935 the increases averaged 5 per cent. In 1936 wages were again upward, the increases averaging nearly 9 per cent. In 1937 the average increase was over 13 per cent and in 1938 was 5 per cent. In 1939 there was an average decrease of over one per cent as the number of decreases in wages reported exceeded the number of increases except in British Columbia where increases were more numerous.

Nature and Scope of Report

The main object of these reports is to show the changes in wage rates and in hours of labour during the periods covered. The figures given in each report afford a continuous record for the years included, the data being from the same sources as far as possible. Whenever a new source of information becomes available, the figures for previous years are secured, if possible, and the record is revised accordingly.

Information is compiled from reports secured annually from representative employers and trade unions, and also from union agreements. The information is obtained in June for building trades, civic employees, steamships, trucking and cartage, longshoremen, logging and sawmilling, pulp and paper mills, and for iron and steel products, including automobiles, parts and accessories. For other trades and industries the information is secured chiefly in September. For the classes covered in June, later information is frequently received and used.

Figures are secured from practically all the large establishments in the various industries and from a representative number of the smaller establishments. These reports are supplemented by figures obtained by officers of the Department and by resident correspondents of the Labour Gazette in the principal industrial centres.

Wages in manufacturing are shown by samples numbered one, two, etc., each sample showing the predominant rate in a certain establishment; in some cases, for large establishments two or three samples are given; in other cases where the same rate is paid by a number of firms a sample may represent several such firms in order to avoid repetition. Additional samples of rates above or below the predominant rates have been included where an appreciable number of workers were receiving such rates; where it appears to be preferable a range of predominant rates is used. The locality in each case is not given as it would in many instances make possible the identification of the particular establishment. For common labour in factories sample rates are given by localities for the principal manufacturing centres only.

For the following industries wages are given in the form of samples as in the case of factory labour; steamships, grain elevators, electric current production and transmission, telephones, laundries, logging and sawmilling, and metal mining.

Figures for particular localities are given for building, metal, and printing trades, electric railways and civic employees in Tables I and II, and for trucking and cartage, and longshoremen in Table III, also for common labour in factories in Table IX.

The statistics as to building trades show the prevailing rates of wages and hours of labour for nine classes of labour for the years 1920, 1926, and for 1930 to 1939 inclusive, for the building season beginning in the spring of each year. During the year 1931, however, changes occurred later in the season more extensively than is usual, and the rates in effect at the end of the year were therefore obtained and included. For 1933 a similar survey was made again toward the end of the year in several cities. As in all previous years, changes in rates reported down to the end of the year, from the sources mentioned above, are included. In Nova Scotia, Quebec, Ontario, Saskatchewan and Alberta, the rates include agreement rates made obligatory on all employers affected under provincial legislation as to collective agreements and industrial standards; in British Columbia they include minimum rates for the construction industry under the Male Minimum Wage Act, and in Manitoba under the Fair Wages Act. Such rates of wages and hours of labour are given in Appendix D.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the employees, members of the organizations of railway employees, the principal railways having the same rates for nearly all the principal classes. The figures published are taken from these agreements.

In water transportation the organization of various classes of employees negotiate scales of wages, hours and working conditions with many of the steamship companies although agreements are not always signed; other operators tend to pay about the same rates.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in most cases represented by unions and in others by committees of employees. The figures published from 1920 to 1933 were taken from such agreements. The figures for average earnings of contract miners, however, were received from representative employers in each district. In some of the mines in these districts the wages of unorganized employees are somewhat lower than the rates in the agreements. For Report No. 18, and subsequent reports, statements as to wage rates and hours of labour have been requested from the operators of all the larger mines throughout Canada and the figures so secured have been

compiled by provinces or districts. The resulting figures include those for many mines not operated under agreements as to wages and working conditions, and cover the mines in New Brunswick, Saskatchewan and the interior of British Columbia for which figures were not previously published.

In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada, secured from representative employers.

In logging, Table VII, the data each year is for the season beginning in the autumn and ending in the spring in Eastern Canada.

Data as to Hours

In earlier reports the hours of labour shown throughout were the standard or regular hours per week, per day, etc., and did not indicate the hours actually worked either overtime or on short time. During 1931 a number of establishments in many of the manufacturing industries reported operations on a short time basis. In the report for that year, No. 15, covering the years 1926, 1930 and 1931, standard or full-time weekly hours were shown as before, with full-time weekly or daily earnings where hourly wages were not used.

In Report No. 16, with figures for 1930, 1931 and 1932, in the tables on manufacturing industries, the hours of labour for these years were those reported by employers, whether short time or regular hours, and the wage rates were brought to an hourly basis, except in certain industries, clothing, bread, cake, biscuit, candy, brewing and paper box making for which regular hours were reported chiefly, employees being usually paid by the week. The same procedure has been followed in subsequent reports except that wages for boot and shoe manufacturing are given on a weekly basis with the hours shown as reported. In this industry, as in some instances in clothing manufacturing, the hours actually worked by individual piece workers are not always reported and the hours shown are those on which the department or factory is operated.

Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the relative changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentage changes in rates from year to year prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers for the six groups the simple arithmetical averages were taken, no allowance being made for the importance of each trade or group by using a system of weighting. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the index numbers of hourly rates from 1901 to 1921 have been reproduced, with figures since 1921 calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily wages in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 has been calculated in the same manner as those for the other groups. The index numbers for metal trades, previously calculated from Section *b* in Table I, omitted for 1931 and 1932, were calculated from the average percentage changes in the samples for such trades in Table X for those years.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering (logging and sawmilling) calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. These figures have been brought down to 1939 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of index numbers for the period 1901 to 1939 are, in the main, skilled trades; and practically all of these classes, including the unskilled, are organized to a great extent in trade and labour unions. The index numbers for these six groups therefore show the trend of wage rates in a number

of organized occupations whose members, except coal miners and steam railway employees, work chiefly in cities. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages in factories show the trend of wages for labour in manufacturing industries in which there are many establishments in small centres as well as in cities. The figures for lumbering cover sawmilling in both large and small centres and logging in the principal districts.

Weighted Average Index Numbers

Beginning with Report No. 19, in addition to the simple average for the six groups with figures from 1901 to 1937, weighted averages have been calculated for these six groups and also for all nine groups in those years for which figures are available. The index number for each group is weighted by the average number of wage-earners in the industry represented, as shown by the decennial or the annual industrial census of 1921 and of 1931, the average of the figures for these two dates being taken in each case.

The weights were as follows (in thousands): building trades 143; metal trades 131; printing trades 25; electric railways 18; steam railways 161; coal mining 28; common factory labour 110; miscellaneous factory trades 363; logging and sawmilling 77.

It will be observed that this weighting has most effect in modifying the effect on the general averages of the figures for coal mining and lumbering in which from time to time since 1920 the changes have been quite different from those in the other groups.

Weighting, within groups, although desirable, has not been done. In such groups by occupations or industries weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, Common Factory Labour, Miscellaneous Factory Trades, and Logging and Sawmilling, the index numbers, being calculated from samples, the averages are automatically weighted by the number of samples which vary according to the number of workers in the various occupations and industries.

*Minimum rate and hours approved under the Industrial Standards Act, Ontario, 1935.

**Beginning in 1934 agreements approved by Order in Council under the Collective Labour Agreements Extension Act, Quebec, 1934, established minimum rates of wages for various trades in certain cities, towns and other defined jurisdictional territory throughout the province. On May 1, 1937, the Collective Labour Agreements Extension Act, Quebec, 1934, was replaced by the Act entitled an Act Respecting Workmen's Wages. On March 18, 1938, the Act respecting Workmen's Wages was replaced by an Act entitled The Collective Labour Agreements Act. The minimum rate in each range is that approved under these Acts.

*Maximum rates based on length of service; in most cities bus drivers, on lines operated in connection with street railways receive the same maximum rates of wages as one man car operators.

‡Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

†Including armature winders, wiremen, etc.

§Including troublemen, and groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

§§Where a range appears, figures represent predominant rates.

(a) Deduction from earnings, 10 per cent.

(b) Rates became effective October 15, 1939.

(c) Per month.

(d) Deduction from earnings; 10 per cent in 1932 and 1933; 15 per cent in 1934; 10 per cent in 1935 and 1936; starting Feb. 1, 1937, rates of reduction reduced by 1 per cent every two months (Oct. 1, 1938, full wages again).

(e) On June 1, 1920, 50 cents per hour.

(g) Buses only in use; drivers 63 cents per hour, 57-hour work; garage men 55-80 cents per hour, 48-hour week.

(h) On Oct. 1, 1920, 50 cents per hour.

(j) In summer 59 cents—one man cars, 54 cents per hour—two man cars, 42-hour week.

(k) No two men cars in operation in Regina since 1921; in Calgary very few.

(l) Deduction from earnings: in 1932, 5 per cent and up; in 1933, 6 per cent and up; in 1934, 1935, 1936, 4 per cent and up; in 1937, 1938 and 1939, 3.3 per cent and up.

(m) Deduction from earnings: in 1932, 4 per cent; in 1933, 1934 and 1935, 10 per cent; in 1936, 7 per cent; in 1937, 5 per cent; in 1938 up to 3 per cent.

(n) Deduction from earnings: in 1932, 4 to 8 per cent and up; in 1933 and 1934, 4 to 10 per cent; in 1935, 4 to 9½ per cent.

(o) On Oct. 1, 1920.

(p) Deduction from earnings: Dec. 1, 1932 also 1933, 1934, 5 per cent; 1935, 2½ per cent.

*For electric street railways by cities, *see* Table I (d). **Differentials on certain lines or divisions above these rates. Nearly all classes are on the basic 8-hour day with time and one-half for overtime.

†Machinists; boilermakers; blacksmiths; plumbers, etc.; sheet metal workers; cabinet makers; carpenters, coach, locomotive and bench; welders, etc. ‡Freight car carpenters; freight car painters; car inspectors, car repairers, etc. §Since 1918, employees are allowed approximately one cent per hour extra for checking in and out.

(a) On Western lines Port Arthur and west, until 1929 in addition to these rates boilermakers' helpers received 5½ cents; blacksmiths' helpers, 4 cents, and other helpers 3 cents; since May 1, 1929, the differentials on western lines were boilermakers' helpers 4 cents, other helpers 2 cents.

(b) Deductions from each employee's earnings on basic rates effective as follows. Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1933; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 16, 1933, with certain exceptions. Deductions amended for all classes effective as follows: Jan. 1, 1935, 12 per cent; May 1, 1935, 10 per cent; in 1937, between February and December reduced to 4 per cent; in 1938, eliminated by April 1.

(c) Effective July 16, 1922 uutil Nov. 1, 1922 when rates in 1923-26 column were made retroactive to July 16, 1922.

† Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight-hour day.

‡Seasonal bonus in addition.

* The figures given for contract miners are the average earnings at piece rates and for some mines the figures include helpers and loaders on piece work; the figures given for machine and hand miners are rates per day.

† Higher rates are paid in two or three mines for some of these classes; also in the large mines for certain positions.

§ The wage scale in a new agreement is to be retroactive to December 11, 1939, with a minimum of 40 cents per hour for labourers.

* Figures for the Yukon Territory were included under British Columbia in 1921. Each year two to four miners have been employed from 50 to 100 days; wages averaged $8 02 per day in 1938. In Manitoba mining operations began in 1931, from ten to twelve being employed until 1938, when five men were employed, averaging $3.13 per day.

† Prolonged dispute during year.

‡ Figures calculated by dividing number of man days worked into total wages paid.

§ Prior to 1933 the figures for Nova Scotia included certain employees handling coal at a distance from the mine.

APPENDIX D

WAGES AND HOURS OF LABOUR IN FEDERAL GOVERNMENT CONTRACTS AND UNDER PROVINCIAL LEGISLATION

Legislation providing for the regulation of wages or hours of labour or both has been enacted in all provinces but the scope and application of the statutes and the method of regulation vary. A Dominion statute limits hours of persons employed on public works and provides for the regulation of wages. Under the authority of an order in council the Government also imposes conditions as to wages and hours in the manufacture of government supplies.

Federal Government Contracts

In accordance with a Resolution of the House of Commons in 1900, the Federal Government adopted a Fair Wages Policy applying to building and construction work and to the manufacture of government supplies for the observance of the rates of wages generally accepted as current for competent workmen in the district where the work is performed.

In 1922 the application of this policy by the various departments of the Government was standardized under an order in council setting forth the labour conditions to be inserted in all contracts for construction and, as far as practicable, in all agreements involving the grant of public funds by way of loan or subsidy to aid any work of construction and in all contracts for the manufacture and supply of mail bags, letter boxes, and other postal stores, fittings for public buildings, harness, saddlery, clothing and other equipment for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees and any other articles designated by the Governor in Council. Where there was no "current" rate of wages in a district, the rate was to be fair and reasonable and disputes as to wages and hours were to be determined by the Minister of Labour. "Current wages" and "hours of labour fixed by the custom of the trade" were defined as the standard rates either recognized by signed agreements between employers and workmen in the district or the rates actually prevailing.

On December 31, 1934, the labour conditions previously applicable to contracts for public works and the manufacture of various classes of Government supplies were rescinded and new conditions substituted (LABOUR GAZETTE, 1935, page 24).

The new order in council retains the requirement for the payment of wages at not less than current rates, or if there are no current rates, fair and reasonable rates, but it is also provided that persons under 18 years of age are entitled to rates of wages not less than those provided for females under the minimum wage laws of the province in which the work is performed. In New Brunswick and Prince Edward Island, where such laws are not in effect, contractors are required to pay workers under 18 years of age wages not less than those provided for females under the Minimum Wage Act of Nova Scotia.

It is also stipulated that in no event shall the wage rate for male workers over 18 be less than 30 cents an hour, or for female workers over 18, 20 cents an hour but in any case where the provincial minimum wage law requires the payment of higher wages, the latter shall apply in the execution of a Federal contract. For example, for a 50-hour week on a Federal Government contract a male over 18, whether experienced or inexperienced, must be paid not less than $15 and a female $10 even if the provincial minimum scale may provide $6, $7, $8, etc., but if the provincial minimum scale is in excess of $15 in the case of male and $10 in the case of female workers then the provincial scale must prevail.

The Fair Wages and Hours of Labour Act, 1935, replacing the Fair Wage and Eight-Hour Day Act, 1930, gave statutory effect to the Government's wage policy with respect to public works. It provides for the observance of current rates of wages and stipulates also that wages shall in all cases be such as are fair and reasonable. It requires an eight-hour day and 44-hour week on construction work under federal Government contracts and on works towards which federal aid is granted by way of subsidy, loan, etc., as before, but extends the list of such works to include those carried out by any provincial and municipal authority if financial aid is given by the federal Government, "unless the grant or payment is by statutory authority or by agreement with the Government of Canada excepted." It is also provided that regulations may be made to require the furnishing of any necessary information to ensure the enforcement of the statute. Any contract may be exempted from the Act by order in council before being entered into.

In accordance with the same policy, regulations under the Dominion Municipal Improvements Act, 1938, require all contracts for projects to which federal assistance is given to municipalities to contain a fair wage clause similar to that inserted in contracts for Dominion public works.

Minimum Wages under Provincial Legislation

A law providing for the establishment by a government board of minimum rates of wages is on the statute books of every province but Prince Edward Island. This legislation applied at first only to female workers but all but that of Nova Scotia now applies or may be applied to males also. In Alberta and British Columbia there is a separate statute relating to each sex. The New Brunswick Minimum Wage Act of 1930 applying to women was never put into effect, but the Fair Wage Act, 1936, now incorporated in the Labour and Industrial Relations Act, 1938, enables minimum rates to be established for both sexes. The only orders so far made apply to particular establishments.

Boards administering minimum wage laws have power to fix special rates for handicapped workers and in some provinces such workers have to be licensed. Rates lower than the ordinary minimum which are increased at specified intervals are also established for learners or inexperienced workers in most occupations but the proportion of inexperienced workers that may be employed at such rates is usually restricted. In some cases, inexperienced workers are classified according to age and those over 18 years of age have higher minimum rates than those under 18.

Part-time and overtime rates may be set by all the boards. In Ontario the statute specifies the hours to which the ordinary minimum rate is to apply and in Nova Scotia the board may determine the work-period to which the rate applies. In the other provinces the Act gives the board power to limit hours or, as in Alberta and British Columbia, there is an Hours of Work Act. Information as to the legal regulation of hours is given in a later section of this Appendix.

In all provinces, workers required to wait on the premises must be paid for the time so spent and if the employer requires uniforms to be worn, as in hotels and restaurants, he must furnish them and pay for laundry.

Apart from the special statutes providing minimum wage-fixing machinery, minimum rates of wages may be fixed under other legislation in several provinces for certain classes of workers such as lumber workers and truck or bus drivers. Under the Manitoba Fair Wage Act, the Collective Labour Agreements Act of Quebec and the Industrial Standards Acts of Alberta, New Brunswick, Nova Scotia, Ontario and Saskatchewan, minimum rates of wages may also be determined. The New Brunswick Industrial Standards Act came into effect only on August 10, 1939, and no orders have yet been made under its authority. The Quebec Collective Labour Agreements Act and the Industrial Standards Acts are dealt with in a separate section later in this Appendix.

The tables below set out the rates established under the Minimum Wage Acts or Fair Wage Acts, as they are called in some provinces, and a brief summary is given of the provisions in each province in so far as they affect wages. For full information it is necessary to refer to the orders as issued by the provincial authorities. Fairly complete summaries were published in The Labour Gazette when the orders were gazetted.

PRINCE EDWARD ISLAND

The Charlottetown Incorporation Act as amended in 1936 empowered the city council to make a by-law prohibiting any labourer or workman being hired at less than 35 cents an hour for any work done in the city by or under a contractor if it is of the kind usually done by contractors and if it is directed by any person other than the owner of the property on which the work is done. Such a by-law was passed on May 14, 1936.

NOVA SCOTIA

The Nova Scotia Minimum Wage for Women Act enables the Minimum Wage Board to fix minimum rates for female workers in any trade or occupation in cities and towns. Agriculture and domestic service are expressly excluded from the Act. The first orders were issued in 1930.

Minimum rates have been established for experienced and inexperienced female workers under and over 18 in laundries and dry-cleaning establishments; bakeries and places making food products; hotels and restaurants; textile and needle trades, including boots and shoes; telephone operators; factories not covered by another order; bookbinding, paper-box making and other paper trades; shops; beauty parlours; and offices. Except in offices and in the needle and textile trades, the number of inexperienced adults or young girls or of both is limited to 25 per cent of the total number of females in the establishment. Under all orders, except those applying to shops, beauty parlours and hotels and restaurants, the length of the learning period is limited to one year for persons over 18 years of age and to 18 months for those under 18 and persons reaching the age of 18 are to be considered as experienced if they have been employed for one year. For office work, only a three months' learning period is required if the employee holds a satisfactory diploma from a business school. For beauty parlours and hotels and restaurants, no distinction is made on account of age. For beauty parlours there is a "beginner's rate" applying to the first six months, then rates for "inexperienced" employees for 12 months. The "beginner's rate" does not apply to those who have paid for at least three months' training in a school or beauty parlour. In hotels and restaurants there is a learning period of three months. In shops, including millinery, dressmaking or fur-sewing connected with a shop, there is a probationary period of three months for which no wages need be paid and a subsequent learning period of 18 months for all workers, the rates varying according as the worker is under or over 18 years of age.

Piece-workers under the general factory and paper trades order must be paid the specified weekly minimum for the first six months, after which it is sufficient if only 80 per cent receive the prescribed minimum. The textile and needle trades order, as revised in 1939, stipulates that if 80 per cent of the workers receive more than the minimum wage, the others may be paid at a lower rate. Piece-workers in beauty parlours must be paid at least the minimum.

As regards hours of labour, the minimum rates apply to a week of from 44 to 50 hours except in beauty shops and offices where they relate to a 48-hour week or the normal work-week if less than 48. Except in shops and in the textile and needle trades, overtime after the specified hours and short time for less than 44 or 48 hours, as the case may be, must be paid pro rata. In the textile and needle trades, part-time rates of 22 cents an hour in cities and large towns and 20 cents in smaller towns are provided and overtime must be paid for at rates of 33 cents and 30 cents an hour according to the size of the town. Special provisions for shops permit a 60-hour week at the regular weekly minimum from December 15 to 31, require time and one-half to be paid for work in excess of 50 hours at all other times, prohibit any reduction for a statutory holiday and require the hourly rates for experienced workers to be paid to all part-time and casual employees. Deductions for absence are not in any case to exceed the value of the time lost.

Where board or lodging or both are provided by the employer, the amounts that may be taken from wages in payment thereof are limited to $2 a week for lodging and $4 for board except for workers in laundries. The latter may be charged not more than $4.50 for board and lodging in Halifax and other towns except Sydney and Glace Bay where a maximum of $4.50 for board and $1.50 for lodging may be deducted. In no case may more than 25 cents be deducted for a single meal.

MINIMUM WAGE RATES IN NOVA SCOTIA

FEMALE EMPLOYEES

Industries and Occupations	Minimum per Week		
	Experienced workers	Inexperienced workers over 18	Girls under 18
	$	$	$
Food trades, including making of confectionery, biscuits, chocolates, grocery specialties, together with bakeries and all allied industries:

Towns under 17,000	10.00	6.00 - 9.00	6.00- 9.00

NEW BRUNSWICK

The Minimum Wage Act, 1930, applying to female workers, has not been put in effect. The Labour and Industrial Relations Act, 1938, which reproduces the provisions of the Fair Wage Act, 1936, provides for a Fair Wage Board with power to establish minimum wages, maximum hours and overtime rates. No orders of general application have been issued but several orders applying to individual plants have been made.

Forest Operations

Under the Forest Operations Commission Act, 1934, the Commission has power, subject to the approval of the Minister of Lands and Mines, to make final decisions in disputes relating to wages and living conditions in lumbering camps and to fix minimum and average wages for the industry. The Act does not apply to the Christmas tree or firewood industries. It permits the employment of men inexperienced or physically unfit for a full day's work at wages below the minimum rates established, if agreements approved by the Commission are signed by the employers and the men concerned.

From April 1, 1939, the Commission established, for stream driving, an average rate of wages of $2.50 a day and board or its equivalent in the case of piece-work and a minimum wage of $2.25 per day and board. Wages paid to cooks, foremen, bookkeepers and clerks are not to be included in determining the average. The last three classes of workmen are not within the scope of the Act. For booming and sorting, the minimum rate is 25 cents per hour without board, provided that where board is furnished by the employer, not more than 50 cents per day may be charged the employee.

From October 1, 1939, for cutting, yarding and hauling, the average wage rate paid by any employer must be at least $40 per month and board and the minimum rate for each employee $36 per month and board. Piece-workers must not be paid less than an average of $40 with board. If board is not furnished by the employer, wages must be increased by 50 cents a day. Wages paid to cooks, tractor operators, truck drivers, foremen, bookkeepers and clerks and the amounts paid to employees for piece-work are not to be included in determining the average wage.

QUEBEC

The Fair Wage Act, 1937, empowers the Fair Wage Board to establish minimum rates and maximum hours for all employed persons except farm labourers, domestic servants, workmen covered by the Forest Operations Act and those governed by a collective agreement made legally binding under the Collective Labour Agreements Act or the Professional Syndicates Act. In the case of an agreement, if the Board, with the approval of the Minister of Labour, declares its provisions less favourable to the employees than the provisions of an order of the Board, the latter are to apply.

Order 4, which is to remain in force until March 31, 1940, unless otherwise ordered by the Lieutenant-Governor in Council, fixes minimum wages for persons employed in commercial and industrial undertakings including those working at home for such establishments, workers in road transport, hotels and boarding houses with more than five rooms to rent and, if a majority of the members approve, for persons employed by municipal and school corporations. The order originally applied only to cities and towns but, as amended from December 30, 1939, it relates to all establishments within its scope throughout the province.

Subsequent orders of the Fair Wage Board deal with special industries or occupations which would otherwise be covered by Order 4. In some cases, they relate only to a limited area. Those in effect on December 31, 1939, apply to: silk textiles; stationary enginemen and firemen in the Montreal district; manufacture of shoe counters; cotton textiles, excluding persons paid by the month, office workers and those engaged exclusively in rayon operations; teachers in Verdun; the milk industry in the Montreal district; building in Arthabaska County; match factories; maintenance men in the Montreal district in office buildings, warehouses, industrial and commercial establishments and apartment houses, but not in hotels or restaurants; packing and grading waste paper; the wholesale and export trade in butter and cheese on the Island of Montreal; laundries, dyeing and dry cleaning establishments in Quebec City, Quebec West and in the Montreal district; full-fashioned hosiery; tanning and dressing of hides and leather; brick and tile manufacture; manufacture of doors, sashes and wooden building products; taverns in the Montreal district; waste materials, except paper, in the Montreal district; taxicab drivers in and about Montreal and in Quebec and Levis; the manufacture of wooden boxes; wholesale food establishments in Quebec City, Levis, Quebec West and Lauzon; custom tailoring and dressmaking in Quebec City; mattress manufacture and furniture upholstering in the Cities of Quebec, Quebec West and Levis; ice industry and trading in Quebec City and district; retail food dealers in Quebec and Quebec West and foundries in Hull.

The accompanying table shows the minimum rates established for the principal classes of workers by most of these orders. The cotton textile order increased by 10 per cent the rates fixed by agreement between the Dominion Textile Company and the National Catholic Textile Union. For teachers in Verdun the scale of salaries was raised to that adopted by the Catholic School Board of Montreal. In all match factories the minimum rates are to be those provided for in Zone 2 by Order 4. All special orders provide that where not incompatible the provisions of Order 4 apply to establishments covered by them.

Most of the orders fix different rates for the two or more zones into which they divide the province. No distinction by reason of age, sex or experience is made in the rates fixed by Order 4 but under that order and certain special orders there is a minimum rate for not less than a fixed proportion of the workers in an establishment and lower minima are set for other proportions. Moreover, it is stipulated in Order 4 that, unless the Board determines otherwise, an agreement may be made between the employer and an apprentice for the payment of a rate not more than 10 per cent below the lowest minimum fixed for the workers in the establishment but no employer under Order 4 may class more than 10 per cent of his employees as apprentices. Under the special orders the proportion of apprentices is usually restricted and separate rates are fixed.

Hours of labour are limited by the orders only in a few cases. A maximum of 72 hours a week is established for male workers by

Order 4. Under the Industrial and Commercial Establishments Act, there is a maximum 10-hour day and 55-hour week for females and boys under 18 in industrial establishments and a 60-hour week for the same classes in shops in towns with a population of more than 10,000 except with a special permit. The order applying to laundries, dry cleaning establishments and dye works in Montreal limits the hours of work of females, except office workers, to 60 hours a week but the overtime rate has to be paid after 54 hours.

The wage orders, however, usually specify the number of hours to which the minimum rates apply and fix special overtime rates. Overtime, under Order 4 and unless otherwise stipulated in the special orders, must be paid for at one and a half times the minimum rate except when the Board permits otherwise or under certain other conditions, such as the receipt of weekly wages of at least from $20 to $30 according to the zone or the payment of wages at least 15 per cent above the legal minimum to workers hired by the week or longer period and given holidays with pay and sick leave or except when holidays with pay are given in lieu of overtime.

For most classes overtime is defined as work in excess of 12 hours in any day, or in excess of 10 hours a day if the specified weekly hours are worked, or in excess of the weekly hours named. In silk textiles, however, the overtime rate is 5 per cent above the minimum and some special workers in other industries are paid pro rata or at a fixed rate. In taverns in Montreal overtime must be paid for at time and one-quarter and workers in hotels and restaurants are only paid the regular rate for work in excess of 60 hours. In wholesale food establishments overtime of office workers, messengers and other special classes beyond 48 hours in the winter or 53 in the summer or for an hour before 7 a.m. or two hours after 6 p.m. must be paid for at time and one-half on the basis of a 50-hour week but for the main class of male employees there is an hourly rate for such overtime of 45 cents in Quebec and Quebec West and 40 cents in Levis and Lauzon and for female employees in these places the overtime rates are 30 cents and 27 cents an hour, respectively. In custom tailoring and dressmaking, overtime must be paid for at time and a half except to employees earning the highest minimum of 50 cents an hour who need only be paid pro rata for overtime. In foundries in Hull, time and one-half must be paid to office workers, messengers, foremen, electricians and pattern makers and for all others the regular rate is to be increased by 16 cents an hour but double time must be paid for Sundays and holidays. No overtime is payable to workers in these foundries who are hired by the week and are earning at least $25 a week if they are unskilled, or $33 a week if skilled, and who are entitled to one week's holiday and four weeks' sick leave with pay each year.

As regards part-time workers, under Order 4, except under special circumstances, regular workers who are employed for less than 30 hours in a week or for not more than three hours in a day must be paid at a rate at least 15 per cent above the ordinary minimum for the class and they must be paid for at least three hours in a day but extra workers employed for not more than two days in a week or in shops from November 1 to December 1 for at least 30 hours in a week have minimum hourly rates varying in the four zones from 25 cents to 15 cents for the first group and from 20 cents to 12 cents for seasonal shop employees.

Special orders issued recently specify rates for part-time workers including those hired during busy seasons. In laundries in Quebec City and Quebec West the part-time rate for males is 20 cents and for females 15 cents and in the manufacture of wooden boxes and other wood products the rates range from 22 cents in Montreal to 14 cents in rural districts. In custom tailoring and dressmaking in Quebec City there is a 30 cents rate for part-time male workers and 20 cents for females and in mattress manufacture and furniture upholstery in Quebec City, Quebec West and Levis there is a 20 cents hourly rate for all part-time workers. The above four special orders apply part-time rates to those working 20 hours a week or less. In retail food stores in Quebec City and Quebec West from November 1 to December 31 part-time employees are to be paid 15 cents an hour and those working two days a week or less must be paid 20 cents. In wholesale food establishments part-time male employees are entitled to at least 30 cents an hour in Quebec and Quebec West and 25 cents an hour in Levis and Lauzon, females 20 cents and 18 cents, office workers 25 cents and 20 cents, and messengers 10 cents an hour. Taxicab drivers in Montreal and Quebec not working every day have a minimum of 25 cents an hour and in the Montreal district must be paid for at least five hours. Bar tenders working part-time in taverns have a 43 cents hourly rate, waiters 32 cents and cleaners 25 cents. When waiters and bartenders work less than 30 hours a week, they must be paid time and a quarter.

When board and lodging are supplied by the employer, Order 4 limits the amount that may be deducted per week from wages to $5 in the Montreal district, $4 in Zones II and III and $3.50 in Zone IV. For board only, the

maximum deductions are $4, $3 and $2.50 and for room only $1.50, $1.25 and $1. Separate meals are 20 cents, 15 cents and 12 cents. In the milk industry and in mining and construction camps, the rates for board and lodging are higher.

The provisions as to legal holidays vary: some orders make no reference to such holidays, others require the payment of double the minimum rate for work on a legal holiday; some stipulate that a day off may be given later, while in wholesale food establishments no deductions from wages may be made on account of a legal holiday.

Wages in Forest Operations

Under the Act to Assure Reasonable Wages for Workmen engaged in Forest Operations, 1937, an order in council, approved September 13, 1939, makes it obligatory on all employers engaged in forest operations except on private lands belonging to farmers or settlers to pay a minimum of $45 per month of 26 days except to inexperienced youths from 18 to 20 years of age, handicapped persons and men of 60 years or over for all whom the minimum is $30 per month of 26 days. It is, however, provided that in no case may the number of the men paid less than $45 per month exceed 12½ per cent of the total number of workers in a shanty. No person under 18 years may be employed. In addition to the wages in cash, board and suitable lodging must be supplied free of charge. Minimum prices for piece-work are also set and piece-workers may be charged 60 cents a day for board and lodging. No deduction may be made from wages for medical assistance, board, lodging or insurance premiums, and the prices of goods sold to workers are subject to regulation. Regular hours are limited to 60 per week, with time and one-quarter for overtime and time and one-half for indispensable work on Sundays except by cooks, stablemen and teamsters.

(a) Wherever three rates are indicated, it is provided that not less than 60 per cent of the workers shall be paid the highest rate, not less than 25 per cent the second rate and not more than 15 per cent the lowest rate. Rate for canneries applies to plants operating only from June 15-Sept. 15. Other canneries are governed by order issued in 1940. In the tobacco industry, half the employees must be paid one rate and half the other.

ONTARIO

The Minimum Wage Act of 1920 applied only to females but as amended in 1934 stipulated that males replacing female employees must be paid at least the minimum fixed for the latter. The Minimum Wage Act, 1937, which repeals the 1920 Act applies to both sexes in any business, trade or occupation except agriculture and domestic service but the only order made under it authority is one relating to the textile industry.

Orders under the earlier statute remain in effect and apply to factories; seasonal canning; jewellery trades; laundries, dyeing and dry cleaning works; telephone systems; shops; custom millinery; hotels and restaurants; beauty shops; shoeshine parlours; offices; elevator employees; theatres and places of amusement. Custom tailoring in the five largest cities, Toronto, Hamilton, London, Ottawa and Windsor falls within the factory order. The shops order does not apply to office and restaurant workers employed in connection with a shop.

The learning period varies with the industry and, in some cases, with age. There is no learning period for workers in theatres or places of amusement, hotels, restaurants, shoeshine parlours, or seasonal canning. In beauty shops and in custom tailoring in the five cities mentioned, there is no prescribed minimum wage for the first three months nor in the case of elevator operators for the first two weeks. In factories and in offices, except where the worker has a business college diploma, the learning period is one year for a girl over 18 and 18 months for one under 18. Persons attaining the age of 18 years are entitled to the full rate for experienced workers if they have had one year's experience or more and if they have had less than one year's experience they are entitled to the full minimum wage for experienced workers as soon as they have completed one year's employment. For office workers in towns or villages of less than 4,000 there is no distinction on the ground of age and the learning period is 18 months in places of more than 1,000 population and 12 months in smaller places. In the jewellery trades a worker is entitled to the full minimum after 18 months if she is over 18 years of age and after two years if under that age. In shops, except in small places, girls over 18 have a learning period of one year and those under 18, two years. Employees reaching 18 years of age without selling experience in the five largest cities must be paid at least $11 a week for the first six months, then the full minimum. In laundries, the learning period is nine months; in beauty shops, two years; in telephone offices, one year; and in custom millinery, three years.

As regards hours of work, the Act stipulates the maximum weekly hours to which shall apply the minimum weekly wages fixed by the Industry and Labour Board which administers the Act. These maximum hours are 48 in a municipality with a population of more than 50,000; 50 in a municipality with a population of between 10,000 and 50,000 and 54 in a smaller municipality or in any locality without municipal organization. The Board has no power to limit hours of work but may

fix special rates for work in excess of the specified hours. All the orders establishing minimum weekly wages, except those relating to telephone exchanges and to laundries, dry cleaning and dyeing establishments, declare the rates to apply to the maximum hours specified in the Act or to the normal working hours of the establishment if they are less than the stipulated number. The weekly rates fixed by the laundries and telephone orders apply in all parts of the province to a 48-hour week or, in the case of laundries, the regular work period if it is less than 48 hours. Night operators in telephone exchanges from 9 p.m. to 8 a.m. who are not required to be in constant attendance at a switchboard are to be paid not less than the minimum for a 48-hour week but others are to be treated as day operators and paid for any overtime beyond 48 hours. Hourly rates are fixed for seasonal canning and for hotels and restaurants.

All orders except those applying to shoeshine parlours in Toronto and to the textile industry require time in excess of the hours to which the weekly rates apply to be paid for at proportionate rates. In shoeshine parlours in Toronto the overtime rate is 26 cents an hour. In the textile industry for the first two hours' work in excess of regular daily hours, 31¼ cents an hour must be paid to girls and women over 18, 27½ cents an hour to girls of 17, and 22½ cents to girls under 17 years of age. For males the rates for the first two hours of overtime in any day range from 27½ cents an hour for those under 17 to 40 cents for those over 21, the lower rate increasing by 2½ cents with each year of age. All other overtime must be paid for at the rate of time and one-half. Employees who receive more than the weekly minimum for the regular work-week must be paid time and one-quarter for the first two hours overtime in any day and time and one-half for all other overtime.

The provisions as to payment for part-time and short-time vary. The textile order requires part-time workers employed for at least 40 hours a week to be paid the prescribed minimum wage for a week and those working for less than 40 hours to be paid an hourly rate equal to one-fortieth of the minimum. Workers temporarily on short time in the textile industry must be paid at least their regular hourly rate. In theatres and amusement places, ushers, cashiers and cleaners who are employed for less than 40 hours in a week must be paid minimum hourly rates of 30 cents in Toronto, 27 cents in Hamilton, Ottawa, London and Windsor and 25 cents in any other place. In shops, workers employed for not more than 10 hours in a week must be paid regardless of age or length of employment, at not less than the hourly rates received by experienced full-time workers. Regular full-time employees working short time and part-time workers employed regularly for more than 10 hours a week in shops and part-time workers in beauty shops and laundries may be paid at an hourly rate determined by dividing the minimum weekly wage by the normal weekly work period of the establishment if the latter is less than 48 in the case of laundries or, in the case of shops, less than the maximum work-week to which the minimum wage applies as determined by the proprietor of the place. Except in telephone exchanges, elevator operators and office workers where weekly rates are fixed, deductions for absences must not exceed the value of the time lost.

The proportion of inexperienced workers that may be employed is limited in shops and laundries to 40 per cent of the total number of female employees and in custom millinery, exclusive of temporary help, in the four largest cities to 33⅓ per cent. In none of the other orders is the proportion of those paid at learners' rates limited.

All beginners, including piece-workers, in factories must be paid the weekly minimum for the first six months and in laundries for the first three months. Afterwards, and at all times in the textile industry, it is sufficient if 80 per cent of the piece-workers receive the prescribed minimum. In the seasonal fruit and vegetable industry only 60 per cent of the piece-workers need be paid the minimum.

For board furnished by the employer in hotels and restaurants in Toronto, not more than $5 a week may be charged to employees nor more than $2 for lodging. Elsewhere in the province and in seasonal canning factories the maximum deduction for lodging that may be made from wages is $1.50 a week and for board $4.50. Not more than 25 cents may be charged for a single meal.

The Commercial Vehicle Act, 1936, gives the Lieutenant-Governor in Council power to fix minimum rates of pay for drivers of goods vehicles. This provision was made by the Public Commercial Vehicle Act, 1934, now repealed, but no minimum rates have been established.

MANITOBA

Under the Manitoba Minimum Wage Act of 1919 as amended, the Minimum Wage Board may make orders applying to any person employed in a city in any occupation, trade or industry but the Act does not apply to domestic service or to religious, charitable, political or patriotic institutions or hospital training schools or to any municipal or other public body. By order in council, on recommendation of the Board, the Act may be extended to parts of the province outside a city. There is a general stipulation in the Act that in any industry to which it applies no person 18 years of age or over may be employed at less than 25 cents an hour except where regulations provide for different rates.

Orders of the Board which are in effect throughout the province relate to both sexes in factories, retail and wholesale stores and in hotels and restaurants and to employees 18 years of age or over not covered by another order but excluding farm workers. An order applying only in cities fixes rates for males and females working in department stores and mail-order houses. Two orders govern boys under 18 in certain manufacturing industries in Winnipeg and men performing work usually done by boys. All other orders apply to females and boys under 18 in cities or as indicated in the accompanying table. Under exceptional conditions the Board may issue a permit granting modification of or exemption from any provisions of the orders.

The minimum rates established by the Board vary with the experience and, in some cases, the age of the worker. Learners' rates apply for one year to employees over 18 years of age in factories, department stores and mail-order houses and in dressmaking, and for six months in fur-sewing and offices. In factories, persons over 18 years working on jobs requiring no skill or training must be paid the rate for experienced workers. For office workers, a business college diploma entitles a girl over 18 to the minimum for experienced workers. For those under 18, minimum weekly rates of $8, $9 and $10 are fixed for boys and girls 15, 16 and 17 years of age respectively and $10.50 for one who is 17 years and six months. An employee who has completed a business course is entitled to the minimum rate for a person one year older. The learning period for workers under 18 in dressmaking and fur-sewing is two years and 18 months respectively, but if a girl becomes 18 before completing the term in fur-sewing she is required to serve only half the remainder before being entitled to the full minimum wage. In dressmaking after serving one year, she must be paid the rate for inexperienced adults when she reaches the age

of 18. In factories, department stores and mail-order houses, employees under 18 who have put in one year or more are entitled to the full minimum rate when they reach the age of 18. Boys under 18 employed in hotels and restaurants, except bell boys, must be paid a minimum of $10 after one year until they reach 18 years.

Except in beauty parlours and hotels and restaurants, where a separate rate is made for learners and employees under 18 years of age the combined number of such workers may not exceed 25 per cent of the total number of employees within the scope of an order. In offices, however, the number of female employees paid at the rates for inexperienced or minor employees and the number of boys under 18 together may not be more than 25 per cent of the total staff, male and female. The learning period is fixed, without regard to age, at eight months in tailoring, 16 months in shops, three months for females in hotels and restaurants, and four seasons of 10 weeks each in millinery. In beauty parlours, no minimum rate is laid down for the first three months after which learner's rates apply for 18 months. In the two orders applying to males only, the highest minimum fixed must be paid after one year.

As in the other western provinces, the board may limit working hours and this has been done in the case of female workers and boys under 18 and in certain work-places for males over 18. Maximum weekly hours for females or boys under 18 are 50 in dressmaking, tailoring and millinery, 48 in factories, department stores, mail-order houses, retail and wholesale stores, fur-sewing, places of amusement, beauty parlours and, except for female cooks, in hotels and restaurants, and 44 in offices. Daily hours may not exceed 10 in beauty parlours, barber shops and hotels and restaurants, nine in department stores and mail-order houses, retail and wholesale stores (except on Saturdays), fur-sewing and tailoring, places of amusement and for boys under 18 in factories in Winnipeg. In dressmaking and millinery, the maximum working day is eight and a half hours and for females employed in factories and offices, eight hours.

Overtime for a limited period may be worked in most cases under special permit but no overtime may be worked by persons under 16 in department stores or mail-order houses or under 18 in shops or by persons under 17 in factories.

In retail and wholesale stores, the minimum rates for male and female workers over 18 apply to a nine-hour day (10½ hours on Saturday) and a 48-hour week, and overtime must be paid for at five cents an hour more than the minimum rate except where the actual wage is above the minimum plus the amount for overtime. In hotels of 100 or more rooms male employees have a maximum 54-hour week but the minimum rates apply to a 48-hour week for all males over 18 and time in excess of 48 hours must be paid *pro rata*. In factories, the overtime rate is 30 cents an hour for work in excess of nine hours a day and 48 hours a week unless the wages are at a rate of 30 cents an hour for the actual hours worked. Males over 18 in factories in Greater Winnipeg must be paid at not less than 30 cents an hour for any work in excess of 48 hours a week regardless of the ordinary wage rate. In department stores and mail-order houses time in excess of nine hours a day and 48 hours a week must be paid for at the regular hourly rate unless the wages paid equal the minimum for the hours worked. In fur-sewing, dressmaking, millinery, beauty parlours, hotels and restaurants, offices and for boys under 18 in factories in Winnipeg, overtime must be paid at the regular rate for all work beyond the maximum hours fixed by the order. The rates for employees to whom no other order applies and for men performing work usually done by boys, for whom no maximum work-week is established, apply to a 48-hour week.

Part-time work in stores for less than 16 hours a week must be paid for at the minimum hourly rate for experienced workers. In places of amusement, ticket sellers and ushers must be paid at least 30 cents an hour when working less than 40 hours a week. In department stores and mail-order houses, experienced employees have a minimum of 25 cents an hour for part-time work and inexperienced workers must be paid the rate for inexperienced adults. Men performing work usually done by boys under 18 must be paid on a *pro rata* basis when working part-time. Except in shops, factories and places of amusement, part-time workers must be paid for not less than four hours on any day they are required to report for duty. In factories only two hours need be paid for.

Maximum deductions permitted from wages for board and lodging are $2 per week for lodging, $4.50 for board or $6 for both in the case of those employed in fur-sewing, dressmaking, tailoring, millinery and in beauty parlours; $2.50 for lodging and $4 for board in hotels and restaurants and for employees not covered by special orders and 25 cents for single meals in shops. No reduction may be made from the minimum wage for statutory holidays in beauty parlors, shops, department stores, mail-order houses or factories.

Under the Highway Traffic Act, the Municipal and Public Utility Board has established a minimum rate for drivers of public service vehicles certificated for passenger transport of $20 per week for a six-day week for

(a) In Portage la Prairie from Nov. 1-April 30 and at any time in other parts of the province the minimum rate for all females is $9.60 a week or 20c. an hour and for males $10 a week or 21c. an hour but in places of less than 1,000 population from Nov. 1-April 30 the minimum is 10 per cent less.

(b) Applies also to boys under 18.

drivers employed by the week, or $80 per month for drivers hired by the month. Those employed otherwise than by the month or week are to be paid at least at the same rate. If wages are proposed to be paid on any other basis, the scale must be approved by the Board. Hours are limited to nine per day for driving, 12 per day in any capacity, with a six-day week.

The Taxicab Act applying only to taxicabs in Greater Winnipeg limits hours on duty to 12 a day on not more than six days a week and there is a legal minimum of $17.50 per week for drivers employed by the week. For a driver employed otherwise than by the week, a minimum of $1.60 per day must be paid for each day on duty. If he is on duty for more than four hours on any one day, he must be paid $1.60 and, in addition, not less than 40 cents an hour for each hour in excess of four. An order of the Taxicab Board effective from May 1, 1937, stipulates that a driver employed by the year or month must be paid a wage equal to what he would receive if paid by the week; that where he is hired by the week, he must be paid the prescribed minimum for the week whether he has four, five or six days of work, unless he is absent through illness or by arrangement.

Fair Wage Act

The Fair Wage Act, 1916, as amended, applies to persons employed on public works, on certain private works of construction and, since 1938, to certain designated industries. For workmen employed on construction works, public and private, as defined in the Act, the Minister of Public Works may, on the recommendation of the Fair Wage Board, fix minimum wages and maximum hours each year, the rates and hours, unless otherwise declared by the Board, to be based on those fixed by agreements between employers and employed or to be in accordance with prevailing conditions. The schedule which was made effective on June 15, 1939, contains for most classes similar rates to those in force from June 15, 1938. For truck drivers on public and private works other than public roads and bridge work and for men running gas and electric engines not otherwise included and for asphalt tile setters, new rates are established.

"Public work" includes work, authorized by the Minister of Public Works for which a contract or contracts have been made between the Minister and an employer, consisting of construction, including remodelling, demolition or repairing or painting of buildings in Manitoba and highway, road, bridge or drainage construction outside the Greater Winnipeg Water District. "Private work" means the building, construction, remodelling, demolition or repairing of a building or construction work for which a contract or contracts have been made exceeding $100 within the Greater Winnipeg Water District or any city or town of a population over 2,000 or any other part of the Province to which the provisions of the Act are extended by the Lieutenant-Governor in Council. The term does not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant, if no more than three men are employed in addition to the regular maintenance staff, and if such work is not undertaken with a view to the sale or rental of the property. Neither does it include work which is done by a maintenance man, or men, employed by the month.

Part II of the Act provides for fixing wages and hours in certain industries by a procedure similar to that laid down in the Industrial Standards Acts of other provinces. The industries designated in the Act are barbering, hairdressing, job printing, engraving, dry cleaning and any branch or combination of these and the Lieutenant-Governor in Council has added, on the recommendation of the Minister, shoe repairing and wood cutting with a sawing machine.

The tables below set out the minimum rates fixed under the Act for work on roads and bridges outside the Greater Winnipeg Water District and for workmen on other public construction work and on the private building work within the scope of the statute.

MANITOBA FAIR WAGE RATES FOR PUBLIC ROAD AND BRIDGE CONSTRUCTION OUTSIDE GREATER WINNIPEG

Occupation	Minimum per hour	Maximum hours per week
	$	
Labourers	.30	48
Teamsters	.30	48
Teamster and two horse team	.55	48
Teamster and four horse team	.80	48
Grader and tractor operators (excepting permanent municipal employees)	.60	48

* All men hired in Winnipeg to go into the country to work on buildings must be paid the city schedule rate excepting where other definite agreements are made.

(a) It was agreed between the Winnipeg contractors and tradesmen that 40 hours per week only be worked between July 1 and September 2, 1939.

(b) Men are not to be classed as apprentices unless employed on work or approved instruction for a minimum of 36 weeks and subject to lost time being worked out. Not more than one apprentice to two journeymen permitted.

(c) For wood lathers, work may be paid for on a square yard basis at not less than 6 cents per square yard.

(d) Engineers in charge of hoisting engines of three drums or more operating any type of machine; or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over, or operating drop hammer pile drivers; in all cases irrespective of motive power.

(e) Engineers in charge of hoisting engines having only two drums or of single drum if used on a building of three stories and over, used in handling building material; or steam shovels and draglines not specified in Class "A" hereof; irrespective of motive power.

(f) Engineers in charge of any steam operated machine not specified in class "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provisions of "The Steam Boiler Act"; or air compressor delivering air for the operation of riveting guns on steel erection work, or pumps in caissons, or concrete mixers of over ½ yard capacity; irrespective of motive power.

(g) Men firing boilers of machines classified in class "A", "B" or "C" hereof or assisting engineers in charge of same.

(h) Operators of gas or electric engines for machines not otherwise specified in class "A", "B" or "C" hereof.

(i) If employed on the construction or demolition of the building by owner, contractor or sub-contractor.

(j) Restricted to men using hammers, saws, axes and augers.

SASKATCHEWAN

The Minimum Wage Act of 1919 applying to females employed in shops and factories in cities was amended in 1936 to enable its extension to other parts of the province and to male employees. Existing orders apply to all workers in factories and shops in cities and in the towns of Estevan and Melville and within a five-mile radius. "Shop" includes a mail-order house, hotel, restaurant, barber shop, beauty parlour, tobacconist's and news agent's business and all parts of a building used in connection with the sale of goods by retail. Hotels and restaurants covered include only places catering to five or more persons.

The Minimum Wage Board may limit working hours but since the Act was applied to male workers, the former restrictions on hours have been rescinded. The normal work-week to which the rates apply is declared to be 48 hours or the usual number of hours worked in the establishment if less than 48 except in hotels and restaurants where for bell boys, porters and elevator operators the normal work-week is not to exceed 60 hours and for other workers 48 hours. Overtime is defined as work in excess of 60 hours for the three classes of hotel and restaurant workers mentioned and in excess of 48 hours per week for all other workers.

In cities for shops, mail order houses, factories, fuel, lumber and building supply yards and for offices in connection with such places and for the transfer and storage business, two overtime rates are fixed, the lower being payable for first 12 hours overtime in a week and the higher one for any additional time. For delivery boys these rates are 20 cents and 30 cents an hour, for inexperienced employees in the classes of establishments named, 27½ cents and 40 cents and for experienced workers 35 cents and 50 cents. Other overtime rates applying in cities include a minimum of 35 cents an hour for theatre and dance hall employees and for experienced workers in barber shops and beauty parlours, 27½ cents for inexperienced workers in barber shops and beauty parlours, 25 cents for inexperienced workers and for dishwashers, elevator operators, bell boys and porters in hotels and restaurants and 30 cents for experienced workers except dishwashers, etc., in these places. For overtime work in Estevan and Melville the minimum hourly rates are 15 cents for delivery boys on foot or bicycle, except in connection with hotels and restaurants, 20 cents for inexperienced workers in all places and for dishwashers, elevator operators, bell boys and porters in hotels and restaurants and 25 cents for experienced workers in all establishments to which the orders apply.

Except in the hotels and restaurants order part-time workers are defined as those who work six or more hours less than the normal work-week. In hotels and restaurants employees working less than 43 hours a week are on part-time. All part-time employees must be paid for at least two hours and for such work in cities there is a minimum hourly rate of 20 cents for delivery boys in shops, mail order houses, factories, fuel, lumber and

Delivery boys, on foot or bicycle	8.00	6.00
Drivers	14.00	13.00
Warehousing, cartage, transfer and delivery service in cities		
Employees other than messengers and office workers and drivers	14.00	12.00
Office workers	14.00	8.00–13.00
Delivery boys on foot or bicycle	6.00	6.00
Drivers	14.00	13.00
Hotels, restaurants and refreshment rooms in cities		
Employees other than bell boys, porters, elevator operators and dishwashers	12.00	8.00–10.00
Dishwashers	10.00	10.00
Bell boys and elevator operators	8.00	8.00
Beauty parlours and barber shops in cities	13.00	7.00–12.00
Theatres and dance halls in cities		
Managers, cashiers, doormen, ushers and cleaners	12.00	12.00
All above workplaces, except hotels and restaurants in Estevan and Melville		
Employees other than delivery boys on foot or bicycle and drivers	12.00	7.00–11.00
Delivery boys on foot or bicycle	5.00	5.00
Drivers	12.00	11.00
Hotels and restaurants in Estevan and Melville		
Employees other than bell boys, porters, elevator operators and dishwashers	10.00	6.00– 8.00
Dishwashers, elevator operators, bell boys and porters	8.00	8.00

building supply yards and offices in connection therewith and in the storage and transfer business, 25 cents for inexperienced workers in all places except theatres and dance halls and 30 cents in theatres and dance halls and for experienced workers in all other places covered. In Estevan and Melville part-time workers must be paid not less than those working overtime.

The minimum rates for inexperienced workers, which are set out in the table, apply in shops, factories and beauty parlours for 18 months, increasing each half-year. The learning period in hotels and restaurants, except for dishwashers, bell boys, elevator operators and porters, is one year. In cities, employees in the transfer and storage business except for office help, messengers and drivers have a learning period of six months while boys delivering parcels for shops and factories, etc., and drivers of horse-drawn or motor vehicles in connection with these places and with the storage and transfer business are paid the lower rate for three months. No learning period is required in cities for amusement place employees or for messengers in the transfer and storage business.

Rates for apprentices fixed in apprenticeship contracts which have been approved by the Board or which form part of a trade union agreement approved by the Bureau of Labour and Public Welfare or which have been registered under any provincial statute supersede the rates stipulated in the minimum wage orders.

The number of inexperienced workers is limited in hotels and restaurants in Estevan and Melville and in all work-places in cities, except beauty parlours, barber shops, theatres and amusement places, to 25 per cent of the total number of workers. In other work-places in Estevan and Melville not more than one-third the total number employed may be paid the rates for inexperienced workers. The proportion of part-time employees is limited to 25 per cent in shops and in the storage and transfer business in cities and to 33⅓ per cent in all establishments covered in Estevan and Melville and in factories and hotels and restaurants in cities. In beauty parlours and barber shops in cities not more than one indentured apprentice or inexperienced worker may be employed for every experienced worker.

In hotels and restaurants where a uniform other than white is required and not supplied by the employer, the worker is to be paid an additional 50 cents per week. If lodging and 21 meals in a week are furnished by the employer in cities the maximum charge that may be made for a week's board of 21 meals is $4.50, for seven days' lodging $2, for single meals, 20 cents and for a single night's lodging, 30 cents. In Estevan and Melville the prices of board and lodging are 50 cents less and a night's lodging 5 cents less while the maximum charge for a single meal is 20 cents as in cities. No deductions from wages may be made for civic or statutory holidays and the employee may not be required to make up the time lost on such days.

The Coal Mining Industry Act, 1935, empowers the Lieutenant-Governor in Council to establish standards as to hours of labour and wages of any class of persons employed in the industry, but no action has been taken under this clause. Hours are limited to eight in a day by the Coal Miners' Safety and Welfare Act as amended in 1932, except when otherwise agreed between employer and employee or in case of change of shift or in emergency.

The Public Service Vehicles Act grants the Highway Traffic Board power to regulate the wages and hours of drivers of passenger and goods vehicles but no regulations under this Act have been issued.

ALBERTA

In Alberta two statutes provide for the fixing by the Board of Industrial Relations of minimum wages for female and male workers respectively.

The Minimum Wage Act, 1925, as amended, applies to women in any trade or occupation in the province except domestic service. The orders issued cover factories; telephone exchanges in cities, towns and villages and those serving 100 rural lines or more; shops, theatres and places of amusement; beauty shops; garages; service stations and elevator operators; restaurants; laundries and dry-cleaning establishments and offices.

The Male Minimum Wage Act, 1936, applies to all male workers except farm labourers and domestic servants. A general order fixes minimum hourly rates throughout the province but it does not apply to indentured apprentices, employees governed by schedules of wages and hours under the Industrial Standards Act or by codes drawn up under the Department of Trade and Industry Act, or to persons employed on a commission basis or for a stated weekly, monthly or yearly salary under a contract approved by the Board of Industrial Relations to workers hired for temporary or seasonal work not for the purpose of the employer's business, persons engaged in fighting prairie or forest fires or those expressly exempted by the Board of Industrial Relations. Further, there are three special orders applying to certain other classes: (1) boys under 18 delivering merchandise from shops, (2) men employed in saw mills, box factories and other woodworking plants and in logging and the railway tie industry in rural districts and (3) persons working on irrigation projects under the Water Resources Act.

For female learners, rates below the ordinary weekly minimum are fixed without regard to age. For male workers, lower rates are established for those 18 years of age or younger. The learning period for girls and women is 18 months in bookbinding, engraving and printing, 12 months in wholesale and retail stores, mail-order houses, laundries and dry-cleaning and dyeing establishments and six months in restaurants. In factories it varies from nine to 12 months. In dressmaking, tailoring, fur-sewing, millinery and hairdressing and for office workers and telephone operators, the apprenticeship period is one year with no fixed rate for the first month of employment. Learners are limited to 25 per cent of the total female staff in all places but telephone exchanges where one-third may be student operators.

All workers within the scope of the Minimum Wage Acts are governed by the Hours of Work Act which limits hours to eight a day and 48 a week for females and nine a day and 54 a week for males. Certain exceptions are permitted in the lumbering industry in rural districts and the Board may grant exemptions in other industries. Hours of labour in excess of those fixed by the Hours of Work Act must be paid for at overtime rates fixed under the Minimum Wage Acts.

For females, if the weekly hours are 48 or less, the first hour in excess of eight in a day must be paid for at the regular rate but time in excess of nine hours a day and 48 hours a week must be paid for at the rate of time and one-half. Male employees, with certain exceptions, working more than 10 hours a day and 54 hours a week have an overtime rate of time and a half. The overtime rate is not payable to men engaged in outdoor advertising and sign painting in Edmonton and Calgary if employed steadily and earning at least $25 a week for an average week of 50 hours or to workers in the lumbering, logging and railway tie industry in rural districts.

Except as indicated in the accompanying table, the rates for male workers are hourly rates with a lower minimum for those employed by the week or longer period. Workers covered by the general order must be paid for at least 42 hours a week, if hired by the week or longer period, and 40 cents an hour for at least four hours if hired for less than that period.

Special provision is also made for part-time female workers and for regular female employees on short time. The latter, except in theatres and telephone exchanges, if working less than 40 hours a week, must be paid for at least that number of hours; if working for less than 48 but more than 40 the prescribed minimum wage may be reduced *pro rata*. Part-time workers, hired by the hour or by the day or only for busy periods, who work for less than 40 hours a week, must be paid not less than 30 cents an hour for at least four hours. Girls and women in theatres who work less than six consecutive days a week must be paid not less than 50 cents an hour for at least two hours and in telephone offices not less than 30 cents an hour for four hours.

Where board or lodging is furnished by the employer, women employed in restaurants may not be charged more than $5 for a week's board or 75 cents per day where board for less than a week is furnished. For male employees the maximum charge for 21 meals per week is $5, for single meals 25 cents, and for lodging $2 for a full week or 25 cents per day for any period less than a week but in logging, lumbering, etc., the workmen must be furnished with board and lodging in addition to the minimum wage specified.

Employees of saw mills, box factories, wood working plants, logging and railway tie industry 10 miles from any city or in towns and villages of less than 1,000	$30.00 per mth. plus board and lodging.

BRITISH COLUMBIA

The Female Minimum Wage Act, 1934, and the Male Minimum Wage Act, 1934, revise earlier statutes. They do not apply to farm labourers or domestic servants. The Female Minimum Wage Act provides that where a minimum has been fixed for employees in any industry or occupation, no male person over 18 years of age may be employed in work usually done by female employees at less than the minimum wage fixed for such female employees. Similarly where a rate has been fixed for female employees under 18 years of age no male employees under 18 years may be employed at a lower wage.

Orders made under the Female Minimum Wage Act cover the mercantile industry; manufacturing; personal service in beauty parlours; theatres and places of amusement; offices; janitor service; fruit and vegetable industry; hotels and catering in any establishment; elevator operators; laundries and dry-cleaning works; telephone and telegraph operation; fish drying, curing, etc.

Orders under the Male Minimum Wage Act apply to logging, sawmilling and woodworking, the shingle industry, box and furniture manufacture, bakeries, the fruit and vegetable industry, construction, carpenters in some localities, shipbuilding, road transport, bus and taxi drivers, the mercantile industry, stationary engineers, barbers, first-aid attendants, janitors, the Christmas tree industry and elevator operators. As in the other provinces, special rates lower than the minimum wage for experienced workers are set for female employees during a fixed learning period except in the fruit and vegetable industry and for elevator operators. A further distinction is made beween inexperienced females over 18 and girls under 18 years of age. The statute stipulates that the number of learners over 18 must not exceed one-seventh of the total number of female employees in any establishment and the aggregate number of such workers and of girls under 18 may not exceed 35 per cent of the total female working force. In wholesale and retail stores, barber and beauty shops, offices and in the hotel and catering industry, the rates fixed for inexperienced females may only be paid with permission from the Board. In the fruit and vegetable industry the lower rates for inexperienced and handicapped female employees may be paid only to 10 per cent of the total number of females.

The learning period for women over 18 in stores, barber shops and beauty parlours, offices, laundries and in the fish drying or curing industry is one year; in most factories it is either six or 12 months but in bookbinding, printing, clothing, millinery and fur-sewing, leather goods, jewellery, and cigar manufacture it is 18 months. Six months' experience is required in the hotel and catering industry before the full minimum is payable and nine months for telephone and telegraph operation. Girls under 18 must be paid the rate for experienced workers on reaching the age of 18 after 18 months' experience in offices, 21 months in the mercantile industry and two years in beauty shops and laundries. A laundry worker must be paid the rate for experienced workers after one year if she has reached the age of 18.

Under the Male Minimum Wage Act, lower rates are fixed for those under 21. Such employees are limited to 10 per cent of the total number in shipbuilding, 15 per cent in the fruit and vegetable industry, 33⅓ per cent in woodworking and 40 per cent in household furniture manufacture. In the mercantile industry the minimum rate for those under 21 varies with the age, the highest rate being payable after three years' experience if the employee is over 18 but under 21 years of age. Employees over 21 but under 24, are required to have 18 months' experience before they are entitled to the full minimum rate. No orders apply to apprentices governed by the Apprenticeship Act.

For all female employees but janitresses, the minimum weekly rate applies to a specified number of hours. In the mercantile industry, beauty shops, the hotel and catering industry, and in the fishing industry, the rates for female workers apply to a week of 40 hours or more. In factories, dressmaking, fur-sewing, etc., and in laundries, the specified number of hours is 48, in offices and for elevator operation 37½ and in theatres and places of amusement 40. Hourly rates are fixed for fruit and vegetable packing and canning.

For part-time work, there are special hourly rates for females in the mercantile industry, 35 cents for experienced workers, 25 to 35 cents for inexperienced and from 20 to 30 cents for girls under 18. In factories the part-time rate is 29½ cents, for elevator operation 37½ cents, in beauty shops 37½ cents and from 27 cents to 35 cents for experienced and inexperienced workers respectively, 35 cents in theatres and amusement places, 37½ cents and from 25 cents to 35 cents in hotels and catering, 40 cents and from 30 cents to 37½ cents in offices and 28⅛ cents in laundries. In most cases, the employee must be paid for at least four hours' work.

In road transport, shops and for elevator operators and barbers, where minimum weekly rates are set for male workers, the rates apply also to a specified number of hours and part-time work is required to be paid at a higher rate. For goods transported by road, for bus

drivers and barbers the part-time rate applies to a week of less than 40 hours, for elevator operators and in the mercantile industry to a week of less than 37½ hours and for taxicab drivers to a day of less than 10 hours. For part-time work, minimum hourly rates of 45, 35 and 50 cents are fixed for barbers and taxicab and bus drivers respectively in Victoria, Esquimalt, Oak Bay and Saanich. In shops, part-time rates range from 15 to 40 cents an hour, according to age and experience and in road transport from 20 to 45 cents according to the vehicle driven.

The Hours of Work Act limits working hours for both male and female employees in practically all the establishments covered by the Minimum Wage Orders to eight a day and 48 a week except when the Board of Industrial Relations makes special regulations permitting longer hours for some classes or at certain seasons. No overtime rates have been established for female workers except in the fruit and vegetable industry, for telephone and telegraph operators and employees in the hotel and catering industry. In the fruit and vegetable industry, the regular minimum hourly rate applies to a 10-hour day. For two additional hours in the industry, excluding canneries between June 1 and December 31, 1939, 45 cents an hour must be paid to at least 90 per cent of the female workers and 37½ cents to the others. After 12 hours' work the minimum rates for 90 per cent and 10 per cent of the employees are 60 and 50 cents an hour respectively. In canneries until December 31, 1939, the first two hours of overtime have a minimum rate of 40 cents for at least 90 per cent of those employed and 37½ cents for the others. For subsequent hours the rates are 54 cents and 50 cents for these two groups. Telephone and telegraph operators and hotel and catering employees must be paid time and one-half after working eight hours a day and 48 hours a week. For telephone and telegraph operators the maximum overtime for emergencies is 56. This does not apply to operators customarily on duty from 10 p.m. to 8 a.m. who may work 10 hours a day instead of eight.

Overtime rates for males are fixed for first-aid attendants and in transport and the fruit and vegetable industry. In the last mentioned industry, excluding the canning of fruits and vegetables from June 1 to December 31, 1939, for the first two hours in excess of 10 hours a day, males over 21 and those under 21 years of age must be paid at least 57 cents and 42 cents an hour respectively. For extra hours, the minimum rates are 76 and 56 cents for these classes. The special rates for overtime in canneries for the specified period during the same hours are 52½ and 37½ cents with 70 cents and 50 cents the minimum hourly rates after the twelfth hour. First-aid attendants for time in excess of their regular hours and taxicab drivers working more than 10 hours a day must be paid for such time at the rate of 50 cents and 45 cents an hour respectively. Bus drivers in the towns named above have an overtime rate of 67½ cents an hour for all work after nine hours in a day or 50 in a week. In certain other branches of the road transport industry time in excess of 50 hours must be paid for at rates varying from 40 to 60 cents an hour but the hours that may be worked are limited to 54 a week.

Deductions for board and lodging for females in the hotel and catering industry and for male and female elevator operators may not exceed $4 per week for 21 meals, $2 per week for lodging or 25 cents per meal. During the off-season, females employed in the hotel and catering industry in summer resorts in unorganized territory may be paid a minimum of $25 per month together with room and board instead of the weekly rate if such arrangement is approved by the Board of Industrial Relations. A maximum of $1.25 per day for board and lodging is permitted to be deducted from the wages of men in the sawmill and logging industry in some districts.

In the case of janitors, where free living quarters are not provided, the maximum rent that may be charged is $20 or $25 according to the size of the apartment and deductions for gas and electricity may not exceed $4 per month.

All other janitors	.37½

Wages and Hours of Labour Under Quebec Collective Agreements Act and Schedules of Wages and Hours under Industrial Standards Acts in Certain Provinces

In certain provinces, legislation provides that the wage rates and hours of labour agreed upon by representatives of employers and workers in a trade or industry for a locality, district or the whole province may be made obligatory on all employers and employees concerned by Order in Council on the recommendation of the Minister in charge of the administration of labour legislation. Such rates of wages and hours of labour are noted below and are applicable to both male and female workers unless otherwise stated.

NOVA SCOTIA

Industrial Standards Act

This Act, which was summarized in the LABOUR GAZETTE, July, 1936, page 604 with amendments in LABOUR GAZETTE, August, 1937, page 861 is similar to the Industrial Standards Act of Ontario which is summarized below. It is, however, restricted to the building and construction industry in Halifax and Dartmouth, excluding government and municipal employees and any employee performing temporary work the total amount of which does not exceed $25. Five schedules were in effect by Orders in Council under this Act at the end of the year 1939:

Construction

The wage rates and hours so in effect are shown below. Provision is made in all schedules for time and one half for overtime and double time for work on Sundays and holidays.

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN HALIFAX AND DARTMOUTH, NOVA SCOTIA.

—	Minimum hourly wage rate	Hours per week
	$	
Bricklayers	1.00	44
Carpenters	.70	44
Electrical workers	.85	44
Plasterers and cement finishers	.80	44
Plumbers and steamfitters	.85	44

QUEBEC

Collective Labour Agreements Act

The text of this Act, which amends the Workmen's Wages Act, was summarized in the LABOUR GAZETTE, May, 1938, page 503 with amendments in the issue of June, 1939, page 576, and the Workmen's Wages Act was summarized in the issue of July, 1937, page 745. Under this Act any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. Any Order in Council may be amended or revoked by the Lieutenant Governor in Council at any time. They do not apply to the Government of Quebec or its departments or services, nor to work done by a third party for the Government under a contract providing for a scale of minimum wages. The agreements under this Act are enforced within the industry itself by joint committees composed of representatives of both employers and employees. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937; proceedings under the Workmen's Wages Act in the issues from July, 1937, to July, 1938; proceedings under the Collective Labour Agreements Act in the issues beginning July, 1938.

The wages and hours in effect at the end of 1939 under agreements so made obligatory in various industries in the whole or part of the Province are noted below.

Mining: Non-ferrous Smelting and Quarrying

Iron Oxide Mining.—Mines producing iron oxide (ochres) in Red Mill and within 50 miles of it are covered by an obligatory agreement (Labour Gazette, December, 1937, and February, 1940). Minimum hourly wage rates are 35 cents for workers working in the mines, 37½ cents for those working in the establishments and 45 cents for millers. Hours are limited to 48 per week, with overtime and all work on Sundays and holidays to be paid at time and one-half.

Building Materials Industry, Province of Quebec.—See below under "Manufacturing: Non-Metallic Minerals, Chemicals, etc."

Manufacturing: Vegetable Foods, etc.

Baking Industry.—Agreements approved by Orders in Council as to wages and other working conditions in this industry provide for the following minimum weekly wage rates and maximum hours: Quebec City and District—for Quebec city, Levis and within 15 miles of them, foremen to be paid $24, journeymen $21, provided a certain minimum quantity of flour is baked per week, delivery salesmen $16, with a 62-hour week for both bakery workers and delivery salesmen and overtime payable at time and one-half; for the rest of the district, corresponding rates are $19.55 for foremen and $17 for journeymen, $14.40 for salesmen, with a 72-hour week and overtime payable at time and one-half (Labour Gazette, December, 1937, April, 1938, January, April, June and August, 1939, January 1940). Three Rivers—bakers $16 to $23, apprentice bakers $6 to $12; delivery salesmen $15, these rates being payable for a certain quantity of flour baked per man per week and extra pay for extra quantities baked (Labour Gazette, March, 1938). Magog—bakers 18 to 29 cents per hour, delivery men 25 cents (Labour Gazette, October, 1938, and January and October, 1939). Granby—bakers $12 to $22, with a 60-hour week and overtime payable at time and one-half (Labour Gazette, October, 1938). Montreal Island—bakers $21 to $25, helpers $18, apprentices $12, with a 60-hour week and overtime payable at regular hourly rates (Labour Gazette, October, 1939). Hull district—bakers $12 to $28, apprentice bakers $6 to $12; pastry cooks $20, apprentice pastry cooks $6 to $15; hours 60 per week, with overtime payable at regular hourly rates (Labour Gazette, June and October, 1935 and October, 1938).

Manufacturing: Boots and Shoes

Shoe Manufacturing.—The agreement covers both male and female employees in the boot and shoe manufacturing industry throughout the province (Labour Gazette, October, 1937, March, June and December, 1938, July and October, 1939). Employees are divided into six trade classes according to the skill required for the operation. Minimum hourly wage rates for each class and for the apprentices to the first four classes are as follows:

MINIMUM WAGE RATES PER HOUR

Class	Zone I	Zone II	Zone III
	cents	cents	cents
I	55	52½	48
Apprentices:			
1st six months	33	31	29
2nd six months	41	38½	36
II	45	42½	39
Apprentices	26	25	23
III	35	33	31
Apprentices	21	20	18
IV	25	24	22
Apprentices	18	17	16
V	18	17	16
VI	13	12½	11½

Minimum wage rates for women or men who take the place of women employees on an operation not mentioned in the classified list of operations are as follows:—

MINIMUM WEEKLY WAGE RATES

—	Zone I	Zone II	Zone III	Zone IV
	$	$	$	$
20% of female employees.	7.00	6.00	6.00	6.00
15% of female employees.	9.00	8.00	7.50	7.00
65% of female employees.	11.00	10.00	9.50	9.00

Manufacturing: Fur and Leather Products, etc.

Fur Manufacturing Industry.—Orders in Council for this industry were summarized in the Labour Gazette, September and October, 1938 and October, 1939.

For the city of Quebec the following minimum wage rates are payable for a week of 48 hours with overtime at time and one-half; in the city of Quebec—first class cutters $27, second class cutters $24, third class cutters $18, journeymen blockers $20, female operators and finishers $14 for first class, $12 for second class.

For the Island of Montreal and within 50 miles of it (Labour Gazette, September and October, 1938), minimum weekly wage rates in industrial and wholesale establishments (excluding the fur dressing and dyeing industry)

are: first class cutters $36.50, second class $29.50; first class male operators $29.50, second class $21.50; first class female operators $21.50, second class $16.50; first class finishers (female) $19.50, second class (female) $15.50; first class apprentice cutters, blockers and trimmers $22, second class $14; first class examiners $25.50, second class $14.00, second class employed by trimmers $14. The hours are 40 per week in the Island of Montreal and within 10 miles of it and 48 in the rest of the Montreal district, overtime at time and one-half.

For the Island of Montreal and within 50 miles of it (Labour Gazette, September, 1938), minimum hourly wage rates in retail establishments are: qualified cutters 95 cents for Class A, and 80 cents for class B, operators 75 and 60 cents, finishers 70 and 55 cents, blockers 55 and 35 cents, female operators 55 and 40 cents, female finishers 50 and 40 cents respectively; in the retail establishments of the Montreal district which are outside the Island of Montreal and located in towns of less than 25,000 population, however, these minimum rates may be 25 per cent less. The hours are 40 per week in the Island of Montreal and 48 outside the Island, with overtime at time and one-half.

Glove Manufacturing (Fine Gloves), Province of Quebec.—The agreement for cutters, operators and blockers of fine gloves covers the whole Province (Labour Gazette, April, 1939). Hours are limited to 49 per week. Wages are piece rates which are specified for each operation, with lower rates set for smaller cities and towns, and in the case of operators and blockers, still lower rates for rural districts. (This agreement was to expire December 31, 1939, but a request for the extension of a new agreement had already been published.)

Gloves Cutting (Work Gloves), Province of Quebec.—An agreement covering the cutting of work gloves was summarized in the Labour Gazette, April, 1939. Hours are 48 per week, and wages are piece rates as set by the agreement with the rates in smaller municipalities 10 per cent less than in larger cities and towns.

Manufacturing: Textiles, Clothing, etc.

Men's, Boys', Youths', Children's and Juveniles' Clothing Industry, Province of Quebec.—This industry throughout the Province is covered by an agreement made obligatory by Orders in Council, the last one coming into effect November 20, 1937, with amendment from December 4, 1939, (Labour Gazette, December, 1937 and December, 1939). (The manufacture of shirts, overalls, mackinaw coats, etc., is not included in the agreement.) The province is divided into three zones: Zone I is the Island of Montreal and the area within 10 miles of its limits, Zone II is the area within 75 miles of the boundaries of Zone I, Zone III is the rest of the province. The hours are 44 per week in Zone I and 48 hours in Zones II and III; overtime pay is time and one-half in Zone I and time and one-quarter in Zones II and III.

Piece work rates may be fixed instead of hourly rates, provided that such rates do not yield less than the hourly rates established in this agreement.

In the coats, pants and vests departments, class AA consists of skilled cutters in all three departments; class A, of head operators and shape sewers or underbasters by machine in the coat department and pocket makers and tape sewers in the vest department; class BB, of pocket makers and skilled trimmers in the coat department, back and front pocket makers, trimmers and seamers in the pants department and skilled trimmers and second operators in the vest department; class B, of fitters and off-pressers in the coat department, leg pressers in the pants department and off-pressers in the vest department; class C, of edge basters, second basters, shapers and top collar makers in the coat department and lining stitchers in the pants department; class D, of examiners, joiners (second operators), lining makers and pocket tackers in the coat department, lining sewers and top pressers, cloth waistband sewers in the pants department, fitters in the vest department; class EE, of steam machine pressers and underpressers in the coat department and general underpressers in the vest department; class E, of choppers, lining basters, machine edge basters and undercollar basters in the coat department, pocket makers and outside seamers on boys' shorts and bloomers and juvenile pants, lining sewers and stitchers on boys' shorts and bloomers and juvenile pants in the pants department; class FF, of underpressers in the pants department; class F, of armhole basters, buttonhole makers, lapel makers and sleeve makers in the coat department, buttonhole makers, fitters, inside seamers on boys' shorts and bloomers and juvenile pants and trimming makers in the pants department, buttonhole makers, basters, lining makers and vee sewers in the vest department; class G, of bottom of collar and leaf of collar fellers, canvas basters, canvas makers, coat finishers, general hands, inside coat tackers, button sewers in the coat department, button sewers, examiners, finishers, fly makers, loop makers, pocket sergers and tackers in the pants department, brushers, button sewers, examiners, finishers, general hands, ticket sewers in the vest department; class H, of buttonhole tackers, fellers of bottom of sleeve linings, pocket closers, sleeve lining tackers and basters, ticket pocket makers in the coat department, buttonhole tackers and cleaners in the pants department and buttonhole tackers and cleaners in the vest department; class K, of basting pullers (male).

* From December 4, 1939, employees are to receive either a 10 per cent increase in their earnings or a 10 per cent increase in their minimum hourly wage rates (the latter only if notice has been given by the employer by December 15, 1939).

WOMEN'S CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.—The Order in Council approving the agreement for this industry governs conditions throughout the Province in the production, for women and girls over 14 years, of cloaks, coats, suits and woollen skirts (LABOUR GAZETTE, October, 1937). The hours are 40 per week, with provisions for limited overtime in certain seasons at regular rates; in other cases, time and one-half rates are payable.

The following minimum wage rates apply to these occupations:—

Class	Wages per hour
	cents
Fully skilled cutters	80
Semi-skilled cutters	55
Trimmers	60
Fur tailors	65
Assistant fur tailors	44
Button sewers, general hands and examiners	34

In the following crafts, work may be done on a piece work or time work basis, but in either case the following minimum wage rates will apply:—

Class	Wages per hour
	cents
Skilled operators (male)	80
Skilled operators (female)	64
Section operators (male or female)	80
Top pressers	80
Machine pressers	80
Under pressers	75
Piece pressers	45
Lining makers	42
Finishers	42
Skirt makers	42
Machine basters, hand basters and special machine operators	44
Semi-skilled operators (male)	55
Semi-skilled operators (female)	49½

Apprentices are limited to 5 per cent of the number of those employed in an establishment. Apprentice operators, pressers and cutters to start at $7 per week, with advances every six months to a minimum of $22 at the end of three years.

Men's and Boys' Hat and Cap Industry, Province of Quebec.*—This industry, which includes the manufacture of hats and caps for men, boys and children, is governed by an agreement made obligatory for the Province of Quebec (Labour Gazette, June, 1939). Minimum wage rates for a 44 hour week are: cutters $22, operators $20, blockers $15.40, lining makers (female) $12.50. A limited amount of overtime is permitted and may be worked at regular rates.

Women's and Children's Millinery Industry, Montreal and District.—The agreement approved by Order in Council for this industry (Labour Gazette, August, 1935, March, 1936, June 1937, and June, 1938) covers the Island of Montreal and an area within a distance of 50 miles from its limits. Hours are 40 per week, with a limited amount of overtime permitted; overtime after 5.30 p.m. to be paid at time and one-half. Wages per week for qualified operators are: hand blockers $32; straw operators, fabric operators, blockers and cutters $29, drapers $20, draper-trimmers $17, trimmers $15. Workers who have not acquired the necessary skill in their particular branch of work to entitle them to be considered skilled workers may be paid at lower wage rates as mutually agreed on or, in case of disagreement, as fixed by the Joint Committee, until they are skilled, but not more than 25 per cent of employees in any particular class of work in any establishment may be paid at less than the above minimum rates.

Textile and Jute Bag Manufacturing Industry, Montreal.—This industry is covered by an Order in Council (Labour Gazette, May, 1939) for the Island of Montreal and the cities and towns within five miles of its limits. Hours are 48 per week except for work required continuously, as boiler house employees, watchmen and maintenance men, who may work 72 hours; overtime is payable at time and one-quarter. Minimum hourly wage rates for male employees are: cloth cutting and rolling machine operators 40 cents; in the printing department—charge hands 45 cents, assistants 35 cents, form cleaners 17 cents, rubber cutters 50 cents, rubber cutters' assistants 17 cents; in the baling department—operators 42 cents, assistants 35 cents; general labour—firemen in charge of boilers 45 cents, stokers 35 cents, watchmen 25 cents, truck drivers 35 cents, maintenance men (including carpenters, electricians, plumbers, machinists, etc.) 50 cents. Minimum hourly wage rates for female employees: printing department—operators 26 cents, helpers 22 cents; sewing department—operators 28 cents, apprentices 22 cents, helpers 18 cents, inspectors 26 cents, checkers 22 cents; bag turning department—turners 22 cents, apprentices 17 cents.

Manufacturing: Pulp, Paper and Paper Products

Paper Box (Corrugated Paper) Manufacturing Industry, Province of Quebec.—This industry, which comprises the manufacture of corrugated paper boxes and all other containers entirely or partly made of corrugated paper board is governed by an Order in Council for the whole province (Labour Gazette, February, March and June, 1939 and February, 1940). Hours are limited to an average of 55 hours and a maximum of 60 hours per week, with overtime at time and one-quarter. Minimum hourly wage rates for male employees: foremen 45 cents, operators of corrugating machines 45 cents, operators of printing machine 35 cents, stationary enginemen 40 cents, stokers 35 cents, machinists 40

* This agreement expired January 1, 1940, but application was made and published in the *Quebec Official Gazette*, December 23, 1939, for the extension of a new agreement.

cents, all other male employees 25 and 30 cents, with an average minimum wage for male employees of at least 32 cents per hour. Minimum hourly wage rates for female employees: experienced employees 26 cents, helpers 22 cents, inexperienced hands 17 cents, with an average minimum wage for female employees of at least 25 cents per hour.

Paper Box (Uncorrugated Paper) Manufacturing Industry, Province of Quebec.—The Orders in Council for this industry (Labour Gazette, May and September, 1939) govern throughout the province of Quebec the manufacture of paper boxes, of wood-imitation boxes, partly made or completed with paper or cardboard and all other fibre, pulp or paper boxes made of uncorrugated material. Hours are limited to 50 per week, except with permit from the joint committee when 55 hours may be worked; overtime at time and one-quarter. The province is divided into two zones: zone I comprising the Island of Montreal and within 50 miles of it, and zone II the rest of the Province. Minimum hourly wage rates for male employees: on set-up boxes—scoreres 35 to 45 cents in zone I and 32½ to 42½ cents in zone II, cutters on knife 30 to 40 cents in zone I, 27½ to 37½ cents in zone II, end piece operators 30 to 38 cents in zone I and 27½ to 35½ cents in zone II, other operators 25 to 35 cents in zone I and 23 to 33 cents in zone II, other help 17 to 30 cents in zone I and 15 to 28 cents in zone II; on folding boxes—die makers 40 to 50 cents in zone I and 37 to 47 cents in zone II, assistant die makers and colt press feeders and apprentices 25 to 35 cents in zone I and 23 to 33 cents in zone II, cylinder press feeders 25 to 30 cents in zone I and 23 to 28 cents in zone II, cutters on knife and automatic glueing machine first class operators 30 to 40 cents in zone I and 27½ to 37½ cents in zone II, hand gluers 22 to 26 cents in zone I and 20 to 24 cents in zone II, cylinder box press operators and colt press operators 35 to 45 cents in zone I and 32½ to 42½ cents in zone II, other help 17 to 30 cents in zone I and 15 to 28 cents in zone II; for miscellaneous employees—shippers, truck drivers and maintenance and repairmen 30 to 40 cents in zone I and 27½ to 37½ cents in zone II, boiler men and machinists 40 to 60 cents in zone I and 37 to 57 cents in zone II. Minimum hourly wage rates for female employees: handwork (first class) 26 to 30 cents in zone I and 24 to 28 cents in zone II; machine operators, tiers, stitchers and gluers 22 to 30 cents in zone I and 20 to 28 cents in zone II, other help 17 to 22 cents in zone I and 15 to 20 cents in zone II

Manufacturing: Printing and Publishing

Printing Trades, Quebec.—The Order in Council extending the latest agreement in the printing trades in the judicial districts of Quebec, Beauce, Montmagny, Rimouski, that part of the St. François district not in the Montreal district and the towns of Rivière-du-Loup and Thetford Mines was summarized in the Labour Gazette, September, 1938, March and October, 1939. Establishments are divided into three classes: Class A covers daily newspapers and three other printing firms; class B, plants equipped with one or more composing machines, linotype or monotype, one or more cylinder presses working more than 20 hours per month and book binding establishments using motive power; class C, establishments having only non-automotive feeding presses and having neither composing machines nor cylinder presses. Hours in class A and class B establishments are 46 per week for day work; in class C, 48 hours for day work; for night work, 43 hours per week. Overtime is to be paid at time and one half; double time for work on Sundays and holidays except when work is part of regular shift. Weekly wage rates: journeymen typographers $30.50 in class A and $28 in class B; journeymen pressmen, stereotypers, bookbinders, rulers, photo engravers and photo-litho apparatus operators $26.50 in both class A and class B establishments; typographers, pressmen and bookbinders in class C, $22.08. Journeymen working on night shifts to receive $2 per week over the day scale.

Printing Trades, Chicoutimi, Lake St. John, Roberval and Charlevoix-Saguenay.—The Order in Council for these judicial districts (Labour Gazette, November, 1936) provides for both newspaper and job printing shops a 40-hour week. Overtime is at regular hourly wage rates for first eight hours in a week and time and one half thereafter. The minimum wage rate for journeymen typographers, pressmen, bookbinders and stereotypers is 52 cents per hour, with a 10 per cent reduction on this rate for work in municipalities of a population of less than 2,000.

Printing Trades, Montreal and District.—The Order in Council covering the printing trades with the exception of work on daily newspapers and of certain work in job offices (duplicating, etc.), in Montreal and district, which was summarized in the Labour Gazette, April, 1938 and October, 1939, includes in its jurisdiction the Island of Montreal and the area within 100 miles of its limits. It is divided into three zones, of which: Zone I, comprises the Island of Montreal and within 10 miles of its limits; Zone II, the municipalities of Three Rivers, Sherbrooke, Sorel,

St. Hyacinthe, Valleyfield, Joliette, Granby, Saint John d'Iberville, Laprairie, St. Jerome and Hull and within 2 miles of their limits, except establishments publishing and printing newspapers weekly or more frequently; Zone III the remainder of the district, and establishments owning and printing a weekly or semi-weekly newspaper outside the Island of Montreal.

Hours are 45 per week in zone I and 48 per week in zones II and III. Overtime is to be paid at time and one half for first three hours and double time thereafter; double time also for Sunday and holiday work. Minimum hourly wage rates for certain classes in zone I: compositors and machine keyboard operators, castermen, journeymen pressmen on rotary presses for paper rolls less than 36 inches wide, machines for power printing, die embossing, etc., flat bed cylinder presses of one colour, bindery journeymen, 70 cents during year 1938, 75 cents during 1939 and 80 cents during 1940; corresponding rates in zone II are 60 cents in 1938, 64 cents in 1939 and 68 cents in 1940; in zone III, 56 cents in the year 1938, 60 cents in 1939 and 64 cents in 1940. Minimum wage rates for journeymen pressmen on rotary presses, for paper rolls 36 inches wide or more, tubular rotary presses, rotary presses sheet fed, two colour rotary presses and perfecting presses are 4 or 5 cents higher than the above scale; for journeymen pressmen on platen presses and multigraphing machines and for feeders on all the above machines the rates are from 9 to 14 cents per hour lower than the above minimums. Minimum hourly rates for bindery girls are 28 cents in zone I, 24 cents in zone II and 23 cents in zone III.

Lithographing Industry, Province of Quebec.—This industry is under an agreement made obligatory throughout the province (Labour Gazette, April, 1938). Regular hours are limited to 45 per week for both day and night work, overtime is to be paid at time and one half for first three hours and double time thereafter; double time also for work on Sundays and holidays. Minimum hourly wage rates for day work: artists 85 cents for poster letterers, $1 for letterers and engravers (reproducers only), $1.10 for poster crayons, $1.20 for process (colour correctors); camera operators —process $1, commercial 56 cents; other operators 52 and 90 cents; transferrers 85 cents and $1, provers $1, stone and plate preparers 53 and 65 cents, journeymen pressmen from 60 cents to $1.35 varying with type of press, press feeders 32 to 60 cents varying with type of press and with experience; press helpers 30 cents.

Manufacturing: Miscellaneous Wood Products

Furniture Industry, Province of Quebec. —The Order in Council making obligatory the agreement in this industry throughout the province is summarized in the Labour Gazette, December, 1937, February and October, 1938, January and February, 1940. The province is divided into four zones: zone I is the Island of Montreal; zone II, municipalities of a population of 3,000 or more in the rest of the province except the county of Chicoutimi, the town of Rivière-du-loup, and establishments with 50 workers or less in any part of the province outside of zone I; zone III is the rest of the province; zone IV covers throughout the Province the manufacture of summer furniture made of wood assembled by nuts and bolts and using textiles in their manufacture. Hours are limited to 55 per week except for shippers, maintenance and repair men. Overtime is to be paid at time and one quarter.

Sash, Door, Wrought Wood and Casket Manufacturing, Jonquière and Kenogami.— The Orders in Council for this industry (Labour Gazette, July and November, 1939) apply to the towns of Jonquière and Kenogami and within three miles of them. Hours are limited to 60 per week with overtime payable at time and one quarter; work on holidays double time. Minimum hourly wage rates: foreman of shop 50 cents, journeymen 40 cents, labourers 30 cents, helpers 20 cents, stationary engineman in boiler house 35 cents, carter (with horse) 40 cents, truck driver 35 cents.

Manufacturing: Metal Products

Aluminum Smelting Industry.—This industry at Arvida and Shawinigan Falls is governed by an agreement for each of the two plants (Labour Gazette, November, 1937, July and October, 1939) and provides as regular hours for an 8 hour day, averaged over the regular working days of each calendar month. Overtime is limited but may be worked at regular hourly rates.

Minimum hourly wage rates for a few of the many classes of workers at Arvida; bricklayers 75 cents, machinists 65 cents, mechanics (general maintenance) 60 cents, millwrights 60 cents, millwrights' assistants 50 cents, electricians 60 cents, pipefitters 55 cents, carpenters 55 cents, head potmen's assistants 55 cents, potmen 49 cents, carbon changers 51 cents, cranemen 47 cents, analysts from 35 cents during first year to 45 cents during third year, construction labourers 40 cents, general labourers 45 cents.

Minimum hourly wage rates for a few classes of workers at Shawinigan Falls: head potmen's helper 54 cents, potmen 48 cents, tapper 52 cents, cranemen 48 cents, wire drawer 48 cents, pourer, catcher, electrician and millwright 46 cents, labourer and sweeper 40 cents.

Ornamental Iron and Bronze Indutry, Quebec and Montreal Districts.—For the Quebec city and district, workers in this industry are included in the agreement for this district in the construction industry. For the Montreal district, these workers were included until December 31, 1939, in the agreement for the building materials industry in the province, as noted below under "Manufacturing: Non-metallic Minerals, Chemicals, etc.".

Can, Container and Metal Utensil Manufacturing Industry.—The agreement made obligatory for this industry throughout the province was summarized in the Labour Gazette, November, 1938, January and December, 1939. Hours are 48 per week for all except stationary engineers and firemen who may work up to 54 hours at the regular rate. Overtime for mechanical employees is payable at time and one-half, for watchmen, truck drivers and service men at regular rate and for other employees at time and one-quarter; work on Sundays and holidays in most cases at double time. Minimum hourly wage rates for general employees—men (labourers, sweepers, janitors, truckers and general helpers) 30 cents during first six months, 32½ cents thereafter; other men employees (production operators, can pilers, packers, etc.) 32½ and 35 cents, shippers 40 cents; boys (16 to 20 years) from 20 cents for beginners to 26 cents after one year, female employees from 17 cents for beginners to 26 cents after one year. Minimum hourly wage rates for certain specialized employees—machine and tool setters 37½ cents for beginners to 42½ cents after one year, maintenance men on machines 40 to 45 cents, picklers, galvanizers and tinners' helpers 40 cents, galvanizers' and tinners' principal attendants 50 and 55 cents, building and maintenance men 50 cents, painters 45 and 50 cents, welders 50 cents, deep draw press operators 42½ and 45 cents. Minimum hourly wage rates for certain mechanical employees: mechanics skilled on a special machine or working on mechanical work but not qualified journeymen 50 cents, millwrights 55 and 60 cents, journeymen machinists including toolmakers, diemakers and general machinists 65 and 70 cents, journeymen lithographers 80 and 85 cents.

Manufacturing: Non-metallic Minerals, Chemicals, etc.

Building Materials Industry, Province of Quebec.*—The agreement for this industry includes both quarrying and cutting of granite, marble and stone throughout the Province and the ornamental iron and bronze industry in the Montreal district (Labour Gazette, June and September, 1939, and February 1940).

In the granite industry, maximum hours for granite cutters, apprentice granite cutters, letterers and blacksmiths in plants are 45 per week; in quarries, a 50 hour week; other trades, a 50 hour week; time and one-quarter for overtime. Hourly wage rates in the granite industry: granite cutters 70 cents on the Island of Montreal and in the cities of Quebec, Three Rivers and Sherbrooke and 60 cents in the rest of the Province; chief engineer 60 cents; blacksmiths, machine polishers, planer operators, mechanical engineers 50 cents; gang saw operators, hoist operators, carborundum machine operators, assistant engineers, travelling crane operators and firemen 45 cents; quarrymen, expert hand polishers after one year 40 cents, labourers 30 cents; apprentice granite cutters from 20 cents during first year to 50 cents during fourth year, apprentice polisher 25 cents during first year; letterers and designers on composition, whether journeymen granite cutters or not, 70 cents in cities and 60 cents in rural districts; sand blast operators (neither designers nor journeymen granite cutters) 50 cents; journeymen granite cutter working on surface machines 70 cents in cities and 60 cents in rural districts; watchmen $15 per week with no limitation of hours.

In the marble industry, which governs all operations in the marble, terrazzo and tile industry, etc., hours are limited to 44 per week for marble cutters and their apprentices and to 55 hours in the other trades, with time and one-quarter payable for overtime work. Hourly wage rates in the marble industry: marble cutters 60 cents, apprentice marble cutters from 20 cents during first year to 50 cents during fourth year; carborundum machine operators 50 cents, apprentice carborundum machine operators from 35 cents during first six months to 45 cents during third six months; terrazzo casters 55 cents;

*This agreement insofar as it applies to the ornamental iron and bronze industry expired December 31, 1939.

cranemen 40 cents; bed rubber face polishers 45 cents, bed rubber end polishers 35 cents; millwrights and sawyermen on gang saws, machine polishers (marble and terrazzo) 40 cents; compressor operators, saw setters, hand polishers and boxers 35 cents, helpers 30 cents.

In the stone industry, hours are limited to 44 per week for stone cutters and their apprentices, and 55 hours for the other trades, with time and one-quarter payable for overtime work. Hourly wage rates in the stone industry are: stonecutters 60 cents, apprentice stone cutters from 20 cents in first year to 50 cents in fourth year; planermen 45 cents, apprentice planermen 35 cents during first nine months and 40 cents during second nine months; carborundum machine operators 40 cents, stone turners 45 cents, sawyermen including gang saw operators 40 cents; cranemen 40 cents, helpers 30 cents; blacksmiths 50 cents. In the artificial stone industry, the hourly rates are 50 cents for artificial stone finishers, 40 cents for rammers and moulders, 30 cents for helpers, 60 cents for pattern makers, 30 cents for first year apprentices and 40 cents for second year apprentices.

For the ornamental iron and bronze industry,* that is the fabrication and erection of ornamental iron and bronze material, the agreement applied only to the Island of Montreal and neighbouring counties. Hours were limited to 44 per week, with time and one-half for overtime. Minimum hourly wage rates were: mechanics 66 cents, fitters 55 cents, helpers 45 cents, erectors 66 cents, erectors' helpers 50 cents. It was further provided that in the establishments governed, 17 per cent of employees were to receive 66 cents, 33 per cent 55 cents and 50 per cent 45 cents.

Paint Manufacturing Industry, Province of Quebec.†—This agreement which covers the paint industry throughout the province (Labour Gazette, January, 1938, and December, 1939) limits hours to 48 per week except for employees on continuous operations who may work a 56 hours week; overtime is payable at time and one-half. Minimum hourly wage rates are: in paint and lacquer factory, 45 cents for charge hands and shaders, 40 cents for mixers and mill men, 35 cents for labourers, fillers and mixer's help; in varnish factory, 65 cents for foreman varnish maker, 50 cents for kettle men, 40 cents for semi-skilled workers and 35 cents for labourers; in white lead and dry colour factory, 45 cents for charge hands and colour strikers and 37½ cents for labourers; in receiving, packing and shipping department, 40 cents for charge hands, 35 cents for other men, $20 per week for shipping clerks, stockkeepers, watchmen, time keepers, janitors, and firemen, 45 cents per hour for coopers, 50 cents for maintenance men (carpenters, electricians, plumbers, machinists); in linseed oil department, hydraulic press or expeller men 37½ cents, labourers 35 cents, maintenance men 50 cents; for female employees, 65 per cent of those employed to be paid 23 cents, 15 per cent 19 cents and 20 per cent 15 cents.

Transportation and Public Utilities: Water Transportation

Longshoremen, etc., Quebec, Sorel and Montreal.—At Quebec, agreements for longshoremen and checkers engaged in the loading and unloading of ocean going vessels (Labour Gazette, October, 1939)* provided for the following hourly wage rates: for longshoremen 70 cents for day work, $1.05 for night work; for checkers 55 cents for day work and 65 cents for night work.

At Sorel (Labour Gazette, August, 1937, July, September and November, 1938 and March, 1939) ocean, inland and coastal navigation are included in the agreement which provides for the following hourly wage rates: for loading grain 50 cents for day work, 60 cents for evening work and 70 cents for night work; for unloading grain out of lake and ocean steamers into the elevator 45 cents for day work, 48 cents for evening work and 55 cents for night work; for handling dynamite 60 cents; for general cargo 50 cents.

At Montreal, longshoremen engaged in loading and unloading ocean going vessels are governed by an agreement (Labour Gazette, December, 1938) which provides for an hourly wage rate of 77 cents for day work, 87 cents for evening work and 97 cents for night work. Shipliners on ocean going vessels (Labour Gazette, December, 1938) are paid in the Montreal harbour at the same rate as longshoremen, that is 77 cents for day work, 87 cents for evening work and 97 cents for night work. Checkers and coopers engaged on ocean going vessels in the harbour of Montreal (Labour Gazette, October, 1939)† were to be paid 64 cents per hour for checkers and 63 cents for coopers for day work, with 10 cents per hour extra for night work.

At Montreal, also, coal handlers engaged in the trimming and handling of coal in bulk cargoes in vessels (both ocean going and inland navigation) are governed by an agreement (Labour Gazette, June, 1938 and June, 1939)

* This agreement, insofar as it applies to the ornamental iron and bronze industry, expired December 31, 1939.

† This agreement expired December 31, 1939, but a request for the extension of a new agreement has been published.

* These agreements expired December 31, 1939.

† This agreement expired December 31, 1939.

which provides for an hourly rate of 92 cents for day work, $1.02 for evening work and $1.12 for night work.

Longshoremen employed in the Montreal harbour in the loading and unloading of vessels engaged in inland and coastal navigation (Labour Gazette, June, 1939 and February, 1940) are governed by an agreement which provides for an hourly rate of 50 cents for day work and 51 cents for night work.

Trade

Retail Store Employees, Quebec City.—This agreement applies to most of the retail trade except food, drug, jewellery and hardware stores (Labour Gazette, January, March, July and October, 1939, and January, 1940). Hours are 49¼ per week. Overtime: work over 49¼ hours up to 54 hours is to be paid at regular rates; after 54 hours at time and one-half; work on Sundays at double time. Minimum weekly wage rates for men clerks: 60 per cent to be paid at least $20, another 25 per cent $15, and the rest $8; corresponding rates for women clerks are $11.50, $9.60 and $7.25; deliverymen $18. Rates are also set for department heads, floor walkers, messengers, etc.

Dairy Employees, Quebec City.—The agreement for dairy employees in Quebec City and Levis (Labour Gazette, July, 1938, July and August, 1939) provides for hours of 57 per week for inside employees in winter and 60 per week in summer months and 65 per week for delivery work, with time and one-quarter for overtime. Minimum weekly wages: foremen $25; testers, ice cream and butter makers, shippers $18; general employees $15; salesmen on delivery $17; helpers on delivery $8 and $12; deliverymen $16.

Retail Store and Hotel Workers, Donnacona.—These workers are under an agreement (Labour Gazette, June, 1938 and June, 1939) which provides a 60-hour week for male employees and 54 hours for female employees, except those employed in offices and hotels; hours for office employees, 40 per week. Overtime is to be paid at time and one-half. Minimum wages for all except office and hotel employees: male workers from $6 per week for beginners with no experience to $12 after three years' experience; female workers from $6 for beginners to $8 after two years' experience. For female hotel employees $16 to $25 per month in addition to board, room and laundry.

Clerks and Bookkeepers, Jonquière, Kenogami, Arvida and St. Joseph d'Alma.—This agreement applies to commercial, industrial and financial establishments, lawyers' and doctors' offices, with certain exceptions (including employees of banks, insurance companies, railways, pulp and paper and aluminum industries) (Labour Gazette, July, 1939 and January, 1940). Hours are limited to 60 per week in industrial establishments, 44 per week in financial establishments and professional offices, 63 per week in commercial establishments, 70 per week in hotels, cafés, drug stores, gasoline stations, dairies and doctors' offices. Overtime is payable at regular rates. Weekly wage rates in financial and industrial establishments and professional offices are from $10 per week during first year for junior clerks, stenographers and typists to $25 during fifth year; bookkeepers, collectors and meter readers $30; others, such as accountants, managers, etc., $35 to $45. Weekly wage rates in retail commercial establishments: for clerks, from $7 during first year to $20 during seventh year and $22 after nine years; bookkeeper, collector, $20; assistant bookkeeper, stenographer and typist from $8 during first year to $15 during third year; cashier $15; manager $30; milk, bread and ice deliveryman $18, deliverymen's helpers, $7 to $12. Wages per hour in commercial establishments other than retail: manager $35, accountant and bookkeeper $25, accountant helper and cashier $18, clerks from $10 during first year to $18 during fourth year, deliverymen and salesmen $18.

Grocers and Butchers, Sherbrooke.—These workers are governed by an agreement (Labour Gazette, September and November, 1938) which fixes hours shops may be open and sets minimum wages of $8 to $15 per week for clerks, 25 cents per hour for extra helpers, and $10 to $12 per week for deliverymen, $5 or $6 for delivery on bicycles.

Retail Stores, Hotels and Food Manufacturing Workers, Magog.—The agreement which includes retail store clerks, bakers, butchers, soft drink manufacturing workers, hotel employees, etc. (Labour Gazette, October, 1938, and January and October, 1939) provides for a 60-hour week in manufacturing establishments, 65 in retail stores, 70 per week in hotels, restaurants, drug stores. Wages: in bakeries from 18 to 29 cents per hour, bakery delivery men 25 cents; in grocery and butcher shops, $15 and $20 per week for butchers, delivery men $15; in soft drink bottling plants $10.80 to $15; in ice storages, ice cutters 20 cents, ice pilers 25 cents per hour; in retail stores, clerks $8 for beginners to $15; seamstresses in clothing stores $12 for a 48-hour week; in hotels and restaurants 10 to 14 cents per hour.

Garages and Service Station Employees.—See below under "Service: Custom and Repair".

Service: Custom and Repair

Garage and Service Station Employees.—The agreement for Quebec City, Levis and neighbouring counties (Labour Gazette, June, October and December, 1938, February, April, May and June, 1939) provides for a 54-hour week in garages, repair shops, etc., and a 60-hour week in auto storage, gasoline stations, etc. except that in auto storage stations, gasoline stations, etc., which are open day and night, the night shift may work 72 hours per week. Wage rates for day hours in the cities of Quebec and Levis and within ten miles of them: man in charge of replacing parts $25 per week; mechanic, fitter, machinist, electrician, body man, wheelwright, blacksmith, welder, painter, and upholsterer 45 cents for class A journeymen, 42 cents for class B and 40 cents for class C; glazier and battery man, 40 cents; oiler and vulcanizer 35 cents, apprentices 15 to 30 cents; service men, gas sellers, washermen, etc. 25 cents per hour except for beginners who may be paid 20 cents per hour during first year. Wage rates for day hours in the rest of the territorial jurisdiction are 30 cents per hour for qualified workmen, 25 cents for assistants; for gasoline stations, etc. from 10 cents per hour during first year to 25 cents after three years. In garages, repair shops, etc., for work between 6 p.m. and 11 p.m., 10 per cent extra to be paid; for hours between 11 p.m. and 7 a.m., 50 per cent extra to be paid except where there is a double shift when the shift between 6 p.m. and 3.30 a.m. will be paid at 10 per cent over regular rates.

The agreement for Sherbrooke* (Labour Gazette, January, 1939) provides for the same hours as in Quebec City as noted above. Minimum hourly wage rates: journeyman electrician, blacksmith, machinist, mechanic, glazier, automobile painter, body man, upholsterer, radiator repairer, welder—first class 45 cents, second class 40 cents, third class 35 cents; apprentices to these trades from 10 cents during first six months to 25 cents during third year; service men 20 cents, apprentice service men 10 and 15 cents. For work between 7 p.m. and 11 p.m., these rates are 10 per cent higher, and between 11 p.m. and 7 a.m., 50 per cent higher.

The agreement for Montreal (Labour Gazette, December, 1939 and February, 1940) covers the Island of Montreal and neighbouring counties. Hours for journeymen (wheelwright, body worker, electrician, blacksmith, machinist, mechanic, joiner, painter, upholsterer, radiator repairer, welder, glazier) and their apprentices are 9 per day, a 54-hour week; hours for all other employees to be 60 per week for day work and 72 per week for

* To be effective until December 16, 1939.

night work. Minimum hourly wage rates for the Island of Montreal and Ile Jésus, and within 10 miles of them: journeymen body worker, upholsterer, radiator repairer, welder, 60 cents for first class, 50 cents for second class and 40 cents for third class; journeymen wheelwright, blacksmith, machinist, electrician, mechanic, joiner, glazier and painter 50 cents for first class, 45 cents for second class and 40 cents for third class; apprentices to above journeymen from 10 cents to 30 cents; service men 25 cents, apprentice service men 15 and 20 cents; wax polisher 30 cents; night watchman $15 per week. Minimum hourly wage rates in the rest of the territorial jurisdiction: journeymen body worker, upholsterer, radiator repairer, welder 45 cents for first class, 40 cents for second class and 35 cents for third class; journeymen wheelwright, blacksmith, machinist, electrician, mechanic, joiner, glazier and painter 43 cents for first class, 38 cents for second class and 34 cents for third class; apprentices to above journeymen 9 cents to 25 cents; service men 20 cents; apprentice service men 13 to 17 cents; wax polisher, 25 cents; night watchman $13. Overtime and evening work to be paid at 10 per cent over regular rates; night work at time and one half, except in case of shift work when only 10 per cent over regular rates is payable for shift from 6 p.m. to 3.30 a.m.

BLACKSMITHING.—An agreement for horseshoers and wheelwrights (LABOUR GAZETTE, December, 1937) effective in Victoriaville and the counties of Arthabasca, Nicolet, Richmond, Megantic, Wolfe and Drummond provides for qualified workmen a minimum of $12 per week, $2.25 per day; for apprentices $6 per week in first year, $9 during second year.

SHOE REPAIRING.—An agreement in Sherbrooke (LABOUR GAZETTE, July, September and November, 1938), provides for minimum weekly wage rates of $10 to $15 for experienced workmen with hours set during which shops may be open.

Service: Business and Personal

Barbers.—Agreements made obligatory by Orders in Council in the barber or the barber and hairdresser trades cover many districts. The hours vary in the several localities, each agreement specifying the time shops are to be open with periods off for each employee. Piece or job rates for each piece of work in the barbering, hairdressing, manicuring trades, etc., are specified in the agreements. For barbers employed by the week, the agreements specify a minimum weekly wage and in addition provide that barbers receive a certain percentage of their individual receipts above a specified amount taken in during the week. The following minimum wage rates for barbers and hairdressers are payable in the following centres and in their surrounding districts:—

MINIMUM WEEKLY WAGE RATES FOR BARBERS AND HAIRDRESSERS

(a) Towns of Chicoutimi, Arvida, Bagotville, Port Alfred, Grand-Baie, Jonquière, Kenogami and Ste. Anne de Chicoutimi.
(b) Journeymen barbers $12 during first year, $15 with two years' experience, plus 10 per cent of gross receipts.
(c) Or $20 without commission.
(d) And Cap de la Madeleine.
(e) Commission of 70 per cent of receipts over $20.
(f) And the county of Deux Montagnes, Isle Jésus and the municipalities of St. Therese de Blainville, Terrebonne, St. Janvier, Ste. Rose, Shawbridge, New Glasgow, St. Canut, Ste. Monique, Ste. Scholastique, Ste. Sophie de la Corne, St. Martin de Laval, St. Augustin, Ste. Anne des Plaines, St. Eustache and St. Hippolyte.
(g) Commission of 60 per cent of receipts over $25.
(h) 65 per cent of receipts over this amount.
(i) Counties of Joliette, Montcalm, l'Assomption and Berthier.
(j) Plus a commission of 33⅓ per cent of gross receipts in excess of $25.

Tavern Employees, Quebec City.—This agreement (Labour Gazette, June and July, 1938, and January, 1940) provides for a 60-hour week and time and one quarter for overtime, and for minimum wage rates of $19.50 for barmen, $17.50 for experienced waiters and $12 to $14 for beginners.

Funeral Undertakers, Montreal.—This agreement (Labour Gazette, January and March, 1939) provides for an average working week of 70 hours with overtime at time and one half. Minimum wage rates are: embalmers $25 per week if employed by the week or $5 for each embalming; extra employees 40 cents per hour, with a minimum of $1.50 per call; motor mechanics $25 per week; motor service men $15.60 per week during first year and $18 thereafter.

Shoe Shiners, Montreal.—An agreement* (Labour Gazette, February, 1939, and February, 1940) provided for a 69 hour week for shoe shiners, with a minimum wage rate of $8 per week for regular employees and of 15 cents per hour for extra employees.

Construction

Building Trades.—The agreements in the building trades in various sections of the province, which have been made obligatory by Orders in Council, have been summarized in the Labour Gazette, during 1934, 1935, 1936, 1937, 1938 and 1939. In some cases the agreements cover several counties as well as the principal cities and towns. The minimum wage rates for the principal trades, which were in effect at the end of the year 1939 under Orders in Council are shown in the accompanying table.

The agreements in many cases also specify minimum weekly rates, lower than the standard hourly rates, for workmen permanently employed on maintenance work for religious, charitable or educational institutions, hotels, office buildings and manufacturing or industrial establishments. These weekly rates are not shown in the table. Minimum wage rates for apprentices which are set in many of the agreements are also omitted from this table.

Regular hours are limited to 8 per day, 48 per week, except for Montreal, St. Johns and Hull where the regular weekly hours are 44. In some cases, however, it is permitted for labourers to work 9 hours per day, 50 or 54 hours per week. In most cases any overtime is to be paid at time and one-half, with any work on Sundays or holidays at double time.

* This agreement expired December 31, 1939.

ONTARIO

Industrial Standards Act

The Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, with amendments summarized in the issues of May, 1936, page 410, May, 1937, page 505, and May 1938, page 501 and June, 1939, page 574, provides that the Minister of Labour for Ontario, may, upon petition of representatives of employees or employers in any industry, convene or authorize an officer to convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force "during pleasure" or for the period, not exceeding twelve months, stipulated in the schedule, and thereupon such schedule is binding upon every employee and employer in such industry in the whole or any part of the Province designated by the Minister and is published in *The Ontario Gazette*. The Industry and Labour Board has authority to enforce the provisions of the Act and of the regulations and schedules. The following is a summary of the wage rates and hours in effect under these Orders in Council at the end of the year 1939:

Logging

LOGGING INDUSTRY.—Two schedules were in effect at the end of the year 1939 in the Thunder Bay district and the Timmins-Cochrane zone, while a third schedule in the Massey zone was revoked December 28, 1939. For the Thunder Bay and Timmins-Cochrane zones, for those working on a time rate basis, the minimum monthly rate for cookees and kitchen staff is $40 per month; for general bushmen and handymen helpers $42.50, for loaders, skidders' helpers, feeders of ties to and on to jack ladders, sorters and sluicers of pulpwood and ties, bull cooks and night watchmen $45; teamsters and skidders $50; teamsters driving four or more horses and barn bosses $55; truck drivers, $75; tractor drivers, $85; river drivers and boatmen on river driving and employees engaged in watering wood during the progress of the drive, $2.60 per day; camp and dam builders $2.50 per day. Similar rates for most classes were in effect until December 28, 1939, in the Massey zone (vicinity of Sudbury). Free board and lodging must be provided by employers to all workers employed on the time rate basis. For those employed on piece rates, the prices are set in all zones and the maximum amount which the employers may charge each employee working on piecework for his board is 85 cents per day in the Thunder Bay and Timmins-Cochrane zones and 75 cents in the Massey zone.

Manufacturing: Vegetable Foods

BAKING INDUSTRY.—One schedule is in effect (LABOUR GAZETTE, January, 1938), which provides for the city of Ottawa and immediately adjacent area a 56 hour week, with the following minimum weekly rates: $23 for cake makers, doughmakers, machine operators, bench hands and ovenmen; $20 for salesmen, drivers and checkers, $14 to $20 for helpers.

Manufacturing: Tobacco and Liquors

BREWING INDUSTRY, PROVINCE OF ONTARIO.—A schedule is in effect throughout the Province (LABOUR GAZETTE, July, 1935, and September, 1936), and provides for a regular working week, between April 1, and September 30, of 50 hours, except transport drivers whose week is 54 hours. Between October 1, and March 31, the regular working week is 45 hours. Time and one-half is to be paid for overtime work. Minimum weekly wage rates are: coopers $30; truck drivers $25; helpers $22.50; bottlers operating machines $24.50; other bottlers $22.50; watchmen, fermenting room and cold storage, brew house, washhouse $24.50.

Manufacturing: Textiles and Clothing

MEN'S, BOYS' AND YOUTHS' CLOTHING, PROVINCE OF ONTARIO.—The schedule which regulates this industry throughout the province (LABOUR GAZETTE, May, 1939), applies to the manufacture of men's and boys' pants, coats, vests and suits, but excludes work clothing, windbreakers, etc., and also excludes custom tailoring establishments with not more than four workers. Regular hours are limited to 44 per week, with time and one-half to be paid for overtime work.

Employees of "stock manufacturers" are divided by classes, as follows: class A, cutter or marker and head operator on coats; class B, finish presser; class C, pocket maker on coats, pocket maker on pants, trimmer, and edge taper; class D, 1st operator on vests, shaper, leg and bottom presser on pants; class

E, seamer on pants, top stitcher on pants, lining maker on pants, waistband operator on pants, fitter on coats, under baster, top collar baster, finish presser on vests and 2nd operator on vests; class F, lining maker, edge stitcher, joiner and pocket tacker, shoulder joiner, gorge sewer, fitter on vests, top presser on pants, chopper, alteration tailor and edge baster by hand; class G, edge presser, lining baster, facing baster by hand, collar setter, seam or under presser on coats, examining brusher and try-on baster, class H, shoulder and under-collar baster, seam or under presser on vests, a pocket maker and outside seamer on boys' longs, shorts and bloomers, a lining sewer and stitcher on boys' longs, shorts and bloomers, finish presser on boys' longs, shorts and bloomers and assistant trimmer; class I, sleeve maker, edge baster by machine and seam presser on pants; class J, button-hole maker by machine, fitter on pants, trimming maker on pants, separator of coats, separator of vests, ticket pocket maker, dart sewer, and canvas baster by hand; class K, facing and bottom tacker, special machine operator, lapel and collar padder, facing baster by machine, armhole serger, lining and back maker on vests, 3rd operator on vests, baster on vests, separator of pants, finisher on coats and canvas maker by hand; class L, canvas baster by machine, special machine operator on pants, button-hole maker by hand, finisher on pants and vests and button sewer; class M, bottom trimmer on pants, thread marker, canvas maker by machine, button-hole tacker, binder, cleaner and basting puller, pocket piecer on vests, general helper and busheller on pants.

Women's Cloak and Suit Industry, Province of Ontario.—The schedule made binding by Order in Council under the Act for the women's cloak and suit industry, that is the manufacture, for females, of cloaks, coats or suits and of woollen skirts of specified weight, was summarized in the Labour Gazette, March, 1939, February, 1938, and February, 1937.

Regular hours are limited to 40 per week, with provision for limited overtime in certain seasons at regular rates of pay. The minimum wage rates are the same as in the agreement which is in effect in the Province of Quebec and is summarized above under the Collective Labour Agreements Act, except that provisions relating to apprentices are not in the Ontario schedule.

Manufacturing: Miscellaneous Wood Products

Furniture (Wood) Industry, Province of Ontario.—Under the schedule made binding for this industry for the whole province (Labour Gazette, July, 1939, June, 1938, and April, 1937), the manufacure of furniture for houses, offices, schools, churches, theatres, institutions and public buildings, radio cabinets and frames for upholstered goods, is included. The province is divided into two

zones: zone B includes the cities of Toronto, London, Woodstock, Kitchener, Guelph, Hamilton, St. Thomas and Stratford and the areas adjacent to them; zone A is the rest of the province. Regular hours are limited to 47 per week, with overtime at time and one-half.

MINIMUM HOURLY WAGE RATES IN FURNITURE (WOOD) INDUSTRY

—	Zone A	Zone B
	cents	cents
Skilled workers	47	49
Semi-skilled workers	37	39
Unskilled workers	32	34
Average for above three classes	37	39
Beginners commencing under 21 years of age*—		
First year	18	18
Second year	21	21
Third year	24	24
Fourth year†	27	27

* The total of these employees may not exceed 20 per cent of the total number of employees in the plant except in plants in which more than half of the production consists of wooden chairs, in which the number of such employees may not exceed 25 per cent.

† After four years' experience such employees must be classed as skilled, semi-skilled or unskilled workers as shown above.

Soft Furniture Industry.—The schedule for this industry (Labour Gazette, April and December, 1939) is effective in the Toronto district and establishes a 44 hour week, with overtime at time and one-quarter. Minimum hourly wage rates are: upholsterers 70 cents; cutters, springers, operators, cushion fillers, finishers and trimmers 60 cents; labourers 45 cents.

Manufacturing: Miscellaneous Products

Jewellery Manufacturing Industry, Toronto.—The schedule for this industry at Toronto (Labour Gazette, November, 1939, and September, 1938) provides for a 44 hour week and for time and one-third for overtime. Minimum hourly wage rates are: casters, model makers, jewellers, press hands, stampers and polishers, 70 cents per hour except when working full time at hand made platinum work, for which they are to be paid at $1 per hour; setters who are not employed on a piece work basis and engravers 82½ cents per hour. A scale of piece rates is included for setters, as well as conditions and wage rates for apprentices.

Construction

Building Trades.—Schedules governing wage rates and hours in the building trades in various localities, which are in force under the Act, have been summarized in the Labour Gazette, during 1935, 1936, 1937, 1938 and 1939. The schedules apply to the immediately surrounding district as well as to the city named. The wage rates and hours for journeymen stated in these Orders are given in the accompanying table. Overtime is usually payable at time and one-half, with double time for work on Sundays and holidays. (Apprentices are to be employed according to the conditions of the Ontario Apprenticeship Act.)

Transportation and Public Utilities: Water Transportation

Coal Hoisting Industry, Toronto.—This schedule covers the work in Toronto usually performed by operating engineers, firemen and oilers in connection with the unloading of coal from boats and the handling of coal in or about dock warehouses or dock yards (Labour Gazette, September, 1938). It provides for a 54-hour week for engineers and a 60-hour week for firemen and oilers. Overtime in connection with the unloading of coal from boats or railway cars is to be paid at regular rate; other overtime at time and one-half. Minimum hourly wage rates are: engineers operating locomotive and crawler cranes with any kind of motive power 85 cents, engineers operating truck cranes with any kind of motive power 75 cents, firemen and oilers 55 cents.

Transportation and Public Utilities: Local Transportation

Taxi Drivers, Toronto.—These are covered by a schedule which provides for an 11 hour day and a 66 hour week, with overtime at 35 cents per hour (Labour Gazette, August, 1939). The minimum wage rate for all drivers is 25 per cent of the fares earned by the driver, with a minimum of $14 per week; the minimum rate for despatchers, $15 per week; for spare drivers 30 cents per hour with at least 5 hours' pay each day they are called to work.

Trade

Coal Drivers and Handlers, Toronto.—The storage, warehousing, transfer and delivery of all kinds of coal and coke in the Toronto district is covered by this schedule (Labour Gazette, November, 1939). Minimum hourly wage rates for boat trimmers, stackers on conveyors, truck drivers and teamsters are 55 cents, yardmen 50 cents, truck drivers' helpers 45 cents. For those working on piece rates, tonnage rates are set for delivery of coal or coke from the docks and from retail yards.

Service: Business and Personal

Barbering Trade.—The accompanying table shows minimum wage rates for barbers established by schedules under this Act. The rates there shown are for those employed full time, and in all cases minimum prices which must be charged for each operation are included in the schedule. Special provision for higher proportionate rates are stipulated for barbers working part time.

SASKATCHEWAN

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The Saskatchewan Act was summarized in the Labour Gazette, June, 1937, page 635, May, 1938, page 507 and June, 1939, page 581.

The following schedules have been made binding under this Act:—

Manufacturing: Vegetable Foods

Bakers, Moose Jaw.—A schedule for the baking industry in the city of Moose Jaw (Labour Gazette, December, 1938) provides for a 54-hour week and the following minimum weekly wage rates: foreman $30, doughman $25, ovenman and bench hand $23, shippers $18, bakery salesmen $18 or a specified commission on sales, whichever is greater.

Manufacturing: Miscellaneous Products

Sign Painting.—At Regina, a schedule for sign painters (Labour Gazette, May, 1939) provides for a 54-hour week except for apprentices for whom hours are 48 per week. Minimum wage rate for first class journeymen is 65 cents per hour, for second class journeymen 45 cents, helper 30 cents. Overtime pay is 80 cents per hour for first class journeymen, 50 cents for second class journeymen, helpers 35 cents.

Another schedule for sign painters at Moose Jaw (Labour Gazette, March, 1939), provides for a minimum wage for experienced sign painters of 65 cents per hour or 42 per cent of the amount taken in at the job prices specified in the schedule, whichever is greater; sign shop helpers to be paid a minimum wage of 35 cents per hour.

Construction

The following hours and wage rates were in effect under schedules for the following trades at the end of the year 1939; overtime to be paid at time and one half, with work on Sundays and holidays in most cases at double time.

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN SASKATCHEWAN

—	Minimum wages per hour	Hours per week
	$	
Regina—		
Carpenters	.75	44
Electrical workers	.90	44
Painters, paperhangers and decorators	.65	44
Painters (spray)	.80	44
Plumbers	.90	44
Sheet metal workers	.75	44
Sheet metal workers' helpers	.40	44
Moose Jaw—		
Carpenters	.70	44
Saskatoon and Sutherland—		
Plumbers	1.00	40

Transportation and Public Utilities: Local Transportation

Draying, Transferring and Storage Industry, Regina.—This industry includes public warehousing and the hauling or transferring of merchandise or household goods except if done by the regular employees of a manufacturer or merchant. It is covered by a schedule which provides for a 48-hour week and a minimum wage rate of $18 per week, and, for part time and overtime work, 40 cents per hour (Labour Gazette, July, 1939, and May, 1938.)

Service: Business and Personal

Shoemaking and Repairing, Regina.—For the city of Regina a schedule in effect (Labour Gazette, December, 1938), provides for a 52-hour week with a minimum wage of $18 per week or payment according to a specified minimum scale of piece work, whichever is greater; inexperienced employees from $7.50 during first six months to $13.50 during second year. Overtime to be paid at time and one-half.

Watch Repairing, Saskatoon.—A schedule for the jewellery industry at Saskatoon covers the alteration and repair of watches (Labour Gazette, January, 1940), providing for a 47-

hour week from January to September inclusive and 51 hours during October, November and December. The minimum wage rate for employees with at least five years' bench experience is $18 per week, plus 50 cents per hour for all overtime and all work on Sundays and holidays; for employees with less than five years' bench experience who are not apprentices, the minimum rate is $15 per week. A scale of minimum prices to be charged customers is also included.

Barbers and Hairdressers.—The minimum wage rates and hours shown in the accompanying table were binding by Orders in Council for these trades at the end of 1939. In all cases the minimum weekly wage is either the stated minimum rate or a percentage of the proceeds taken in by the barber or beauty parlour employee whichever is greater. The hours are those for which the minimum wage rate is payable. In most cases overtime is payable at 30 or 35 cents per hour.

ALBERTA

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The text of the Act was published in the Labour Gazette, June, 1935, page 534, with amendments noted in the issues of June, 1936, page 501, June, 1937, page 640, June, 1938, page 663 and June, 1939, page 567. The following notes give information as to schedules of wages and hours in effect at the end of 1939.

Agriculture

Honey Producing Industry.—In the Coaldale, Taber, Vauxhall and the Lethbridge Zones hours for the honey producing industry are limited to 9 per day for male employees and 48 per week for female employees with overtime payable at regular rates (Labour Gazette, April, 1939, and June and September, 1938). Minimum wages per day are: for field work—$2.50 and $2.70 for men; for extraction work including packing and shipping—$2.25 and $2.70 for men, $2 and $2.25 for women, and $1.80 for boys and girls over 16 and under 21 years. For monthly employees, the minimum wage in addition to board and room is $30 for men with less than one year's experience and $50 for those with more experience. In addition, bonuses are provided for if the average production exceeds a certain amount and the price of honey is not less than a certain amount.

Logging

Lumber and Sawmill Industry.—In the Flatbush, Chisholm, Spurfield and Faust Zones, a schedule (Labour Gazette, January and June, 1939) regulates wages and hours for logging, railway tie contractors, sawmills, planing mills and box factories. Hours are 60 per week for all workers except cooks, teamsters, millwrights, river drivers and certain other classes. Minimum monthly wages to be paid in addition to board and lodging include: $50 or $75 for cooks; $50 for blacksmiths and engineers; $45 for truck drivers; $40 for edgermen; $35 for cross-cut filers, tractor drivers and canters; $32.50 for scalers or tallymen; $30 for top loaders, tail sawyers, trimmermen, handymen and barn bosses; $27 for sawyers; $26 for teamsters, skidders, roadmen, swampers, bull cooks, cookees, labourers, shipping and yardmen; $50 for planermen.

In the Whitecourt Zone (Labour Gazette, October, 1939), a schedule provides for similar wages and conditions as in the Flatbush, Chisholm, Spurfield and Faust Zone, as noted above.

In the village of Rocky Mountain House, a schedule (Labour Gazette, August, 1939) provides for a 10-hour day and 60-hour week with certain exceptions, and for the following minimum wages: $150 per month for millwrights; 28 cents per hour for machine

operators, lumber graders and shippers; 25 cents per hour for teamsters, truck drivers, labourers, lumber pilers, lumber loaders and yard men; $2.50 per shift for night watchmen.

Manufacturing: Vegetable Foods

Baking Industry.—Schedules were in effect for bakers in the Edmonton and Calgary districts at the end of the year. For Edmonton (Labour Gazette, January, 1940 and December, 1938), hours are 52 per week, with overtime at time and one-half, and minimum wages $26 per week for doughmen, ovenmen and bench hands, $19 for helpers and truckers, $20 for shippers, $13.50 for cake wrappers and $16 for bread wrappers. For Calgary (Labour Gazette, January, 1940), hours are 50 per week, with overtime at time and one-half; and minimum wages $27 per week for doughmen and ovenmen, $25 for bench hands, $19 for helpers.

Manufacturing: Miscellaneous Wood Products

Sawmill, Planing Mill and Box Factory Employees.—These are included in the schedules noted above under "Logging."

Construction

The following hours and wage rates were in effect under schedules for the following trades at the end of the year 1939. The usual provision is time and one-half for overtime and double time for Sundays and Holidays.

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN ALBERTA

* Piece work also and special rates for certain classes of work.

Transportation and Public Utilities: Local Transportation

Taxi Drivers.—At Edmonton, a schedule (Labour Gazette, September, 1939) provides for an 11-hour day, a 6-day week and a 66-hour week. Minimum wage rates during winter months are $15 per week plus 25 per cent commission on all receipts in excess of $60; for summer months, $12.50 per week plus 25 per cent commission on all receipts in excess of $50 per week. At Calgary (Labour Gazette, February, 1939) hours are also 66 per week. The minimum wages are $13.50 per week of 66 hours plus 25 per cent commission on all receipts in excess of $54 per week. At Banff National Park (Labour Gazette, July, 1939) hours for taxi and bus drivers are 11 per day. Days of rest to be provided on the basis of one day in seven. Minimum wages are $2.35 per day plus a bonus of 4 cents per mile to drivers of touring cars and of 5 cents per mile for bus drivers for all mileage in excess of 60 miles per day.

Service: Custom and Repair

Garage and Service Station Employees, Calgary.—These workers are governed by a schedule (Labour Gazette, April, 1939) which provides for a 9-hour day, with a half day off every second week, making the weekly hours 54 and 49 on alternate weeks; overtime at time and one-half. Minimum wage rates are: 70 cents per hour for first class mechanics, 60 cents for second class mechanics, $13.50 per week for non-mechanical service station employees, 50 cents per hour for washmen and greasemen, 33⅓ cents for night watchman. Mechanics always engaged in the repairing or reconditioning of used cars may be paid 7½ cents per hour less than the above rates.

Service: Recreational

Bowling Alley Employees.—At both Edmonton (Labour Gazette, October, 1939, April and September, 1938) and Calgary (Labour Gazette, October, 1939, February and September, 1938), hours for pinsetters are restricted to 54 per week with wages based on 2½ cents per line for five pins or duck pins and 3½ cents per line for ten pins.

Department of Trade and Industry Act

Under this Act and its amendments (LABOUR GAZETTE, April, 1934, page 305, May, page 442 and November, page 986; June, 1936, page 502, November, page 997; June, 1938, page 634), this department may call a conference of any trade to draw up certain trade standards including minimum wages and hours. If such code is approved by a majority of persons in the trade or by persons owning over 50 per cent of the aggregate capital invested, they may be made binding by Order in Council on everyone carrying on the trade. Although a number of such codes were made binding only one includes provisions as to wages:

Service: Business and Personal

BARBERS, PROVINCE OF ALBERTA.—This code which came into effect February 15, 1937, and was amended from February 27, 1937, August 15, 1938 and August 21, 1939 (LABOUR GAZETTE, October, 1938, page 1093 and October, 1939, page 999) applies to barbers throughout the province. It is provided that a journeyman barber employee receive "60 per cent of his gross weekly receipts for services rendered," but in no case less than $15 per week or $3.50 for Saturday or $3 for any other week day; part time work must be paid at 40 cents per hour.

Maximum Hours of Work as fixed by Legislation and Administrative Action

Dominion Legislation

For the most part hours of work in Canada are regulated by provincial legislation. Limitations imposed by the Dominion affect only Dominion Government employees, persons employed on Dominion public works or in the execution of contracts for Government works or supplies.

An Order in Council of 1930, provided that unless it was against the public interest the hours of work of any person employed by the Dominion Government who was at that time required to work more than eight hours a day should be reduced to eight with a half holiday on Saturday.

On construction work undertaken by the Government of Canada, either directly or by contract, the Fair Wages and Hours of Labour Act restricts working hours to eight a day and 44 a week provided such works are not declared exempt from the operation of the Act by the Governor in Council. Unless excepted by statutory authority or by agreement, works towards the cost of which a grant is made by the Dominion are governed by similar conditions laid down in an agreement between the Dominion and the provincial or municipal authority or private corporaton to which financial assistance is given. In contracts for equipment and supplies for the Dominion Government the working hours of persons employed in the manufacture of such goods are to conform to the custom of the trade in the district or where there is no custom as to hours, the Minister of Labour may determine fair and reasonable hours.

No action has been taken under the section of the Railway Act which allows the Board of Transport Commissioners to limit the hours on duty of railway employees within the legislative jurisdiction of the Dominion.

93444—13

Provincial Legislation

Provincial legislation includes laws concerning working conditions among which are hours of labour in certain classes of undertakings such as mines, factories and shops and for certain occupations such as drivers of motor vehicles and elevator operators, legislation in Alberta, British Columbia, Nova Scotia and Quebec, dealing only with hours of work and statutes in Alberta, Manitoba, New Brunswick, Nova Scotia, Ontario, Quebec and Saskatchewan, under which Orders in Council may limit hours of labour under certain conditions.

The British Columbia Female Minimum Wage Act, the Minimum Wage Acts of Manitoba and Saskatchewan and the Fair Wage Act of Quebec give the administrative authorities power to limit working hours, in some cases subject to the approval of the Lieutenant-Governor in Council.

Where, under the authority of minimum wage laws, hours in excess of the ordinary maximum are permitted to be worked or where minimum rates of wages are declared to apply to a specified number of hours and longer hours are worked, it is usually stipulated that higher rates must be paid for the additional hours. Such punitive overtime rates tend to restrict working hours. The regulations for the payment of overtime are indicated above in the sections dealing with minimum wage legislation in each province.

Maximum hours of labour fixed by Order in Council under the Quebec Collective Labour Agreements Act and the Industrial Standards Acts of Alberta, Nova Scotia, Ontario and Saskatchewan are shown earlier in this section beginning on p. 160. Restrictions placed on hours under the Manitoba Fair Wage Act are indicated on p. 150.

The table below shows the maximum hours of work fixed by provincial laws for employment in mines, factories and shops but it does not cover the legal restrictions imposed on working hours in some classes of manufacturing establishments and shops by orders in council under the Quebec Collective Labour Agreements Act or the Industrial Standards Acts.

STATUTORY MAXIMUM HOURS OF WORK PER DAY OR PER WEEK IN MINES, FACTORIES AND SHOPS IN CANADA

—	N.S.	N.B.	Quebec	Ontario	Manitoba	Sask.	Alberta	B.C.	Yukon
MINES—									
Coal:									
above	.....	.....	.....	.....	.....	8 unless agreed otherwise	9, 54 8, —	8 8	
below	8	8	.....	.....	.....				
Metal:									
above	.....	.....	.....	.....	.....	.....	9, 54	8	8 unless paid at overtime rate
below	.....	8	8 for boys under 18	8 in Northern Ontario	.....	.....	8,—	8	
FACTORIES	.....	10, 60*	10, 55†	10, 60†	8, 48**	48†	9, 54 males 8, 48 females	8, 48	.....
SHOPS	.....	.....	60‡	10, 60†	8, 48**	.....	As for factories	8, 48‡‡	.....

*Females only.
†Females and boys. Applies to boys under 18 in Quebec and under 16 in Ontario and Saskatchewan.
‡Females and boys in towns of 10,000 or more. An order of the Fair Wage Board fixes a maximum of 72 hours for males over 18, and 55 hours for females and for boys under 18, in industrial and commercial establishments in cities and towns.
**Females, and boys under 18, in factories, 17 in shops. Adult males in factories in Greater Winnipeg may not work more than 48 hours in a week unless paid a minimum of 30 cents an hour for extra hours.
‡‡In Vancouver, Victoria and their environs, but 3 extra hours may be worked on Saturdays in other parts of the province provided that 48 is maximum for week.

Hours of Work Acts

The British Columbia Hours of work Act of 1923, as revised in 1934, sets a maximum limit of eight hours in a day and 48 in a week for persons employed in mining, manufacturing and construction and in such other industries or occupations as may be added by regulation. Up to the present, the following have been brought within the Act: barbering, baking, catering, drug stores, road transport and the taxicab industry, hotel clerks and elevator operators and the mercantile and soft drinks industries. The Board of Industrial Relations may make exemptions and add other industries.

The Alberta Hours of Work Act, 1936, fixes an eight-hour day and 48-hour week for female employees and a nine-hour day and a 54-hour week for male workers. It applies to any industry, trade or occupation except farming and domestic service, unless exempted by regulation. It does not affect the Mines Act which fixes an eight-hour day for underground workers.

In both Alberta and British Columbia, persons holding confidential, supervisory or managerial positions are exempt from the hours limitation and by regulation longer hours are provided for some classes of workers in the lumbering industry. In the latter province, the fruit and vegetable industry, the seasonal manufacture of boxes and shooks, lithographing during the summer months if competent help is not available, and fish canneries are declared exempt from the restriction on hours of work. Regulations in British Columbia permit a fixed number of hours in excess of the maximum established by the Act for shops during the Christmas season and in smaller towns and villages as well as for taxicab drivers in the Victoria district, retail florists, men delivering bread and milk, employees in drug stores and for certain classes of workers in industrial undertakings such as men engaged in emergency repairs or in shipping goods under unusual conditions.

In 1939, Alberta allowed seasonal exemption from the daily and weekly limits for workers on irrigation projects under the Water Resources Act from April 1 to October 1 and orders under the section of the Act providing for special regulations for continuous industries limit to eight a day and 48 a week the hours for men engaged in drilling oil wells in the Turner Valley but where drilling operations are at a critical point the Board has permitted

workers on a shift to continue work for three consecutive weeks provided they are given three days off at the end of that time.

In Quebec and Nova Scotia there are statutes enabling the administrative authorities to limit hours of work. The Quebec Act, enacted in 1933 with a view to making possible the employment of more workers, gives the Lieutenant-Governor in Council power to limit the number of hours per day or per week during which a workman may be employed at manual labour. It applies neither to agriculture nor to industries or undertakings subject to competition from other countries or provinces. Orders in council under this statute limit working hours in the building trades throughout the province, one order applying to each of the three divisions into which the province is divided for purposes of factory inspection. Hours were limited at first to 40 a week or 36 where a two-shift system was in effect but at the present time maximum hours are eight a day and 48 a week in the Quebec and Eastern Townships Division, except on small jobs, and, in the Montreal Division, eight a day for skilled workers and nine for unskilled. Two shifts, or in the Eastern Townships Division three shifts, of eight hours each may be worked or of six hours each in the Montreal Division. The shift system is compulsory from May 1 to October 1 on works costing more than $20,000 which are undertaken for a municipal or school corporation or for parish authorities or the provincial Government or on works, half the cost of which is borne or guaranteed by the provincial Government or a municipal corporation or by both.

Hours of persons working in beauty parlours and shoe repair shops on the Island of Montreal are also limited under this statute. Maximum hours in shoe repairing are fixed at 64 and in beauty parlours at 55 a week. For urgent work in shoe repairing the inspector may allow overtime up to two hours a day and six a week but no overtime may be permitted on Saturday. The hours of work are to fall on the first four days of the week between 8 a.m. and 7 p.m., on Friday between 8 a.m. and 9 p.m. and on Saturday between 8 a.m. and 11 p.m.

The Nova Scotia Limitation of Hours of Work Act of 1937 provides for a board of adjustment with power to determine the maximum working hours in industrial undertakings, including mines and quarries, manufacturing and construction and stipulates that a weekly rest-day must be given all workmen employed in industrial undertakings. No administrative board has been appointed and no orders made under the Act.

Maximum Hours under Minimum Wage Laws

The first Minimum Wage Acts in Alberta, British Columbia, Manitoba and Saskatchewan gave the Board power to limit hours of labour notwithstanding the provisions of any existing statute. In other provinces the Board could only specify the number of hours to which the minimum rates applied but in both cases overtime rates could be established. In Ontario the present Minimum Wage Act specifies the hours to which the rates apply and in New Brunswick and Nova Scotia the Board may declare the minimum rates to apply to a certain work period and, as in Ontario, fix a rate for overtime. The Fair Wage Board of New Brunswick has made orders applying only to particular establishments.

In Alberta, since the enactment of the Hours of Work Act, 1936, applying to all employment except farm work and domestic service, there has been no authority under the Minimum Wage Acts to limit hours. In British Columbia where the Hours of Work Act, 1934, applies only to industrial undertakings, wholesale and retail stores, hotels and restaurants and other designated workplaces or occupations, the Female Minimum Wage Act gives power to the Board of Industrial Relations to limit hours but no such authority is granted by the Male Minimum Wage Act. In Manitoba, Saskatchewan and Quebec, maximum hours of work may be fixed under the minimum wage law. Since the Saskatchewan Act was made applicable to men in 1936, the orders under it have been revised and maximum hours are no longer fixed but there are punitive rates of wages for hours in excess of the number to which the minimum rates apply. The Quebec Fair Wage Board in Order 4 limits to 72 a week the hours of male workers in all the industrial and commercial establishments to which it applies throughout the province. Maximum working hours of women and boys under 18 are fixed by the Quebec Industrial and Commercial Establishments Act as stated below. The restrictions imposed under the minimum wage laws of British Columbia and Manitoba are noted under the class of workplace to which they apply.

The regulations as to payment for overtime beyond the number of hours to which the minimum wage is declared to apply or for hours in excess of the ordinary legal maximum are summarized in the earlier part of this Appendix.

Public Works

In Alberta and British Columbia, hours of labour on public works are limited by the Hours of Work Acts. In Manitoba and Ontario special statutes govern labour conditions on public works.

Under the Manitoba Fair Wage Act of 1916, the Minister of Public Works is authorized to establish maximum hours for persons employed on all works of construction contracted for by the provincial Government. The maximum hours fixed by the regulations vary with the occupation from 44 to 48 per week, except for teamsters who have a maximum working week of 54 hours. The Ontario Government Contracts Hours and Wages Act, 1936, limits hours on public works and works subsidized by the provincial Government to eight a day and 44 a week. Exceptions may be made by the Government.

In Quebec, by an order in council of April 24, 1929, as amended on October 6, 1932, the Minister of Public Works and Labour may determine "fair and reasonable" hours of labour on construction works for the Quebec Government. In other provinces, by order in council or by resolution of the Legislature "a fair wages" policy is applied to public works and wages and hours are usually determined according to the custom of the trade in the locality.

An Ordinance of 1917 establishes an eight-hour day except in emergency for persons employed on public works in the Yukon Territory.

Mines

Mining for metals or non-metallic minerals is carried on in all the provinces but Prince Edward Island as well as in the Yukon Territory and there is coal mining in Alberta, British Columbia, New Brunswick, Nova Scotia and Saskatchewan with a very small production in Manitoba and the Yukon. Wherever coal is mined the working day underground is limited by law to eight hours but under all the laws longer hours may be worked in emergencies or for repair work or at a change of shifts. In Alberta and British Columbia the eight-hour period includes time spent going to and from the working face. In Nova Scotia and New Brunswick the limits apply only to time spent at the place of work. Workers above ground about coal mines have a statutory eight-hour day in British Columbia and Saskatchewan and a nine-hour day and 54-hour week in Alberta. In Saskatchewan longer hours either above or below ground may be worked by agreement between the workman and employer.

In metal mining in Northern Ontario, except where the number employed in a shift is six or less, and in New Brunswick, the law provides for an eight-hour day for underground workers, the time to be reckoned in each case from the time the man reaches his place of work until he leaves it. In Ontario, a Saturday shift may work longer hours for the purpose of avoiding work on Sunday, of changing shifts or of giving any of the men a part holiday. In New Brunswick any one required to work longer hours in an emergency must be paid for the extra time at the regular rate. In British Columbia the working hours of those employed above ground as well as those below ground are limited to eight a day as are also the hours of men employed in or about a smelter or mineral-separation plant except when shifts change. In Alberta, the eight-hour limit applies to underground workers in any mines and for those above ground the statutory maximum is nine hours a day and 54 a week as about coal mines. In Quebec, there is no restriction on the hours of adult males in mines except in iron oxide mining where, under the Collective Labour Agreements Act, the workmen have a 48-hour week. Boys under 17 may not be employed below ground in any mine in Quebec for more than 48 hours in six days. In the Yukon miners may not be employed more than eight hours in a day and 56 in a week unless payment is made at the overtime rate. In Nova Scotia, there is no statutory regulation of hours of work in mines other than coal mines. Except in Alberta, British Columbia, Saskatchewan and the Yukon there is no legal restriction on hours above ground.

Factories

Early factory legislation in all provinces except Prince Edward Island limited hours of women and young persons, and in Alberta the Factories Act of 1926 provided for a nine-hour day and 54-hour week for both sexes. In Nova Scotia the clause fixing maximum hours was later dropped while in Alberta and Manitoba the power to limit hours given by the Minimum Wage Acts was exercised to reduce the maximum fixed by the factory law in so far as women were concerned. When the Alberta Hours of Work Act was passed in 1936 it maintained the existing conditions of a maximum of nine hours a day and 54 a week for male workers and eight hours a day and 48 a week for women and girls. In British Columbia the Hours of Work Act of 1923 extended to men and boys the eight-hour day and 48-hour week provided for women and girls by the Factories Act of 1908. In New Brunswick and Ontario the 10-hour day and 60-hour week fixed in the first factory laws for women and girls, and in Ontario also for boys under 16, have not been changed but in Quebec the weekly limits for women and

boys under 18 were reduced in 1930 to 55. In these three provinces the daily limit may be exceeded for the purpose of arranging for a shorter work day on one day of the week. Order 4 under the Quebec Fair Wage Act fixes a maximum of 72 hours a week for male workers over 18 in industrial and commercial establishments throughout the province. In Saskatchewan there is a 48-hour week for women and boys under 16 in factories.

In New Brunswick, Ontario, Quebec and Saskatchewan, longer hours may be worked by special permission of the factory inspector in case of any accident preventing the working of the factory, or of any other occurrence beyond the control of the employer which prevents the machinery being regularly worked or where the custom or exigencies of the trade require longer hours, but the Acts stipulate that in such cases the hours of work of the classes of workers to which the limits apply shall not exceed a fixed number: in New Brunswick, 13½ hours a day and 84 a week; in Quebec, 12 a day and 65 a week; and in Ontario and Saskatchewan, 12½ a day and 72½ a week. In no case may permits for hours in excess of the ordinary maximum be given for more than 36 days in a year. Under these statutes, night work is prohibited for the same classes of workers by fixing the period in which the hours of work must fall: in New Brunswick between 6 a.m. and 10.30 p.m.; in Quebec and Ontario between 6 a.m. and 9 p.m. and in Saskatchewan between 7 a.m. and 10 p.m. Normal working hours may not be later than 6 p.m. in Quebec or 6.30 p.m. in Ontario or earlier in Ontario than 7 a.m.

Under all the factory laws except those of Alberta and Quebec, an hour must be allowed for a noon meal and if work is prolonged by special permission of the inspector after 7 p.m., at least 45 minutes, or in New Brunswick one hour, must be given for an evening meal. In Quebec the inspector may direct that an hour be given for the noon meal and, by regulation, half an hour must be allowed for an evening meal if work goes on after 6 p.m.

In Ontario since 1932 and Quebec since 1935, with permission from the chief inspector, women and young persons may be employed in two shifts of eight hours each, both shifts to fall between 6 a.m. and 11 p.m. and each shift to have one hour for a meal.

In Manitoba under the Minimum Wage Act, the maximum hours that may be worked by women and boys under 18 in factories are 8 in a day and 48 in a week except with a permit from the provincial Bureau of Labour.

Orders in Council in Quebec under the Collective Labour Agreements Act and in Alberta and Ontario under the Industrial Standards Acts fix maximum hours for workers in certain classes of factories. These are indicated in the section of this appendix devoted to these statutes.

Shops

As regards shops, hours of work are limited by statute for all classes of workers only in Alberta and British Columbia. In both these provinces, shops are within the scope of the Hours of Work Acts.

In Ontario there is a maximum 10-hour day and 60-hour week for women and boys under 16. In Quebec the Industrial and Commercial Establishments Act fixes a 60-hour week for women and boys under 18 in cities and towns of 10,000 or more but this restriction appears to be superseded by Order 4 under the Fair Wage Act limiting hours for these classes to 55 a week in all parts of the province. Under the same order, the maximum work-week for men in retail and wholesale stores in Quebec is 72 hours. In Manitoba a minimum wage order limits hours of work of women and boys under 17 in shops to 8 a day and 48 a week.

Except in Alberta and Ontario, provision is made for a limited amount of overtime, particularly during the Christmas season but in Manitoba no person under 17 may work overtime. In British Columbia regulations permit employees in shops outside of Victoria, Vancouver, Burnaby, Esquimalt, Oak Bay and Saanich to work three additional hours on Saturday and on the day before a holiday occurring on Saturday but the weekly hours may not exceed, 48. Exemptions from the maximum hours are permitted for certain occupations such as druggists and florists.

The Ontario Act prohibits women and boys under 16 being employed in shops before 7 a.m. or after 11 p.m. With respect to boys, this provision is modified by the Adolescent School Attendance Act which forbids any employment, except with a permit, of children from 14 to 16 years of age between the hours of 8 a.m. and 5 p.m. In Nova Scotia, the Children's Protection Act prohibits the employment in shops of girls under 16 and boys under 14 for more than eight hours or more than four hours on Saturday.

All the provinces except Prince Edward Island have statutes which may indirectly affect hours of work in shops by permitting certain municipal councils to make by-laws requiring the closing of shops at a certain hour. In Quebec the Early Closing Act applies only to cities and towns while in other provinces the councils of cities, towns and villages or, in some cases, of counties or townships have power to make such a by-law. In Quebec, also, the Act stipulates that the hour fixed for closing shall not be earlier than 6 p.m., but in the other provinces the by-law

may provide for a half-holiday on one day of the week as well as for a fixed closing hour on other days.

In British Columbia and Saskatchewan there is special provision for a weekly half-holiday for shops. In Saskatchewan the Act applies only to cities and fixes Wednesday unless a by-law appointing another day of the week is passed. The Saskatchewan Weekly Half-Holiday Act applies only to shops in cities and requires them to be closed on Wednesday afternoons from April 1 to August 31 unless the city council has passed a by-law for a half holiday on another day or for a longer period. In all cases, provision is made for exempting news agents' and tobacconists', shops, those where fruits and perishable foods, are sold and some others.

Bakeshops

Large bakeries not selling at retail on the premises are probably everywhere within the scope of the Factories Acts. They are under the Hours of Work Act in Alberta, also in British Columbia where an exception is made for delivery-men who may work 54 hours a week. In Manitoba the minimum wage order governing factories apparently covers bakeshops, women and boys under 18 having an eight-hour day and a 48-hour week being fixed for all. The Ontario Factory, Shop and Office Building Act fixes a maximum of 56 hours for adult male employees in bakeshops allowing overtime in certain cases. Orders in Council under the Quebec Collective Labour Agreements Act and the Industrial Standards Acts of Alberta and Saskatchewan govern hours of labour for bakers in some cities.

Barber Shops and Beauty Parlours

There is no general legal limitation of hours of labour in barber shops and beauty parlours in Nova Scotia, New Brunswick or Prince Edward Island but early closing by-laws in the first two provinces may restrict working hours in some places.

In Alberta the Hours of Work Act applies to both. Barber shops in British Columbia are within the Hours of Work Act and an Order under the Female Minimum Wage Act fixes maximum working hours in beauty parlours at nine a day and 44 a week. A Manitoba Minimum Wage Order provides that no female or boy under 18 may be employed in a beauty parlour for more than 10 hours in a day or 48 in a week except with a permit from the Bureau of Labour. Hours in barber and beauty shops in Manitoba may be fixed under the Fair Wage Act as amended in 1938 but no orders have been made.

In Ontario, working hours in beauty shops may, since 1939, be regulated to some extent by municipal early closing by-laws as they have been in barber shops in Ontario and some other provinces. In many Ontario cities and towns schedules of wages and hours under the Industrial Standards Act apply to barber shops but in most cases the only regulation of hours is in accordance with local by-law. In Quebec under the Limitation of Hours Act, employment in beauty parlours on the Island of Montreal is restricted to 55 hours in a week between 9 a.m. and 7 p.m. except on Saturdays when the time may be extended to 9 p.m. In other cities and towns agreements under the Collective Labour Agreements Act fix hours varying from 55 to 59 a week. In Saskatchewan barbers and hairdressers in several towns have their hours of work limited under the Industrial Standards Act.

Hotels and Restaurants

In New Brunswick, Nova Scotia, Prince Edward Island and Saskatchewan, hours of labour in hotels and restaurants are not restricted by statute or regulation.

In Alberta and British Columbia, the Hours of Work Acts apply to these places. In British Columbia hotel clerks and persons employed in public dining rooms and the service connected therewith have an eight-hour day and 48-hour week but an order under the Female Minimum Wage Act allows women in hotels and restaurants to work in emergencies up to 10 a day and 52 a week. In resort hotels the maximum work-week for women and girls is 54 hours. An order under the Manitoba Minimum Wage Act limits the hours of all workers in restaurants and of girls, women and boys under 18 in hotels to 10 a day and 48 a week with specified rest periods but cooks may be required to work up to 54 hours a week.

Working hours in hotels in Ontario are not regulated but restaurants are under the Factory, Shop and Office Building Act and females and boys under 16 have a maximum of 10 hours in a day between 7 a.m. and 11 p.m. and a 60-hour week unless a special permit is obtained from the inspector. By Order 4 of the Quebec Fair Wage Board in hotels and restaurants hours are limited to 55 a week for women and boys under 18 and to 72 a week for men.

In Alberta, British Columbia, Manitoba, Ontario, Quebec and Saskatchewan, there is provision for a weekly rest-day for most classes of workers in hotels and restaurants but in all except Alberta and British Columbia it applies only to cities or in Quebec to cities and towns. In British Columbia, the regulation relates only to female workers.

Offices

In Alberta, the hours of office workers are governed by the Hours of Work Act. A regulation under the British Columbia Female Minimum Wage Act limits hours of women in offices to eight a day and 48 a week unless a permit for longer hours is given by the Board of Industrial Relations.

The Manitoba Minimum Wage Board has fixed maximum hours for female office workers in Winnipeg, St. Boniface, St. James and Brandon at eight a day and 44 a week except in shops where hours are the same as for the selling force. The Shops Regulation Act, which applies to offices in connection with shops, limits hours of young persons and women to 48 a week and eight a day.

The maximum 55-hour week for women and boys under 18 and 72-hour week for men provided by Order 4 of the Quebec Fair Wage Board appears to apply to office workers.

In other provinces persons employed in clerical work in such establishments as factories and shops, would seem to come within the scope of the laws limiting hours in these work-places but there is no limitation on the hours of workers in offices of financial institutions or in professional offices. As in other work-places overtime rates fixed under minimum wage laws tend to restrict the hours of office employees.

Transport

Road Transport

Road transport of goods for remuneration is within the scope of the Hours of Work Act in British Columbia and persons employed in transporting goods, which are not the property of the employer, by any means other than by rail, water or air may be permitted to work up to 10 hours a day and 54 a week. Operators of motor-cycles and boys on delivery or messenger work on foot or bicycle have an eight-hour day and 48-hour week while drivers delivering milk may be employed 10 hours in a day and 63 in a week but not more than 378 hours in seven weeks. Taxicab drivers have a maximum of 54 hours in a week and, except in Victoria and suburbs, a maximum of nine hours in a day. In Victoria they may be employed for 10 hours within the 11 hours immediately following reporting for work.

In Alberta, no regulations under the Hours of Work Act have been made for road transport except for passenger vehicles in Edmonton where maximum hours for drivers are 12 from the time of starting work on six days a week with a rest period of one hour each day. Similar regulations apply to taxi-drivers in Calgary under the Industrial Standards Act, but in Banff during the summer season there may be a 12-hour day and seven-day week for taxi and bus drivers. Throughout the province a regulation of the Highway Traffic Board limits hours spent in driving a goods or passenger vehicle to nine in 24 except in an emergency, but under special circumstances a maximum of 10 hours in two periods of five hours each separated by a 45-minute rest period may be permitted.

In Manitoba, no person may be employed in driving a goods or passenger vehicle for more than nine hours or employed in any capacity for more than 12 hours in any 24 or on duty more than six days a week except in case of a breakdown of the vehicle. Taxicab drivers in Winnipeg, however, may be on duty as drivers or in another capacity for a maximum of 12 hours a day on six days a week. The Saskatchewan Vehicles Act, 1939, allows the Highway Traffic Board to regulate hours of drivers of public service and commercial vehicles but none has been issued.

In New Brunswick, Nova Scotia, Ontario and Prince Edward Island, drivers of transport vehicles may not be employed more than 10 hours, out of 16 consecutive hours in New Brunswick, and out of 24 in Nova Scotia, Ontario and Prince Edward Island. In New Brunswick, the 10 hours cover only work as a driver but in Nova Scotia it applies to work in any capacity in connection with a vehicle transporting passengers or passengers and freight. In both provinces some vehicles are exempt. In Ontario, the 10-hour limit applies to both passenger and goods transport but the stipulation for passenger transport is limited by the Public Vehicle Act to the hours spent in driving or operating the vehicle. For truck drivers work in any capacity is prohibited by regulations under the Commercial Vehicle Act for more than 10 hours in 24. Taxicab drivers in Toronto have a maximum 11-hour day and 66-hour week under the Industrial Standards Act.

In Quebec, except in an emergency when an overtime rate of $2 an hour must be paid, no employed person may be permitted to drive a motor vehicle transporting passengers or goods for more than 12 consecutive hours without taking a rest period in addition to the time for meals, and no bus driver may drive more than 250 miles in 24 hours.

Steam Railways

Only in Ontario is there any statutory regulation of the hours of work of steam railway employees. The Ontario Railway Act forbids a company which operates a line of railway of 20 miles in length or over permitting a conductor, engineer, fireman, trainman, dispatcher or signal man who has worked

in any capacity for 16 consecutive hours to go on duty again until he has had at least six hours' rest.

Electric and Street Railways

In British Columbia, the Lieutenant-Governor in Council may, under the Railway Act, limit the number of days in a week on which street railway employees may be allowed to work but no regulations have been made.

The Ontario Municipal Board has power to regulate the working hours of conductors and motormen employed by a street or electric railway company but the Railway Act stipulates that no person may be employed more than six days a week of 10 hours each and whenever practicable or reasonable the ten hours must be within 12 consecutive hours.

In Nova Scotia, the Halifax Street Railway Companies Act contains provisions to limit the hours of conductors and motormen to six on Sunday and 10 on weekdays but they are dependent on an order of the Board of Commissioners of Public Utilities which has not been issued.

Municipal Fire Departments

The legislatures of Alberta, British Columbia, Nova Scotia, Ontario and Saskatchewan, have enacted measures for regulating the working hours of persons employed by municipal fire departments. A two-platoon system is provided for in all these provinces.

In Alberta, in every place having a paid fire department, all employees may have one full day off duty in every week. In cities or towns having a population of 10,000 or more, the two-platoon system is compulsory. The Act provides alternative systems: either employees have 24 hours on duty followed by 24 hours' rest or there are day and night shifts, the shifts alternating every seven days, and covering 10 hours during the day or 14 hours at night. The one full day off duty does not include periods of release at the changing of platoons. A 1939 amendment provides that cities and towns with a population of 8,000 or more and a permanent fire department may, by by-law, adopt the three-platoon system, each platoon working for eight consecutive hours in a day. Such by-law may be passed and submitted to the electors by the council of its own motion and must be passed and submitted to them on receipt of a petition signed by at least 10 per cent of the electors.

In British Columbia, the Fire Departments Hours of Labour Act and the Fire Departments Two-Platoon Act both apply to any place where there is a paid fire department. Employees must have two full days off duty in addition to time off duty at the change of platoons.

In Ontario, the Fire Departments Act applies to places having a population of not less than 10,000 and a permanent fire department paid by the municipal corporation. The two-platoon system is compulsory, every employee having 24 consecutive hours off duty, not including periods of release at the change of platoons.

In Nova Scotia in cities with a population of 30,000 or more, where there is a permanent fire department paid by the city, the two-platoon system comes into force when it is approved by a majority of the City Council.

The Saskatchewan Act applies to all cities with a population of 10,000 or more but a 1939 amendment allowed cities of under 15,000 to contract out before January 1, 1940. The two alternative systems are as in Alberta and employees have 24 consecutive hours off duty, not including periods of release at the changing of platoons.

Miscellaneous

In certain other occupations, hours of work are limited by regulation in some provinces. In British Columbia, Ontario and Quebec, the maximum working time for workers in compressed air varies from one and one-half hours in 24 when pressure is 45 to 50 pounds per square inch to seven hours in British Columbia and eight in Ontario and Quebec when pressure is 22 pounds or less. In the three provinces, work is to be divided into two shifts with a rest period ranging from five hours to half an hour according to the pressure.

Moving-picture machine operators in Manitoba may not be permitted to be on duty for more than five hours without a rest period of at least two hours.

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME XL] MAY, 1940 [NUMBER 5

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

ACCORDING to data tabulated in the Dominion Bureau of Statistics from 11,903 establishments, employment at the beginning of April showed a considerable seasonal contraction, the reported staffs aggregating 1,093,930 persons, compared with 1,109,526 in the preceding month. The statistics furnished by leading firms since 1920 show that in seventeen of the nineteen preceding years, employment at April 1 has suffered a between-season recession, ordinarily resulting from the completion of the winter's work in logging camps, before any considerable numbers of persons have been absorbed into the outdoor industries opening up in the spring and summer. The general decline at the date under review was very slightly less than the average recorded at April 1 in the years since 1920, and was also smaller than that indicated at the beginning of April in 1939. After adjustment for seasonal variation, the index at the latest date stood at 118·5, compared with 118·3 at March 1, 1940.

There were important losses in logging at April 1, 1940. Mining was also seasonally quiet, and there was a falling-off in transportation and in hotels and restaurants. On the other hand, manufacturing showed further improvement, and additions to staffs were noted in communications, construction, laundering and dry-cleaning and trade.

The index (based on the 1926 average as 100) declined from 113·5 at March 1 to 111·9 at the beginning of April; at that date in the more recent years of the record, it was as follows:—1939, 104·9; 1938, 105·0; 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4 and 1928, 102·3.

Unemployment in Trade Unions.—At the beginning of April, 1940, reports were supplied to the Department of Labour by 1,982 local trade unions comprising a membership of 248,607 persons, 26,748 or 10·8 per cent of whom were without work in contrast with percentages of 11·7 at the beginning of March, 1940, and 15·7 at the beginning of April, 1939.

Employment Office Reports.—The reports for the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business transacted during March, 1940, as indicated by the average daily placements, was above that of the preceding month, but below that of the corresponding period last year, services, construction and maintenance, farming and trade being the groups in which the largest increases occurred under the first comparison and construction and maintenance the division in which the most marked decline was recorded under the second. Vacancies in March, 1940, numbered 26,286, applications, 62,931 and placements in regular and casual employment, 23,978.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget was $17.76 at the beginning of April as compared with $17.75 for March; $17.04 for April, 1939; $17.50 for April, 1938; $17.18 for April, 1937; $15.41 for June, 1933, the low point in recent years; $21.53 for April, 1930; $20.66 for April, 1922; and $26.92 for July, 1920, the post war peak. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100 changed little during the month being 83·0 for the week ended May 3 as compared with 83·2 for each of the preceding six weeks. Comparative figures on a monthly basis are 83·2 for March; 73·4 for April, 1939; 82·3 for April, 1938; 86·2 for April, 1937; 63·5 for February, 1933, the low point in recent years; 94·5 for April, 1929; 98·4 for April, 1922; and 164·3 for May, 1920, the post war peak.

Business Statistics.—The table on page 410 gives the latest statistics available reflecting industrial conditions in Canada. The index of the physical volume of business in March was about 6 per cent lower than in the previous month but about 9 per cent higher than in March, 1939. Lower volume was indicated in March as compared with the previous month by the figures for mineral production and manufacturing. In the former group

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended May 3, 1940.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending April 27, 1940, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending April 20, March 23, and February 24, 1940; April 22, March 25, and February 25, 1939. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Excluding gold.

considerable decline was recorded in the exports of copper, nickel and asbestos also in the imports of bauxite. In the latter group lower volume was indicated by the figures for the rubber, textiles, forestry products, automobile, and petroleum industries. The construction group was practically unchanged in the same comparison, contracts awarded being slightly lower and building permits higher. The output of electric power also showed little change. In the distribution group trade employment advanced but this was more than offset by declines in car loadings and in external trade. Of the above mentioned principal groups all were higher at the beginning of March, 1940, than March, 1939, with the exception of mineral production which was lower in this comparison also. Information available for April shows the number of cars of revenue freight and the value of construction contracts considerably higher both as compared with March, 1940, and with April, 1939. Wholesale prices, employment and earnings of the Canadian National Railways were somewhat lower than in the previous month but higher than in April, 1939.

Strikes and Lockouts.—The number of strikes and lockouts in April was 18, involving 13,807 workers and resulting in a time loss of 67,104 man-working days, as compared with 11 disputes during March, involving 2,380 workers and causing 19,276 days' time loss. The increased number of workers and time loss for the month was due chiefly to four disputes, a strike of 4,500 women's clothing factory workers at Montreal which resulted in a loss of 29,000 days, that of seamen on the Great Lakes and St. Lawrence River affecting 6,000 deckhands, etc., and resulting in a loss of some 10,000 man-working days, and two disputes of foundry workers at Oshawa, Ont., involving about 600 workers and causing more than 11,000 days' loss. In March most of the time loss was caused by two disputes, a strike of 700 coal miners at Mountain Park, Alberta, which caused time loss of 7,000 days and a strike of cotton factory workers at Milltown, N.S., where 663 workers were involved in a loss of 6,630 days. In April, 1939, there were six disputes, involving 315 workers and resulting in a time loss of 1,361 man-working days. Only one of these disputes caused considerable time loss, that of rubber factory workers at Kitchener, Ont., which involved 200 workers and a loss of 1,000 days. Of the eighteen disputes recorded for April, 1940, fourteen were recorded as terminated during the month. Five resulted in favour of the employers affected; compromise settlements were reached in six cases and the results of three disputes were recorded as indefinite. Four disputes, involving approximately 280 workers, were recorded as unterminated at the end of April. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the present month reports were received from Boards of Conciliation and Investigation which dealt with disputes between (1) the Canadian National Railways and certain of its sleeping car conductors and porters; (2) various ocean steamship companies and their longshoremen at the Port of Montreal, and (3) the London Street Railway Company and its employees.

Nine applications for the constitution of boards were received and four boards were established.

Details of proceedings under the Industrial Disputes Investigation Act and the texts of the various boards, reports will be found in the section commencing on page 415.

Statistics of relief recipients for March

The grand total of all classes of persons on urban and agricultural direct relief across Canada in March of this year was 768,500, according to figures released by the Hon. Norman A. McLarty, Minister of Labour. These figures are the preliminary results from the registration of all direct relief cases, carried out for the Department of Labour by the provinces and municipalities in March. The grand total for March, 1940, compared with the same month of 1939, showed a decrease of 25 per cent, while compared with March, 1938, the Dominion figure was down by 26 and a half per cent: both urban and agricultural relief showed decreases from a year ago.

Unemployed but fully employable persons on relief in March this year numbered 172,000, an increase of about one per cent from the revised February total. The figure for March this year showed a decrease of ten and a half per cent from March a year ago, and a decrease of one and a half per cent from March, 1938.

A total of 646,000 persons were receiving non-agricultural relief in March, an increase of less than one per cent from the corrected figures for the previous month: March, 1939, had shown a slightly larger increase over February, 1939. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a decrease of 8·3 per cent from the figure for March, 1939, and a decrease of

one per cent from the figure for March two years ago.

The Dominion total on agricultural relief continued to show a major decline from the year before, following improved crop conditions in 1939 in the Prairie Provinces. A total of 25,000 farmers who, together with their dependents, accounted for a farm population of 122,500, were reported as receiving agricultural relief for subsistence in March. The Dominion total on agricultural relief in March increased by 9·3 per cent from the revised February figure, but was 62 per cent lower than March, 1939, and 69 per cent less than in March, 1938. Figures for March for Saskatchewan alone showed decreases of 70 per cent and 76 per cent from March, 1939, and from March, 1938, respectively: the Saskatchewan total of persons on agricultural relief represented slightly more than 65 per cent of the Dominion total in March this year.

Third annual meeting of the C.A.A.L.L..

With representatives from seven provinces and officials of the Dominion Department of Labour in attendance, the third annual meeting of the Canadian Association of Administrators of Labour Legislation was held in Ottawa on May 1, 2 and 3. The Association, which is composed of government officials responsible for the administration of labour laws and regulations in Canada, is intended to serve as a medium for the exchange of information and encourage co-operation among its members; to promote the highest possible standards of law enforcement and administration; and to attain uniformity of legislation and regulations.

Sessions of the conference were devoted to discussion of the following topics: (1) annual reports of departments of labour; (2) internal administration of factory inspection branches; (3) hours of labour in Canada and statutory regulation thereof; (4) hours of labour on Dominion and provincial government contracts and overtime provisions in war supply contracts; (5) apprenticeship; and (6) legislation regarding union recognition, collective bargaining and industrial disputes.

Hon. Norman A. McLarty, Minister of Labour, addressed the delegates at a dinner held on the opening day of the conference.

Among those in attendance at the conference were the following:—

Dominion Department of Labour:

W. M. Dickson, Deputy Minister of Labour;

Gerald H. Brown, Assistant Deputy Minister of Labour;

Humphrey Mitchell, Director of Labour Transference;

R. F. Thompson, Supervisor of Youth Training; and

Margaret Mackintosh, Chief of Research.

Alberta:

E. S. Clarry, Trade Commissioner.

British Columbia:

Adam Bell, Deputy Minister of Labour; and

Robert Morrison, Assistant Deputy Minister of Labour.

Manitoba:

Arthur MacNamara, Deputy Minister of Public Works and Labour; and

James Leslie, Conciliation Officer, Department of Labour.

New Brunswick:

H. R. Pettigrove, Fair Wage Officer, Department of Labour.

Ontario:

Hon. N. O. Hipel, Minister of Labour;

J. F. Marsh, Deputy Minister of Labour;

A. W. Crawford, Chief Enforcement Officer, Department of Labour;

J. R. Prain, Chief Inspector, Department of Labour; and

F. J. Hawes, Director of Apprenticeship, Department of Labour.

Quebec:

J. O'Connell-Maher, Secretary, Department of Labour;

Cyprien Miron, Conciliation Officer, Department of Labour;

Clovis Bernier, Deputy Chief Inspector, Department of Labour;

Alfred Robert, Inspector of Industrial and Commercial Establishments;

Gus Francq, Vice-chairman, Fair Wage Board; and

J. L. Labreche, Workmen's Compensation Commission.

Saskatchewan:

H. R. Johnstone, Commissioner of Labour and Public Welfare.

Officers of the Association for 1940-41 are as follows: past president, Mr. Bell; president, Mr. O'Connell-Maher; first vice-president, Mr. Crawford; second vice-president, Mr. Johnstone; secretary-treasurer, Miss Mackintosh.

Wartime prices Board to conserve cod liver oil supply

As a result of the invasion of Norway, the Wartime Prices and Trade Board announced on April 12 that the Government has taken prompt steps by Order in Council to conserve the domestic supply of cod liver oil by prohibiting exports of both cod livers and cod liver oil unless approved by the Board. The present action follows efforts by the Board during the past five months to increase the domestic production and to encourage the use of substitutes for animal and industrial needs.

The normal consumption of cod liver oil in Canada for pharmaceutical, animal feed stuffs, and other purposes is about 460,000 gallons a year; of this amount 75 per cent is normally imported. Imports from Norway in 1939 totalled 95,000 gallons.

Labour Legislation in Canada in 1939

Labour legislation enacted by the Parliament of Canada and provincial legislatures during 1939 is reviewed in the second supplement to the consolidated report on *Labour Legislation in Canada as Existing on December 31, 1937* published by the Department of Labour.

In the introduction to the latest supplementary report, which is entitled *Labour Legislation in Canada, 1939,* legislation is dealt with under such subject headings as Freedom of Association-Collective Bargaining; Conciliation and Arbitration; Wages and Hours of Labour; Regulation of Mines; Workmen's Compensation; Unemployment; Safety and Health; Licensing of Workmen; Vocational Education and Apprenticeship; Pensions and Insurance; Housing, and Labour Day.

The main volume of the series may be obtained from the Department of Labour for One Dollar, and the supplements for twenty-five cents each.

Silver Jubilee of Industrial Safety Associations

Marking twenty-five years of industrial accident prevention work in Ontario the silver jubilee convention of the Industrial Accident Prevention Associations was held in Toronto on April 22 and 23, more than 3,400 persons attending the sessions of the conference.

In his presidential report to the convention, A. Ross Robertson of the Dominion Bridge Company, Limited, Toronto, emphasized the greater necessity for safeguarding against industrial accidents in wartime stating: "Our country is at war. Industry is playing its part and is being called upon for greater production in many lines and to produce new articles. Machines are being speeded up. More machinery may be placed in a given space.

"Employees will be asked to do work they have not done before. New and untrained employees will be taken on. Industry may be called to work with hazardous materials. In my judgment, during this trying time, the need for accident prevention work is greater than ever."

Reporting to the conference, R. B. Morley, General Manager of the Industrial Accident Prevention Associations, stated that the associations' 1939 field force of 16 had made 11,794 plant visits during the year, 6,231 being for inspection purposes with an average of three recommendations for each inspection. In the year, 369 certificates of merit were distributed marking the accomplishment of 12 months without a "lost time" accident, that is an accident involving time lost by the injured worker beyond his particular work shift.

Many interesting papers were presented to the convention, among which was one entitled "Conservation of Men, Money and Material" given by W. Graham Cole, Director of Safety, Metropolitan Life Insurance Co., New York. In his paper, Mr. Cole declared that recent experience had proven that accidents were not an essential bi-product of industry. "Through well-organized effort," he asserted, "careful planning and competent leadership, many industrial establishments have been able to effect a marked reduction in the frequency and severity of accidents among their employees."

Another paper entitled "Kicks and Complaints in 25 years under Compensation in Ontario" was presented by John Harold, Chairman of the Ontario Workmen's Compensation Board, in which he reviewed the activities of the Board during the twenty-five years since its establishment in 1915. Mr. Harold referred to the fact that the Board had administered 1,373,677 claims for compensation or medical aid during the quarter century and had expended on account of such claims a total of $134,953,555.32.

At the conclusion of the convention the following officers for 1940 were elected. President, E. C. Steele, Union Gas Company, Ltd., Chatham; first vice-president, M. F. Verity, Massey-Harris Company, Limited, Toronto; second vice-president, Col. Frank Chappell, General Motors of Canada, Ltd., Oshawa; honorary treasurer, A. J. Harvey, Lever Brothers Ltd., Toronto. R. B. Morley was reappointed general manager.

Sectional officers were also appointed for the following divisions. Woodworkers, class three; ceramics and stone; metal trades, class seven; food products, class 14; leather, rubber and tanners; textile and allied industries; printing trades; and steel erectors.

No amendment to trade union legislation in Great Britain during war

A deputation from the General Council of the British Trade Union Congress, which was received by the Prime Minister, on March 7, 1940, asked among other things for the amendment of the Trade Disputes and Trade Union Act which was passed in 1927, the year following the general strike.

In the main, criticism was directed to the implication of the Act with regard to strikes. Other arguments advanced were that the earlier requirements in regard to picketing were adequate; that by substituting "contracting-in" for "contracting-out" of a political

levy approved by a ballot vote of the members of a union, "the opportunity of an industrial dispute had been used to take political advantage of the unions"; and that the civil servants' organizations should have restored to them the right to affiliate to the Trades Union Congress.

Prime Minister's Reply.—After the deputation had met the Prime Minister an official report was issued which contained the following passage:

> The Prime Minister stated that since he last saw representatives of the T.U.C. on the question of the Trade Disputes Act the position had been completely changed by the outbreak of war. Any alteration of the provisions of the Act would require legislation and he felt that, quite apart from the merits of the case, it would be impracticable to introduce in wartime such legislation, which would of necessity be highly controversial.

He trusted, therefore, that, with the object of concentrating upon the supreme task of winning the war, the trade union movement would not press for reconsideration of any of the provisions of the Act at the present time. He was well aware and appreciative of the support which the trade union movement was giving to the national war effort and he felt that their record in this respect would proportionately strengthen their position in any representations that they might desire to make at the conclusion of the war.

Recent regulations regarding protection of young workers in U.S.A.

Two regulations have been issued under the child labour provisions of the United States Fair Labor Standards Act. These relate to certificates of age and to hazardous occupations.

In connection with the latter the chief of the Children's Bureau issued an Order declaring the occupations of motor vehicle driver and helper to be particularly hazardous for the employment of minors between 16 and 18 years of age. In consequence young persons under 18 may not be employed in the occupations referred to in so far as they come under the Fair Labor Standards Act. The Order came into effect on January 1, 1940.

The reasons given for the Order referred to the high risk of accidents to which young drivers and helpers are exposed as shown by workmen's compensation costs, the opinion of experts and accident statistics. Further, the regulations issued by the Interstate Commerce Commission under the Motor Carriers Act, 1935, applicable to common contract carriers engaged in interstate commerce establishes as necessary for safety a minimum age of 21 years for motor drivers. An examiner for the Commission recommended after holding public hearings that the same minimum age for motor vehicle drivers should be applied with certain exceptions to private carriers engaged in interstate commerce.

Postponement of International Labour Conference at Geneva

In view of uncertain developments in the war situation, the announcement was made in Geneva on May 11, that the International Labour Conference, scheduled to meet on June 5, has been postponed. It is expected, however, that the Governing Body of the International Labour Office will meet if at all possible.

At the 89th session of the Governing Body held on February 1-5, it was decided that the Conference would convene on June 5 if circumstances permitted, but it was also agreed that the officers of the Governing Body and the International Labour Office should be given authority to change the date or place of meeting if necessary.

At that time Canadian representatives, acting in accordance with instructions, pointed out that Canadian participation in the Conference must be contingent on compatibility with the primary obligations of national defence.

The agenda to have been discussed had been limited to the usual routine items, discussion on the Director's report, and one other subject, viz.: "Methods of Collaboration between Public Authorities and Employers' and Workers' Organizations."

Now, however, the disturbed international situation resulting from intensified war, has necessitated the postponement.

(Since the above was written, news reports state that the League of Nations Organizations started to move out of Geneva on May 15. It was also stated that the Bank of International Settlements and the International Labour Office joined in the move for the purpose of assuring the security of their personnel and archives.)

Correction

In an article in the April issue entitled "Establishment of a Permanent Committee of Adjustment in Railway Co-operation"—the name of Mr. F. H. Hall, vice-president of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, was inadvertently omitted from those elected at the meeting of February 15 to represent the employee organizations. The complete list of employees' representatives elected at that meeting should have read as follows: Messrs. J. B. Ward, W. H. Phillips, W. V. Turnbull, R. J. Tallon, A. J. Kelly, F. H. Hall; alternates—T. Todd, L. A. Beaudry.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

NINE applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From steel workers, mechanics, helpers and labourers in the employ of Canadian Vickers Limited, at Montreal. Six hundred employees were stated to be directly affected by the dispute, which related to their request for an increase in wages of 15 cents per hour for all classes of labour in the Marine Department. The application was subsequently withdrawn, a verbal agreement having been reached between the parties concerned on April 25, 1940.

(2) From pipe-fitters, plumbers and helpers in the employ of the Burrard Dry Dock Company, Limited, at Vancouver, B.C., being members of Local Union No. 170, United Association of Journeymen Plumbers and Steam-Fitters of the United States and Canada. The dispute relates to the request of the employees, 45 in number, for an increase in their wage rates.

(3) From sheet metal workers in the employ of the Burrard Dry Dock Company, Limited, at Vancouver, B.C., being members of Local Union No. 280, Sheet Metal Workers International Association. The dispute concerns the employees' request for an increase in their wage rate.

(4) From employees in the Canada Works plant of the Steel Company of Canada, Limited, at Hamilton, Ont., engaged in manufacturing wire products. Approximately 700 employees are stated to be involved in the dispute, which relates to a request made to the company for reinstatement of certain employees alleged to have been discharged because of union membership and activities, and for an agreement to be negotiated with the union of the employees and its representatives, Lodge No. 1005, Steel Workers' Organizing Committee, covering wage increases, the establishment of an eight hour day, time and a half for overtime and double time for Sundays and holidays, etc.

(5) From mechanics, helpers, labourers, etc., in the employ of the Davie Shipbuilding and Repairing Company, Limited, at Lauzon, Que. Four hundred and forty employees are stated to be directly affected by the dispute, which arises out of a demand for an agreement providing for increased wages, certain changes in working conditions, and recognition of the Canadian Union of Boilermakers and Iron Shipbuilders, Local No. 3, chartered by the All-Canadian Congress of Labour.

(6) From 172 employees in the foundry and machine shop of the Dominion Wheel and Foundries Limited, at Toronto, Ont., being members of Local Union No. 1089, Steel Workers Organizing Committee. The dispute arose out of the employees' request for increased wages, certain changes in working conditions, and union recognition. A Board of Conciliation and Investigation was established by the Minister of Labour on May 4, and Mr. J. L. Cohen, K.C., of Toronto, Ont., was appointed a member thereof on the recommendation of the employees.

(7) From employees of the Acadia Coal Company, Limited, at Stellarton, N.S., who are members of the United Mine Workers of America, District 26. They request increased wages and certain changes in hours of labour and working conditions. Twelve hundred and fifty employees are stated to be directly affected by the dispute.

(8) From employees of the Old Sydney Collieries, Limited, at Sydney Mines, N.S., who are members of the United Mine Workers of America, District 26. They request increased wages and certain changes in working conditions and hours of labour. Eighteen hundred employees are stated to be directly affected by the dispute.

(9) From employees of the Sydney and Louisburg Railway Company, at Glace Bay, N.S., who are members of the United Mine Workers of America, District 26. They request increased wages and certain changes in working conditions and hours of labour. One hundred and fifty employees are stated to be directly affected by the dispute.

Board in Great Lakes Shipping Dispute

A Board was established by the Minister of Labour on April 20 to deal with a dispute between various shipping companies operating on the Great Lakes and the St. Lawrence River and the unlicensed personnel in their employ represented by the Canadian Seamen's Union. A strike had occurred in this case at midnight of April 14 (see article on Strikes and Lockouts in Canada appearing elsewhere in this issue).

When early in April the department became aware that negotiations concerning wages and working conditions to govern employment of seamen for the forthcoming season of navigation had broken off and that a strike

threatened, the Deputy Minister of Labour despatched a telegram to the President of the Canadian Seamen's Union in the following terms:—

> This department understands your union has made demands to a number of shipping companies operating on the Great Lakes for an increase in wages and other concessions and that as these have not been granted your union now is making preparations for strike action at an early date. You will be aware that disputes of this character fall directly within scope of Industrial Disputes Investigation Act and that it is illegal for employees to go on strike or employers to declare a lockout without first having dispute dealt with by a Board of Conciliation and Investigation and in this connection I would especially direct your attention to Section fifty-eight of the Act, from which it will be observed that the responsibility for making Board application rests with the party proposing the change in wages or in hours. It should be obvious to everyone that this country while at war cannot afford to have its inland shipping tied up. This information is being conveyed to you for the purpose of eliminating any possibility of misunderstanding.

No reply was received to this telegram until after a strike had been ordered on April 13 to commence at midnight on April 14. The officials of the union and their legal representative maintained that the crews had not yet signed ships articles and that consequently the seamen could not be considered as employees within the meaning of the Industrial Disputes Investigation Act. A number of the ships, however, had already signed on full crews under the Canada Shipping Act and were operating at the time the strike occurred, and from the outset it was held by officials of the department that such crews were employees of the companies concerned and came directly within the scope of the Industrial Disputes Investigation Act. This view was confirmed by officials of the Department of Justice.

In an endeavour to find a basis of settlement immediately following the strike, conferences were held in Ottawa by officers of the department with representatives of the Seamen's Union and also with representatives of the steamship companies, and these discussions were continued in Toronto with the same parties. Finally on April 20, through the personal intervention of the Minister of Labour, Hon. Norman McLarty, the strike was terminated on the understanding that a wage increase of $7.50 per month would be granted to the employees and that all other matters in dispute would be referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.

The Board is composed of the Honourable Mr. Justice C. P. McTague, Toronto, chairman, appointed by the Minister of Labour on the joint recommendation of the other Board members; Mr. J. L. Cohen, K.C., Toronto, appointed on the recommendation of the employees; and Mr. Frank Wilkinson, K.C., also of Toronto, appointed on the companies' recommendation.

The shipping companies coming within the scope of the inquiry are the following:—

Algoma Central Steamship Line,
Canada Steamship Lines, Limited,
Canadian Lake Carriers, Limited,
Colonial Steamships, Limited,
Gulf and Lake Navigation Company, Limited,
Keystone Transports, Limited,
Lake Erie Coal Company, Limited,
Lakehead Transportation Company, Limited,
McKellar Steamships, Limited,
Northwest Steamships, Limited,
Paterson Steamships, Limited,
Quebec and Ontario Transportation Company, Limited,
Saint Lawrence Steamships, Limited,
Sarnia Steamships, Limited,
Tree Line Navigation Company, Limited,
Union Transit Company, Limited,
Upper Lakes and Saint Lawrence Transportation Company, Limited, and
Valley Camp Coal Company of Canada.

Other Boards Established

A Board of Conciliation and Investigation was established by the Minister of Labour on April 15 to deal with disputes between the Burrard Dry Dock Company, Limited, and the following classes of its employees:—

(1) Machinists, fitters, specialists and helpers, members of Vancouver Lodge No. 692, International Association of Machinists;
(2) Pipe-fitters, plumbers and helpers, members of Local Union No. 170, United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada; and
(3) Sheet metal workers, members of Local Union No. 260, Sheet Metal Workers' International Association.

The machinists had made application for a Board during March (LABOUR GAZETTE, April, 1940, page 320), while the applications from the plumbers and sheet metal workers were received during April as stated above. The personnel of the Board is as follows: Professor H. F. Angus, of Vancouver, B.C., chairman, appointed by the Minister of Labour on the joint recommendation of the other members of the Board; Mr. W. D. McLaren, of Vancouver, appointed on the recommendation of the company; and Mr. Percy R. Bengough, also of Vancouver, appointed on the men's recommendation.

A Board was established on April 22 to deal with a wages dispute between the Canadian General Electric Company and its pattern makers at Toronto, Ont., being members of the Toronto Association of Pattern Makers League of North America. An application had been received from the employees early in the month (Labour Gazette, April, 1940, page 320). The personnel of the Board is as follows: Professor Norman A. M. MacKenzie, of Toronto University, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members; Mr. V. A. Sinclair, K.C., of Toronto, appointed on the company's recommendation; and Mr. John Munro, also of Toronto, appointed on the employees' recommendation.

Agreements and other Proceedings

The department was advised during April that the recommendations of the Board which dealt with a dispute between Mr. F. W. Nicholas and his checkers, porters, coopers, etc., at Port McNicoll, Ontario, had been, with one exception in respect to working conditions, accepted by the parties concerned as a settlement of the dispute and that an agreement had been signed covering working conditions and rates of pay for the season of 1940. The employees concerned are members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The texts of the Board's findings appear at page 199 of the Labour Gazette for March, 1940.

It was reported in the Labour Gazette for February, 1940, at page 101, that an application for the establishment of a Board had been received from foremen, clerks, drivers, chauffeurs, checkers, etc., in the employ of the Railway Express Agency, Inc., at various points in Canada. As a result of mediation by an officer of the Department of Labour a settlement was reached early in April, and Board procedure accordingly became unnecessary.

It was reported in the February issue of the Labour Gazette (page 102) that an interim report had been received from the Board of Conciliation and Investigation established to deal with differences between the Algoma Steel Corporation Limited and its employees, members of the Algoma Steel Workers' Union, and that the Board had adjourned for a period of three months. At the written request of the employees the Board has arranged to hold further sessions at Sault Ste. Marie, Ont., commencing May 20. In the meantime, Mr. W. F. O'Connor, the employees' nominee on the Board, found it necessary, owing to other duties, to resign as Board member, and on the employees' recommendation Mr. Charles Beattie, of Toronto, was appointed in his stead.

Report of Board in Dispute between the Canadian National Railways and certain of its sleeping car conductors and porters

The Board of Conciliation and Investigation established to deal with a dispute between the Canadian National Railways and certain of its employees being sleeping car conductors and porters, members of the Canadian Brotherhood of Railway Employees, submitted its findings, in the form of three separate reports, to the Minister of Labour during March. Inasmuch as certain ambiguities appeared in these reports which required clarification, the chairman of the Board was instructed by the Minister of Labour to reconvene the Board and consider the dispute further. New reports were submitted by the Board on April 19, comprising a majority report signed by the chairman, Honourable Mr. Justice Louis Cousineau, and the Board member nominated by the employees, Mr. Edward H. Crawford, and a minority report signed by the company's nominee on the Board, Mr. F. C. Dobell.

The dispute arose as a result of changes made by the company in the assignment of runs to conductors and porters in Ontario and Quebec, as well as to sleeping car porters operating out of Winnipeg, involving increased hours of service for certain employees and loss of employment to others. Approximately 350 employees were stated to be directly affected by the dispute.

The texts of the majority and minority reports follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act, and in the matter of a dispute between the Canadian National Railways, employers, on the one hand, and sleeping car porters operating from Winnipeg, members of Division 130, Canadian Brotherhood of Railway Employees, employees, on the other hand,

and

In the matter of a dispute between the Canadian National Railways, employer, on the one hand, and sleeping car conductors and porters in Ontario and Quebec, members of the Canadian Brotherhood of Railway Employees, employees, on the other hand.

To the Honourable N. A. McLarty,
Minister of Labour,
Ottawa, Ontario.

Sir:

The above disputes which were referred to this Board for consideration, were heard

jointly at meetings held by the Board of Conciliation at Montreal, Quebec, and Ottawa, Ontario, on different dates during the months of January, February and March, 1940.

The Canadian National Railways were represented by Messrs. A. J. Hills, W. W. Swinden, W. I. Moodie, and J. McIsaac, and The Canadian Brotherhood of Railway Employees by Messrs. J. E. McGuire and T. McGregor, and in addition at certain meetings by Messrs. A. R. Mosher and M. M. Maclean.

Too much praise cannot be given to both parties for their able presentation of the facts in dispute, whether by way of written or oral argument. Emphasis too must be laid upon the response made thereto by these representatives when the members of the Board endeavoured to bring about an amicable settlement, but as both parties felt (and we believe very sincerely) that there was a vital principle at issue, unfortunately a compromise was not able to be effected.

In dealing with these two disputes it may be observed that they have many points in common, and in particular they involve a consideration of the wording and meaning of Section 4 (*b*) of the Schedule of Rules and Rates of Pay for employees in sleeping, dining and parlour car service, which Schedule became effective in 1927, as well as a consideration of Section 58 of the Industrial Disputes Act.

Before considering these elements it will be well to dispose of the contention advanced by the Canadian National Railways' representatives (herein afterwards referred to as "the Railway") that the disputes herein should have been referred to the Board known as "Board of Adjustment No. 2". Throughout its correspondence with the Department of Labour, in the briefs filed, and in oral argument, the Railway has strenuously contended that the proper tribunal for the disposition of these cases is Board of Adjustment No. 2.

In our opinion this argument is untenable:—

(1) Section 7, ss. (2) of the Industrial Disputes Act is clearly against it. Once the Board of Conciliation is established by the Department it does not lie in the mouth of any party to the dispute to question the validity or jurisdiction of the Board.

(2) A reference to the cases cited by the Railway does not bear out the contention that the matters in dispute must of necessity be dealt with by that Board. Cases similar to the one at bar may have been dealt with by that Board, but that was only with the consent of both parties, and was not to be deemed in any way as an abrogation or denial of the right of any party at any time to apply for a Conciliation Board under the Industrial Disputes Act.

(3) The agreement constituting the Board of Adjustment No. 2 specifically excludes from its jurisdiction any dispute arising out of a proposed change in rate of pay, rules or "working conditions". The brief filed by the Railway, particularly in the Central and Eastern application, is studded with references to "changes of working conditions." Mr. Swinden was asked this very pointed question, "Do you consider that these changes are changes in working conditions?" to which he replied, "Yes, decidedly so". In our opinion this answer is definitely adverse to the claim of the Railway that these matters are peculiarly a matter for application by the Board of Adjustment No. 2.

Reverting then to the two elements under consideration, we think we are driven to the conclusion that the claim of the employees must be sustained. In 1927 the parties entered into a written agreement referred to herein as the "1927 Schedule". It is to be presumed that this agreement only came into existence after many long hours of consultation and debate. It is further to be presumed that when the contracting parties reduced to writing the points on which they had agreed, they then had a clear conception of what they had agreed upon and what they intended to put down in writing. It is somewhat late in the day for the Railway now to contend that Section 4 (*b*) does not express what the parties in 1927 had agreed upon. In our opinion Section 4 (*b*) is binding upon the parties unless abrogated or annulled in whole or in part by common consent.

Section 4 (*b*) reads as follows:—

"In the event of the Railways deciding to make any changes in the service as set up in the foregoing Schedule of runs, or in the event of new runs being established, the number of employees or crews required to operate the service shall be arranged by mutual agreement between the Superintendent and Employees' General Committee."

It may be divided into two parts. (1) It gives to the Railway unfettered discretion to make decisions as to changes in the services set up in the Schedule of runs then established or to establish new runs. This is agreed to by the employees, and concerning this aspect there therefore can be no dispute. (2) It, however, imposes upon the Railways, when either of these eventualities occur, the necessity of reaching a mutual agreement with the employees as to the number of employees or crews required to operate the services.

In the cases at bar no such agreement was arrived at. On the contrary, the Railway notified the employees that the new runs,

with reduced personnel, were to become effective, without any mutual agreement having been arrived at, and in our opinion they very definitely and unquestionably committed a breach of Section 4 (*b*) of the Schedule.

In the briefs filed by the Railway an attempt was made to answer the claim made by the employees that there was a violation of the Section. The Railway has sought most strenuously to defend its actions on the following grounds:—

(1) That the runs as previously established did not give an adequate return in service for the wage expense incurred, or to use the language of the second brief, "that they did not secure a fair return in service for the compensation paid".

(2) That in some cases a continuance of the old runs involved the supplying of expensive equipment. This was instanced in the brief concerning the Flin Flon dispute, by their setting up that a $60,000 sleeping car would have been necessary.

(3) That the continuance of the runs previously established would have isolated the employees from proper supervision.

(4) That by the creation of the new runs the Company was thereby able to operate the Railways in a more economical manner.

(5) That the Railway, being custodians of public moneys, was bound to consider itself as a trustee of these funds and therefore had to give to the people of Canada the best possible returns for the public funds expended in their behalf.

In our opinion none of these grounds can prevail to answer the charge that there has been a violation of Section 4 (*b*). Both in contract and in morality the Railway owes a duty to its employees to see that binding contracts are observed by it, both in the letter and in the spirit in which they were entered. Sanctity of contract is a principle of law, binding equally upon simple individuals as well as upon high contracting parties such as the Canadian National Railways and members of the Canadian Brotherhood of Railway Employees. Surely the duties imposed by parliament upon the management of Government-owned railways did not include a mandate to disregard solemn obligations whenever the management felt that in the interests of economy they should be swept aside.

In our further opinon there has been a complete disregard of the rights of the employees in that the monthly hours to be worked by them in the new runs have in the main been greatly increased. The Railway contends that it has the right to increase these hours as long as in its opinion the increase does not impose a burden upon the employee. In the briefs filed we can find no authority for such a proposition. Carried to a logical conclusion it would mean two things: (1) the Railway is the sole judge of what is or is not arduous; and (2) the complete abrogation by unilateral action of the agreements entered into in 1927 and thereafter.

To make an employee work more hours per month for the same wages is to bring about a "change in wages and hours" as is contemplated by Section 58 of the Industrial Disputes Act. It is not necessary to cite legal authority for this decision, as in our opinion it is self-evident. We believe that the Railway has committed a breach of Section 58 of the Act, which justifies this Board in recommending to the Department that the claim of the employees be sustained.

We wish particularly to draw attention to the claim of the Railway that Section 3 (*e*) of the Schedule regulates the proper procedure in the event of a mutual agreement not being arrived at. In our opinion this claim is clearly unfounded.

(1) Section 3 of the Schedule deals with discipline and grievances and has no reference whatsoever to a change in the basic structure of the Schedule.

(2) It applies to individual cases and not to the employees as a body.

(3) In the first brief filed no reference whatsoever was made to it.

In our opinion this argument was simply put forth at a late date to meet the admitted failure of the Railway to arrive at a mutual agreement before the new runs were established. This is clearly borne out by reference to the concluding sentences in letters from Mr. Swinden to the Department of Labour under date of July 14, 1939.

We have referred in the foregoing to the attempts made to settle by some mutual compromise the various matters in dispute, especially with regard to future assignments of runs by the Railway. It should be possible for both parties to revise the existing Schedule so that the Railway may have a right of decision in administrative matters while at the same time adequate protection and reasonable assurances will be given to the employees so that they will not have similar causes for complaint in the future.

On the whole and having this object in view, we hold and recommend as follows:—

(1) With reference to the first named dispute:

(*a*) That the Management of the Canadian National Railways violated the terms of the agreements with its Sleeping and

Dining Car employees by arbitrarily amalgamating the Winnipeg-Le Pas-Flin Flon run with the Flin Flon-Regina run and operating the joint run with fewer porters than were employed on the two runs when they were separately operated.

(*b*) That the Railway Management should forthwith re-establish the Winnipeg-Le Pas-Flin Flon run as it operated prior to May 1, 1939, and the Regina-Flin Flon run as it was constituted on May 1, 1931.

(2) With reference to the second named dispute:

(*a*) That the Railway Management likewise violated the terms of existing agreements by arbitrarily altering the terms or hours of the employees or amalgamating existing runs without the consent of the employees as was required by the said agreements.

(*b*) That the Railway Management immediately reinstate the assignment of employees to the five runs as they existed prior to August 14, 1938.

(*c*) That the Canadian National Railways pay to Mr. Leo J. P. Clarke the sum of $250 as compensation as part of the time lost by him through the change in his assignment.

(3) With reference to both disputes:

(*a*) That when the existing Schedule of Rules which became effective on September 1, 1927, is revised, the clauses in the Schedule referring to mutual agreement as to employee assignments be amended by giving to the Railway Company a limited and reasonable discretion in the assignment of employees to respective runs, and that as a part of the foregoing and without limiting its generality, there should be incorporated therein a suitable rule or agreement by which a maximum number of hours of duty per month should be specified, as well as a definition of the term "hours of duty".

(*b*) That the Railway Management should in any event give from fifteen to thirty days' prior notice of intended change in runs.

All of which is respectfully submitted.

(Sgd.) LOUIS COUSINEAU,
Chairman of Board.

(Sgd.) E. H. CRAWFORD,
Member of Board.

Minority Report

April 11, 1940.

The Hon. the MINISTER OF LABOUR,
Ottawa, Ontario.

Sir:

Re: Industrial Disputes Investigation Act and re differences between the Canadian National Railways and certain of its employees being sleeping car conductors and porters, members of the Canadian Brotherhood of Railway Employees.

You have been pleased to cause the reconvention of the Board of Conciliation and Investigation established in this matter in order to obtain further expressions of the views of its members. My colleagues and I have again discussed in detail the matters in dispute and the conclusions of the reports previously made by each of us. In particular, we have again analysed the wording of Article 4 (*b*) of the Schedule and have considered what we should recommend ought to be done by the parties concerned.

My conviction is still unshaken that the only reasonable and logical interpretation of Article 4 (*b*) is that placed upon it by the Railway Company. Further it is the only workable interpretation, for the Company must have the discretionary control thereby afforded to it. The Company is in fact the only possible agent to make new or changed assignments and to take the responsibility for making them effective, often on very short notice.

Even if the contention of the Employees as to the interpretation of Article 4 (*b*) should be correct, I would still recommend that this dispute should be settled by the parties agreeing that that discretionary control and that responsibility should in future be vested in the Company, subject to the limits mentioned in my previous report, which appear to me to be reasonable and to be fair to both parties. Even if the Company had, as alleged, infringed the contract there is no reason why the disputed runs should be reinstated during the preparation of such a formula for future guidance as my colleagues and I are unanimous in agreeing should be prepared to assure discretionary control to the Company and to define the limits of that prerogative.

However, there was in my opinion no infringement of the contract and I must now make the same report as I made on February 29, 1940. A copy of that previous report is attached hereto to form part hereof. For convenience of reference I summarize my former recommendations as follows:—

1. That Article 4 (*b*) of the Schedule should be amended to read, or should be

acted upon as if it did read, as suggested in my report of February 29, 1940, after insertion, in the second sentence of my suggestion, of a number to be arrived at by mutual consent.

2. That the other clauses of the Schedule which refer to "mutual agreement" with regard to employee assignments should be similarly treated.

3. That the Railway Company should continue to operate the disputed runs as they have been operated during the past months, and that the employees should not be reinstated in their assignments as they were prior to the changes of which they have complained.

4. That the employees should withdraw their claims for expenses and lost wages resulting from the changes of assignments.

5. That the Company should in future give fifteen days' notice of intended changes in runs or of the establishment of new runs, except in cases of emergency or necessity.

The reasons for which I have reached the conclusions on which these recommendations are based are set out in full in my previous report and should be considered as incorporated herein as effectually as if they were now repeated at length.

If I have correctly understood the views which my colleagues have expressed at our sessions, I anticipate that they will agree to recommendations 1, 2 and 5 above (subject perhaps to some changes in verbiage), that they will agree to recommendation 4 (except as to one employee for a small part of his claim) and that they will disagree with my recommendation 3. It seems therefore that we are all three agreed that the Railway Company should, within reasonable limits, have the right or discretion to make assignments in new or changed runs and that the only material point on which our views differ is as to whether or not the assignments affected in the runs under dispute in this reference should or should not be reinstated before the parties replace the contentious Article 4 (*b*).

I am therefore hopeful that the efforts of this Board, whose members are unanimous to at least that extent, will prove to have been of service to both the parties.

Respectfully submitted,

(Sgd.) F. C. DOBELL.

The following is Mr. Dobell's original minority report as referred to above:

Montreal, February 29, 1940.

To the HONOURABLE MINISTER OF LABOUR.

Re: Industrial Disputes Investigation Act and re differences between the Canadian National Railways and certain of its employees being sleeping car conductors and porters, members of the Canadian Brotherhood of Railway Employees.

Introductory

1. A Board has been established to consider two complaints or demands made by employees in the Sleeping, Dining and Parlor Car services of the Canadian National Railways with regard to the assignment of conductors and porters on the Montreal-Noranda, Montreal-Ottawa, Montreal-Toronto, Montreal-Winnipeg and Winnipeg-Flin-Flon-Regina runs. As the basis of the claim or demand put forward by the employees was substantially the same in each of the two cases, it appears that both matters can most conveniently be dealt with in a single report.

Upon the constitution of the Board several sessions were held in Montreal, when representatives of the employees and of the Railway Company submitted, and subsequently explained and discussed, written briefs or statements of their respective positions and of the grounds on which they relied for maintaining them. These representatives were also afforded opportunities of presenting oral evidence and of questioning each other in order that the members of the Board might be amply cognizant of all the views of both parties. Of these opportunities full advantage was taken by both sides. Each of the parties to the dispute was then accorded a delay in which to submit written answers to the statements of the other party, and, when sessions were resumed in Ottawa for efforts to conciliate the parties, the members of the Board were familiar with the arguments in support of the respective contentions of both parties.

Article 4 (b) of the Schedule

2. The Board was informed by the representatives of both sides, and I agree entirely, that the fount of both disputes lies in the interpretation or construction which should have been placed in the past, and which should be placed in the future, upon Article 4 (*b*) of the document known as "Schedule of Rules and Rates of Pay for Employees in Sleeping, Dining and Parlor Car Service" dated October 1, 1927, which reads as follows:—

"In the event of the Railways deciding to make any changes in the service as set up in the foregoing Schedule of runs, or in the event of new runs being established, the number of

employees or crews required to operate the service shall be arranged by mutual agreement between the Superintendent and Employees' General Committee."

The employees contended that the reference to "mutual agreement" indicated that such agreement as to number of employees must be arrived at before the Railway Company could put into effect any change in the service or any new runs decided upon by it, although they admitted that the Company had the uncontrolled right to decide to make changes and establish new runs. The Railway Company on the other hand maintained that the opening sentence of the clause made it clear that the "decision" throughout rested with the Company itself, including decision as to the number of employees required in any particular service. The Company maintained that what the Article meant was that the service or change should be made effective forthwith and that, if the employees took objection to the number of men assigned, this was a matter to be arranged, if possible, by agreement between the Superintendent and the Employees' General Committee, or, failing such agreement, to be dealt with first in accordance with the provisions of Article 3 (*e*) of the Schedule and finally to be brought, if necessary, before the body known as C.N.R.E. Board of Adjustment No. 2, as would be done in any other case of alleged grievance.

The answer of the Railway Company to the suggestion that Article 4 (*b*) required mutual agreement as to employee assignments before any change in service or before the establishment of any new run was—

(1) That this Article was drafted with the knowledge in the minds of the representatives of both parties that Article 3 (*e*) was also in existence in case of a failure of mutual agreement between the Railway Company's Superintendent and the Employees' General Committee;

(2) That the Article itself, and in fact the whole Schedule, was drafted only shortly after the Railway Company had consented to the establishment of a Board of Arbitration, known as C.N.R.E. Board of Adjustment No. 2, specifically designed to deal with any such matters of disagreement, and upon which the employees are equally represented with the Railway Company; and

(3) That, both before 1927 and in the twelve years since the Schedule went into effect, the employees have in fact, whenever they felt aggrieved, availed themselves of the opportunities of adjustment afforded by Article 3 (*e*) of the Schedule and by Board of Adjustment No. 2.

Article 4 (*b*) is perhaps unfortunately worded in that the contentions of either party as to its strictly literal interpretation could, in my opinion, be argued by Counsel in a Court of law with some hope, or even confidence, of success. But this Board is not required to record its interpretation of any specific words, but rather in the language of Article 27 of the Industrial Disputes Investigation Act, to recommend what "ought or ought not to be done by the respective parties concerned". The employees admit that the Railway Company has, under the first sentence of the Article, uncontrolled discretion to make changes in service or to establish new runs, but contend that the second sentence gives them themselves the right virtually to veto any such change or establishment by refusing to agree with the management upon the number of men to be assigned. For instance, the employees could conceivably, if this view were correct, decline to operate a new or a changed run unless an absurd number of porters, let us say six, were assigned to each parlor car. The result is that, if the Employees' contention is correct, the first sentence of the Article is meaningless and of no value.

On the other hand the interpretation placed by the Company on this Article appears to me to be reasonable and logical. In the Company's view it must have and exercise a free and uncontrolled discretion not only in deciding on new runs or changes of runs but also in the assignment of men thereto, subject always to the employees' undoubted right to appeal any alleged grievance or unfairness through the proper channels referred to elsewhere herein. Furthermore this view clothes Article 4 (*b*) with intelligible sense and meaning, whereas the contrary view does not, and in my opinion that interpretation of any document or part of a document which gives it a reasonable and intelligible sense must always prevail over any other interpretation which would make it meaningless.

Apart from any question of interpretation of words, it is essential to the operation of any business that the management should exercise some measure of discretionary control, subject always, as above mentioned, to the right of the employees to obtain redress in case of harsh treatment. On this point I cannot improve upon the words used by the Arbitrator in one of the cases which went before C.N.R.E. Board of Adjustment No. 2 in making his award. This is copied at the top of page 4 (end of first paragraph) of the document produced before this Board under the title "Railway's Submission No. 5". The Arbitrator said: "In my opinion decisions as to the requirements or needs of service must necessarily be a function of management, subject to the consideration of such representa-

tions as may properly be made on behalf of employees. It does not seem to me reasonable to suppose that it could have been the intent of the Agreement to provide that, even if the service did not justify the employment of a Sleeping Car Conductor, one must be employed unless the representatives of the Employees give their permission for his withdrawal."

Article 3 (e) of the Schedule

3. Article 3 (*e*) of the Schedule has been referred to above as providing, in the submission of the Railway Company, the primary procedure for employees to seek redress if they consider themselves aggrieved by any exercise by the Railway's officers of its discretionary power.

The employees contended with some emphasis that Article 3 (*e*) was intended to provide a procedure only for the adjustment of the type of grievance referred to in Article 3 (*a*), i.e., cases of suspension, discharge, or disciplining, and not to cases of grievances arising out of the establishment of new runs or out of changes in established runs. But examination of the Schedule as a whole discloses that nowhere except in Article 3 (*e*) is there provided any avenue for redress to any employee or group of employees who may consider themselves aggrieved, whereas many questions besides those covered by Article 3 (*a*) (i.e., suspension, discharge, or disciplining) must undoubtedly from time to time give employees cause to consider themselves aggrieved, e.g., seniority, overtime, hours of service, rest periods, lay-over, etc. This is made abundantly manifest in the Exhibit produced to the Board as Appendix "A" to Railways Submission No. 5. This shows that 50 cases have been before C.N.R.E. Board of Adjustment No. 2 since October 1, 1927. We know that each one of them first passed through the procedure prescribed by Article 3 (*e*) of the Schedule before reaching that Board. Yet, of those 50 cases, only 4 arose out of matters involving suspension, discharge or discipline. The remaining 46 cases which have followed Article 3 (*e*) and then, one of the parties being still unsatisfied, have gone before C.N.R.E. Board of Adjustment No. 2, therefore represent 92 per cent of the total cases so handled in the last twelve and one-half years. One must conclude that Article 3 (*e*) covers, and has always been recognized as covering, grievances or disputes of any kind under the Schedule and is not confined to the subjects dealt with in Article 3 (*a*), particularly as the number of men or crews required is only one of many factors in the determination of an assignment. If this, by chance, is not the true position, then only 8 per cent of all these cases have been conducted in a regular manner and 92 per cent irregularly, but the result is the same, for then a custom having full contractual force has been established between the parties on their own recognition.

The fact that Article 3 (*e*) was not mentioned in the written submission of the Railway Company as providing procedure for the settlement of disputes of this nature was at one time referred to as suggesting that this was only thought of and mentioned by the Company's representatives at the sessions of the Board after the employees had questioned the applicability of Article 3 (*e*) to grievances under Article 4 (*b*). Naturally, the Company did not suggest in its brief that the employees should have taken the procedure provided by Article 3 (*e*) before making application for a Board of Conciliation and Arbitration for the good and sufficient reason that these two disputes, which are now before this Board, had already been submitted to the provisions of Article 3 (*e*) and had been taken by the employees through each step of the procedure contemplated by that Article. What the Railway Company suggested in its brief was that the correct procedure for the employees to have followed *thereafter* would have been to go before C.N.R.E. Board of Adjustment No. 2. Whether that suggestion should or should not have been followed, this Board since its own establishment does not have to decide.

The employees cannot hope to sustain before this Board their contention that Article 3 (*e*) does not cover the settlement of disputes arising under Article 4 (*b*), for it is established (i) that the two very disputes now before this Board do arise under Article 4 (*b*) and (ii) that those two disputes have already been subjected by the employees themselves to the procedure contemplated by Article 3 (*e*). Having themselves taken proceedings under Article 3 (*e*) in these two disputes, surely they cannot now impugn those proceedings, but are estopped from questioning their regularity and validity.

These disputes were so dealt with in the same way that all the 50 cases shown on the Exhibit entitled "Appendix 'A' to Railways Submission No. 5" were dealt with under Article 3 (*e*) before being taken to C.N.R.E. Board of Adjustment No. 2. All those 50 cases went first through the procedure prescribed by Article 3 (*e*) and were only subsequently taken before C.N.R.E. Board of Adjustment No. 2, which in fact is the procedure contemplated by two clauses (hereinafter quoted) of the Agreement constituting that Board. Of those 50 cases no less than 10, or one-fifth, arose under Article 4 (*b*). Those two complaints before the Board arose under

Article 4 (*b*); they were actually prosecuted by the employees under the terms of Article 3 (*e*); the employees cannot now, to my mind, argue that the provisions of Article 3 (*e*) do not apply to complaints arising under Article 4 (*b*).

The two clauses referred to above in the Agreement constituting C.N.R.E. Board of Adjustment No. 2 read as follows:—

"The parties hereto agree to the establishment of a Board composed of members to be selected as hereinafter prescribed for the purpose of disposing of outstanding grievances or disputes that may arise from the application, non-application or interpretation of the schedule of wages and working conditions now in effect or hereinafter established which are not promptly adjusted between the officers of the Railway and the Representatives of the Employees."

"Disputes arising will be handled as heretofore up to and including the General Manager or corresponding officer of another Department. If decision given is not satisfactory to the employees, the case may be appealed to the Board."

Although the assignments complained of in these two disputes were referred to by the employees as having been arbitrarily put into effect by the Railway Company, no evidence was adduced before the Board to indicate that the Railway Company had, in the twelve years since the Schedule in question has been in effect, nor theretofore, habitually made harsh or arbitrary use of its privilege or discretion to make assignments or changes in assignments.

On the contrary the Company in one of its written representations to the Board states that "the management has proceeded on the basis that the elements of assignments set up in the list of runs embodied in the wage agreement, when written in September, 1927, should be taken as indicating reasonable limits; that no run or assignment now made should require more overall hours, less rest and shorter layover than any run in the original list;" and that it was willing to continue this practice.

The employees instead took the position that, although in the past they have availed themselves of Article 3 (*e*) of the Schedule whenever they did not acquiesce in changes made by the Company, no such action on their part should be construed as creating any admission or precedent to the affect either that Article 3 (*e*) would be applicable to future similar disputes or that any assignment or change in assignments could lawfully be made by the Company without that prior mutual agreement which the employees allege is called for in Article 4 (*b*). As a general statement of law it may be correct to say that even repeated use of a procedure does not prevent the person who has used it from arguing against its applicability in other similar matters, but here we are dealing with specific cases which have already been subjected to the procedure now attacked by the very parties now attacking it. If the employees' general statement of law is correct, I agree that they might in future similar disputes allege that they are not bound again to use Article 3 (*e*) merely because they have used it in the two cases before this Board. But they cannot come before the Board admitting that they have used Article 3 (*e*) in these two cases, even in fact submitting some of the correspondence exchanged in the course of the proceedings under that Article, and then expect to succeed in arguing that Article 3 (*e*) is not applicable to these cases.

Further, I repeat, this Board is concerned primarily and most importantly with the question of what "ought or ought not to be done by the respective parties concerned" in the future and not with giving advice as to the meaning in law of any words in the Schedule or as to the result in law of any continued course of action.

Section 58 of the Act

4. The employees' application referring to the Central and Eastern lines also contains the complaint that the Railway Company infringed the provisions of Section 58 of the Industrial Disputes Investigation Act in that certain changes, which the employees contend affected conditions of employment with respect to wages or hours, were made effective before the dispute had been dealt with by a Board of Conciliation. As the employees now in question are engaged and paid on a monthly basis, changes of assignments or the establishment of new runs do not affect their conditions of employment with respect to wages or hours, and this section of the Act does not appear to apply in the circumstances.

Efforts to conciliate

5. The representatives of the parties to the dispute were invited, particularly in view of current conditions, to settle their differences, even if need be with sacrifices on each side, and the members of the Board used their utmost endeavours to assist them to conciliation. The individual representatives of each party to the dispute showed themselves ready and willing to explore every avenue of conciliation suggested by the members of the Board, but unfortunately these negotiations repeatedly came to nought on the point or question of principle, which as mentioned above is the basis of both these disputes, and which may briefly be stated as follows: "Should Article 4 (*b*) of the Schedule be acted upon (i) as if it meant that the Railway Company has the uncontrolled privilege

or discretion, not only of deciding upon changes in the service or upon the establishment of new runs, but also of making the assignments of employees incidental thereto, or (ii) as if it meant that, without violation of the Schedule, no such change can be made nor such new runs established until prior mutual agreement as to the number of men to be assigned has been arrived at?"

Conclusions

6. It appears to me, upon examination of the documents submitted, upon weighing the arguments and explanations offered to the Board, and upon consideration of the public service required from a Railway Company operating in the geographical and climatic conditions which exist in Canada, that the first of these two alternatives is the right one and accordingly that the contention of the Railway Company is well founded. It not only has, but also must have, unfettered discretion in these matters. Further, as indicated above, in case the terms of any such assignment shall give any employee or group of employees any cause to consider himself or themselves aggrieved, provision is made in Article 3 (*e*) for the procedure of which he or they may take advantage, and C.N.R.E. Board of Adjustment No. 2 is also open, and was in fact expressly constituted to consider and deal with any cases of grievances as shown by the two clauses of its constitution quoted above.

But, in the meantime, while grievances are brought forward, complaints are made, appeals are prosecuted, and arbitration proceedings are conducted, the Railway's service to the public must continue and this can only be guaranteed to the people of the country if the Railway Company itself has, within reasonable limits, an uncontrolled discretion as to assignments, subject always to the Employees' right to adjustment through the media above mentioned. It must be remembered, too, that new or changed assignments often have to be put into effect within a few hours' time and the responsibility for making them effective must be accepted by some person or body. The Railway Company is the logical, and in fact the only possible, agent for this purpose.

Having so reached the conclusion that the Railway Company has now, both as a right arising out of the Schedule and as a necessary social condition, the uncontrolled discretion (subject as aforesaid) to establish and change runs, I arrive at what I think should be the recommendation of this Board. This would be that the Company should agree to a reasonable limitation upon that uncontrolled discretion and that the employees should admit that such discretion is not conditional on their prior agreement within and up to that limitation. I proceed to a concrete suggestion as to what that limitation should be.

It was clear throughout the proceedings that the representatives of both parties to the dispute were equally sincere in their conviction that their own respective interpretations of Article 4 (*b*) of the Schedule were correct. I have accordingly given considerable time and thought to the elaboration of a new Article 4 (*b*), or an amendment of the existing Article, which I hope will be acceptable to both parties and which I believe would constitute a satisfactory formula not only for the solution of the present dispute, but also for the avoidance of other similar disputes in the future.

I would suggest that the parties should agree that Article 4 (*b*) of the Schedule should be interpreted by them, and acted upon between them, as if it read as follows:—

"In the event of the Railway deciding to make any changes in the service as set up in the foregoing Schedule of runs, or in the event of new runs being established, the number of employees or crews required to operate the service shall be fixed by the Railways. But if the service of any employee would thereby be increased to more than working hours per month the Railways shall endeavour to have the assignment agreed to by mutual consent between the Superintendent and the Employees' General Committee. If such mutual consent is not obtained, the assignment as fixed by the Railway shall be made effective and the matter in question shall be dealt with in accordance with Article 3 (*e*)."

The blank in the second sentence of the above quotation should contain such a figure of hours as represents a fair and not unreasonable month of labour in the type of service rendered by the employees under discussion. In order to impose a limitation which will both give the Railway Company a fair margin up to which it may exercise the right of immediate decision, which it must have as pointed out above, and at the same time ensure the employees against any harsh or arbitrary use of that right, I suggest that this figure should be slightly over that representing the present average monthly service of all road employees paid on a monthly basis in the Sleeping, Dining and Parlour Car services of the Company.

This would also necessitate arrangement between the parties as to the method of arriving at a computation of "working hours per month" for the purpose of the suggested new Article on account of the fact that, as represented to the Board, different systems of computation are now used by the Company and the Employees.

The Company is already obliged to observe the provisions of Article 2 (*b*) of the Schedule,

which require positions to be bulletined for 15 days. I think the Company should also agree that, even within the limits of its uncontrolled discretion as defined in such new or amended Article 4 (*b*), it will not, except in cases of emergency or other necessity, establish any new run or change any existing run without giving the employees fifteen days prior notice of its intention to do so and thereby according the employees reasonable opportunity to make any protest they wish.

If the employees would prefer it, I would be equally willing to recommend that the last phrase of the revised Article 4 (*b*) of the Schedule suggested above should read "the matter in question shall be dealt with in accordance with Article 3 (*e*) and by C.N.R.E. Board of Adjustment No. 2". I had no intention, in framing my suggested revision, to imply that their right of appeal should end with the proceedings specified in Article 3 (*e*), and I am sure that in fact under my suggestion they would still have the same right to use Board of Adjustment No. 2 as they now have. But if the employees desire to have this point clarified I would make the additional reference to that Board a part of my suggested revision of the Article and of my recommendations which follow.

Recommendations

7. I submit that what ought to be done by the respective parties concerned is:—

(1) To amend Article 4 (*b*) of the Schedule to read as above quoted (or to the like effect), or to agree that it shall be acted upon as having that meaning, thereby substituting limited and reasonable discretion in the Railway Company for the unlimited discretion which its representatives allege that it has and has always had; and

(2) To agree that the purport and intent of paragraph (1) shall be followed in the interpretation of all the other clauses of the Schedule which refer to "mutual agreement" with regard to employee assignments, for instance Article 4 (*c*), Article 15 (*c*), etc.; and

(3) For the employees, relying upon the advantages to be gained by them from the operation of the preceding paragraph and of paragraph (5) below, to withdraw their request for the re-establishment of the assignments forming the subject of these disputes, both the Flin Flon run and those in the Central and Eastern Districts; and

(4) For the employees, both for the same reason and because they have not established that they are entitled to it, to withdraw their request for lost wages and expenses; and

(5) For the Company to agree to give fifteen days' notice of intended changes in runs or of establishment of new runs, except in cases of emergency or necessity.

Before such a report as this is submitted tribute must be paid, and is paid, to the sagacity and forensic ability of the representatives of both parties to whose representations and arguments it was at all times a pleasure to listen.

Respectfully submitted,

(Sgd.) F. C. DOBELL,
A Member of the Board.

Report of Board in Dispute between Various Steamship Companies and their Longshoremen at the Port of Montreal

A unanimous report was received from the Board of Conciliation and Investigation established to deal with differences between various steamship companies represented by the Shipping Federation of Canada, Inc., and their longshoremen at the Port of Montreal, members of Local 375, International Longshoremen's Association.

The dispute related to the demand of the employees for increased wages, shorter hours and improved working conditions, 2,600 workmen being directly affected.

The personnel of the Board was as follows: Honourable Mr. Justice John G. Gillanders, of Toronto, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members; Mr. F. C. Dobell, of Montreal, nominated by the company, and Mr. Raoul Trepanier, also of Montreal, nominated by the employees.

The text of the Board's report follows:—

Report of Board

To the Honourable the MINISTER OF LABOUR, Ottawa, Ont.

Re: Industrial Disputes Investigation Act and re differences between various steamship companies represented by the Shipping Federation of Canada, Inc., and their longshoremen at the Port of Montreal, members of Local 375, International Longshoremen's Association.

Sir:

The Board of Conciliation and Investigation established in this matter has met in Montreal throughout the current week. Representatives of the employees and of the Shipping Federation of Canada, Inc., representing the various ocean steamship companies using the Port of Montreal, have submitted, and subsequently explained and discussed, written

statements of their respective positions and of the grounds on which they relied for maintaining them. These representatives were also afforded, and took advantage of, opportunities for oral argument and for questioning each other. Subsequently the members of the Board held further meetings for the consideration of the purport of this report.

The Board's recommendation for the settlement of the dispute is that the demands of the employees for increased wages, shorter hours and improved working conditions should not be conceded as demanded, because the merits and substantial justice of those demands were not proved, but that some increase in wages should be granted as a temporary measure during war-time and that some of the other demands of the employees should be conceded in modified form.

Attached hereto is a draft Agreement which the Board recommends that the parties to this dispute should execute to replace the existing Agreement dated March 5, 1938. For convenience of reference, whatever words are either newly introduced in this draft or constitute therein amendments of the previous Agreement are underlined in typed copies of this report or italicized in printed copies.

Of the changes involved the most important, and the one to which most time was devoted both by the representatives of the parties at the board sessions and by the Members of the Board in their private discussions, was the question of wages. The Board wishes to make it clear that, in recommending an increase, it is actuated primarily and principally by consideration of the peculiar situation which now exists in ocean shipping and which may be expected to continue, or even to become accentuated, during the continuance of the current hostilities. The Board stresses the fact that the increase in wages which it is recommending should be regarded as a war bonus and that, if the Shipping Federation of Canada, Inc., and the constituent companies adopt and execute the proposed new Agreement, they will do so, and will in future be recognized as having done so, solely with the object of furthering the public interest in war-time by ensuring the harmonious operation of one of the most important seaports in the British Empire. It would therefore be part of the Board's recommendation that the scale of wage rates included in the proposed new Agreement should not be considered as constituting any statement of opinion as to what are reasonable wage rates under present conditions with regard to living costs and other determining factors, but that the companies should retain the right, in accordance with the terms of the Agreement, to demand the revision of these rates when they consider that circumstances warrant.

The draft Agreement which the Board recommends should be entered into between the parties has been dated as of April 24th and Clause 1 states that the Agreement and the Schedule of Working Conditions shall be effective as from April 24th. This date was not selected for the reason that it marked the holding of the last public session of the Board, but because the Board was informed that that day would witness the opening of navigation for the 1940 season in the Port of Montreal. The intention of the Board is that the revised Agreement should govern from the opening of navigation, whether that occurs on the 24th instant or on another date.

It was represented to the Board that, during the continuance of the current War, a new operation may be expected to become prevalent in the Port of Montreal, namely the loading of lumber into ships from cars or open wharves. There is inserted as the last phrase of Article 24 of the Working Conditions in the proposed new agreement a suggested formula to cover this operation. The Board recognizes however that the parties themselves are much better qualified to arrive at a satisfactory and practicable arrangement with regard to this matter and invites them to amend this phrase in any way which may be mutually agreeable to them. At the same time the Board asks the parties not to allow any difference of opinion on this one point to prevent their adoption of the remainder of the Agreement.

In conclusion, the Board would wish to give expression to its sense of obligation to the representatives of both parties for their patient and valuable efforts in assisting it to arrive at a recommendation which its Members feel sure will facilitate, and which they hope will in fact ensure, an amicable settlement of the dispute referred to it for investigation and conciliation at a time when disputes elsewhere are not receiving any such benefits.

The whole respectfully submitted.

(Sgd.) J. G. GILLANDERS,
Chairman.
(Sgd.) F. C. DOBELL,
(Sgd.) RAOUL TREPANIER.

Montreal, April 25, 1940.

Draft Agreement

Memorandum of Agreement made at Montreal as of the *24th day of April, 1940*, between (Insert names of Companies—hereinafter called the "Companies") and: *International Longshoremen's Association, and its Affiliated Local 375* (hereinafter called the "Longshoremen")

Witnesseth:

1. This Agreement, and Schedule of Working Conditions attached hereto, shall become effective *as from April 24, 1940*, and shal continue in full force and effect until the 31st of December, *1940*, and thereafter from year to

year unless or until either party serves written notice on the other party to the contrary at least *Sixty* days prior to December 31, *1940*, or Sixty days prior to December 31, of any subsequent year.

2. That in consideration of the undertakings hereby entered into and obligations assumed by the Longshoremen, the Companies hereby undertake and agree:—

(*a*) Tu put up a bond of *$2,000* issued by a duly incorporated insurance or trust company who will also act as trustee for a guarantee of the due performance by them of this Agreement.

(*b*) That working hours shall be between 7 a.m. and 12 o'clock noon and between 1 p.m. and 6 p.m., during which the rate of pay shall be *Eighty-five cents (85c.)* per hour, between 7 p.m. and 11 p.m., during which the rate of pay shall be *Ninety-five cents (95c.)* per hour and between midnight and 5 a.m., during which the rate of pay shall be *One dollar and five cents ($1.05)* per hour.

(*c*) That double time to be paid on Sundays, St. Jean Baptiste Day and Dominion Day.

(*d*) That when longshoremen are required to work any meal hour they shall receive double time at the prevailing rate of wages and for each succeeding hour until discharged for meals.

(*e*) That the rates of pay for working on nitrate, blulk sulphur, *bulk ore, potash,* full cargoes of china clay and fertilizer, shifting bunker coal, and handling cargo in refrigerators which is to be transported at 32 degrees Fahrenheit or lower, shall be *One dollar ($1)* per hour for the periods between 7 a.m. and 6 p.m., *One dollar and ten cents ($1.10)* per hour for the period between 7 p.m. and 11 p.m., and *One dollar and twenty cents ($1.20)* per hour for the period between midnight and 5 a.m.

(*f*) That the rates of pay for grain trimming and bagging shall be *One dollar ($1)* per hour for the periods between 7 a.m. and 6 p.m., *One dollar and ten cents ($1.10)* per hour for the period between p.m. and 11 p.m., and *One dollar and twenty cents ($1.20)* per hour for the period between midnight and 5 a.m., the running of the grain in the pipes to be stopped while the men go down in the hold to work, two men to stand on deck during that time, if necessary.

(*g*) That for work performed in open 'tween deck where there is grain running in a hatch connected with the said open deck the rates of pay for the whole gang shall be *One dollar ($1)* per hour for the periods between 7 a.m. and 6 p.m., *One dollar and ten cents ($1.10)* per hour for the period between 7 p.m. and 11 p.m., and *One dollar and twenty cents ($1.20)* per hour for the period between midnight and 5 a.m., this not to apply to men working other cargo in the lower hold.

(*h*) That starting times for day work shall be between 7 a.m. and 7.30 a.m., at 9 a.m., and between 1 p.m. and 1.30 p.m. Men called for 9 a.m. shall be put to work at that hour or paid a minimum of one hour's pay.

(*i*) That men ordered out to work at night must be ordered out for 7 p.m. and be paid full time at the prevailing rate from that hour until discharged or set to work; a minimum of one hour shall be paid in the event of the men not commencing work. Orders for men required at 7 p.m. and who have not been working during the afternoon, to be given on or before 4 p.m.

(*j*) That men ordered out on Sunday *and holidays mentioned in Section (c)* and not commencing work shall receive a minimum of *two* hours' pay at the prevailing rate.

(*k*) That preference of work will be given to members of Local 375, I.L.A. whenever such are available, provided, however, that such preference shall only be given in so far as it may be permissible under the laws of the Dominion of Canada and/or the Province of Quebec.

(*l*) That all the above mentioned conditions and schedule of wages apply to all ocean steamships coming into the harbour of Montreal under the Companies' jurisdiction.

3. That in consideration of the scales of wages hereby agreed to by the Companies and the Schedule of Working Conditions and other undertakings hereby entered into, the Longshoremen undertake and agree:—

(*a*) To put up a bond of *$2,000* issued by a duly incorporated insurance or trust company who will act as trustee for a guarantee of the due performance by them of this Agreement.

(*b*) To supply the necessary men under the jurisdiction of the Longshoremen to perform the work of longshoremen throughout the term of this Agreement.

(*c*) That subject to Article 2, Sections (*i*) and (*j*), mails, baggage, express to be handled on Sundays, week days at all times, and holidays (except Labour Day) at the prevailing rate of wages, time to count from the time the men are ordered.

Note.—The Companies agree under reservation to this clause in view of Section 90, Chapter 161 of the Revised Statutes of Canada, 1927, which states as follows:—

"161. Every one who abandons, or obstructs, or wilfully delays the passing or progress of any mail, or any car, train, locomotive engine, tender, vehicle, vessel, air vessel, horse or animal employed in conveying any mail on any railway, public highway, river, canal or water communication, is guilty of an indictable offence."

(*d*) That the Longshoremen accept and adhere to the scale of wages and other conditions set forth herein, and to the Schedule of Working Conditions appended hereto, until the termination of this Agreement.

4. That the Companies and the Longshoremen hereby consent and agree that the two bonds of *Two* thousand dollars each herein referred to will be held by the trustees upon the understanding that the bonds so deposited by each of the parties shall be applied by the said trustees in payments in order of priority of time, of any and all judgments or orders of any Court in the Province of Quebec, in favour of the other party until the termination of this Agreement.

5. That the Longshoremen shall have the right to appoint a representative on the wharves

to be elected at a general meeting of the Longshoremen.

6. That the parties hereto have agreed to the hours of work set forth in this Agreement with the proviso that both parties shall take such steps as lie within their competence to ensure that the average number of hours per week of the workers shall not exceed forty-eight over the term of the Agreement.

In Witness Whereof the parties hereto have executed these presents as of the day, month and year first hereinabove written.

Schedule of Working Conditions referred to in Article 3, Section (*d*) of the Agreement, dated *April 24, 1940,* between the Companies and the Longshoremen.

General

1. All foremen and men shall be under the control of the Company's Superintendent and/or Contracting Stevedore, but all orders to the men shall be given through their respective foremen.

2. Walking Bosses are under no obligation to be Members of Local 375, I.L.A.

3. Any man found smoking in the hold, pilfering, or under the influence of liquor while at work, shall be discharged at any time.

4. Any extra man called during the forenoon or during the afternoon shall be paid from 7.30 a.m., 9 a.m. or 1.30 p.m. until noon or 6 p.m. respectively, except when the whole gang is discharged, but such extra man can be shifted from gang to gang if necessary.

5. When a gang has to go from one place to another, after receiving orders to do so the men shall be paid from the time such order is issued to them.

6. When using *two-wheeled* handtrucks two men shall be employed on the truck when the truckload exceeds *800* lbs. net weight of cargo. *If one piece it may be 850 lbs.*

7. Dunnage must be put in sling and lowered with winch if men are working in the hold.

8. Hatch beams must be taken off or bolted when men are working in the hatch and using a winch.

9. When cargo in bags is piled up in the shed more than 7 bags high, or when hay in bales is piled up in the shed more than 5 bales high *or when canned goods are piled up in the shed more than 7 feet high,* one extra man shall be employed.

10. Ships in course of loading or unloading —1 to 2 Walking Bosses per pier, at option of Company's Superintendent and/or Contracting Stevedore.

11. The Companies and/or Contracting Stevedores shall have the right to judge how all men in the gang are to be distributed, and shall also have the right to work with falls together or any other practical and safe method of loading or unloading.

12. Any dispute as to the interpretation of the Working Conditions herein contained shall be taken up by the Longshoremen's representative on the wharves with the Company's Superintendent and/or Contracting Stevedore, and not with the men. No official of the Companies or of the Longshoremen has the right to make any changes in this Schedule of Working Conditions. Should there be any dispute which cannot be adjusted between the parties hereto, as to the interpretation of any of the clauses of these working conditions, the men shall continue to work, and such dispute shall be referred to a Committee of Arbitration consisting of three members, one selected by the Companies, one by the Longshoremen, and a Chairman selected jointly by the other two. Such Committee shall sit without any unnecessary delay, and a majority decision shall be final and binding on both parties.

Unloading of a Ship

13. Sixteen men shall constitute a regular gang for the unloading of all cargo landed on handtrucks, and when this number of men are employed *neither the slingload nor the truckload shall exceed* 1,200 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

14. Sixteen men shall constitute a regular gang for the unloading of all cargo landed on mechanical trucks and/or trailers, and when this number of men are employed the slingload shall not exceed 2,000 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package. *Not less than six men in the hold.*

15. Sixteen men shall constitute a regular gang for the unloading of all cargo on to wharves, or cars, when not landed on handtrucks or mechanical trucks and/or trailers, and when this number of men are employed the slingload shall not exceed 1,600 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

16. Eighteen men shall constitute a regular gang for the unloading of all cargo overside into another vessel, and when this number of men are employed the slingload shall not exceed 2,000 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

17. The Companies and/or Contracting Stevedores shall have the right, at any time, to increase the slingloads mentioned in Articles 13, 14, 15 and 16 herein, and in such event they shall increase the number of men in the gang, but shall have the right to judge as to the number of extra men needed.

18. Notwithstanding anything contained in Articles 13 to 17 inclusive, the following shall be the slingloads (unloading) of the undernoted commodities:—

Raw Sugar at the Refineries and overside to Lake Vessels:

Bags, 320 lbs	5 per sling	net weight of cargo, 5% margin.
" 275 to 230 lbs	7 " "	
" 230 to 180 lbs.	8 " "	
" under 180 lbs.	10 " "	

Baled Woodpulp:

Bales over 280 lbs.	6 per sling	and not less than 20 men in gang.
" 280 to 160 lbs.	8 " "	
" under 160 lbs.	10 " "	

Tinplate:

10 boxes per sling, or equivalent, not to exceed 2,240 lbs. net weight of cargo, when unloaded on to mechanical trucks and/or trailers, or when unloaded into another vessel.

Timber:

35 ft. in length or more, one per sling from hold, landed on any kind of buggy, but when from deckload, two or more per sling subject to size. Timber 8 x 8, 20 ft. in length, 6 per sling.

Rubber (Bales weighing 210 to 260 lbs. each):

6 bales per sling.

Loading of a Ship

19. Sixteen men shall constitute a regular gang for the loading of all cargo from handtrucks, and when this number of men are employed, *neither the slingload nor the truckload shall exceed* 1,400 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

20. Sixteen men shall constitute a regular gang for the loading of all cargo from wharves or cars when hand or mechanical trucks are not used, and when this number of men are employed, the slingload shall not exceed 1,600 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

21. (*a*) Sixteen men shall constitute a regular gang for the loading of all cargo with mechanical trucks and/or trailers, when the trucks and/or trailers are not loaded by Longshoremen, and when this number of men are employed the slingload shall not exceed 2,240 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

(*b*) *Seventeen men* (*exclusive of driver of towmotor*) shall constitute a regular gang for the loading of all cargo with mechanical trucks and/or trailers, when the trucks and/or trailers are loaded by Longshoremen, and when this number of men are employed the slingload shall not exceed 2,240 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

22. Eighteen men shall constitute a regular gang for the loading of all cargo overside ex vessel, and when this number of men are employed the slingload shall not exceed 2,000 lbs. net weight of cargo, 5% margin, except in the case of a single piece and/or package.

23. The Companies and/or Contracting Stevedores shall have the right at any time, to increase the slingloads mentioned in Articles 19, 20, 21 and 22 herein, and in such event they shall increase the number of men in the gang, but shall have the right to judge as to the number of extra men needed.

24. Notwithstanding anything contained in Articles 19 to 23 inclusive, the following shall be the slingloads for the undernoted commodities:—

Rolls of Paper:

Up to 500 lbs.	3 per sling	when loading from hand trucks.
500 to 1,000 lbs.	2 " "	
Over 1,000 lbs.	1 " "	

Copper:

Up to 1,000 lbs.	2 per sling
Over 1,000 lbs.	1 " "

Deals and Lumber:

Pine or Spruce deals, 3 in., 12 pieces per sling except spruce deals not exceeding 7 in. wide, 14 pieces.

Pine or Spruce deals, 2 in., 18 pieces per sling. When spruce or pine scantlings or deals are handled together, not less than the equivalent of 12 pieces of 3 in.

Pine or spruce, 1 in., 30 to 32 pieces.

Pine or spruce scantlings, equivalent of 12 pieces of 3 in.

Pine or spruce deal ends, 8 to 10 ft. long, 18 pieces.

Pine or spruce deal ends, 10 to 12 ft. long, 16 pieces.

Pine or spruce deal ends, 2 to 7 ft. long, 32 pieces.

Saw birch, 4 in., 10 pieces; Saw birch, 3 in., 12 pieces; Saw birch, 2 in., 16 pieces; Saw birch, 1 in., 30 pieces.

All timber exceeding 16 ft. in length, 3 in. thick, will be considered as long timber, and the load will be 10 pieces.

The foregoing quantities of deals and/or lumber cover operations with handtrucks only. When mechanical trucks and/or trailers are used, the quantities may be increased.

The loading of lumber from cars or open wharves to ship will be a separate operation when no trucks or trailers are used, and the slingload shall be governed by prevailing conditions, the gang for this operation to be not less than 16 men.

25. *The Companies agree to appoint a small Committee, which shall meet a similar Committee of the Longshoremen, when necessary, for the purpose of adjusting any legitimate grievance which may arise in connection with the operation of this Agreement.*

Report of Board in dispute between the London Street Railway Company and its motormen-conductors, bus operators, shopmen barnmen and trackmen

The findings of the Board of Conciliation and Investigation established to deal with a dispute between the London Street Railway Company and its motormen-conductors, bus operators, shopmen, barnmen and trackmen, members of Division 741, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America, were received in the Department of Labour on May 3.

The Board was composed of His Honour Judge J. J. Coughlin, of Windsor, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members; Mr. Waldon Lawr, K.C., Toronto, nominated by the company, and Mr. Oliver William Durdin, London, Ont., nominated by the men.

The report of the Board was signed by the chairman and Mr. Lawr, and, although Mr. Durdin did not concur in some of the statements contained in the report and submitted a minority report, both the majority and minority reports are identical in the substance of their recommendations, namely, that wage rates of street car and motor bus operators should be increased three cents an hour, and wage rates of shopmen and trackmen receiving less than 55 cents an hour should be increased one and one-half cents per hour.

The texts of the two reports follow:—

Report of Board

London, Ontario,
April 26th, 1940.

The HONOURABLE NORMAN A. MCLARTY,
Minister of Labour,
Ottawa, Ontario.

Sir:

Re: London Street Railway

PRELIMINARY STATEMENT

Pursuant to our authority as a Board of Conciliation appointed by you under the Industrial Disputes Investigation Act we proceeded with the investigation of the dispute between the above company and its employees after due notice to the parties directly concerned.

Sittings of the Board were held, in camera, at the Municipal Buildings in London on April 3rd, 4th and 5th, and on April 10th to 13th, and from the last mentioned date adjournment was made to this day for the consideration of evidence and exhibits and the drafting and final consideration of our findings.

At the hearing the company was represented by Mr. R. G. Ivey, President, Mr. L. Tait, Manager, and Mr. P. Glasgow, while the employees were represented by Mr. Magnus Sinclair of Toronto, General Executive Board member of the Amalgamated Association of Street and Electric Railways and Motor Coach Employees of America, and by Mr. John Colbert and Mr. William Knight of London, members of the local union.

The demands of the men were:

(1) An increase of eight cents per hour to bring the wage scale back to the 1929 standard. It had been diminished by successive reductions during the depression to a total of ten cents of which two cents was restored in 1937 leaving the present scale eight cents below that of 1929.

(2) An increase of the period of holidays with pay from three days discontinuous to one week continuous.

Efforts towards a compromise agreement were made without success, the company admitting the men's right to some increase in pay but claiming that any attempt to remedy a slight injustice to the men could only be at the expense of a greater injustice to its stockholders and the representatives of the men contending that the company was in a position to make the increase of pay demanded.

As this Board has no coercive powers and in the event of failure to induce the parties to come to an agreement can only make recommendations which the parties are at liberty to accept or reject it was decided to enter, in as exhaustive manner as the time would permit, into the question of the ability of the company to pay and if inability to pay should be established to try to find the causes for it and, if possible, a remedy.

We now set out the result of our investigation into that matter, with our recommendations, in the following report:

HISTORY OF COMPANY

The London Street Railway Company has been in existence for sixty-five years and has gone through the phases of horse car, electric car and motor bus transportation.

In the horse car days it was operated on local capital producing satisfactory returns to the investor.

The stock of the company was taken over by American investors in the year 1895 and the road electrified, the first complete year under electrification being 1896 and our study of the affairs of the company is from that year on. Buses were first tried out on a small scale in 1926 and have been added to periodically until in 1939 fifty-seven per cent of revenue was derived from buses.

We present in the following table a record of the average yearly business of the company by five year periods from 1896 to 1939 inclusive showing also the average rate of fare for all passengers including children:

Period	Average No. of Passengers	Average Revenue from Passengers	Average Rate of Fare
1896-1900	2,502,000	95,600	3·82
1901-1905	4,314,000	161,400	3·74
1906-1910	6,374,000	229,200	3·60
1911-1915	9,220,000	333,500	3·62
1916-1920	12,539,000	465,500	3·74
1921-1925	13,599,000	622,100	4·58
1926-1930	12,135,000	608,800	5·02
1931-1935	8,910,000	493,000	5·55
1936-1939	8,901,000	488,800	5·49

We also present in the following table a record of the average paid-up capital on investment during the corresponding five year periods together with the amounts paid in dividends and the (average) rate.

In this table is included stock dividends which were three in number and aggregated $58,640. The same amount is also included in the figures as to capital invested:

Period	Capital Invested	Dividends Declared	Rate
1896-1900	$330,000	$18,000	5·61%
1901-1905	452,000	26,040	5·76
1906-1910	555,200	26,020	4·77
1911-1915	555,200	33,310	4·69
1916-1920	624,500	10,210	1·63
1921-1925	637,480	9,560	1·50
1926-1930	637,480	Nil	Nil
1931-1935	637,480	Nil	Nil
1936-1939	637,480	Nil	Nil

DEFECTIVE ACCOUNTING

The last table is incomplete for the reason that while it shows dividends paid it does not show surpluses carried forward. The reason that no surplus figures are shown is that up to the year 1917 under what appears to us to be a very defective accounting system there was no account in the books showing accrued depreciation and thus, what were in the books called surpluses were, in fact, largely illusory or inflated surpluses and of no value in determining the financial condition of the company.

To this defective system of accounting, and to the publication in the company's annual reports of the figures for so called surpluses and to the declaration in the years 1896 and 1897 of dividends at the rate of ten per cent per annum we think may be attributed an impression still widely held that the company has been a money making one.

In fairness to the management of those days it may be said on the authority of the report (Exhibit 2) of Falls and Company, auditors, that this system of accounting was the one commonly followed by street railway companies in that period.

Under the present management of the company a new and, in our opinion, a very excellent system of accounting was introduced in 1918 whereby annual charges to depreciation are made. Attempts were also made in 1918 and again in 1929 to correct the accounting errors of the early period by bulk transfers of large amounts $165,000 and $211,000 respectively, from the (illusory) surplus account to the depreciation account.

DEPRECIATION ACCOUNT

It should here be said that accuracy in estimating amounts to be charged to depreciation where the factor of obsolescence enters, as it did in a marked degree in the transition period from electric car to motor bus, is a most difficult thing to attain. With the ever accelerating progress of science the obsolescence feature in depreciation has taken on an importance not known until quite recent years.

In the course of the hearing of evidence by the Board Mr. Tait, the Manager of the Railway, was requested to revise all previous estimates of depreciation in the light of present day conditions and according to his revised estimate a further charge of $202,383 should be added to the depreciation account. The result of this change is to bring the book value of the fixed assets down to $569,420 and of all assets of the company down to $651,761.04. These assets are subject to a bond mortgage of $385,000.

Following this estimate the Board suggested to the officers of the company the transmission of an offer to the City to sell all its assets, including franchise, at a fixed price to enable the City to negotiate with other transportation interests in regard to a new franchise.

Pursuant to this suggestion an offer has been transmitted to the City Council for the sale of all the company's assets for $550,000, approximately $100,000 less than the book value under the revised estimate above quoted.

POSITION OF STOCKHOLDERS

Without attempting to make an estimate of our own we have taken the figure quoted in the above offer as representing the highest amount that the assets can be deemed to be worth and on that basis to calculate the position of the stockholders.

We are of opinion that a new company dealing for a franchise would negotiate on a basis of maintaining its investment unimpaired and deriving, at the same time, not less than a six per cent annual return on all capital invested whether on borrowed capital or on stock.

But in estimating what stockholders in the present company should have looked forward to as a reasonable objective at the time of making their investment we have adopted a rate of five per cent instead of six, and on that basis proceeded to determine whether it has been a money making or a money losing venture and to what extent.

On calculations much too lengthy to set out in detail, we have found that the results obtained by the shareholders from 1896 to 1939 inclusive fall short of that objective to the following extent, viz.:

Shortage in income.. .. ..$	611,117
Loss in capital..	462,983
Total loss to shareholders..$	1,074,100

To the extent that the actual value should be found to be below the above quoted book value, the loss to the shareholders will be exactly so much greater.

CAUSE OF CONDITION

We do not think the cause is that of mismanagement or under salaries of officers or too high wages to employees. Stringent economy in management has been the rule for many years. The office of Secretary-Treasurer was combined with that of Manager, saving the salary of one official and imposing, we think, too great a burden on the occupant of the combined offices. The management have made savings to the shareholders by the purchase, at a low price, for

the benefit of the company, of all bonds which were offered for sale at fifty cents on the dollar or less. As there is a very bad market for the bonds of a company in financial difficulties, very considerable savings have been made in this way.

For the responsibility, work and worry involved the remuneration of President, Directors and Manager is low.

The wages of the men are also on the low side.

With all these things on the low side what is the cause? The answer is *low fares.*

Not inordinately low fares but slightly too low a fare prevailing from the very inception of electrical transportation in 1896 down to the present day.

An increase of a third of a cent per trip throughout the whole period would have cured all the "lows" and would have saved all concerned from loss.

The only beneficiaries of these low fares have been the millions of car riders who, for the past forty-four years, have been getting their daily transportation at a shade less than cost. There is no way of collecting from them, so the loss remains where it now rests.

The sufferers have been primarily the shareholders and secondarily the officials and wage earners.

Remedy Suggested

We doubt if any other transportation interest is in as good a position to give to the citizens of London the transportation they want at a lower price than the present company provided a reasonably fair franchise can be arranged.

Therefore we suggest immediate negotiations between the City and the present company for a new franchise based on a fair return, not on the originally invested capital of the company but on that capital less the loss of 70 cents on the dollar, or more, indicated above and which has gone beyond recall.

There should, in our opinion, be an abandonment of all electric car operations and the substitution of buses. This will get rid of the bad street conditions and much reduce the obstruction of automobile traffic and dangerous down town congestion now prevailing. It will also bring about a more rapid transportation of patrons.

Motor bus operation is more expensive than electric car operation and the increased cost must be cared for in the rates of fare to be established. We think it possible that a competent fare can be established at a level so little in excess of that now prevailing that the deterrent effect on patronage of the increase will be more than balanced by the counter attraction of a vastly improved system.

New capital of $200,000 or more, in addition to the present capital of the company will have to be found. With a reasonably fair franchise, the company should be able to find this.

Recommendations as to Wages and Holidays

Having completed our findings and recommendations with respect to the company and to the anticipated new franchise we now return to the subject of the demand of the employees.

We have already found that the wages of the men are on the low side. Compared with the hourly rates prevailing in cities where transportation is under municipal operation and where deficits can be paid out of taxes the hourly rates paid by the company are substantially lower.

But there are other features of the company's record that are well worthy of commendation:—

Employment is steady. The company has a very low percentage of temporary employees, much consideration having been given to secure steadiness of employment by doing, in the shops of the company, jobs that might with much less trouble to the Management be substituted by new units purchased in the United States or elsewhere.

The company has shown its appreciation of the faithful services of its old employees by retaining them in the service at good pay to an age beyond that at which many industrial concerns let aged employees out.

Several employees are over seventy: thirty of its employees ranging from age sixty to seventy inclusive worked the full twelve months of 1939 and drew average wages of $1,245.

Three day holidays, with pay, are allowed but have to be sandwiched in so as not to interrupt operations of the company. This is unsatisfactory to the men.

Some evidence was given on behalf of the company aimed at establishing a favourable comparison between the wages paid by it and that by other employers of labour in London. We do not think we are in possession of sufficient material to make a definite finding in that regard.

In the recommendations we are about to make for increases in pay rates we find we must make a distinction between car and bus operators on the one hand and the shop and track men on the other hand. The former are paid on a uniform basis of 47 cents per hour, the latter at various rates, a few unskilled workers as low as forty-five cents per hour and ranging from that up to sixty-five cents an hour. Under the conditions prevailing and detailed above we recommend an increase of three cents per hour in the wages of the operators and an increase

of one and one-half cents per hour in the wages of such of the shop and track men as are now paid at a rate of less than fifty-five cents.

We also recommend that all the men be granted a full week's continuous holidays with pay, arrangements for the order of the holidays to be made between a committee of the men and the management. We favour holidays not so much for any physical or mental benefit they provide as for the pleasure given by their anticipation.

We make these recommendations for increased wages realizing that under existing conditions there are no profits out of which they can be paid and that they must come out of the already much depleted capital of the stockholders.

We urge the acceptance of these recommendations on the company in the belief that the temporary additional sacrifice of capital it entails will help pave the way for the effecting of a new arrangement whereby the interests of car-rider, company employee and investor will be held in proper balance and whereby no one of any of these classes will have to make an unjust sacrifice for the advantage of the other.

Respectfully submitted.

(Sgd.) J. J. COUGHLIN,
Chairman.

(Sgd.) WALDON LAWR,
Member.

Minority Report

LONDON, ONTARIO,
April 30, 1940.

To the Hon. NORMAN A. MCLARTY,
Minister of Labour,
Ottawa, Ontario.

SIR:

Re Industrial Disputes Investigation Act and re differences between the London Street Railway Company and its motormen, conductors, bus operators, shopmen, barnmen and trackmen, members of Division 741, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America.

While agreeing with the recommendations of the other members of the Board of Conciliation appointed by you under the Industrial Disputes Investigation Act herein, I regret that I am unable to agree with some of the findings contained in their report, and there are some items which are not referred to in their report to which I would like to refer.

The evidence presented by the representative of the employees, particularly Exhibit 13, compiled from the Dominion Government Wage Book, established that the lowest hourly rate paid by many Canadian Street Transportation Systems was higher than the highest hourly rate paid to the operators employed by the London Street Railway. The figures were complete up to the year 1938. The statement contained information respecting thirteen Canadian cities other than London, and of those thirteen the above mentioned fact was true in the following twelve cities, namely: Halifax, Toronto, Hamilton, Windsor, Port Arthur, Fort William, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria.

In Exhibit 31, filed on behalf of the company, it appeared that in this thirteenth city, namely, Winnipeg, the operators on one man cars were being paid a minimum of 51 cents per hour, as compared with the maximum rate of 47 cents per hour paid by the London Street Railway, where all cars and buses are operated by one man. The lower hourly rate paid in Winnipeg was to operators of two man cars.

In Exhibit 31, submitted on behalf of the company, the same fact appeared to be true of many other cities not referred to in Exhibit 13. The cities mentioned in Exhibit 31, not referred to in Exhibit 13, of which this was true were as follows: Brantford, Victoria, New Westminster, Lethbridge, Montreal, St. John, Ottawa.

Likewise from Exhibit 41, filed on behalf of the employees, showing the hourly wage rates of designated trades in the City of London and other Canadian cities, it appeared that the hourly wage rate paid in the several trades therein mentioned was much in excess of the maximum rate being paid to operators of the company in question, and in most cases exceeded the hourly wage rate paid to shopmen and trackmen employed by the company. The information contained in Exhibit 41 was obtained from the Dominion Bureau of Statistics.

Likewise Exhibit 9, compiled from the LABOUR GAZETTE, published by the Department of Labour (Canada) showed the average hourly wage rate for motormen, conductors and bus operators in all Canada at 61 cents to 62 cents per hour, and in the United States at 75 cents per hour, as compared with the maximum of 47 cents per hour for operators of the company in question.

In the recommendation contained in this report consideration has been given to the fact that the evidence presented to the Board showed among other things that the wages paid to the operators as compared with operators in other Canadian cities were much lower than the wages paid to a majority of the shopmen and trackmen as compared with other Canadian centres.

The evidence also disclosed that in many other centres where the wages paid by transportation companies were both lower and higher than the rate paid by the company in question, employees were receiving other consideration, such as sick benefits, free uniforms, superannuation benefits, and holiday privileges, whereas the operators of the company in question are required to pay one-half of the cost of the uniform, no sick benefits or superannuation benefits are available to them, and a three day holiday in each year is given, although the three days are not given in one continuous period.

Exhibit 17, filed on behalf of the employees, compiled from the LABOUR GAZETTE, published by the Department of Labour (Canada) indicated that cost of living in London as compared with nineteen other Canadian cities was very little lower as regards food, and was substantially higher as regards rent. From this exhibit the estimated cost of food for an average family of five persons for a year in London would be $465.92, as compared with $471.12, being the average cost for all foods for a family of five in the other nineteen Canadian cities. The same exhibit showed an average monthly cost of $26.38 for a six-room modern house in the other Canadian cities, as compared with an average of $30 monthly for the city of London, or an increased annual cost of $43.44 for rent in London as compared with these other Canadian cities.

From the special information supplied by the Department of Labour to the Board, the following facts were established: In February, 1940, it cost $1.20 to purchase in food in the city of London what could be purchased in March, 1937, for $1.14; $1.37 to purchase in February, 1940, in fuel what could be purchased in March, 1937, for $1.33. In February, 1940, $1.23 would purchase in clothing what $1.17 would purchase in March, 1937, and rents in London had advanced in the same period fifteen per cent.

It is apparent from this evidence, I think, that while the cost of living has been steadily increasing during the past few years, the wages paid to the employees in question have not been increasing proportionately. While the figures above quoted, which were supplied by the Department of Labour, apply particularly to London, the same Gazette indicates the same condition in other Canadian cities.

From the exhibits filed on behalf of the employees it appeared that wages paid to the operators herein particularly were lower than those paid to operators employed by other Canadian transportation systems. While this was also true in many cases respecting shopmen and trackmen, it was not so to the same marked degree.

The employees asked that reductions in salaries previously made by the company should be restored in accordance with the award made by the Board of Conciliation which considered the question in 1937. Following the report of this Board of restoration of 2 cents per hour was made to the employees, although a majority of the members of that Board recommended that the full decrease of 10 cents per hour be restored.

From these facts, it was apparent to me that the employees of the company were entitled to an increase in the wages paid to them and it remained to be ascertained what the company was able to pay.

Representatives of the company contended that the company was unable to pay any increased wages to the employees. Both the representatives of the employees and the company were consulted separately by the Board and an attempt was made to reach an agreement between them. These efforts, however, failed.

After considering all of the evidence submitted by the representative of the company, I found myself unable to agree with their contention.

Until 1929 the company showed a net income, after providing for all depreciation charges. Thereafter the company showed a deficit each year, after providing for depreciation. It was about this time, or a few years previous, that the company commenced to abandon parts of the electrical street car system and substitute motor busses. In other words, from about 1926 to date the company has been steadily discontinuing the use of street cars and substituting busses, and in this way converting an electrical street car transportation system to a motor bus transportation system. This conversion has been undertaken without raising additional capital. It is not difficult, therefore, to understand that if this new equipment is to be purchased without raising new capital, the company will have difficulty in showing a surplus while it continues this policy.

The auditor of the company gave evidence before the Board and frankly admitted that the depreciation charges being presently made by the company were in excess of the amount that would normally be required for depreciation if the company had in previous years made adequate depreciation charges. He agreed with me when I suggested "That the company to-day was paying for its folly of yesterday".

This is rather clearly borne out by the 1939 financial statement of the company, from which it appears that, although the sum of $121,000 was expended in that year by the company for maintenance (not repair), an additional sum of $69,000 was charged for

depreciation for the same year, or almost two-fifths of the value of the assets of the company. Bearing in mind that at least $100,000 of the assets consist of real estate, and the large amount expended for maintenance of equipment, it seems quite apparent that the large amounts now required for depreciation have resulted from the failure to charge sufficient amounts for depreciation in the earlier years of the operation of the company.

During the period 1929 to date, the company has also reduced its bonded indebtedness by an amount of $90,000.

These three facts, namely, the conversion of the system without new capital, the present large amounts reserved for depreciation, notwithstanding the substantial amounts expended to maintain and replace parts of the equipment, and the retirement of the bonded indebtedness have to a large degree improved the security of the investors in the company, but this is being accomplished, I believe, partly at the expense of the employees.

The restoration of the 8 cents per hour decrease at this time would, however, create a sizeable increase in operating expenses just at a time when the company contemplates a large expenditure to complete the plan of instituting an all bus system. With this thought in mind, and in the hope that the company itself will shortly restore the balance of the decrease, and prompted by the desire to concur in the recommendations of the other members of the Board, I recommend award and report as follows:—

1. That the wage rate of all operators (both street car and motor bus operators) involved in this dispute be increased as of this date 3 cents per hour.

2. That the wage rate of all shopmen and trackmen involved in this dispute, now receiving less than 55 cents per hour, be increased 1½ cents per hour.

3. That a holiday for a period of seven consecutive days in each year, with pay, be given to all employees of the company involved in this dispute.

Respectfully submitted.

(Sgd.) O. W. DURDIN.

Imperial Oil Employees' Welfare Activities during Twenty-five Years

The LABOUR GAZETTE has from time to time recorded the progressive development of the Employee Welfare plans of Imperial Oil Limited (LABOUR GAZETTE, August 1939, page 809; January 1937, page 49; January 1932, page 43; April 1925, page 347).

The various plans in operation are outlined by the Chairman of the Annuities and Benefits Committee, Mr. J. R. Simpson, in the current issue of *The Imperial Oil Review* as follows:

"The welfare programme of Imperial Oil Limited and its subsidiaries in Canada has functioned under the Annuities and Benefits Department for a period of approximately a quarter of a century.

"The basic principles on which the plan was founded have proven sound and logical. It provides machinery to care for all its employees as follows: Sickness benefits, death benefits, pension, stock and cash saving, vacations with pay, and the eight-hour day. The present Employees Thrift Plan is of a three-fold nature, namely, it provides that the Company and the employees become partners whereby if the employee provides 3 per cent of his monthly salary or wage the Company provides 3 per cent, or in other words, the Company matches the employee's contribution dollar for dollar, and for every addition 1 per cent increase the employee contributes the Company will match it with one-half of 1 per cent. The maximum that an employee may contribute to the plan is 13 per cent of his monthly wage or salary, and the Company will match this contribution with 8 per cent. The Company's contribution is then allocated to the pension phase of the plan as a minimum, and the employee's money may be allocated either to the cash saving phase or the stock purchasing phase. If it is desirable, the employee may allocate double the Company's contribution to the pension phase, and the remainder of the combined contributions may go either to cash or stock purchasing.". . . . .

"During the year 1939, 513 cases of sickness were provided for. Fifty-five employees were placed on pension. Twenty-three annuitants and twenty-five employees died during the past year. All of these have been taken care of by sickness benefits and death benefits, which have strengthened and maintained the morale of those saddened by the loss of their bread-winner. The record of industrial accidents has been good; during the past year in the various units throughout the Dominion there were only 114 accidents, all of a minor nature.". . . . .

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Summary of Recent Decisions

REPORTS have been received of three cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the Labour Gazette, November, 1939, page 1100, and in previous issues, and the seventh report of the proceedings of the Board covering the period from October 1, 1936, to September 30, 1939, was recently issued as Bulletin No. 14 in the Industrial Relations Series published by the Department of Labour.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war of 1914-18. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 482—Canadian National Railways (Atlantic Region) and the Brotherhood of Railroad Trainmen.—This case dealt with the claim of a train crew for minimum day switching in the Bathurst, N.B. yard on February 22, 1939.

The employees contended that time occupied in switching service in the Bathurst yard by the train crew on the stated day could not, under the provisions of Article 14, Rule (d) of the current schedule for conductors, baggagemen, brakemen and yardmen, be used to make up monthly guarantee. The employees further contended that the words "any other service" as used in the wording of the Article, applies to road service and that it was never the intention under the provisions of the Rule, that road crews could be used in yard service to make up monthly guarantee, particularly at points where yard men are employed such as at Bathurst.

The railway contended that the employees' claim was not in order and in summing up their contention stated: "To sum up, Caraquet Sub-division crews have been operating their trains for years between Bathurst and Tracadie and there is, therefore, no ground for the contention of the employees that Bathurst is off the section of the line covered by their regular assignment. There is nothing in Rule (d) of Article 14 to support the employees' contention that the words, 'Any other service,' as referred to in this Rule, apply exclusively to road service. In this connection it might be pointed out that in the Atlantic Region trainmen and yardmen hold rights in both road and yard service."

The Board decided that on the evidence presented it did not feel it would be justified in sustaining the contention of the employees "involving as it would a change in the established practices." The Board therefore did not sustain the "specific" claim of the employees.

Case No. 483—Canadian Pacific Railway (Western Lines) and the Order of Railroad Telegraphers.—This case concerned the holiday allowance for a spare operator in the Regina Division for the year 1938.

In a joint statement of facts it was declared that the spare operator's holiday service year ended December 31st and that during 1938 he worked 178 days; he was laid off January 7 to May 8, 1938, receiving his holidays for 1937, with pay, immediately after being paid off on January 7. The claimant worked during each month of 1938 with the exception of February, March and April, for which he was allowed seven days holidays, with pay, in January, 1939.

The employees contended that the terms of the Agreement applied in the case of the 1938 holiday allowance for the claimant and claimed nine days holidays instead of the seven allowed.

The company maintained that the decision in the case appeared to rest in whether or not the spare operator was indefinitely laid off and whether his services were not required during that period. The company stated that as there were five senior men to the claimant on the list who were available for relief work, it was apparent that he was not required by the company to hold himself available.

Representatives of both parties appeared before the Board and presented additional information and in a general statement the Board declared: "It was represented on behalf of the employees that one day's holiday allowance should be made for each calendar month

in which service is performed by a telegrapher. It is not the understanding of the Board that the rule so provides, the holiday allowance in principle being 'one day's holiday for each month worked'. A month's work is the equivalent of between 25 and 26 days' work. The fourth paragraph of the holiday rule quoted in the submission is evidently intended to provide a flexibility in the application of the rule to senior laid off telegraphers who necessarily have to hold themselves available for calls for spare service, and goes so far as to indicate that in some cases in certain circumstances a day's vacation may be allowed for a month in which "men not laid off indefinitely" do not work. The interpretation, however, indicates that a man laid off for a term exceeding three months would be regarded as being laid off indefinitely. It is the Board's opinion that in the spirit of the interpretation and in view of the time worked by the telegrapher in the case in question from June to December, 1938 inclusive, seven (7) days' holiday allowance should be made for that period. The Board suggests, within the spirit of the interpretation, that in addition to the seven days mentioned, in this particular case and in the circumstances stated, it would be reasonable that one additional day's holiday allowance should be made for the time worked in January and May, 1938."

The Board sustained the claim of the employees "to the extent of one additional day's pay for holiday allowance."

Case No. 484—Canadian National Railways (Atlantic Region) and the Brotherhood of Railroad Trainmen.—This case concerned a dispute regarding temporary suspension of a yardmaster's position at Saint John, N.B.

The employees contended that the action of the company in abolishing the day yardmaster's assignment constituted a displacement of the day yardmaster, thereby reducing to one the number of yardmasters employed at the terminal of Saint John and retaining the services of a general yardmaster, who was required to perform the duties of day yardmaster. The employees further contended that this action was in violation of the employees seniority and promotion rules and was not in keeping with the decision of the Board respecting Case No. 107.

The railway contended that there was no violation of the current schedule covering conductors, baggagemen, brakemen and yardmen when the day yardmaster's job was discontinued and that in so far as the decision of the Board in Case 107 was concerned, the circumstances were not similar. The railway's contention continued: "This case was based on the fact that yardmasters in certain yards had been actually displaced by the appointment of general yardmasters and assistant general yardmasters. At Saint John, N.B., a general yardmaster has been part of the organization for many years, and has been retained all the year round, although during the summer months only two yardmasters have been employed. There was not sufficient work last summer to justify the employment of both a day yardmaster and a switchtender, whose assignments were from 5.45 a.m. to 1.45 p.m. and advantage was taken of the day yardmaster's retirement on pension on May 31 to discontinue his assignment for the summer months. Objection was taken to this, however, by the employees and the job was restored, and the switchtender's job abolished. The employees objected to the switchtender being laid off, and the job was re-established, and the day yardmaster's job again discontinued on August 14, 1939, and was not set up again until December 1, 1939, on account of traffic conditions."

Representatives of both parties appeared before the Board and gave additional oral evidence, and in its general statement the Board decided that the circumstances in this particular case did not appear in any way parallel to Case No. 107 cited by the employees. The claim of the employees was not sustained by the Board.

During April, 5,136 accidents were reported to the Workmen's Compensation Board of Ontario, as compared with 5,065 during March and 3,443 during April a year ago. Benefits awarded amounted to $658,804.57, of which $524,893.67 was for compensation and $133,910.90 for medical aid.

The total number of accidents reported to date this year is 21,245, as against 16,832 during the corresponding period of 1939, and benefits amounting to $2,305,335.22 have been awarded this year, compared with $1,997,763.67 during the same period last year.

The table of fatal accidents in coal mines, given in the annual report of the Department of Mines for the Province of Nova Scotia, shows 37 fatalities in this industry for the fiscal year ending November 30, 1939. This figure includes 21 miners killed in the Princess Colliery disaster on December 6, 1939. The table includes 19 fatalities in 1938 and 27 in 1937.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1940

THE following table shows the number of disputes, workers involved and time loss for April, 1940, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time lost in man working days
*April, 1940	18	13,807	67,104
*March, 1940	11	2,380	19,276
April, 1939	6	315	1,361

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While there was a considerable increase in the number of strikes recorded for April, the number of workers involved and the time loss incurred were substantially higher. The increase in the last two items was due chiefly to four disputes, that of 4,500 women's clothing factory workers at Montreal, P.Q., which caused 29,000 days' time loss, a strike of seamen on the Great Lakes and St. Lawrence River affecting some 6,000 deckhands, etc., and resulting in some 10,000 days' loss, and two strikes of foundry workers at Oshawa, Ont., involving some six hundred workers and a time loss of approximately 11,000 days. In March most of the time loss was caused by strikes of coal miners at Mountain Park, Alberta, and cotton factory workers at Milltown, N.S. In April, 1939, only one dispute caused considerable time loss, a strike of rubber factory workers at Kitchener, Ont.

Five disputes, involving 1,600 workers, were carried over from March, including that of hat factory workers commencing at Montreal on March 18, 1940, but reported to the Department too late for inclusion in the April issue of the LABOUR GAZETTE. Thirteen disputes commenced during the month. Of these eighteen disputes, fourteen were terminated during the month, five resulted in favour of the employers involved; compromise settlements were reached in six cases and the results of three disputes were recorded as indefinite. At the end of the month, therefore, there were four strikes or lockouts recorded as in progress, namely: hat factory workers, Montreal, P.Q.; shoe factory workers, Toronto, Ont; foundry workers, Toronto, Ont.; and beverage room employees, St. Catharines, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indictating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to three such disputes, namely: fur factory workers, Toronto, Ont., October 17, 1939-October 31, 1939, one employer; work clothing factory workers, Winnipeg, Man., December 1, 1939-December 15, 1939; and shoe factory workers, Montreal, P.Q., March 28, 1940-April 30, 1940, one employer, the last dispute being added to the list this month.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to April

COTTON FACTORY WORKERS, MILLTOWN, N.B. —Early in April the Town Council met the representatives of the workers and of the management to ascertain the facts of the situation. Discussion with others interested in bringing about a settlement also occurred but apparently without result. The management had offered to negotiate on the basis of the agreement for its plants at Cornwall, Ont., and after the union officers had studied this agreement a committee was invited to meet the management at the head office of the company in Montreal. It was arranged there that the employees would vote on whether they wished to be represented by the union and if a majority voted for this course an agreement would be negotiated. Work was resumed on April 15 and the vote was taken on April 26, under the supervision of the provincial Fair Wage Officer. The result was 586 to 21 in favour of the union. It is reported that the union is to represent its membership among the employees and

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1940*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to April, 1940				
MINING, ETC.				
Coal miners, Mountain Park, Alta.	1	700	4,000	Commenced Mar. 18, 1940; against employment of a certain man as an official; terminated April 6, 1940; return of workers; in favour of employer.
MANUFACTURING—				
Textiles, etc.—				
Cotton factory workers, Milltown, N.B.	1	663	7,900	Commenced Mar. 18, 1940; for union recognition, adjustments in wages, hours, etc.; terminated April 13, 1940; negotiations; compromise.
Hat factory workers, Montreal and Marieville, P.Q.	1	17	442	Commenced Mar. 18, 1940; for recognition of union; unterminated.
Shoe factory workers, Montreal, P.Q.	1	20	200	Commenced Mar. 28, 1940; for change in method of wage payment and against discharge of worker; employment conditions no longer affected by April 30, 1940; in favour of employer.
Metal Products—				
Foundry workers, Oshawa, Ont.	1	200	4,800	Commenced Mar. 27, 1940; for closed union shop agreement, wage increases, etc.; terminated April 27; conciliation (provincial); compromise.
(b) Strikes and Lockouts commencing during April, 1940				
MINING, ETC.—				
Coal miners, Inverness, N.S.	1	54	54	Commenced April 1; to maintain equal distribution of work; terminated April 1; negotiations; compromise.
Coal miners, Sydney Mines, N.S.	1	450	900	Commenced April 8; against reduction in number of workers when operations curtailed; terminated April 10; negotiations; in favour of employer.
Coal miners, Stellarton, N.S.	1	350	350	Commenced April 19; against transfer of two workers from another mine; work resumed April 20; pending negotiations; indefinite.
MANUFACTURING—				
Boots and Shoes—				
Shoe factory workers, Toronto, Ont.	1	70	1,330	Commenced April 9; alleged violation of agreement *re* new machinery and adjustment of wages rates; unterminated.
Textiles, etc.—				
Cotton factory workers, St. Gregoire de Montmorency, P.Q.	1	65	35	Commenced April 1; misunderstanding as to posting of piece work rates; terminated April 1; negotiations; in favour of employer.
Men's work clothing factory workers, Winnipeg, Man.	1	69	276	Commenced April 17; alleged violation of agreement *re* wage payments and work to be performed; terminated April 20; negotiations; indefinite.
Women's clothing factory workers (dresses), Montreal, P.Q.	125	4,500	29,000	Commenced April 22; for increased wages, reduced hours and extension of provincial collective agreements act to cover the industry; terminated April 29; negotiations; compromise.

SERVICE—				
Business, etc.				
Beverage room workers, St. Catharines, Ont., and district.	12	20	200	Commenced April 5; for union agreement providing for increased wages and reduced hours; unterminated.

*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

§Estimated number including workers on vessels not yet operating.

†Calculated on basis of six days' time loss for those workers who had already signed articles for 1940 shipping season.

that new employees will join the union within a limited time; also that certain wage changes are to be made but not a general increase.

HAT FACTORY WORKERS, MONTREAL, P.Q.—A number of workers in one establishment ceased work on March 18 to secure recognition of the United Hatters, Cap and Millinery Workers' International Union. The dispute was not reported to the Department in time for inclusion in the April issue of the LABOUR GAZETTE. The management had offered to negotiate with a committee of employees and stated that there was no objection to the employees being members of any union. The establishment was picketed as well as places where work was being done for the company at Marieville, P.Q. A number of those picketing were charged with intimidation and the management secured an interim injunction against picketing or interfering with the business. The management reported that most of the strikers had been replaced but the union reported that the strike was still on at the end of the month and attempts were being made to negotiate with the management.

SHOE FACTORY WORKERS, MONTREAL, P.Q.—Toward the end of April the union reported that fifteen out of the twenty-two workers (on strike since March 28) had secured work elsewhere, but that the strike had not been terminated. The employer stated that those on strike had been replaced by the beginning of the month. The dispute has been added to the list carried elsewhere in this article of disputes where employment conditions are no longer affected but which the unions involved have not yet declared terminated.

FOUNDRY WORKERS, OSHAWA, ONT.—As a result of conciliation by the Ontario Department of Labour a settlement was reached providing for an agreement between the employing company and its employees and

work was resumed on April 29. The agreement provided for a general increase in wages of seven and one-half per cent with certain other concessions as to overtime rates, etc.

COAL MINERS, INVERNESS, N.S.—A number of workers in one section of a mine ceased work for one shift in protest against the placing of one employee where the equal division of work would be disturbed. It was reported that the employee had been absent for six months as the result of an injury and it was agreed that he would be placed at other work when available.

COAL MINERS, SYDNEY MINES, N.S.—When operations on a longwall were curtailed and the management reduced the number of workers from 26 to 24 the miners affected ceased work on April 8 and other miners also ceased work in sympathy or were indirectly affected. After two days, work was resumed with the reduction agreed to pending discussions of all working conditions on the longwall.

SHOE FACTORY WORKERS, TORONTO, ONT.—Employees in one establishment ceased work on April 9 alleging that the agreement with the Canadian Shoe Workers' Union and Allied Crafts had been violated. It is understood that the introduction of new machinery and the adjustment of wages, piece rates, were matters in dispute and that negotiations had been carried on for two months, with officials of the Ontario Department of Labour participating. At the end of the month the dispute was reported as still in progress.

COTTON FACTORY WORKERS, ST. GREGOIRE DE MONTMORENCY, P.Q.—A number of cone winder tenders in one establishment ceased work for a few hours on April 1 when a list of piece rates was posted. When it was explained that the list was for test purposes only and that the guaranteed rate of 31·11 cents per hour would continue to be paid, work was resumed. A dispute as to new rates had occurred from February 19 to February 23, 1940, and was settled by an arrangement for a guaranteed minimum rate pending the determination of satisfactory piece rates (LABOUR GAZETTE, April, 1940, page 332).

MEN'S WORK CLOTHING FACTORY WORKERS, WINNIPEG, MAN.—Employees in one establishment ceased work on April 17 alleging that the employing company was not paying wages in accordance with the agreement with the United Garment Workers of America. The management is reported to have stated that the workers were not performing the work required under the agreement. Operations are said to have been resumed on April 22, but details of the settlement had not reached the Department as this issue went to press.

WOMEN'S CLOTHING FACTORY WORKERS (DRESSES), MONTREAL, P.Q.—Employees in upwards of one hundred establishments operated by some seventy members of the Montreal Dress Manufacturers' Guild ceased work on April 22 to secure an increase in wages of twenty per cent, claiming that the agreement between the manufacturers and the International Ladies' Garment Workers' Union provided that an increase in wages should be negotiated or arbitrated by January 15, 1940, if thirty days' notice had been given (LABOUR GAZETTE, July, 1938, page 795). The union stated that the manufacturers after negotiations objected to an increase in wages and refused to arbitrate. It was reported that 4,000 out of 5,000 employed in the industry in Montreal ceased work and were joined by several hundred others in a short time, the shops of a number of contractors being also involved. A number of persons were arrested in connection with picketing on charges of assault, obstructing traffic, etc. On April 29, as a result of negotiations, a settlement was reached providing for a ten per cent increase in wages and an agreement for two years, the parties to apply for its extension to all establishments in the industry by an order in council under the Quebec Collective Labour Agreements Extension Act. One-half of the increase is to be in effect on June 3, 1940, and the remainder when approved by the provincial authorities for the whole industry.

FOUNDRY AND MACHINE SHOP WORKERS, OSHAWA, ONT.—Employees in one establishment ceased work on April 2 to secure a renewal of an agreement with the Steel Workers' Organizing Committee on behalf of the members of the Amalgamated Association of Iron, Steel and Tin Workers of North America with amendments providing for increases in wages and other changes. It was reported that it was agreed that the plant would be closed on April 2 for negotiations but a strike was declared that night when a settlement was not reached. As a result of conciliation by the Chief Conciliation Officer of the Ontario Department of Labour a settlement was reached on April 19 when a renewal of the agreement was made providing for seven and one-half per cent increase in wages and certain other concessions as to overtime, etc. Work was resumed on April 23.

FOUNDRY AND MACHINE SHOP WORKERS, TORONTO, ONT.—Employees in one establishment ceased work on April 24 to secure a union agreement with the Amalgamated Association of Iron, Steel and Tin Workers of North America with a ten cent per hour increase in wages. The management and committees representing the employees and the

union had met in several conferences but an agreement was not reached. At the end of the month a settlement had not been reported.

Seamen (Deckhands, Etc.), Great Lakes and St. Lawrence River.—A dispute between certain shipping companies operating on the Great Lakes and St. Lawrence River and the unlicensed personnel in their employ, members of the Canadian Seamen's Union, resulted in a strike at midnight on April 14, affecting approximately 6,000 workers and more than 200 vessels. Earlier in the month, following expiration of an agreement in force since September, 1938, negotiations for a new agreement had been carried on without success. The union sought a wage increase of $15.00 per month, a closed shop, additions to all crews, and certain other concessions. Before the strike occurred the Department had advised both parties that disputes in the transportation industry come directly within the scope of the Industrial Disputes Investigation Act and that it would be illegal for the employers to declare a lockout or for the employees to go on strike without first having recourse to a Board of Conciliation and Investigation. Following the commencement of the strike, conferences were held between departmental officials and the parties involved, in Ottawa and in Toronto, and on April 20 the Minister of Labour, who had personally intervened, announced that an understanding had been reached. The understanding provided for immediate resumption of work, a wage increase of $7.50 per month and reference of all other matters in dispute to a Board of Conciliation and Investigation established under the provisions of the Industrial Disputes Investigation Act (see page 415).

Two strikers, one a vice president of the union, arrested on April 18 in connection with a clash between pickets and non-union workers at Sarnia, were sentenced to one month each in jail on charges of resisting police. Another striker was reported arrested in Toronto on the same day on two charges of intimidation and unlawful boarding of a steamer. He was remanded for trial at a future date on which it was reported several other similar cases were to be tried. Among four strikers reported arrested at Toronto later in the week on charges of vagrancy, one was accused also of alleged contravention of the Defence of Canada Regulations. He was remanded until the end of the month, bail being set at $1,000.

Deckhands, Cobourg, Ont.—A number of extra deckhands employed in fitting out a steamer for service ceased work on April 12, demanding an increase in wages. They had been engaged on April 1 for one month at $55.00 per month with board, the rate for deckhands, and they demanded $85.00 per month with board, the rate for firemen. They were paid off and other men were secured for the work.

Beverage Room Workers, St. Catharines and District, Ont.—Employees in a number of beverage rooms in hotels in St. Catharines, Merriton and Thorold, Ont., ceased work on April 5 and later dates to secure agreements with the Hotel and Restaurant Employees' International Alliance and Bartenders' International League providing for increases in wages, reduced hours, etc. From time to time some of the hotel proprietors signed agreements providing for $20.00 per week for waiters, $23.00 for tapmen, 51 hours per week and one week's holiday with pay. By April 13 nearly all of the hotels were reported to have signed the agreement. At the end of the month, however, a termination had not been reported.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month bringing down to date that given in the March, 1940, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1939. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more important ones.

The number of disputes which began during March was 82 and 15 were unterminated at the end of February making a total of 97 in progress during March. The number of workers involved was 52,600 and the

resulting time loss was 165,000 man-working days.

Of the 82 disputes which began during March, 26 arose out of demands for increases in wages, two were the result of proposed wage reductions and 19 were over other wage questions; 13 arose out of questions concerning the employment of particular classes or persons; 14 were over questions respecting working conditions; and five arose out of questions of trade union principle. Three strikes were due to sympathetic action.

During March, final settlements were reached in the case of 82 disputes. Of these, 16 were settled in favour of the workers, 52 were settled in favour of the employers and 14 resulted in compromises. In seven other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during March, occurred in a colliery near Doncaster, Yorkshire, where a demand by haulage hands for increased wages, led to a strike of 3,300 employees and indirectly affected 700 others. The strike began on March 12 but on the advice of trade union officials work was resumed the following day.

At Meath, Glamorganshire, dissatisfaction over extra payments allowed in one colliery for pushing trams in steep places as well as other grievances, led to a strike of 2,966 employees of several collieries on March 18. On March 30 work was resumed pending negotiations.

At Coventry 2,752 electricians and others employed in an aircraft factory ceased work on February 26 due to dissatisfaction with piece rates established for a certain job and other grievances. Work was resumed March 2, on the same terms as were in force prior to the strike.

On March 27, 2,000 building labourers ceased work near Warrington, Cheshire, demanding the building trade rate of wages instead of the civil engineering rate. Their demands having been granted, they resumed work the same day.

A proposed revision of piece work rates for "pan turners" in one colliery, near Doncaster, lead to a strike of 1,800 workers on March 19. On March 27, work was resumed after the acceptance of the employer's offer of 10 shillings a shift, plus percentages. Negotiations were to continue.

Dissatisfaction with the interpretation of a national agreement for a war addition to wages led to a strike of 598 colliery workers near Barnsley, Yorkshire, on March 11. About 1,200 workers were indirectly affected. Two days later work was resumed without any change in conditions.

On February 26, weavers, winders and other workers in a linen factory at Belfast, numbering 1,450, ceased work refusing to work with non-unionists. An amicable settlement was reached and work was resumed on April 13.

A one day strike in which 1,168 workers were directly involved occured at a colliery at East Wemyss, Fifeshire, on March 1, 225 workers being indirectly involved. The dispute arose out of the dissatisfaction of certain women pithead workers, with recent advances in wages. Work was resumed on the advice of trade union officials.

Australia

A press report from Sydney dated May 7, states that a meeting of 6,200 striking coal miners in New South Wales voted to end the strike which began about March 11 and involved some 25,000 workers (LABOUR GAZETTE, April, 1940, page 337). Voting is still proceeding and the terms on which work will be resumed are not stated.

India

The strike of 150,000 textile workers in Bombay which began about March 5 (LABOUR GAZETTE, April, 1940, page 337) was ended on April 12. The workers accepted an increase of about four cents a day instead of the six cent increase they had originally demanded.

United States

Preliminary estimates of strikes in January, 1940, which as the Bureau of Labor Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 110 strikes as beginning during the month which with 80 unterminated at the end of December made a total of 190 in progress during the month. The number of workers involved in these disputes was approximately 36,000 with a resultant time loss of 200,000 man-working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 200 strikes in progress involving about 35,000 workers with a resultant time loss of 345,000 man-working days.

COMBINES INVESTIGATION ACT

Court Proceedings Against Alleged Combines

Alleged Paperboard Container Combine

THE trial of nineteen companies and one individual charged with offences against section 498 of the Criminal Code commenced before Mr. Justice J. A. Hope of the Ontario Supreme Court in Toronto on April 22. Four counts are set forth in the indictment, charging the accused with combining, in relation to the manufacture and sale of corrugated and solid fibreboard shipping containers, to unduly prevent or lessen competition, to restrain and injure trade and commerce, to unduly limit facilities for manufacturing and supplying, and to prevent or lessen manufacture and production. The investigation into the alleged combine was completed under the Combines Investigation Act in March, 1939 (Labour Gazette, April, 1939, pp. 391-393) and a true bill was returned by a Grand Jury at Toronto in September, 1939. (Labour Gazette, October, 1939, p. 1004.) In November, 1939, Mr. Justice MacKay dismissed a motion by the defendants to quash the indictment because of alleged defects in the form of the indictment and the inclusion of certain extra-provincial companies among the accused (Labour Gazette, November, 1939, p. 1106). On arraignment the defendants elected for trial before a judge without a jury.

The prosecution, which was undertaken at the instance of the Attorney General of Canada, is being conducted by J. C. McRuer, K.C., assisted by R. M. Fowler and J. L. McLennan. Seven of the companies charged in the indictment, with head offices located outside the province of Ontario, were not represented when proceedings commenced before Mr. Justice Hope. Counsel for other defendants refused to plead, contending that the indictment was invalid. At the request of Crown Counsel his lordship directed that a plea of not guilty be recorded on behalf of all accused, on all counts. Counsel representing the Ontario defendants included D. L. McCarthy, K.C., H. E. Manning, K.C., A. G. Slaght, K.C., J. M. Robb, Ross J. Dunn, F. W. Wegenast, K.C., E. W. Bayly, Joseph Singer, K.C., and Walter J. Tuchtie.

Proceedings in Alberta Against Alleged Tobacco Combine

Thirty-five tobacco manufacturers and wholesalers appeared in the Alberta Supreme Court before Mr. Justice A. A. McGillivray on April 29 for trial on combine charges which followed an investigation under the Combines Investigation Act. (Labour Gazette, October, 1938, pp. 1090-1092.) Charges under section 498 of the Criminal Code were preferred against forty-four manufacturers and wholesalers after preliminary hearings before Magistrate A. I. Millar, K.C., at Edmonton in April, 1939. (Labour Gazette, June, 1939, p. 586.) A motion to quash the indictment was dismissed by Mr. Justice A. F. Ewing in November, 1939. (Labour Gazette, December, 1939, p. 1229.) On January 15, 1940, when the defendants were arraigned nine elected for trial by jury while the remainder elected for trial by judge without jury. At this hearing Mr. Justice McGillivray found the Crown should furnish the defendants with further particulars of the charges. Mr. Justice McGillivray dismissed a further demand for particulars on February 26, 1940, and set the date of the trial for April 1. At the opening of the criminal assizes at Edmonton in March Mr. Justice W. R. Howson ruled that the trial of the defendants who elected trial by jury should be held over until the next sittings of the Supreme Court.

The charges on which tobacco manufacturers and wholesalers are being tried allege a conspiracy to unduly limit facilities for manufacturing, supplying, or dealing in tobacco products; to unduly prevent, limit or lessen manufacture or production of tobaccos; to unreasonably enhance the price of articles; to unduly prevent or lessen competition.

In the proceedings, which were commenced at the instance of the Attorney General of Alberta, A. L. Smith, K.C., of Calgary and H. J. Wilson, K.C., Assistant Deputy Attorney General are appearing for the Crown. Counsel for defendants include: Lionel A. Forsyth, K.C., Colville Sinclair, K.C., H. G. Nolan, K.C., H. H. Parlee, K.C., S. Bruce Smith, K.C., Neil D. Maclean, K.C., G. H. Steer, K.C.

Prosecution of Members of Alleged British Columbia Fruit Combine

Trial of four individuals and eight companies charged with being members of a combine in violation of the Combines Investigation Act commenced on May 1 before Mr. Justice H. B. Robertson, sitting as judge without a jury, in the Supreme Court of British Columbia at Vancouver. The accused are charged with being parties to or privy to or knowingly assisting in the formation or operation of a combine by way

of a merger, trust or monopoly in connection with the marketing of British Columbia fruit, vegetables and other products of the soil.

The case was traversed to the Vancouver assizes from Vernon. The preliminary hearings were held in Kelowna in February by Magistrate T. F. McWilliams, who committed the accused for trial on the combine charges. At the same time the magistrate dismissed conspiracy charges against nine companies and five individuals.

The charges were laid at the instance of the Attorney General of British Columbia after an investigation under the Combines Investigation Act into an alleged combine of wholesalers and shippers of British Columbia fruit and vegetables. No combine was found to exist among the three major wholesale fruit houses but the Commissioner reported that the control which Western Grocers, Limited, and its wholly-owned subsidiary, Dominion Fruit, Limited, had secured over certain British Columbia shipping agencies appeared to be in violation of the Combines Investigation Act. (LABOUR GAZETTE, November, 1939, pp. 1104-1106.)

Counsel for the Crown are Dugald Donaghy, K.C., and H. I. Bird. Counsel for the defence are Alfred E. Bull, K.C., and H. V. Craig.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Minimum Wages and Hours of Labour in British Columbia and Quebec—Teachers' and Old Age Pensions, Mothers' Allowances and Public Service Vehicles in Alberta—Forest Operations in New Brunswick

IN Alberta new by-laws under the Teachers' Retirement Fund Act relate to the furnishing of information by interested parties and to contributions and there are certain changes arising from the transfer to another authority of the administration of old age pensions and mothers' allowances. A regulation of the Highway Traffic Board regarding public vehicles leaves existing labour conditions virtually unchanged. In British Columbia the fruit and vegetable industry is again exempted from the Hours of Work Act and employers in personal service occupations are required to supply and launder any uniforms required.

The Quebec Fair Wage Board has repealed the order covering building trades in Arthabaska and has extended the stationary engineers order and the waste-paper grading and packing industry order. The Board has also set new hour and wage schedules for laundry watchmen and for persons employed in shipping departments of wholesale foodstuffs establishments in Quebec City and district. An order in council regarding hours of labour for women and young persons in industries engaged in munitions and war contracts, incorrectly reported in last month's issue of the LABOUR GAZETTE, is corrected. Higher wage rates have been set for woodsmen in New Brunswick in an order which contains provisions to facilitate enforcement.

Alberta Teachers' Retirement Fund Act

New by-laws of the Board of Administrators (LABOUR GAZETTE, March, 1940, p. 243) were approved on March 21. The Board may require a teacher to furnish information relating to his certificate, salary, age, length of service and dates of contracts, while boards of trustees must give similar details of dates of employment of their teachers, their salaries and amounts retained as contributions to the Fund. These contributions must be paid to the Board on order.

Alberta Mothers' Allowance Act

Administration of the Mothers' Allowance Act after April 1, 1940, was transferred from the Department of Public Health to the Department of the Treasury by an Order in Council gazetted April 15.

Alberta Public Service Vehicles Act

A regulation R1-40 of the Highway Traffic Board, gazetted April 15, revising and consolidating many earlier orders makes no material changes in the existing provisions relating to drivers. Working hours are still to be governed by the Hours of Work Act and regulations of the Board; annual medical certificates are still required; drivers of trucks certified as Public Service and Commercial Vehicles must continue to keep a log book recording their daily working hours; owners of public service vehicles used for transporting passengers and liverymen must file with the Board a complete list of their driver employees and must immediately advise the Board of any dismissal and its cause; and drivers of public service vehicles for passengers must make a daily report to the owners in a form to be approved by the Board. In addition, numerous provisions are included bearing upon the safety of both the drivers and the public.

Alberta Old Age Pensions Act

In view of the recent supersession of the Workmen's Compensation Board as pension authority by a new Old Age Pensions Board (LABOUR GAZETTE, March, 1940, p. 243) the regulations of the former board have been amended to take account of the new administration. Employees of the new board are to be subject to the Civil Service Act of the province.

British Columbia Female Minimum Wage Act

Order 27 of the Board of Industrial Relations governing female employees in beauty shops and other personal service occupations (LABOUR GAZETTE, 1935, p. 902; 1939, p. 474) which fixes minimum wages and maximum hours and makes other regulations for these occupations was amended by Order 27B, effective May 1. This provides that where the employer requires his employees to wear a distinctive uniform or other wearing apparel he must furnish, repair and launder it free of cost to the employee.

British Columbia Hours of Work Act

Exemption of the fruit and vegetable industry from the provisions of the Hours of Work Act (LABOUR GAZETTE, 1939, p. 585) has been renewed and extended for a year to March 31, 1941, by an order gazetted April 11.

New Brunswick Forest Operations Commission Act

New and higher wage rates for woodsmen engaged in stream-driving, booming and sorting became effective April 1, replacing those fixed a year earlier (LABOUR GAZETTE, 1939, p. 397). The average daily rate for stream-drivers is increased by 35 cents to $2.85 and board, while the minimum of $2.50 represents a 25-cent increase over last year. For boomers and sorters an increase from 25 cents to 28 cents per hour without board has been set, and as in the last order, 50 cents per day is the maximum which may be charged for board. As in previous orders, employers are required to keep a time book recording names of employees, length of their employment and rates of pay, while submission of payrolls to the Commission for audit where necessary and periodic investigations by the Fair Wage Officer are again provided. Foremen, bookkeepers and clerks are still outside the jurisdiction of the Act and their wages must not be included in determining any average rate.

Quebec Fair Wage Act

Order 12 of the Fair Wage Board governing building trade employees in Arthabaska County (LABOUR GAZETTE, 1938, p. 1099) has been repealed as from March 9, the industry now being covered by a collective labour agreement.

Pending the approval of a new order applying to stationary engineers, Order 6 has been continued in its present form (LABOUR GAZETTE, 1938, p. 625) for three months from April 15, subject to contrary order.

Order 15 applying to persons employed in the waste-paper packing and grading industry (LABOUR GAZETTE, 1938, p. 1236) has been continued in force for a year from April 8, unless otherwise ordered in the meantime.

An order of the Fair Wage Board, gazetted April 6, provides that watchmen working in laundries in Quebec and Quebec West governed by Order 28 (LABOUR GAZETTE, 1939, p. 1003) shall be entitled to a regular week of 72 hours at the rate of 25 cents per hour. Such employees previously were subject under blanket Order No. 4 to a 25-cent hourly rate based on a 60-hour week with provision for time and a half if overtime was worked.

Persons employed in shipping departments in the wholesale foodstuffs trade of Quebec City and district have been established by an order of April 3 as a new category under Order 33 (LABOUR GAZETTE, 1939, p. 1113) and are to receive weekly wages of $11 in Quebec and Quebec West and $10 in Levis and Lauzon. Overtime rates of 30 cents per hour must be paid for any time worked over 10 hours in any day or 48 in any week except during the period April 1 to November 30 when the regular week is 53 hours.

Quebec Industrial and Commercial Establishments Act

ERRATUM

The Order in Council relating to industries engaged in the manufacture of munitions and other war supply contracts was incorrectly reported in the April issue of the LABOUR GAZETTE, p. 345. This order provides that exemptions may be made from the provisions of the Act which prohibit night work for women and young persons under 18. The exemptions are to be made in cases of emergency and are to be arranged between the employer and the labour inspector with the approval of the Minister of Labour.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at March 31, 1940

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at March 31, 1940. (The text of the old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT MARCH 31, 1940

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

LABOUR AND INDUSTRY IN MANITOBA

Annual Report of the Department of Labour

COVERING the period May 1, 1938 to April 30, 1939, the annual report of the Manitoba Department of Labour reviews the administration of the Bureau of Labour Act; the Manitoba Factories Act; the Bake Shops Act; the Minimum Wage Act; the Elevator and Hoist Act; the Steam Boiler and Pressure Vessels Act; the Building Trades Protection Act; the Public Buildings Act; the Fair Wage Act; the Electricians License Act; the Public Amusements Act (the licensing of projectionists); the Fire Prevention Act; the Strikes and Lockouts Prevention Act.

During the fiscal year 1938-39, a total of 19,691 inspections were made and 7,379 orders were issued under the various acts administered by the department, the number of inspections and orders under each act being indicated in the following table taken from the report:

SUMMARY OF INSPECTIONS MADE AND ORDERS ISSUED BY THE BUREAU OF LABOUR FROM MAY 1, 1938, TO APRIL 30, 1939

Statute	Number of Inspections	Number of Orders
The Manitoba Factories Act	2,062	1,033
The Bake Shops Act	104	48
The Minimum Wage Act	5,344	1,917
The Elevator and Hoist Act	4,401	1,373
The Steam Boiler and Pressure Vessels Act	4,541	1,958
The Building Trades Protection Act	591	63
The Public Buildings Act	205	119
The Electricians License Act	243	75
The Public Amusements Act, (re the licensing of projectionists)	259	182
The One Day of Rest in Seven Act	35	25
The Fair Wage Act	716	77
The Fire Prevention Act	1,190	509
Total	19,691	7,379

Accident Prevention.—Industrial accidents during the year 1938-39 totalled 1,130 of which 15 were fatal, 426 "serious" and 689 "slight".

There was an increase of 277 in the number of traffic accidents during the year, there being 64 fatal traffic accidents and 1,404 non-fatal, while 1,562 resulted in property damage only.

Home accidents during the year were responsible for 82 fatalities—a greater number than industrial and traffic fatalities combined. There was no record given in the report of the non-fatal home accidents.

Under the heading "General Accidents" the fatalities in 1938-39 numbered 130, while 115 were listed as "serious" and 28 "slight".

The report also reviews the efforts being made by the Accident Prevention Branch including classes in industrial first aid work; safety motion pictures; traffic lanes; etc.

Steam Boiler and Pressure Plants.—In the administration of "The Steam Boiler and Pressure Vessels Act," 4,541 inspections were made, and in 1,958 cases repairs were ordered. Fees received from the inspection of steam plants amounted to $9,551.50, from the inspection of air tanks, $1,133, from refrigeration plants, $811. Twenty-eight designs of boilers, tanks, etc., were registered during the twelve month period, the service being productive of fees amounting to $161.

The Board of Examiners for Steam Engineers, during the year issued 1,180 certificates by way of renewal and examination, the fees from this service amounting to $2,418.

Fair Wage Act.—During the fiscal year reviewed by the report, fourteen meetings of the Fair Wage Board were held for the purpose of revising the schedule. Seven hundred and sixteen (716) inspections were made and 77 orders issued. Sixty-three (63) wage claims were adjusted resulting in the collection of $1,677.13 under this legislation.

Licensing of Workmen.—The Board of Examiners under the Electricians License Act issued 277 journeymen licences and 98 contractors' licences during the year, the total fees collected (including fees for examinations) amounted to $2,990.

Under the "Public Amusements Act" (licensing of projectionists) 30 candidates were examined, of whom 27 were successful. Receipts under this Act including fees collected for examinations, licences, and apprentice licences, amounted to $684.

Fees received for dry cleaning licences totalled $315; for "spotters" licences $6.00. Fuel oil delivery licences amounted to $204.16, and fees from licences to install and service fuel burners totalled $45.00.

Strikes and Lockouts Prevention Act.—Regarding the administration of the Strikes and Lockouts Prevention Act the report states:

> At the 1936-37 session of the legislature, the above Act was passed and became effective on April 17, 1936, with the object of reducing to a minimum, strikes, lockouts and other labour disputes.
>
> This legislation provides for the making of applications by aggrieved parties to the Registrar. All such applications are first investigated by the Conciliation officer and, if possible, signed agreements obtained. In the case of failure to reach such agreement, the disputes are referred to a Board if such disputes come within the scope of the Act. When cases do not come within the scope of the said Act, the party making such application either agrees to withdraw or a Board is refused, and the Minister notifies the parties interested to this effect.

During the fiscal year, seven (7) applications were filed with the Registrar and the cases dealt with in the following manner:

1. Case investigated in June, 1938, and an agreement satisfactory to both parties signed.
2. Case submitted to the Department in June, 1938, after the employees had been on strike for one week, and as a result of several meetings with both parties, an agreement was signed.
3. In this case there were not sufficient persons employed in the plant to warrant its coming within the scope of the said Act. Nevertheless the Department called both parties together and succeeded in having an agreement signed.
4. This dispute was in regard to wages and working conditions, and after several meetings, an agreement was signed in September, 1938.
5. This application did not come within the provisions of the Act, therefore, a Board was refused.
6. Case referred to the Department and after discussion of same with both parties, the request for a Board was withdrawn.
7. This application was incomplete and the parties making the application refused to complete the form, but went on strike instead. Consequently, no agreement signed.

One Day Rest in Seven Act.—There were 35 inspections made and 25 orders issued under the terms of this Act during the fiscal year covered by the report.

Overtime Permits.—During the year, 98 permits to work overtime were issued and 7 for legal holidays. The largest number of overtime permits was issued to the laundries, dry cleaning, dyeing and cleaning establishments (42), followed by garments, ladies' wear and cloaks establishments (16), and offices (13).

Minimum Wage Act

Seven informations were laid during the fiscal year by the Bureau of Labour under the terms of the Minimum Wage Act. One hundred and sixty-five wage claims were adjusted on behalf of females resulting in the collection of wages due amounting to $1,451.80, while male wage claims adjusted numbered 106, resulting in the collection of $2,103.23 wages due.

A total of 5,191 day and 153 night inspections were made throughout the province under all regulations governing the employment of all persons coming under the scope of the Act. A total of 1,917 orders were issued, 33 dealt with working conditions, 681 dealt with hours, 915 with wages and 288 with other regulations under the Act.

Immigration to Canada in 1939-40

The report of the Immigration Branch of the Department of Mines and Resources for the fiscal year ending March 31, 1940, shows that 16,205 immigrants entered Canada during the period March 31, 1939 to March 31, 1940, compared with a total of 17,128 in the previous fiscal year, a decrease in number of 5·4 per cent.

Of the total entering Canada during the period reviewed by the report, 3,566 were from the British Isles, an increase of 5·7 per cent over the figure of 3,373 for the previous fiscal period; 5,748 were from the United States, an increase of 1·5 per cent; 1,767 were listed as from "Northern European races", an increase of 29·4 per cent compared with the previous year; while "other races" accounted for 5,124, a decrease of 23·8 per cent.

Adult males entering Canada during the fiscal period 1939-40 numbered 4,802; adult females, 6,493; and children under eighteen, 4,910.

Occupationally, 1,853 males, 1,149 females and 1,804 children were listed in the farming class. The labouring group comprised 342 males, 60 females, and 73 children; mechanics, 645 males, 283 females, 167 children; trading class, 710 males, 424 females, and 215 children; mining class, 38 males, 8 females and 2 children; female domestic servants eighteen years and over numbered 652, under eighteen years, 116; listed under "other classes" were 1,214 males, 3,917 females and 2,533 children.

The destination of the largest number (5,549) was given as Ontario; 3,253 went to Quebec; 2,120 to British Columbia; 1,567 to Alberta; 1,235 to Manitoba; 1,214 to Saskatchewan; 836 to Nova Scotia; 350 to New Brunswick; 68 to Prince Edward Island; 9 to the Northwest Territories; and 4 to the Yukon Territory.

The annual report of the Railroad Retirement Board of the United States for the fiscal year ending June 30, 1939, has recently been published. From the date of the enactment of the Railroad Retirement Act, August 29, 1935, until June 25, 1938, when the Railroad Unemployment Insurance Act became a law, the Railroad Retirement Board was charged solely with the administration of the retirement system for aged and disabled roalroad employees. The Railroad Unemployment Insurance Act gave the Board the added responsibility of administering a nation-wide system of unemployment insurance for the employees of the same industry.

The report gives a detailed account of the administrative organization of the Board; the Board's operations under the Railroad Unemployment Insurance Act; the adjudication of employee annuities; analysis of employee annuitants; analysis of pensioners; service, compensation, and age of covered employees, etc.

MARITIME CONFERENCE ON INDUSTRIAL RELATIONS

Meeting Featured by Discussions on Industrial Relations in War Time, Unemployment Insurance and Financing the War

MEETING under the auspices of the Institute of Public Affairs at Dalhousie University, the third Maritime Conference on Industrial Relations was held at Halifax on April 23 and 24, sixty representatives of maritime industries being in attendance. Similar conferences were held in 1937 and 1938, but due to the outbreak of war, the conference scheduled to meet in September 1939, was postponed.

After giving careful consideration to the question as to whether the conference should be held during the present war, members of the Maritime Committee on Industrial Relations reached the conclusion that the maintenance of harmonious relations between employers and employees at the present time was even more important than in times of peace and that the many problems brought about by the war would provide ample material for discussion. It was also felt that a meeting of this type would provide an excellent opportunity of surveying, as far as possible at the present time, the effects of war on Canadian industry and particularly maritime economy. To this end a full session of the conference was devoted to the latter subject while another was given over to the subjects of "War Finance" and "War Taxation."

Opening Session

The conference was opened by an address of Mr. Floyd S. Chalmers, Editor of the Financial Post in Toronto, who spoke on the effects of the war on Canadian industry. He dealt with the subject under national aspects, while war conditions in the major maritime industries were dealt with by four speakers. Agriculture was treated by Hon. J. A. MacDonald, Nova Scotia Minister of Agriculture, the Fishing Industry by Mr. C. J. Morrow, President of Lunenburg Sea Products, Lumbering by Mr. R. S. Cumming, Secretary-Manager, Maritime Lumber Bureau, Amherst, and the Coal Industry by Mr. T. S. McColl, Chief Mining Engineer of the Dominion Steel and Coal Corporation in Sydney.

In another session, Mr. R. B. Bryce of the Department of Finance in Ottawa, spoke on the subject "How Canada Finances the War." He gave a comprehensive picture of the whole financial situation of the Dominion, emphasizing the magnitude of the task and pointed out that it could only be successfully carried out if all classes co-operated. Mr. W. F. Lougheed of the Institute of Public Affairs of Dalhousie University spoke on "The War Excess Profits Tax", tracing its history in Canada and the United States and discussing its main economic and social features.

At a luncheon meeting presided over by Hon. Angus L. Macdonald, Premier of Nova Scotia, Dr. Carleton Stanley, President of Dalhousie University, spoke on "The University and the Community."

Industrial Relations and the War

In another session the effects of the war on industrial relations and social security were discussed. Mr. H. W. Macdonnell, of the Canadian Manufacturers' Association, Toronto, reviewed Canada's social legislation as it is affected by the war, and dealt with the wage problem in its relation to cost of living, labour disputes, and conciliation and expressed the opinion that the existing Dominion and Provincial legislation was sufficient to cope with the present situation.

Mr. R. P. Bell, president of Pickford and Black, spoke on "Collective Bargaining," dealing with the economic and social aspects of his subject. He stressed the need for a better understanding between employers and employees.

Unemployment Insurance

The last paper of the conference was given by Professor L. Richter of Dalhousie University. He examined the Federal government's plan of introducing unemployment insurance with special reference to its adequacy for overcoming the difficulties of a post war depression. He stated that unemployment insurance was meant to tide the worker over short periods of enforced idleness but would not remove the long term unemployed from the relief rolls. Any scheme, he considered, would have to be supplemented by other relief measures if used as an instrument for assisting the victims of a post war depression.

Interesting discussions in which members of the Provincial Government participated, took place following most of the addresses, featuring wage problems, conciliation and arbitration.

At the conclusion of the conference new members of the Maritime Committee on Industrial Relations were elected. The Chairman, Mr. B. R. Turnbull, General Manager of the Acadia Sugar Refining Company, and the Secretary, Professor L. Richter, Dalhousie University, were re-elected. Other members of the Committee include: Mr. R. P. Bell, Pickford and Black, Halifax, Mr. F. M. Blois, Stanfields Ltd., Truro, Mr. J. A. Ford, Swift Canadian Co., Moncton, Mr. J. H. L. Jones, Mersey Paper Co., Liverpool, Mr. T. S. McColl, Dominion Steel and Coal Corporation, Sydney, Mr. F. G. Macnabb, Canadian Pacific Railway, Saint John, Mr. C. J. Morrow, Lunenburg Sea Products Ltd., Lunenburg.

WORKMEN'S COMPENSATION IN ALBERTA, MANITOBA, NOVA SCOTIA AND SASKATCHEWAN

Annual Reports of Provincial Boards

THE Workmen's Compensation Boards of Alberta, Manitoba, Nova Scotia and Saskatchewan recently issued their annual reports for 1939, a brief summary of each appearing below.

Alberta

The twenty-second annual report of the Alberta Workmen's Compensation Board for the year ending December 31, 1939, shows that during the year there were 13,504 accidents reported compared with 13,377 in the previous year, an increase of 227 accidents. Of the total number of accidents, 37 were fatal, 101 resulted in permanent disability and 13,366 in temporary disability.

During 1939, assessments collected by the Board amounted to $1,210,643.52 while compensation paid totalled $464,397.73 and payments from the pension fund amounted to $486,541.82. Contribution to the medical aid fund amounted to $367,922.81 concurrent with expenditures from this fund of $372,834.60, an expenditure from this fund in excess of revenue of $4,911.79.

The consolidated statement of receipts and expenditures given in the report shows an excess of revenue over expenditure for the year amounting to $20,804.71. The cost of administration including the cost chargeable to the Electrical Protection Act, mine rescue work and returned superannuation, was $124,954.82.

Statistics for the year reviewed by the report may be summarized as follows: Number of employers within the scope of the Act as at December 31, 1939, 6,880; number of accidents reported during the year 1939, 13,504; number of accidents and claims not finally disposed of as at December 31, 1938, 1,040; number of claims disposed of by award of pension or payments of compensation, 6,584; number of claims disposed of by payment only of account for medical aid, 5,211; number of accidents disposed of for which no application for compensation was received, 112; number of accidents disposed of on which no compensation was due, $1,260; number of claims on which further payments have to be made, 1,160; number of accidents awaiting further reports and on which no payments have been made, 217.

"Handling objects" was again the most frequent cause of accidents, followed by "falling objects or bodies." The time-loss in non-fatal claims totalled 203,893 days. The average time-loss in permanent disability cases was 85·70 days or a total of 14,312 days while the average time-loss in temporary disability cases was 29·54 days with a total time-loss of 189,581 days. The average age of injured workmen was 35·82 years.

The report also refers to the gradual establishment of a system of merit as follows: "After a full discussion with many representatives of Industry, the Board has decided upon a policy of merit and demerit. The demerit has been in effect for a number of years but in order to give some financial recognition to those employers who, through their co-operation with the Accident Prevention Department have had a most favourable experience, it was considered that some preferential rating should apply. The system of merit will be worked in gradually, as the Board would rather feel its way along so that it may accurately determine the full degree to which this system might be ultimately adopted."

The report also contains references to work carried on by the Mine Rescue and First Aid Department at various centres. In dealing with accident prevention the report refers to the record of the Canada Cement Company (Exshaw Plant) with 50 to 150 employees, operated for a period of five consecutive years without a lost time accident, it being stated that the Company in the past eleven years had only reported disabling injuries in two years. Reference is also made to the reduction of accident costs by more than one half in six large meat packing plants, the accident cost per shift in these six plants being 2·14 cents for 1939 compared with 5·22 cents in 1938, the lowest accident cost per shift (1.17 cents) being obtained in the Edmonton plant of Swift Canadian Company.

Manitoba

According to the report of the Workmen's Compensation Board of Manitoba for the year 1939, there were 11,433 accidents including 38 fatalities reported to the Board during the year, compared with 11,224 accidents with 48 fatalities reported in 1938.

Details showing the accidents as reported by the various groups for the last two years are as follows:

Group	1938	1939
Steam Railways	1,149	1,199
Province of Manitoba	482	584
City of Winnipeg	361	351
General Body of Employers	8,590	8,658
Winnipeg Electric Company	225	195
Dominion Government	417	446
	11,224	11,433

The report also shows that the Board had on its books as in receipt of pension 523 dependents of workmen killed in industry during the period March 1, 1917, to December 31, 1939.

The total actual payroll of all classes of employees in 1938 was $68,220,539.96 compared with the 1937 figure of $65,801,138.19. Of the total payroll the largest group was that of the general body of employers with a 1938 actual payroll of $37,814,771; the Canadian Pacific Railway Company and the Canadian National Railways followed with payrolls of $7,290,980.80 and $7,548,289.70 respectively.

During 1939 the actual cash disbursed by the Board amounted to $1,321,496.38 as compared with $992,628.12 expended in 1938. The value of Board Orders passed during 1939 for payment of compensation, including orders respecting Dominion Government employees and amounts transferred to General Unclassified Reserve to provide for the future payments in fatal and permanent disability cases was $1,035,529.62 as compared with $885,772.97 for the year 1938.

The report also contains a detailed analysis of compensable accident statistics for 1938. In that year "handling objects" was given as the cause of the greatest number of accidents followed by "falls of persons" and "falling objects."

Nova Scotia

The annual report of the Workmen's Compensation Board of Nova Scotia records an increase in the number of accidents reported to the Board in 1939 compared with 1938, the total being 12,500 in 1939 as against 12,199 in the previous year, an increase of 301.

The total cost of all accidents in 1939 under Part 1 of the Act, as far as could be estimated at the time of publication of the report, was nearly $1,647,000, which amount is exclusive of administration expense and cost of safety associations.

The provisional statement of income and expenditures for 1939 shows that the total actual and estimated, amounted to $1,775,569.78, and the estimated expenditure for the same period was $1,782,615.56 indicating a provisional deficit for 1939 of $7,045.78. The gross surplus brought forward from prior years was $550,622.69 leaving a provisional surplus for all years of $543,576.91 from which an amount of $20,000 has been set aside as a reserve for bad and doubtful accounts, resulting in a net surplus of $523,576.91.

During 1939, the report shows that an estimated amount of $188,734.11 was paid on account of medical aid to all classes, compared with $174,848.98 so expended in 1938. The sum of $9,995.66 was expended on safety associations compared with $9,801.85 expended in the previous year. Administration expenses increased from $119,589.62 in 1938 to $125,614.30 in 1939, the ratio of administration expense to the compensation cost of accidents for twenty-three years being 7·80 per cent.

The 12,500 accidents reported to the Board for the year 1939 are classified as follows: Fatal accidents, dependency established and compensation commenced, 35; fatal accidents, burial expenses paid, no dependents, 4; fatal accidents reported, pending adjustment, 2; fatal accidents, claim non-compensable or disallowed, 6; accidents causing permanent partial disability, 224; accidents causing total disability for seven days or over, 7,933; accidents where medical aid only has been paid, 3,258; accidents pending adjustment, no payments, 455; accidents not compensable (other than fatal), 583.

During the year 7,933 workmen injured and wholly disabled for seven days and upwards were paid compensation. At the end of the year the persons receiving compensation for 1939 and prior years in the form of a monthly pension were as follows: Widows, 681; children under 16, 683; dependent mothers, 53; dependent fathers, 15; other dependents, 12; workmen disabled for life (partially or wholly), 1,586.

The average rate of assessment levied on payrolls under Part 1, since the commencement of the Act in 1917 has been $2.07 per hundred dollars of payroll. The average rate for 1938 was $3.16 while the average rate for 1939 was $2.92.

Saskatchewan

The tenth annual report of the Saskatchewan Workmen's Compensation Board contains a provisional account of the Board's activities for the calendar year 1939 and a final statement for 1937.

During 1939, a total of 6,052 claims were reported to the Board compared with 5,190 in 1938. On a total 4,984 accidents in 1939 some compensation has already been paid, 2,283 of this total requiring medical aid only, 507 partial compensation and 2,194 full compensation. There were 19 fatalities as a result of accidents, seventy-three cases of permanent disability and 2,609 cases resulting in temporary disability. Total receipts of the Board for the year ending December 31, 1939 were $407,247.25 while total expenditures, including an estimate for outstanding claims, were $402,669.97 leaving an estimated surplus of $4,577.28 on the activities of the Board for the year.

The number of employers who reported to the Board in 1939 was 4,686 as compared with 4,470 in 1938, an increase of 216. The amount

of payroll reported during 1939, exclusive of Dominion and Saskatchewan Governments, which are not asked to estimate their payrolls, totalled $33,603,034, an increase of $2,778,719 over 1938.

The average assessment rate of the Board in 1939 was $1.31 per $100 of payroll, a reduction when compared with $1.59 in 1938, and equals the lowest assessment rate struck by the Board since its establishment, the rate for 1939 being equal to that of 1933.

Administration expenses of the Board in 1939 amounted to $50,426.02 being a ratio of 10·23 per cent to benefits paid.

The report gives detailed statistics concerning compensable accidents occurring in 1938. The causes of accidents in 1938 are classified as follows: Prime movers, 86; working machines, 197; hoisting apparatus, 12; dangerous substances, 199; stepping on or striking against objects, 651; falling objects, 677; handling objects, 552; tools, 278; runaways and animals, 58; moving trains and vehicles, etc., 159; falls of persons, 599; all other causes, 1,040, a total of 4,508 for the year 1938.

Referring to recent extensions of the Act, the report states:

"In response to repeated requests from certain of the rural telephone companies and associations of the Province, the benefits of the Act have recently been made available to such rural telephone companies on a voluntary basis by application of the individual companies and a new principle has been introduced in that the assessments of such companies is being based upon the number of their subscribers rather than upon their annual payroll. This new method of assessment will, it is hoped, prove to be simpler and less expensive of operation than the payroll system. Heretofore it has not been possible for these companies to obtain adequate protection for their workmen, the policies offered by the insurance companies being quite restricted and the premiums also relatively high.

"Within the past two years the cities of Regina, Saskatoon and Moose Jaw have requested that compensation should be made available to all their employees rather than to those only who are engaged in industries within the Act. This has resulted in an additional annual assessable payroll of $670,000.00 and the benefits of the Act are extended to the employees of these cities whose earnings go to make up that additional payroll."

Census of Labour in War Industries in Great Britain

A census of skilled, semi-skilled and unskilled labour in the essential war industries in Great Britain has been ordered by the Ministry of Supply and is being undertaken by the Ministry of Labour and National Service. (The following information in regard to this census is taken from *Industrial and Labour Information* published by the International Labour Office.)

The census aims at the complete planning of labour supplies in factories for war requirements. To begin with, the census applies to the three industries of engineering, motor-vehicle and aircraft manufacture, and shipbuilding and ship repairing. Employers in these industries are supplied with tabulated forms issued through the employment exchanges asking for the required information and the returns were to be made by April 10, 1940.

The intention is to call for similar returns each quarter and the area of enquiry will be extended as circumstances require, in order that there may be reliable and up-to-date knowledge of the numbers and whereabouts of skilled men and of the kinds of work they are doing. Not only will the census show the amount of man-power in employment, it will also give an indication of the factory space and plant that is engaged on Government work, on work for export and on work for the home market.

The three main purposes of the census are: (1) to provide information on the proportion of the labour in certain vital industries which is employed on production for the war effort or in the export trade or for the home market; (2) to yield valuable information on the distribution of skilled labour among the various industries; (3) to assist the Area Supply Boards in dealing with problems connected with the planning of production.

Returns are compulsory and heavy penalties are provided for failure to comply with the Order. . .

The information collected is expected to reveal what are the essential occupations and key positions and how they can be expanded and utilized in the war effort.

PROGRESS OF VOLUNTARY CONTRIBUTORY PLAN FOR PREPAYMENT OF MEDICAL SERVICES IN ONTARIO

Annual Report of Director of Associated Medical Services Indicates Success of Program

THE recent annual report of the Associated Medical Services, Incorporated, indicates the growth and consolidated progress of this system of voluntary contributory health insurance in Ontario (the establishment and purposes of this program were summarized in the LABOUR GAZETTE for June, 1937, page 597).

The basic principle of the plan is to provide medical service and hospitalization without profit. In carrying out this objective, the program provides that any wage-earner or salaried person, regardless of income may obtain medical, surgical and nursing treatment through a system of monthly payments fixed at $2; or, on a family basis, of $2 for the family head, $1.75 for the first dependent, $1.50 for the second dependent, $1.25 for the third dependent and $1 for the fourth and each subsequent dependent. Thus an average family of four may voluntarily budget against the possibility of illness for $6.50 per month.

The benefits accorded to subscribers include the services of participating physicians in home, office or hospital; surgical service; semi-private accommodation or a sum not exceeding $3.50 toward the cost of hospitalization; all necessary nursing; and child birth in cases where both husband and wife have been subscribers for ten consecutive months previous to delivery. There is a two months' probationary period and the subscriber must pay three months' subscription before becoming entitled to any service. All services are provided through the family doctor, nominated by the subscriber, but special services such as X-ray, consultations, hospitalization, or special nursing, etc., are not authorized unless sanction has first been obtained.

The following conditions, if institutionalized, are not covered by the service: mental illness of any type; epilepsy; chronic tuberculosis; or any condition which is the responsibility of any body or agency.

The application for health insurance is divided into two parts, the first part being an application to become a subscriber. The second part is similar to health reports required by insurance companies when no medical examination is requested. Should any physical disabilities be revealed by the questionnaire an examination may be required. Physicians and surgeons, who participate in the plan, have their fees paid by the Corporation. Participation in the scheme by doctors is voluntary, but the majority of doctors gladly co-operate in the plan.

Some idea of the progress of this voluntary contributory system of medical service is indicated in the statistics for its first three years.

At the end of 1937—the plan only started to operate on May 31, 1937—there were 733 people on service and the system covered only Toronto, Woodstock (Oxford County) and Norfolk County.

In April, 1938 a branch was opened in Ottawa. At the end of that year 4,000 people were on service. At the end of 1939 additional branches were in operation at Hamilton, London, Oshawa, and Peterborough and subscribers had increased to 12,000. On March 31, 1940, there were 15,000 on service and new branches were functioning in Kitchener and St. Catharines. Of the 15,000 subscribers in March 1940, approximately 2,300 were in Ottawa.

The statistics also demonstrate the value of the service to the subscribers. Breaking down the figures for the year 1939, the total expenditure of $109,698 for that period indicates the nature and extent of the service as follows: medical accounts of doctors and surgeons—$77,691 or 70·82 per cent; hospitalization—$24,782 or 22·59 per cent; nursing—$6,722 or 6·13 per cent; drugs—$502 or ·46 per cent.

The average medical cost per subscriber by months during the year 1939 was as follows: January, $1.19; February, $1.67; March, $1.51; April, $1.60; May, $1.64; June, $1.29; July, $1.15; August, $1.31; September, $1.05; October, $1.29; November, $1.63; and December, $1.36.

The reserve as at March 31, 1940, amounted to $35,118, but it is pointed out that while this amount is sufficient for a moderate epidemic, it is intended for that specific purpose and is in no sense of the word a profit.

Policy and Objectives

The policy and sphere of service of the Associated Medical Services was outlined by the Managing Director, Dr. J. A. Hannah, in his annual report as follows:—

"Associated Medical Services is an organization designed to deal with the problems involved in medical economics. The ultimate aim must ever be a complete medical service for every member of the community with a reasonable return for services rendered. This requires that we shall press the problem to the place where all those not of independent means shall have medical service available on a contributory basis. The middle class wage-earner can and will bear this load if given the opportunity of budgeting against its cost.

"The low income groups will have to have more or less assistance. For those employed this assistance should and must come from employers, some of whom have already recognized and accepted their share of responsibility by contributing the whole or a part of such costs either for the employees, or, in addition, their.... As Associated Medical Services grows in stability and reputation this will automatically become more common. There will, however, come a time when it will be unfair to leave such a responsibility a matter of option.

"The very low income group and the indigent will have to become a responsibility on taxation. This, however, need not entail a tremendous additional present outlay from taxes.

"It must, however, be recognized that such developments are difficult and dangerous unless they are brought about by a process of evolution. It takes years to train personnel to the point where it can handle the multitudinous problems involved. Any sudden change along this line would greatly increase our present costs and throw the whole idea into confusion and disrepute. . . .

"In the meantime it is the duty of Associated Medical Services to foster a gradual growth in both experience and education of the public and profession. Democracy is a continuous growth in the experience of personal liberty. Failure to recognize that personal liberty involves personal responsibility leads to personal licence. If we are to have a strong and sound system we must develop it slowly, and surely, and take the public and profession with us. Failure to recognize these facts will undoubtedly lead to serious difficulties.

"On the other hand, failure to accept our responsibility or any attempt to shirk it will be just as disastrous. We must never go faster than our public, but we must also never fail to give lead and direction. The difference between successful and decadent organizations can be reduced to simple terms of leadership...."

Future Planning

As regards future planning, the Managing Director states:—

"It can be accepted that our successes will attract a host of others toward this field. It is the duty of Associated Medical Services to prevent the recurrence of mistakes made in health insurance in other countries. Canada does not need a multiplicity of organizations to carry out this project.

"It is a part of the responsibility of Associated Medical Services to point the way in such a manner as will permit custom to govern and produce the best results. To this end we have carried on a quiet program of education to both public and profession, urging that they accept their responsibilities in this matter. We are planning a gradual extension of this program to the point where we will eventually be in contact with each of our subscribers and participating physicians each month.

"At the present time about 60 per cent of our new applicants are sent to us by our subscribers. This process has been encouraged. We want young married couples whose families will grow up with the custom, and in their turn budget against the future cost of medical care. . . .

"To the family it does not matter whether husband, wife or child occasions the expense —it must come out of the family income. From various studies it would appear that in an average family consisting of husband, wife and two children, the husband will require only 10 per cent of the total medical expense—the wife and children 90 per cent. As a solution to the problem of Medical Economics a system which neglects to cover 90 per cent of the family's responsibility is far from answering the problem."

No. 18 in the series of studies of personnel policy published by the National Industrial Conference Board, Inc., New York, is entitled "Training Solutions of Company Problems." The report includes programs giving special attention to the development of the skill of non-supervisory production employees.

In an introduction to the report, it is stated that the aim of The Conference Board in making the study of training methods was to provide suggestive material for those responsible for planning company training programs. The study contains an introductory section while one section contains surveys of training programs of General Electric Company; Cincinnati Milling Machine Company; National Cash Register Company; Wright Aeronautical Corporation; and Ford Motor Company.

HOURS OF WORK OF WOMEN AND JUVENILES IN FACTORIES IN GREAT BRITAIN SINCE OUTBREAK OF WAR

A REPORT on Hours of Employment of Women and Young Persons in Factories during the First Five Months of the War which was presented to the British Parliament in March was referred to briefly in the LABOUR GAZETTE for April. As it is considered that this report will be of interest in Canada, extracts from it are quoted here:

"The Factory and Workshop Act of 1901 permitted the employment of women and young persons, of either sex, aged 14 (and in some cases 13) to 18 years for a maximum of 60 working hours a week in non-textile and 55½ hours in textile factories; and in 1914 it was quite usual for these maxima to be worked. In addition women could in some cases be employed on overtime beyond the 60 hours.

"By section 150 of that Act the Secretary of State was empowered in case of any public emergency, by order, to the extent and during the period specified by him, to exempt from the Act any factory belonging to the Crown, or any factory in respect of work which was being done on behalf of the Crown under a contract specified in the Order. Similar but somewhat wider powers of exemption are given by section 150 of the Factories Act of 1937."

Conditions in Last War

"On the outbreak of War in August, 1914, many employers engaged in important work on behalf of the Crown found even the long hours permissible under the Statute insufficient to meet the urgent demands of the Service Departments for supplies of munitions and stores, and the question to what extent the ordinary provisions of the Act were to be relaxed, immediately arose. . . . .

"The experiment of granting Emergency Orders under section 150 of the Act to individual firms for short periods—usually a month in the first instance—was adopted. These Orders generally permitted overtime working to the extent of two hours a day on not more than five days a week, and in exceptional cases additional hours were allowed on Saturdays. Women and young persons were thus employed for very long hours amounting in many cases to 70 or more in a week. An alternative method of increasing production was to authorize a system of employment in shifts, with either two turns of 12 hours' or three turns of eight hours' duration.

"During approximately the first six months of the War, Orders under section 150 were made for about 3,000 firms engaged in a wide variety of industries. . . . .

"Meanwhile investigation into the needs of various industries was undertaken with a view to formulating general schemes of hours of work applicable to particular industries. These investigations and the information gained in dealing with individual cases provided sufficient data to make it practicable for the Secretary of State to make general Orders authorizing standard working hours for whole industries. The need for the standardization of hours was most pressing in the case of large factories engaged in the production of armaments and accordingly on 31st March, 1915, a General Order was made for 'armament works and other factories in which the manufacture of munitions of war and processes incidental thereto' were carried on. Owing to the shortage of munitions of war it had to be recognized that the widest possible latitude was necessary for this work. The Order authorized three schemes of hours:—

"(1) Overtime beyond the 60 hours with a limit of five hours a week for women and male young persons between 14 and 16 years and female young persons between 16 and 18 years of age; 7½ hours for male young persons over 16 years; and in exceptional cases 7½ hours for women. Thus male young persons under 16 years of age could be employed for 65 hours a week and those over 16 years of age for 67½ hours.

"(2) Day and night shifts with turns of 12 hours each for women and male young persons over 16 years, and in certain cases for male young persons between 14 and 16 years.

"(3) Eight-hour shifts for female young persons over 16 and male young persons over 14 years of age. Thus boys over 14 years of age could be, and in fact were, employed at night.

"General Orders for other industries authorizing hours rather shorter than those permitted under the Munitions of War Order followed, and by the end of 1915 twenty such Orders had been made and were in force."

The report states that it was found necessary also to authorize emergency hours for women in some factories not engaged on work for the Crown but on other work of national importance and under a Defence of the Realm Regulation of 1915, the Secretary of State was given power to exempt factories generally. During the present war, a Defence Regulation extended the Secretary of State's power to permit longer hours in any class of factory.

"Early in 1915 it became apparent that, while long hours could be worked with advantage to production for short periods, continuous overtime very soon produced lassitude in the workers and adversely affected the quality and quantity of their work."

As a result of recommendations by the Health of Munition Workers' Committee set up by the Government to consider these questions an order was made for munition factories limiting the employment of women to the 60 hours permitted under the Factory and Workshop Act but within this limit allowing night work of women and 14 hours of work including meal times in a day. The employment at night of girls between 16 and 18 was only permitted under special circumstances and that of girls under 16 was forbidden. Boys over 16 and under 18 were allowed to work 65 hours a week by day and 63 by night.

"The tendency to reduce hours continued, and by 1917 it was the exception for women and girls to be employed as long as 60 hours a week. Applications for some relaxation of the law were still numerous but the general tendency was to arrange for more elasticity in the daily limits of working hours while keeping the weekly maximum within that allowed under the Factory Act. . . . .

. . . . . The movement for reduced hours continued through the intervening years and no serious disorganization of industry resulted when the Factories Act, 1937, which came into force on the 1st July, 1938, fixed 48 hours as the normal, maximum working week for women and young persons."

Conditions in Present War

Referring to conditions at the beginning of the present war the report continues as follows:

"The situation in September, 1939, was in some respects materially different from that existing at the commencement of the War of 1914-18. In the first place, as already mentioned, the hours normally worked in industry had become much shorter; the ill-effects of continued long hours on production were widely recognized; and it was in most quarters appreciated that the hours worked in the last war had been excessive and that even if it were necessary as a temporary measure to resort to longer hours, the hours should not exceed 60 a week or rather less, and should subsequently be reduced where possible as industry became better organized for war purposes. It was also widely recognized that the hours of juveniles under 16 should be relatively short. In the second place, very largely as a result of experience in the last war, great advances had been made, on a voluntary basis as well as by legal requirement, in the provision of amenities for the comfort and welfare of the workers, which incidentally do much to maintain their health and cheerfulness and to counteract the effects of long or inconvenient hours of work.

"Nevertheless many of the problems of 1914 again had to be faced in 1939—demands from the Service Departments for greatly increased supplies, and in particular for an immediate increase from firms with the equipment and experience for providing the particular class of work required, dislocation due to the calling up of reservists, and an inclination to take the easy course of relying on continued overtime of the trained staff and to regard restrictions on hours as an obstacle to production which should be swept away or disregarded in war time.

"In these circumstances three considerations were prominent. First, it was necessary to agree freely to substantial overtime at the outset so as to meet immediate difficulties and afford time, without holding up urgent supplies in the meanwhile, for inquiries into the actual needs of the case. Secondly, it was essential to make it clear to employers and workpeople that the Factories Act had not gone by the Board, and that hours must be regulated, through its machinery, in accordance with a considered policy. Thirdly, it was important that the position at individual factories should be reviewed at fairly short intervals, especially during the first few months of the war, to see that, with expansion of staff where reasonably practicable and the better organization of industry for war purposes, overtime would not be worked to a greater extent or for longer periods than necessary.

"To assist in meeting the first point, it was arranged that, at the outset of the war, the Service Departments might inform their contractors, in cases where they thought this necessary, that they were provisionally authorized to work overtime subject to a maximum of 60 hours a week, and to make certain changes in starting and stopping times, but must at once approach the local Factory Inspector with a view to obtaining as soon as practicable an Order from the Home Secretary formally authorizing the precise relaxations of the Factory Acts found to be necessary. . . . . The arrangement. . . . . was terminated at an early stage, so that authority to depart from the peacetime requirements of the Factories Act can now only be obtained through the Factory Inspectors and the Home Office."

Factory Inspection in War Time

"In addition, Factory Inspectors were instructed that on receiving applications for such authority they should as soon as possible have the case investigated and submit a special report to the Home Office, and that pending a decision the Inspector might, according to the circumstances, inform the firm that as a provisional and temporary measure he would not object to certain changes in hours.

"On such an application, an Inspector visits the factory and reports as to the nature of the work for which an Emergency Order is desired, the classes of persons (i.e., women, young persons over 16 or under 16) whom it is proposed to employ for additional hours or in shifts and details of the proposed scheme of hours. The Inspector also inquires into the extent to which the workers concerned will be employed on work on behalf of the Crown, and as to which Government Departments are particularly concerned. He also reports on the conditions at the factory regarding the observance of the provisions of the Act as to the safety, health and welfare of the persons employed, and as to the views of the workers, especially on the proposed arrangement of hours and intervals for meals. If it should appear that workers living at a distance are employed at the factory he also ascertains whether adequate transport facilities are available at the times required. When shortage of workers is advanced as a ground for the application for permission to

work extended hours, inquiries are made of local officers of the Ministry of Labour and National Service. Inspectors also consult local Trade Union representatives in connection with such applications, and report their views to the Home Office. . . .

"The general practice has been to make Orders in respect of particular factories or processes or departments and to limit their validity, in the first instance, to short periods of one, two or three months. Opportunity has thus been afforded to review the situation and to assess with greater accuracy than was possible in the first weeks of the War the position and needs of individual factories and the requirements of particular industries."

Extended Hours

"By far the largest number of applications received have been for permission to employ women and young persons for daily or weekly hours in excess of those allowed by the Factories Act. Orders authorizing extended hours have been made in respect of 2,459 factories; but the hours authorized were often shorter than those applied for, and in some cases the application was refused altogether.

"As indicated earlier in this report, as much as 60 hours a week might have been worked in some cases at the beginning of the War, but when after inquiries a formal Order was made the maximum was reduced in almost every case to some figure not exceeding 57 for women and young persons over 16 years of age. Many factory occupiers, to whom Orders were granted in September and October allowing 57 hours, have found that by the adoption of some measure of reorganization they are able to maintain the necessary output with fewer working hours than they had at first regarded as essential, and when applying for a renewal of the original Order have proposed a reduction of the working week to 54 hours or even less. Moreover in 239 cases in which Orders allowing overtime working have been granted, the occupiers have stated on the expiry of the Order that they do not desire its renewal, at any rate for the present.

"Work on Sunday (not in a shift system) has hardly ever been applied for; but it has been allowed in a few cases on some special Sunday or Sundays to enable some particularly urgent job or unforeseen emergency to be dealt with."

Two Day Shifts

"As a method of securing increased output and at the same time avoiding the employment of individual women and young persons over 16 years of age for a long day, Emergency Orders authorizing the employment of such persons on a system of two day-shifts with turns of eight hours have been granted —in the case of 299 factories. The usual hours worked are: Shift I, 6 turns a week from 6 a.m. to 2 p.m., and Shift II, 5 turns (in cases of extreme urgency, 6 turns) from 2 p.m. to 10 p.m. The shifts alternate weekly or fortnightly subject to arrangements to meet the convenience of individual workers. It is usual to impose a condition requiring the provision of a mess room (a class of welfare provision not usually required by the Act itself) and, where the Inspector's inquiries indicate that this is desirable, a condition to enable transport facilities to be secured for workers living at a distance."

Employment at Night

"(i) Women (over 18).—Applications for authority to employ women at night have been relatively few and have been confined almost entirely to factories producing armaments, or engaged in processes incidental thereto; altogether 57 Orders have been made. The system authorized is usually one of the following:—

(*a*) a system of three eight-hour shifts in the 24 hours, with an interval of at least half an hour for meals and rest in each turn;

(*b*) a system of day and night shifts allowing a weekly total of working hours of about 54 for the day-shift and about 50 for the night-shift. Under this system intervals for meals and rest, amounting to at least one hour, are required to be allowed during each turn.

"In all but a few cases such Orders provide for a short Saturday and only five night turns a week. Care is taken to ensure that suitable welfare facilities are provided: to supplement the welfare provisions of the Act itself, special conditions as to a messroom, adequate supervision, and suitable transport facilities are included in each Order permitting the employment of women at night. Except for a few cases where the workers have expressed a wish to remain permanently in the night-shift, the Orders require weekly or fortnightly alternation of the shifts.

"(ii) Male young persons aged 16 years or over.—Such persons are permitted by section 81 of the Act to be employed in a system of shifts (including a night-shift) in certain specified industries and processes on work which is, by reason of the nature of the process, required to be carried on continuously day and night. The industries and processes to which the section applies are the smelting of iron ore, the manufacture of wrought iron, steel or tinplate, certain processes in which reverberatory or regenerative furnaces are used, the galvanising of sheet

metal or wire (except the pickling process), the manufacture of paper, and the manufacture of glass. The section permits the total hours worked by male young persons, employed in any of the systems of shifts authorized by the section, to exceed 48 in any week but not to exceed 56 in any week or 144 in any continuous period of three weeks.

"Some applications have been received for a modification of the terms of this section, usually for a variation of arrangement of the turns, and in a few cases for an extension of the shift system to work on non-continuous processes. Twelve Orders have been made modifying or extending the system allowed by section 81.

"Orders have also been made for 30 factories allowing the employment of male young persons over 16 in a system of two day- and night-shifts or three eight-hour shifts. Eleven of these factories were engaged in the manufacture of aircraft or aircraft components, four in making wire ropes or cables, and 15 in miscellaneous processes in the manufacture of armaments. Special conditions were attached as to a messroom, and suitable transport facilities.

"Sixty-two applications for Orders allowing the employment of women or young persons at night have been refused, at any rate for the time being, and in no case has authority for the night employment of girls under 18 or of boys under 16 been given. . . ."

Young Persons under 16 Years

". . . The Factories Act, 1937, which came into force on the 1st July, 1938, reduced their maximum weekly hours to 48 in all factories, and under section 71 the weekly hours of young persons under 16 years were further reduced to 44 from the 1st July, 1939, except in a few industries (e.g. the cotton and woollen textile industries). On the outbreak of War industry had not sufficiently adjusted itself to the recent reduction to 44 hours, and many hundreds of applications were received for permission to employ the young persons up to the 48 hours previously allowed.

"During the early weeks of the War many firms, particularly in the engineering industry, and firms engaged in making blinds and other articles urgently required owing to the restrictions imposed on lighting, were permitted to employ young persons under 16 years of age up to 47 or 48 hours a week for a short period rarely longer than two months. This relaxation was granted to enable the firms in question to increase output immediately and to afford them an opportunity of adopting other measures, e.g., the absorption and training of additional workers or some rearrangement of the work to maintain the necessary production. Many factory occupiers took such effective measures during the short period for which the concession was granted that, by the time their Orders expired, they found it unnecessary to employ these young persons beyond the statutory maximum of 44 hours. Some firms have been able to meet the difficulty of maintaining balance of production by availing themselves of the Young Persons Under Sixteen (Factory Hours Modification Regulations). These Regulations allow different periods of employment to be fixed for two different sets of such persons (or if H.M. Inspector of Factories for the district approves, more than two sets) subject to certain specified conditions, thus enabling juveniles to be employed in the factory over the whole period of employment of 11 hours (between 7 a.m. and 6 p.m.) but limiting the hours of any individual juvenile to the statutory maxima of 44 in a week and nine hours in a day.

"There are, however, some cases where the refusal of a concession for young persons under 16 years would result in serious dislocation and loss of output, especially where the work of the young persons is very closely linked with that of older persons with whom they work, either as members of a team or as assistants. This is particularly the case in the ship-building and ship-repairing trades and in some classes of engineering work, where the nature of the work done by boys, e.g. rivet heating for riveters, or rivet catching and holding-up, or "pulling" or assisting drop-hammer smiths, or acting as moulders' assistants in foundries, is such that there are strong grounds for allowing them to work somewhat longer hours during the emergency. In the circumstances Orders permitting the employment of male young persons under 16 years up to 47 or 48 hours a week have been granted to a number of firms in these industries after full investigation into each particular case.

"During the early months of the War, short-term Orders permitting the employment of young persons under 16 years of age for hours in excess of 44, but not exceeding 48 a week, were granted to 439 factories of which 302 were engaged in general engineering and 48 in ship-building and marine engineering. Three hundred and twelve of these Orders were not renewed. In many cases the firms concerned did not find it necessary to apply for renewal, and in others renewal was refused. At the end of the five months under review, there were in operation 133 Orders allowing the employment of these young persons for hours between 44 and 48 in a week. . . ."

Subsequent Developments

"A tendency towards standardization of emergency hours in some industries leads to the making of Orders on similar lines. Such an Order, allowing up to 54 hours for women and young persons over 16 (subject again to permission to use the Order being obtained from the Superintending Inspector), was made by the Secretary of State on the 22nd January for factories in which certain articles of clothing are made. This Order had not been used up to the 27th January.

"Similar Orders have since been made for the woollen and worsted textile industry (allowing up to 54 hours) and for cotton spinning and weaving (allowing up to 55½ hours). In the case of cotton, employers' and workers' representatives have entered into formal agreements as to overtime working up to 55½ hours, and have set up Joint Committees to consider proposals for overtime working in any particular factory. The Superintending Inspectors concerned are in close touch with these Committees.

"It will be seen from the foregoing that notwithstanding the exceptional demands being made upon industry for increased and accelerated production to meet the War emergency the hours and conditions of employment of women and young persons are being kept under supervision and control.

"The experience of the present emergency is necessarily limited and, as the War continues, fresh problems for industry in the matter of production and output will almost certainly arise. It is, however, the policy of the Government while authorizing, where necessary, hours which would not be permissible in peace time, not to authorize hours which are found in the light of experience and of scientific investigation to be detrimental to health or efficient production."

Married Women and Private Industry in U.S.A.

To secure information as to the prevailing practice on the employment of married women, the National Industrial Conference Board sought an expression from representative companies—not only manufacturing concerns but stores, financial companies, and others. Information was received from 484 companies, with a total employment of 1,150,646. The results of this survey are summarized in the May issue of *The Woman Worker* (published by the United States Department of Labor) in the following paragraphs:

The conclusion of the Conference Board is that in probably a large majority of cases no definite position had been taken one way or the other; the more general practice was to leave the policy somewhat flexible. Practically three-fourths of the companies said they had no definite fixed policy concerning women factory employees who married, and nearly 60 per cent had none regarding their office employees.

Well over half the plants encourage or permit their women employees, whether in plant or office, to remain at work after marriage. Altogether, women plant employees in about 92 per cent of the companies and women office workers in practically 77 per cent may continue in their jobs under some circumstances.

The policy of forbidding office women to remain after marriage is most general in the 52 financial companies (including banks and insurance companies), 34 of which require that women leave if they marry. Of the 372 manufacturing concerns, only 52 require office women and 31 require factory women to give up their jobs at marriage. Only 3 of the 26 mercantile establishments require saleswomen and office workers to give up their jobs.

Statements cited from employers include the following.

"There is no question but that from the employer's standpoint there will be a distinct loss if he attempts to dismiss all married women from his organization.

"We do not believe that employers should set up restrictions regarding employment of married women.

"They are not valued by domestic value but by job value."

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, MARCH, 1940

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on April 1 was 11,903, the employees on their pay-rolls numbering 1,093,930 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for March was 1,982 having an aggregate membership of 248,607 persons, 10·8 per cent of whom were without employment on April 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of work-people placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of April, 1940, as Reported by Employers

There was considerable seasonal curtailment in industrial employment at April 1, according to information tabulated in the Dominion Bureau of Statistics from 11,903 establishments whose staffs aggregated 1,093,930 persons, compared with 1,109,526 in the preceding month. This reduction of 15,596 workers lowered the index from 113·5 at March 1, to 111·9 at the date under review, when it was 6·7 per cent above that of 104·9 at April 1, 1939. The latest index was also higher than at the beginning of April in any other year for which statistics are available; the previous maximum was that of 110·4 at April 1, 1929. The average for the calendar year 1926 is taken as 100 in calculating these indexes.

In seventeen of the nineteen preceding years of the record, employment at April 1 has shown a downward movement, due to the completion of the season's logging operations in many camps in the Eastern and Central Provinces, and before appreciable numbers of workers have been absorbed into the industries whose active seasons open in the spring and early summer. The general contraction at the latest date was rather smaller than that recorded at April 1, 1939, being also slightly less than the average in the experience of past years. Accordingly, the index, after adjustment for seasonal variation, advanced fractionally, standing at 118·5, as compared with 118·3 at March 1, 1940.

There was important shrinkage in logging at April 1, 1940, when 26,263 men were released from work in the woods; this decline was substantially larger than that recorded at the same date last spring, and also considerably exceeded the average loss at April 1 in the years since 1920. Mining was seasonally quiet, and there was a falling-off in employment in transportation and hotels and restaurants. On the other hand, manufacturing showed further improvement, and there were additions to staffs in communications, construction, laundering and dry cleaning establishments and trade.

Based on the 1926 average as 100, the unadjusted indexes at April 1 in recent years are as follows:—1940, 111·9; 1939, 104·9; 1938, 105·0; 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8. 1929, 110·4 and 1928, 102·3.

For April 1, 1939, statistics had been received from 11,493 firms, whose employees had numbered 1,015,632, as compared with 1,031,679 in the preceding month. The general index had then stood at 104·9.

Employment in Financial Organizations

Statistics of the employment afforded have been collected in recent months from banks, trust companies and stock exchange firms. At the beginning of April, 409 firms and branches in these lines of business reported staffs aggregating 33,498 persons, compared with 33,458 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, con-

struction, services and trade industries brings the total number of employees included in the April 1 survey of employment to 1,127,428 in 12,312 establishments, but leaves unaltered the index of 111·9 calculated from data for the industries above enumerated; when the employees of the co-operating financial institutions were added to the general figures for March 1, the index was lowered from 113·5 to 113·4. The comparable index for April 1, 1939, was 105·0, while without the figures for the co-operating financial institutions it was 104·9, as given above.

Employment by Economic Areas

Industrial activity in Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan and Alberta showed seasonal declines at April 1, while in Prince Edward Island, Manitoba and British Columbia there was a moderately upward movement. The general level of employment in all five economic areas was higher than at the same date in 1939; in the Maritime Provinces, Quebec and Ontario, it was also higher than in any other April in the years for which data are available (i.e., since 1920), while in the Prairie Provinces the favourable comparison goes back to 1931, and in British Columbia, to 1930.

Maritime Provinces.—There was a large seasonal decrease in the Maritime Provinces; little change was reported in Prince Edward Island, while in Nova Scotia and New Brunswick considerable curtailment was indicated. The 829 co-operating employers reduced their payrolls from 86,030 persons at March 1 to 82,874 at the beginning of April. Logging showed a decided seasonal contraction, over 2,900 men being released from bush work, while employment in transportation and railway construction and maintenance moderately declined. On the other hand, manufacturing reported gains, mainly in lumber mills. Communications, building and road construction and trade also showed advances. Employment generally was brisker than at the beginning of April, 1939, when smaller losses had been reported; statements for April 1 of last year were received from 814 firms employing 73,458 workers, 1,042 fewer than at March 1, 1939.

Quebec. — Manufacturing, communications, transportation, construction and maintenance and trade showed heightened activity in Quebec. The gains in manufacturing extended to many industrial divisions, but were most pronounced in the iron and steel and textile groups. On the other hand, mining was rather quieter and there were very large, seasonal losses in logging camps, which reported the release of over 11,100 men. Data were tabulated from 2,963 establishments in Quebec, with 320,894 employees, as against 327,036 at March 1. The index, at 112·2 at April 1, 1940, was some three points higher than at the same date of last year, the curtailment then indicated having been on a larger scale. The trend has been retrogressive in seventeen of the nineteen preceding Aprils for which information is available; the decrease at the latest date was below normal according to the experience of this period.

At April 1, 1939, statistics had been furnished by 2,828 employers, whose payrolls

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Apr. 1, 1927	97·4	97·8	94·6	100·4	94·1	96·1

[1] For explanation of term "Relative Weight", see footnote to Table I.

had included 310,584 men and women, as compared with 320,258 in the preceding month.

Ontario.—Employment showed a contraction in Ontario, where 5,201 firms had reduced their forces by 4,750 workers since the preceding month, bringing them to 473,266 at April 1. A rather larger loss had been registered by the 5,026 establishments making returns for the same date in 1939, when their staffs aggregated 426,204. Employment was then at a lower level, the index standing at 108·0, compared with 118·8 at the latest date. The experience since 1920 shows that activity customarily declines in Ontario at the beginning of April, there having been curtailment of operations in sixteen of the nineteen

previous years for which data are available; the shrinkage at the date under review was slightly less than average.

Manufacturing reported heightened activity as compared with the preceding month, the greatest improvement being in iron and steel plants, although the trend was also favourable in the lumber, textile, electrical apparatus, non-ferrous metal and other divisions. On the other hand, pulp and paper, beverage and leather factories were slacker. In the non-manufacturing industries, mining, building and road construction and maintenance and trade showed improvement. Logging, however, released a large number of men as the season's operations drew to a close, and the railway construction and maintenance division was also quieter.

Prairie Provinces.—As is customary in the early spring, employment in the Prairie Provinces as a whole declined at April 1; the reduction was smaller than that noted at the same date in 1939, but approximated the average loss indicated in the early spring in the last nineteen years. The Prairie index, at 96·7 at the latest date, was five points above that at April 1, 1939, being also higher than at the same date in any other year since 1931. While firms in Manitoba reported slight improvement at the beginning of April of the present year, the trend in Saskatchewan and Alberta was unfavourable. An analysis of the returns by industry shows that most of the decrease in the Prairie Provinces as a whole was of a seasonal character in coal-mining and logging; railway construction and maintenance and transportation, however, were also slacker. On the other hand, manufacturing, building and trade afforded rather more employment. The working forces of the 1,698 co-operating employers aggregated 126,324 persons, compared with 128,711 at March 1.

The establishments furnishing information at the same date of last year had numbered 1,664, with a personnel of 118,337.

British Columbia.—A seasonal advance was indicated in British Columbia, according to

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

returns tabulated by the Bureau from 1,212 firms with 90,572 employees, or 839 more than in their last report. The increase was not equal to that noted, on the average, at April 1 in previous years of the record, being also smaller than the gain recorded at the same date of last spring. However, the volume of employment reported was rather greater than at April 1 of 1939, or of any other year since 1930. There was a falling-off at the date under review in manufacturing; this took place mainly in the lumber division, while iron and steel products were more active. Mining was also quieter. On the other hand, there was improvement in construction and trade. At the beginning of April of last year, the 1,161 co-operating establishments had reported 87,049 employees, compared with 84,012 in the preceding month.

Table 1 gives index numbers by economic areas.

Employment by Cities

Industrial activity increased in six of the eight centres for which employment data are segregated. There were gains in Montreal, Toronto, Ottawa, Windsor, Winnipeg and Vancouver, where they ranged from 0·6 per cent in Montreal to 3·9 per cent in Windsor. In Quebec City and Hamilton, on the other hand, the trend was downward. The level of employment in each of these centres, except Quebec, was higher than at April 1 in any other of the last eight or ten years; in Quebec, the latest index was lower than at the beginning of April, 1939, but it was higher than at that date in preceding years since 1931.

Montreal.—There was an advance in industrial activity in Montreal, according to 1,758 firms who reported 169,411 persons on their payrolls, as compared with 168,363 at March 1. This increase, which was seasonal in character, approximated the average gain at April 1 in earlier years of the record, although it was somewhat smaller than that indicated at the same date in 1939. Manufacturing generally showed improvement at April 1, 1940, from the preceding month, textile and iron and steel plants reporting the greatest increases in personnel. Transportation, services and trade also afforded rather more employment, but construction was quieter. The 1,656 establishments from which returns were received for April 1, 1939, had reported 157,774 employees, compared with 156,460 in the preceding month; the index then was several points lower than that of 108·8 at the beginning of April, 1940, when it was higher than in any other April of the record, except that of 1930.

Quebec.—Manufacturing and trade showed heightened activity in Quebec City, while transportation, construction and hotels and restaurants were somewhat slacker. There was a decrease of 73 in the working forces of the 209 employers making returns, who had 15,008 on their payrolls at April 1. A small gain had been indicated by the 206 firms co-operating at the beginning of April in 1939, whose staffs aggregated 16,514; the index was then ten points higher than that of 108·1 at the latest date.

Toronto.—Toronto businessmen reported improvement over the preceding month. Most of the betterment took place in trade and manufacturing; within the latter, there were increases in iron and steel, textiles and some other divisions, while the trend was downward in paper product and leather plants. The working forces of the 1,786 employers furnishing statistics totalled 149,135 persons, compared with 147,509 at March 1. Employment was in greater volume than at the corresponding date of last year, when a smaller advance had been indicated by the 1,711 concerns reporting; their payrolls had included 135,196 men and women. The index at April 1, 1940, stood at 115·9, the highest figure for that date in any year since 1930.

Ottawa.—Improvement was noted in Ottawa, there being moderate gains in manufacturing and trade. Construction, on the other hand, was quieter. An aggregate staff of 15,007 workers was employed by the 231 establishments whose statistics were tabulated, and who had 14,785 in their last report. The index, at 110·6, was slightly higher than that of 107·3 at the same date of last year, when an increase had also been recorded. Statements had then been compiled from 225 firms with 14,618 employees.

Hamilton.—Manufacturing showed a falling-off, particularly in the iron and steel division, while there was an upward movement in trade and building construction. Returns were tabulated from 332 employers with 37,949 persons on their paylists, or 214 fewer than at March 1. The level of employment was higher than at April 1, 1939, although an advance had then been indicated by the 322 co-operating establishments, whose payrolls had included 32,109 men and women.

Windsor.—The trend in Windsor continued favourable, according to data received from 194 firms employing 21,445 workers, as against 20,633 at the beginning of March. Manufacturing was more active, especially in the iron and steel division, and trade also showed some improvement. Employment on the whole was in greater volume than in April of last year; 197 concerns had then provided work for 19,214 persons.

Winnipeg.—Industrial activity increased in Winnipeg, the staffs of the 528 establishments furnishing statistics aggregating 41,630, as compared with 41,217 in the preceding month. Manufacturing was brisker, and construction and trade also reported an upward movement. A falling-off on the whole had been noted at April 1, 1939, when information had been received from 521 employers with a personnel of 38,311; the index was then several points lower, standing at 88·3, as compared with 95·4 at the date under review.

Vancouver.—Improvement was recorded in Vancouver, according to 533 firms with a staff of 37,588, as compared with 36,990 in the preceding month. There was a decline in shipping, but manufacturing, construction, services and trade showed heightened activity. A smaller increase had been indicated at the beginning of April of last year, and employment in that city was then at a lower level. The index stood at 111·5 at the latest date, compared with 107·4 at April 1, 1939, when the 506 co-operating establishments had reported 35,504 men and women on their paylists.

Employment by Industries

Manufacturing.—Further seasonal improvement was recorded in manufacturing at the beginning of April, when the number reported as having work in these industries was rather greater than in any other month for which data are available. The Dominion Bureau of Statistics tabulated returns from 6,542 establishments which employed 633,847 operatives at the latest date, as compared with 629,639 at the beginning of March. The April 1 index (1926 = 100), stood at 123·4, as compared with 122·6 in the preceding month, and with 107·1 at April 1, 1939. The highest April index in earlier years since 1920 was that of 116·5 in 1929. In the period before the outbreak of the present war, the recorded peak months had been August, 1929, and October, 1937, when the indexes were 121·6 and 121·7, respectively.

Despite the unusual activity generally reported in manufacturing at the first of April, the gain from March was slightly below the average indicated in the last nineteen years; this was probably due to the maintenance of staffs at an exceptionally high level in the last six months. As a result, the seasonally-corrected index fractionally declined, falling from 125·2 at March 1, to 124·4 at the beginning of April, 1940.

The largest increases in personnel reported at the date under review were in textiles and iron and steel; these were seasonal in character, but they rather exceeded the average April gain recorded in the period, 1921-1939. Electrical apparatus, non-ferrous metal, clay, glass and stone and other non-metallic mineral products, chemical, rubber, musical instrument and animal food factories also showed improvement. On the other hand, the leather, lumber, pulp and paper, vegetable food and tobacco industries afforded less employment.

The following are the unadjusted index numbers in manufacturing at April 1 in the years since 1927 (average, 1926 = 100):—1940, 123·4; 1939, 107·1; 1938, 110·8; 1937, 110·8; 1936, 101·1; 1935, 93·9; 1934, 88·1; 1933, 76·0; 1932, 87·3; 1931, 99·7; 1930, 111·3; 1929, 116·5 and 1928, 106·6.

The 6,283 manufacturers furnishing statistics for April 1, 1939, had employed 546,555 workers, a slight increase in comparison with their payrolls in the preceding month. The index for the beginning of April in the present year was 15·2 per cent higher than that of 107·1 at April 1, 1939.

Animal Products, Edible.—Improvement was noted in dairies and fish canneries, while meat-packing establishments were rather quieter. Statements were tabulated from 299 firms employing 25,637 workers, as against 25,495 at the beginning of March. A larger increase had been recorded at April 1, 1939, but activity was then at a lower level.

Leather and Products.—A decline was shown in the leather group, according to statements from 340 employers whose payrolls aggregated 25,766 at the beginning of April, or 394 fewer than in the preceding month. A gain had been indicated at April 1 a year ago, when the index of employment stood at 112·7, compared with 124·9 at the date under review.

Lumber and Products.—A downward trend was noted in lumber-using factories, there being a decrease of 530 persons in the staffs of the 952 co-operating manufacturers; they had 43,010 employees, as compared with 43,540 at March 1, 1940. The loss was contra-seasonal, according to the experience of earlier years of the record, although a reduction had also been reported at the beginning of April in 1938 and 1939. The index, at 79·5 at April 1, 1940, was some seven points higher than at the same date of last year.

Plant Products, Edible.—There was a falling-off in employment in vegetable foods in the period under review; flour and cereal and sugar and syrup factories reported heightened activity, but fruit and vegetable canneries and chocolate and confectionery plants were slacker. Returns were tabulated from 538 firms whose payrolls aggregated 35,160 persons, as compared with 35,366 at March 1. The index was several points higher than at the beginning of April, 1939, when a gain had been noted.

Pulp and Paper Products.—The movement in pulp and paper and paper product manufacturing was slightly downward, while printing and publishing afforded more employment. Data were received from 718 firms employing 68,767 workers, as compared with 69,096 in their last report. On the whole, greater activity was indicated in these industries than at April 1, 1939, when there had also been a decline from the preceding month.

Rubber Products.—Rubber works were more active, 149 men and women being added to the reported staffs, which totalled 13,663 in 53 establishments. An advance had also been shown at the same date last year, when the index was rather lower.

Textile Products.—There was further improvement, on the whole, in textiles, chiefly in garment and personal furnishings, knitting, cotton and silk factories. The average change at April 1 in the nineteen preceding years for which data are available has been an increase, so that the gain at the date under review was seasonal. Statements were compiled from 1,218 manufacturers with 125,597 employees, or 1,493 more than at March 1, 1940. Most of the advance took place in Quebec and Ontario. The situation was decidedly more favourable than at the corresponding date of last year; the expansion then reported had been on a smaller scale.

Tobacco.—Seasonal reductions in employment were recorded in this group, 542 persons being released from the working forces of the 46 co-operating establishments, which employed 13,664 workers at the date under review. The curtailment took place largely in Quebec. The index was higher than in the spring of last year, when much greater losses had been noted.

Beverages.—The tendency was slightly downward in this division, there being curtailment in distilled and malt liquor manufacturing, which more than offset improvement in soft drink plants. Returns were tabulated from 148 establishments with 8,939 men and women on their staffs, compared with 9,027 at March 1. Employment in the beverage group was in much the same volume as at the beginning of April, 1939; a small gain had then been indicated.

Chemicals and Allied Products.—Three hundred and nineteen plants turning out chemicals and allied products reported 21,480 employees, as compared with 21,327 in their last return. The greatest improvement was in Ontario and British Columbia. Although the general advance was not equal to that noted at the corresponding date in 1939, the index then was many points lower.

Clay, Glass and Stone Products.—There was an increase in the personnel of building material works, 219 of which employed 9,611 workers, as against 9,357 in their last report. Larger additions to staffs had been made at April 1, 1939, but employment then in these industries was not so active as at the date under review.

Electric Light and Power.—A falling-off was shown in this group, in which 103 plants reported 16,574 employees, or seven fewer than at the beginning of March. Employment was brisker than at April 1, 1939; a small loss had also then been indicated.

Electrical Apparatus.—There was moderate improvement in electrical appliance factories, according to the 126 co-operating firms, who had 19,352 persons on their payrolls, compared with 18,959 in their last report. A slight increase had been noted at April 1, 1939, when the index was some eighteen points lower.

Iron and Steel Products.—Statistics were received from 932 manufacturers in this group, whose staffs were enlarged by 2,865 workers to 156,050 at the beginning of April. There were gains in the boiler, engine and tank, machinery, agricultural implement, automobile, shipbuilding and many other divisions; crude, rolled and forged products, heating appliance and foundries and machine shops, however, released some employees. Considerably heightened activity was shown in Quebec, Ontario and British Columbia, while there was a smaller gain in Manitoba, with a similar decline in the Maritime Provinces. Moderate additions to the personnel had been recorded in the same period of last year. The index number then was much lower than that of 118·9 at April 1, 1940; this was the highest figure in the decade.

Non-ferrous Metal Products.—Returns tabulated from 196 manufacturers in this group showed that they employed 27,241 persons, as against 26,915 at March 1. There were increases in the smelting and refining, aluminum product and other divisions. The improvement was chiefly in Ontario. Employment was in much greater volume than at the beginning of April in 1939. An advance had then also been indicated.

Mineral Products.—Expansion was shown in these industries at the beginning of April, according to data received from 99 establishments, in which 12,884 persons were employed, or 240 more than in the preceding month. The level of employment in this group was higher than in the corresponding period of last year, when a slight loss had been shown.

Logging

Continued and larger losses of a seasonal character were reported in logging camps, 440 of which reduced their payrolls from 52,753

men at March 1, to 26,490 at the date under review; the number laid-off was above the average, according to the experience of preceding years of the record. The most extensive curtailment at the beginning of April was in Quebec and Ontario, but the movement was also downward in the Maritime and Prairie Provinces. In British Columbia, on the other hand, slight improvement was noted. The seasonal contractions reported at the same date of last year had involved the release of a much smaller number of workers, but the index then was many points lower than at April 1, 1940, when it stood at 90·0.

Mining

Coal.—As is customary at the beginning of April, there was a falling-off in employment in coal-mines during the period being reviewed; this mainly occurred in the Prairie coal fields, but there were also small losses in the Maritime Provinces and British Columbia. Data were received from 107 operators, whose staffs included 24,617 employees, as against 25,838 in their last report. Activity was slightly greater than in the spring of last year, when larger declines had been reported.

Metallic Ores.—Returns were received from 209 firms in this group, employing 43,626 workers, or practically the same number as at the beginning of March. A decrease had been indicated at the same date in 1939, and the index then stood at 333·6, compared with 350·2 at the first of April in the present year.

Non-metallic Minerals, other than Coal.—A slight reduction was reported in the staffs of the 99 firms furnishing data in these industries; they employed 8,352 persons, as compared with 8,390 in the preceding month. An increase had been recorded by the employers furnishing statistics at April 1 of last year, but employment was then at a lower level.

Communication

Information was received from 86 communication companies and branches, employing 22,223 workers, or 267 more than in the preceding month. Telephones showed improvement, but there was a falling-off in employment on telegraphs. A general gain had also been indicated at April 1, 1939; the index was then at 81·2, compared with 83·2 at the latest date.

Transportation

There were moderate declines in employment in the street railway, cartage and storage, steam railway and shipping divisions. Statistics were compiled from 525 employers of 100,477 men and women, as compared with 100,762 at March 1. Of the former number, 28,842 persons belonged in the local transportation, 60,196 in the steam railway and 11,439 in the water transportation group. The tendency at April 1 in preceding years for which data are available has usually been upward, there being, on the average, a small increase at that date; the movement at the beginning of April, 1939, however, had also been unfavourable, the losses then recorded having been on a larger scale. The index at the date under review was 82·8, or slightly higher than that of 79·3 at April 1 of last year.

Construction and Maintenance

Building.—Statements were compiled from 833 building contractors, with 19,612 persons in their employ, or 638 more than in their last report. The tendency was upward in Nova Scotia, Ontario, Manitoba, Alberta and British Columbia, but elsewhere was rather unfavourable. No general change had been indicated at April 1, 1939; the index was then slightly lower.

Highway.—Additions to staffs were reported on highway construction and maintenance; 355 contractors employed 30,012 workers, as compared with 25,794 in the preceding month. Nova Scotia, Quebec, Ontario and British Columbia recorded heightened activity, the gains in Quebec and Ontario being substantial. In 1939, the improvement in April over March had not been so pronounced, but the number then engaged in this work was decidedly larger than in the period under review.

Railway.—There was moderate curtailment in employment in the construction departments of the railways in the Maritime and Prairie Provinces and Ontario; in Quebec and British Columbia, on the other hand, heightened activity was indicated. The working forces of the 29 co-operating contractors and divisional superintendents included 22,496 persons, whereas in the preceding month they had 22,314 employees. The index number was fractionally higher than in the spring of 1939, a decline on the whole having been recorded at April 1 of last year.

Services

The service group showed improvement, according to 594 firms with 29,504 workers, or 180 more than in the preceding month. Laundries and dry-cleaning establishments were decidedly busier, but there was a reduction in hotels and restaurants. On the whole, the increase reported at the beginning of April of last year had been more marked; nevertheless, employment was then in rather less volume than at the date under review.

Trade

There was a substantial seasonal increase in the aggregate forces of the 2,084 co-operating wholesale and retail establishments which employed 132,674 workers at April 1, as compared with 130,152 at the beginning of March. The advance occurred mainly in the retail division, but wholesale houses were also busier. All five economic areas shared in the upward movement. A smaller gain had been indicated in trade as a whole at the same date a year ago, when the index of employment was rather lower, standing at 131·1, compared with 137·6 at the beginning of April, 1940.

Tables

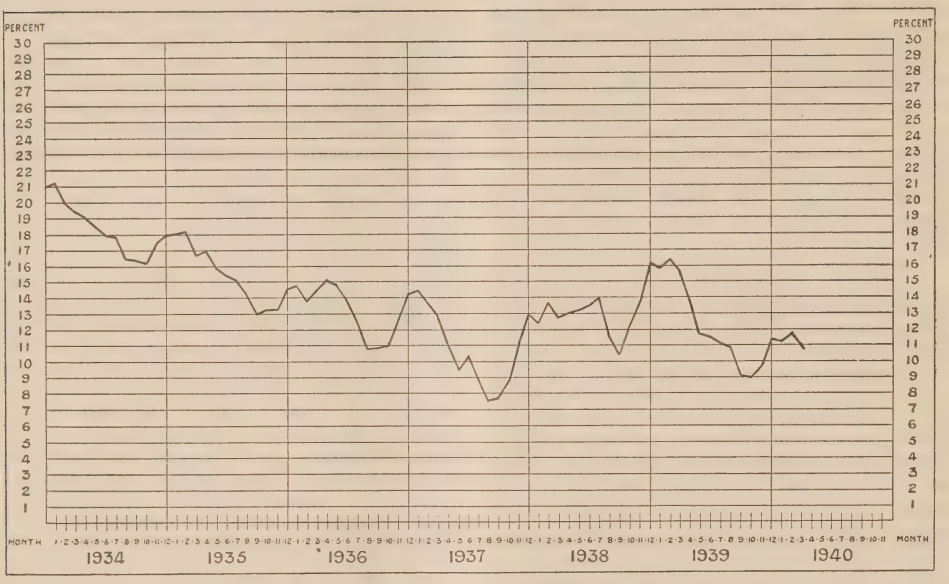
Index numbers of employment by economic areas, and industries, respectively, are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of March, 1940

Unemployment, as used in the following report, has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle on account of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a slight rise in the level of activity for local trade union members at the close of March from the preceding month, unemployment standing at 10·8 per cent in comparison with a percentage of 11·7 in February. The percentage for the month under review was based on the returns compiled from 1,982 labour organizations comprising a membership of 248,607 persons, 26,748 of whom were out of work on the last day of the month. The situation was considerably improved from March a year ago when 15·7 per cent of unemployed members was reported. Advances in work afforded from February, of moderate degree, were reflected by Manitoba and British Columbia unions, the gains in the former province being more particularly pronounced in the garment trades, while in the latter, the navigation division, the iron and steel trades, and the fishing industry all contributed to the total expansion noted in that province. In Quebec and Saskatchewan increases in employment on a small scale occurred, while a fractionally upward tendency only was apparent among Ontario, Nova Scotia and New Brunswick members. Due to the off-season in coal mining activities in Alberta, the percentage of idleness in that province took a rather sharp upward turn. All provinces participated in the more favourable employment movement apparent from March last year, British Columbia, Ontario and New Brunswick unions showing important increases in available work while advances of more moderate proportions were indicated from Manitoba, Quebec and Nova Scotia. In Saskatchewan and Alberta conditions were but slightly improved.

Each month the records of unemployment in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. Contrasted with the returns for February, Winnipeg, Toronto and Vancouver unions reflected fair sized increases in work afforded during March and slight gains were evident among Montreal, Saint John and Regina unions. Edmonton members, however, showed a rather noteworthy falling off in available employment and minor contractions were reported from Halifax. In contrast with the returns for March a year ago, Vancouver members were considerably busier during the period under survey and appreciable betterment in conditions was manifest by Saint John, Toronto and Winnipeg members. In Halifax, Montreal and Edmonton, the advances noted were of more moderate degree. Regina was the only city to report a lowering in the volume of activity from March, 1939, though the change was slight.



The chart which appears with this article shows the trend of unemployment by months from January, 1934, to date. It will be noticed that the curve during January this year remained on approximately the same level as at the close of 1939. The February trend, however, was upward from that of January indicative of a lessening in employment though the variation from January was but nominal. During March the curve tended in a more favourable direction from February, the projection being slightly downward. At the close of March, however, the volume of activity, as manifest by the curve, showed marked improvement from the corresponding month of last year.

Workers in the manufacturing industries were slightly better engaged during March

than the preceding month according to the returns compiled from 585 local unions with a membership numbering 95,433 persons. Of these 6,538 or 6·9 per cent were idle on the last day of the month contrasted with 8·9 per cent of unemployment in February. Hat, cap and glove workers were decidedly more active than in February and moderately better conditions prevailed for garment, and textile and carpet workers. The volume of employment accorded iron and steel, wood and fur workers, general labourers, printing tradesmen, paper makers and metal polishers was slightly in advance of that registered in the previous month. Rubber and glass workers who, however, formed but a small share of the noted by metal polishers, jewelry and brewery workers, and paper makers. Lesser gains were reported by hat, cap and glove, wood, and cigar and tobacco workers and bakers and confectioners. On the contrary, fur workers suffered severe losses in employment afforded and among rubber workers and electric current employees pronounced contractions were apparent. A considerably lower level of activity was manifest also, by general labourers and gas workers, and minor declines were registered by meat cutters and butchers, and printing tradesmen.

Due to seasonal quietness in coal mining activities in Alberta during March, the situation in that industry, as a whole, showed a

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

total membership in the manufacturing industries, showed heavy increases in unemployment and rather noteworthy recessions were apparent among electric current employees. The situation also declined slightly for gas, leather, brewery, and cigar and tobacco workers, meat cutters and butchers, and bakers and confectioners. Among jewelry workers the same level of activity was maintained as in February. Much better conditions obtained in the manufacturing industries during March than in the corresponding month of 1939 when 13·3 per cent of inactivity was recorded. In this comparison extensive employment advancement was reflected in the iron and steel, textile and carpet, and garment trades and among leather and glass workers, while increases on a substantial scale also were noteworthy decline from February. Reporting for March were 57 organizations of coal miners with 21,438 members, 2,238 or 10·4 per cent of whom were unemployed in comparison with a percentage of 5·0 in February. Conditions were, however, somewhat better than in March a year ago when 12·7 per cent of the members reported were idle. In Nova Scotia and British Columbia there was little change in the volume of work afforded during March from the preceding month though the tendency was in a favourable direction. From Alberta, however, the recessions noted were quite severe. Both the eastern and western coal fields contributed to the employment advancement reflected from March, 1939. British Columbia unions especially showing noteworthy improvement while the gains recorded in Nova

Scotia and Alberta were rather slight. In New Brunswick all members were reported busy in the three months used for comparative purposes.

The building and construction trades which have shown steadily diminishing employment since the close of October, due in large measure to the usual between-season quietness in these trades indicated a slightly better situation during March. For this month reports were forwarded by 224 local trade unions involving a membership of 25,151 persons, 9,178 or 36·5 per cent of whom were out of work at the end of the month in contrast with a percentage of 38·2 in February. A moderate rise in work afforded, however, was manifest from March of last year when unemployment stood at 40·2 per cent. Painters, decorators and paperhangers were much better employed during March than in the previous month and gains of considerable importance were registered by tile layers, lathers and roofers, bricklayers, masons and plasterers, hod carriers and building labourers, and bridge and structural iron workers. Granite and stonecutters reflected but slight employment advancement. On the other hand, plumbers and steamfitters showed marked curtailment in activity from February and moderate losses were apparent among carpenters and joiners, and electrical workers. The percentage of idleness for steam shovelmen remained unchanged from that of February. When a comparison is made with the returns for March, 1939, tile layers, lathers and roofers, bridge and structural iron workers, and electrical workers were decidedly busier during the month reviewed, and employment for carpenters and joiners, and plumbers and steamfitters was maintained also, at a considerably higher level. Gains of lesser degree were evident among painters, decorators and paperhangers, and hod carriers and building labourers. A distinctly unfavourable situation, however, was reflected by granite and stonecutters when compared with the returns for March, 1939. Losses in employment on a much smaller scale, though still rather noteworthy, were indicated by steam shovelmen and activity for bricklayers, masons and plasterers declined slightly.

In the transportation industries during March, an upward movement of employment was manifest from both the previous month and March last year, the 844 labour organizations making returns with 70,823 members showing that 6,449 or 9·1 per cent were without work on the last day of the month in contrast with percentages of 10·2 in February and 13·2 in March, 1939. Steam railway employees, whose returns constituted over 80 per cent of the entire group membership reported, showed a fractional gain in activity from February while the improvement manifest over March last year was of moderate proportions. The navigation division reflected decided betterment in both comparisons, the gains over March a year ago being particularly extensive. Street and electric railway employees reported a high level of activity during March and a nominally better tendency was noted from both the preceding month and March, 1939. Among teamsters and chauffers, there was a drop in employment from February of less than one per cent, though the curtailment from March last year was rather substantial.

Adequate work was provided for all retail shop clerks reported during March compared with 0·5 per cent of inactivity in February and with a percentage of only 0·1 in March last year. For the month under review reports were received from 6 associations of these workers with a total of 1,822 members.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929.....	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	5·7

Forwarding reports for March were 82 associations of civic employees with a combined membership of 10,274 persons, 291 or 2·8 per cent of whom were without employment on the last day of the month in contrast with percentages of 1·3 in February and 2·2 in March, 1939.

The level of activity in the miscellaneous group of trades during March remained identical with that of the preceding month, the 141 organizations reporting with a membership involving 10,916 persons showing that 457 or 4·2 per cent were idle, the same percentage as was recorded in February. Fluctuations, however, occurred in the various groups of trades, theatre and stage employees, and stationary engineers and firemen indicating fractional gains in activity which were exactly counteracted by the minor declines apparent among barbers, hotel and restaurant employees, and unclassified workers. Heightened activity, of noteworthy degree, was manifest in the miscellaneous group of trades from March last year when 9·8 per cent of idleness was recorded. In this comparison unclassified workers were mainly responsible for the group advancement, though moderate expansion was evident among theatre and stage employees, and stationary engineers and firemen. Increases in work afforded on a small scale were also registered by hotel and restaurant employees. Barbers alone, showed some slight employment curtailment.

The 5 unions of fishermen from which reports were compiled at the close of March embracing a membership of 2,310 persons showed that 100 or 4·3 per cent were without work contrasted with a percentage of 10·4 in February. Conditions for these workers were decidedly more active than in March, 1939, when 36·7 per cent of unemployed members were reported.

The employment tendency for lumber workers and loggers was slightly more favourable during March than in February, though large scale advances were apparent from March, 1939. This was evident from the reports received from 7 associations of these workers with a membership aggregate of 2,634 persons, 389 of whom were unemployed on the last day of the month, a percentage of 14·8 as compared with percentages of 15·9 in February and 31·5 in March last year.

Table I shows by provinces the percentage of members who were, on an average, unemployed each year from 1929 to 1939 inclusive and also the percentages of unemployment for March of each year from 1929 to 1937 inclusive and for each month from March, 1938, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for March, 1940

The volume of business transacted by the offices of the Employment Service of Canada during the month of March, 1940, as represented by the average daily placements effected, showed a gain of more than 5 per cent over that of the previous month, but a loss of nearly 9 per cent from the corresponding period a year ago. Increases over February, none of which was very pronounced, were recorded in services, construction and maintenance, farming, trade, manufacturing and transportation, the largest being in services and the smallest, nominal only, in transportation. Logging registered a decided decrease, but only a minor loss was shown in mining. In comparison with March last year an exceptionally heavy decline was reported in construction and maintenance and a fairly large one in farming; those in services and logging were of smaller proportions and that in mining slight. Increases were recorded in manufacturing, trade and transportation, the largest being in the first named group, but none was sufficient to offset in any marked degree the losses recorded in other divisions.

The accompanying chart shows the trend of employment since January, 1938, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. As may be seen from the graph, the curves both of vacancies and placements in relation to applications showed an upward trend throughout the month, but at the end of March the levels attained were still several points below those recorded at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 40·6 during the first half and 43·2 during the second half of March, 1940, in contrast with ratios of 47·1 and 47·2 during the corresponding periods of 1939. The ratios of placements to each 100 applications during the periods under review were 37·1 and 39·4 as compared with 44·9 and 44·8 during the corresponding month of 1939.

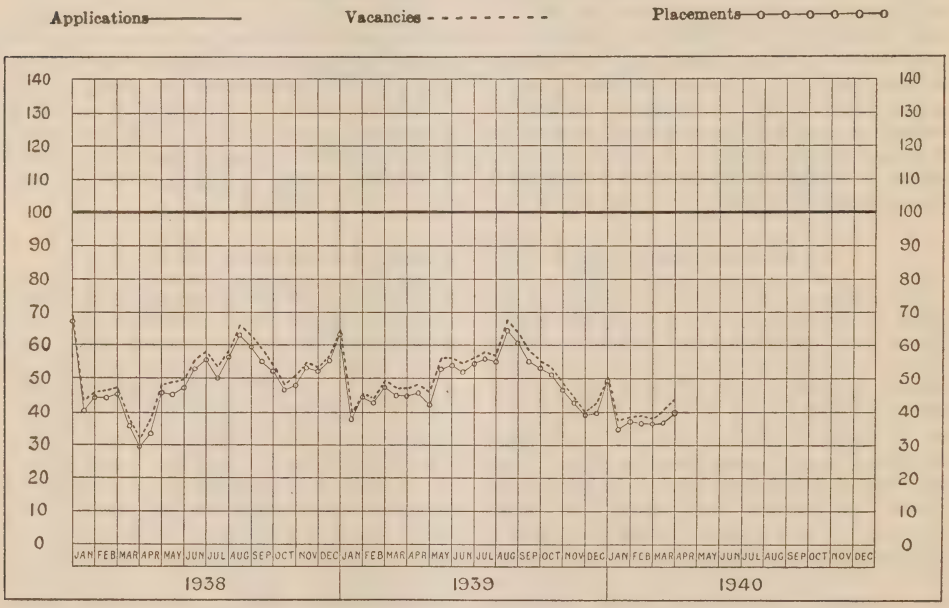
The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during March, 1940, was 1,096, as compared with a daily average of 1,152 during the corresponding month a year ago and with 1,006 recorded daily in February, 1940.

The average number of applications for employment received daily by the offices of

the Service during the month under review was 2,623, in comparison with 2,443 in March, 1939. Applications for work during the preceding month of 1940 averaged 2,590 daily.

The average number of placements made daily by the offices of the Service during March, 1940, was 1,000, of which 607 were in regular employment and 393 in work of one week's duration or less, as compared with a total daily average of 949 during the preceding month. Placements in March a year ago averaged 1,097 daily, consisting of 582 in regular and 515 in casual employment.

During the month of March, 1940, the offices of the Service referred 25,299 persons to vacancies and effected a total of 23,978 placements. Of these, the placements in regular employment were 14,545, of which 9,745 were of men and 4,800 of women, while placements in casual work totalled 9,433. The number of vacancies reported by employers was 14,717 for men and 11,569 for women, a total of 26,286, while applications for work numbered 62,931, of which 46,070 were from men and 16,861 from women. Reports for February, 1940, showed 25,126 positions available, 64,735 applications made and 23,713 placements effected, while in March, 1939, there were recorded 31,086 vacancies, 65,948 applications for work and 29,604 placements in regular and casual employment.



The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1930, to date:

Year	Placements		
	Regular	Casual	Totals
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940 (3 months)	44,249	28,842	73,091

NOVA SCOTIA

During the month of March, 1940, orders received at Employment Offices in Nova Scotia called for over 9 per cent fewer workers than in the preceding month, but nearly 46 per cent more than during the corresponding month of last year. There was a decrease in placements of over 13 per cent when compared with February, but an increase of 46 per cent in comparison with March, 1939. Except for a small decline in farming, all industrial divisions showed increases in placements over March of last year. The most important gain was in construction and maintenance, but moderate improvement was also reported in services, trade, manufacturing and logging. Placements by industrial divisions included manufacturing 40; logging 67; construction and maintenance 671; trade 53 and services 682 of which 556 were of household workers. There were 617 men and 124 women placed in regular employment.

* 121 Placements effected by offices now closed.

NEW BRUNSWICK

Opportunities for employment, as indicated by orders received at Employment Offices in New Brunswick during March, called for approximately the same number of workers as in the preceding month, but nearly 13 per cent more than during the corresponding month of last year. There was a decline of over one per cent in placements when compared with February, but an increase of over 11 per cent in comparison with March, 1939. The increase in placements over March of last year was due to moderate gains in construction and maintenance, services and trade, as minor changes only were reported in all other industrial divisions. Placements under construction and maintenance numbered 463 and in services 614. Of the latter 504 were of household workers. During the month 79 men and 94 women were placed in regular employment.

QUEBEC

Orders received at Employment Offices in the Province of Quebec during March, called for nearly 15 per cent more workers than in the preceding month and over 5 per cent more than during the corresponding month of last year. There was an increase in placements of over 9 per cent when compared with February, but a decrease of over 2 per cent when compared with March, 1939. The decline in placements from a year ago was due to a substantial reduction in construction and maintenance. This loss was largely offset by increases in logging, services, manufacturing and trade. The changes in all other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were manufacturing 374; logging 524; construction and maintenance 1,768; trade 231 and services 3,255, of which 2,978 were of household workers. Placements in regular employment numbered 2,859 of men and 1,881 of women.

ONTARIO

There was a decrease of over one per cent in the number of positions offered through Employment Offices in Ontario during March, when compared with the preceding month and of nearly 24 per cent in comparison with the corresponding month of last year. There was a decline also in placements of nearly 2 per cent when compared with February and of over 25 per cent in comparison with March, 1939. With the exception of a fairly large increase in manufacturing and a minor gain in logging, all industrial divisions showed declines in placements from March of last year. The most important decrease was in construction and maintenance, but there were also fairly large reductions in services and farming. Placements by industrial divisions included manufacturing 909; logging 153; farming 688; construction and maintenance 3,113; trade 244 and services 3,092, of which 2,228 were of household workers. During the month 3,007 men and 1,354 women were placed in regular employment.

MANITOBA

During the month of March, 1940, orders received at Employment Offices in Manitoba called for nearly 10 per cent fewer workers than in the preceding month, but nearly 3 per cent more than during the corresponding month of last year. There was a decrease in placements of over 14 per cent when compared with February, but an increase of nearly 2 per cent in comparison with March, 1939. Although there was a small gain only in placements for the province as a whole, when compared with March of last year, considerable change was indicated in certain industrial divisions. A large gain in construction and maintenance was almost entirely offset by a decline in farming. There was a moderate loss in services and small increases in logging and manufacturing. Placements by industrial divisions included manufacturing 62; logging 110; farming 354; construction and maintenance 494 and services 668, of which 585 were of household workers. During the month 990 men and 344 women were placed in regular employment.

SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during March, were nearly 24 per cent better than in the preceding month, but over 15 per cent less favourable than during the corresponding month of last year. There was an increase of over 17 per cent in placements when compared with February, but a decline of over 15 per cent in comparison with March, 1939. The decline in placements from March a year ago was almost entirely due to a decrease in farming, as a moderate loss in services was offset by a gain in transportation and the changes in all other groups were quite small. Industrial divisions in which most of the placements were effected during the month were farming 293; construction and maintenance 54 and services 523, of which 373 were of household workers. Placements in regular employment numbered 361 of men and 313 of women.

ALBERTA

There was a decrease of nearly 3 per cent in the number of orders received at Employment Offices in Alberta during March, when compared with the preceding month and of over one per cent in comparison with the corresponding month of last year. There was a decline also in placements of over 10 per cent in comparison with February, and of nearly 7 per cent when compared with March, 1939. Placements in logging were considerably higher than during March of last year and there was a small increase in services, but these gains were more than offset by declines in all other groups, the most important of

which were in construction and maintenance, and farming. Placements by industrial divisions included logging 203; farming 462; construction and maintenance 123 and services 489, of which 392 were of household workers. There were 723 men and 331 women placed in regular employment.

British Columbia

The demand for workers, as indicated by orders received at Employment Offices in British Columbia during March, was over 19 per cent better than in the preceding month, but over 52 per cent below that of the corresponding month of last year. Placements were over 18 per cent higher than in February, but nearly 53 per cent less than during March, 1939. The substantial decrease in placements from March of last year was largely due to a heavy reduction under construction and maintenance and a fairly important loss in logging. These declines were offset to a small extent by gains in services, manufacturing and trade. The changes in all other groups were unimportant. Placements by industrial divisions included manufacturing 125; logging 101; farming 122; construction and maintenance 1,318; trade 95 and services 930, of which 673 were of household workers. During the month 1,109 men and 359 women were placed in regular employment.

Movement of Labour

During the month of March, 1940, the offices of the Employment Service of Canada made 14,545 placements in regular employment, 5,992 of which were of persons for whom the employment found was outside the immediate district of the offices at which they were registered. Of the latter, 128 were granted the Employment Service reduced transportation rate, 116 going to centres within the same province as the despatching office and 12 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Ontario offices issued 91 certificates for reduced transportation during March, all to provincial points. Securing certificates at Port Arthur 80 bush workers, one waitress, one hotel worker and one domestic journeyed to centres within the region administered by that city office. For employment within their respective zones also, the Fort William office despatched 2 bushmen and the Sudbury office one bushman. Travelling from Windsor one blacksmith and one marine fitter went to Barrie and one machinist to Peterborough. The North Bay office was instrumental in the transfer of one painter to Timmins and one boilermaker to Barrie. In Manitoba during March 22 persons benefited by the Employment Service reduced transportation rate, 10 of whom were bound for provincial situations and 12 outside the province. Provincially the transfers were within the Winnipeg zone and included 8 farm hands, one farm domestic and one steam engineer, all of whom were despatched by the Winnipeg city office. The persons travelling outside the province also proceeded from Winnipeg, of whom 8 mine workers and 2 cooks were destined to the Port Arthur zone and one farm hand each to Estevan and Weyburn. Alberta transfers at the reduced rate during March were entirely to provincial centres and numbered 11. From Edmonton 2 mine labourers, one farm hand, one truck driver, one engineer, one blacksmith, one machinist and one domestic went to employment at points within the Edmonton zone, while the Calgary office transferred 2 farm hands within its own zone and one farm hand to Drumheller. Reduced rate certificates were granted in British Columbia during March to 4 persons going to provincial employment. The Vancouver office was responsible for the transfer of 2 hotel cooks within its own zone and one engineer to Kamloops. From Prince Rupert one mine cook was conveyed to a point within the same zone.

Of the 128 persons who travelled at the Employment Service reduced rate during March 34 were carried by the Canadian National Railways, 91 by the Canadian Pacific Railway, 2 by the Pacific Great Eastern Railway and one by the Temiskaming and Northern Ontario Railway.

(4) Building Permits Issued in Canada During March, 1940

The March report of building permits issued by all municipalities in Canada includes returns from 150 municipalities. Of these, 125 had details to report, remaining 25 advised they had issued no permits and no response of any kind was received from 52 municipalities.

The building permits issued by 58 cities in March, 1940, represented construction work valued at $4,464,780, as compared with $3,015,089 in February, 1940, and $3,359,661 in March, 1939.

The total value of permits issued during the first three months of 1940, aggregated $12,442,014, and the value for the 58 municipalities was $9,891,819. The corresponding value for the 58 municipalities in the first three months of 1939 was $7,092,967.

Referring to Table 1, it will be observed that new construction of all types accounted for 67·3 per cent of the total value. The percentage of new residential construction was 44·1.

TABLE 1.—VALUES AND CLASSIFICATIONS OF BUILDING PERMITS ISSUED IN CANADA, BY PROVINCES, MARCH, 1940

Classification of Permits	CANADA	Provinces

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JANUARY TO MARCH, 1940

BUSINESS transacted by the offices of the Employment Service of Canada during the quarter January to March, 1940, showed a decline from that effected during the corresponding quarter of 1939, there being a decrease of 15 per cent in vacancies offered and of nearly 18 per cent in placements effected. Construction and maintenance, farming and logging showed losses in both cases, by far the largest being in construction and maintenance, where placements from last year in highway construction were much reduced. Manufacturing, services, trade, mining and transportation recorded gains, the two highest being in manufacturing and services, but those in mining and transportation were nominal only. Provincially, Ontario, Manitoba, Saskatchewan and British Columbia showed declines both in vacancies and placements, those in British Columbia and Ontario being particularly marked, while the Maritimes, Quebec and Alberta reported increases, the gains in the latter two provinces, however, being quite small.

From the chart on page 476 which accompanies the article on the work of the Employment Offices for the month of March, 1940, it will be seen that the curves of vacancies and placements in relation to applications followed an upward course throughout the quarter, except during February, when the trend of placements was slightly downward during the entire month and that of vacancies during the latter half only. At the end of the quarter, however, the levels of both vacancies and placements in relation to applications were several points below those reached at the close of the corresponding period a year ago. During the period January to March, 1940, there was a ratio of 39·5 vacancies and 36·9 placements for each 100 applications for employment, as compared with 45·3 vacancies and 43·5 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 1,045, of applications registered, 2,642, and of placements effected, 975, in contrast with a daily average of 1,214 vacancies, 2,681 applications and 1,166 placements in regular and casual employment during the first quarter of 1939.

During the three months January to March, 1940, the offices of the Employment Service reported that they had made 77,636 references of persons to positions and had effected a total of 73,091 placements, of which 44,249 were in regular employment and 28,842 in casual work. Of the placements in regular employment 29,228 were of men and 15,021 of women, while casual work was found for 15,712 men and

13,130 women. A comparison with the same period of 1939 showed that 88,570 placements were then made, of which 49,056 were in regular employment and 39,514 in casual work. Applications for employment during the period under review were received from 143,074 men and 55,058 women, a total of 198,132, in contrast with a registration of 203,712 during the same period in 1939. Employers notified the Service during the first quarter of 1940 of 78,347 positions, of which 45,421 were for men and 32,926 for women, as compared with 92,251 opportunities for work offered during the corresponding quarter of 1939.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of March, 1940.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF APRIL, 1940

Reports of the Superintendents of the Employment Service

THE employment situation at the end of April, 1940, was reported by the superintendents of the Employment Service of Canada to be as follows:—

In the Maritime Provinces spring plowing, although retarded considerably by adverse weather, had been started and a few farm hands were placed. Activity in logging was confined chiefly to river driving and to sawing. Lumber surveyors reported snow plentiful in the thick woods and logs and pit props were being hauled to the main highways. Fair quantities of gaspereaux, cod, haddock, halibut and scallops were taken, but shore fishing was hampered by drift ice. Coal mines in the New Glasgow area operated from three to six days per week, while those in Cape Breton and vicinity worked from two and a half to six days. Nearly all manufacturing plants were working at full capacity, especially those making confectionery and foodstuffs; a reduction in staff, however, was reported in the steel works at New Glasgow. The contract for new wharves at Halifax had been awarded and operations started. There was also a good demand for carpenters on National Defence projects at Saint John. Little other new construction had begun, but that under way was progressing favourably. Main highways were still closed to heavy traffic and roads in rural districts were in poor condition, but passenger traffic, by rail, was fair and, by bus and car, gradually increasing. Transportation of freight was active, many freighters discharging and taking on large cargoes for overseas. Navigation also had opened on the Saint John River. Trade, both wholesale and retail, showed a slight increase, but collections were only fair. Requests for women for domestic service were more numerous, but capable maids were scarce. Char workers also were in demand.

Requests for farm help in the Province of Quebec were considerably more numerous. Spring operations in logging were gradually getting under way and pulpwood cutting and peeling had brought renewed activity to several localities. Many men, too, had been called for river driving. Manufacturing centres reported as follows:—Chicoutimi, Hull and Three Rivers—Factories and plants operating at full capacity; Matane—Additional skilled labour had been called for sawmills and small factories; Montreal—Iron and steel, textile, leather and paint factories very busy; Sherbrooke—Textiles reported increased staffs, with night work in the silk plants; the iron works also were hiring more skilled workers for the making of machinery used in war munitions; Thetford Mines—Renewed activity in sash and door factories. Building construction was rather slack at Montreal, Thetford Mines, Three Rivers and Val d'Or but, elsewhere, many small construction jobs were under way and highway construction and maintenance also provided work for a large number of men. Trade was fair. The call for household domestics also remained steady.

There was an increased demand for farm hands in Ontario, particularly for capable single men, with wages offered somewhat higher than those paid last year. While lakes were still locked in ice, sufficient open water existed to allow advantageously placed sawmills to begin their seasonal cut. One mill, for which help had been recruited, advised that weather conditions had delayed opening. River driving had not yet started, but calls had been received for men for this type of work, as well as for camp builders, although preference was to be given to former experienced employees. Mining, except at Timmins, was very quiet, and, at Sudbury, nickle mines, owing to the invasion of foreign territory, where their refinery is located, were curtailing production by one-third, which will necessitate the laying off of approximately twenty per cent of the number usually employed. They plan, however, to increase plant facilities at Port Colborne. Iron, steel and textile establishments continued to maintain good production and staff levels. Very few highly skilled workers are now unemployed and those who are semi-skilled are being steadily absorbed. In many centres, applicants who have hitherto been considered too old, are being re-employed. Other lines, including automobile accessories, box factories, printing plants, paper mills, tanneries and shoe establishments reported improvement. With the advent of warmer weather, building construction showed advancement; factory additions, airport construction, repairs, alterations and new dwellings taking care of practically all experienced bricklayers, carpenters, etc. Highway construction was also opening up and more men were required for this, as well as for maintenance work. Some extra gangs for the railways had likewise been sent out. Navigation was in full swing and at ports on the Great Lakes boats were leaving and arriving daily, an average of fifty boats per day passing through the

American and Canadian locks at Sault Ste. Marie, while the canal at Welland also was busy. In the Women's Department there was an acute shortage of domestic help, with wages advancing, as opportunities for women in factories and in other lines of work appeared. A large number of calls had been registered for summer help for hotels, golf clubs and restaurants, but it was difficult to interest applicants in out-of-town vacancies. Spring housecleaning had increased the hours of employment available for char workers and many women had been placed.

Weather in the Prairie Provinces was more favourable for seeding and this increased the call for farm hands, especially in Saskatchewan. In Alberta, with many roads still impassable, the demand was not so active, although a number of sheep men were requested for the lambing season. Logging was quiet at Winnipeg, but busier at Edmonton. Mines also were closing down, with summer crews only being retained. Many miners, however, were registering for employment in other groups of industry. Manufacturing showed improvement at Winnipeg and Lethbridge, but, elsewhere, was slacker. More activity was taking place in building, as a considerable amount of repair work was in progress, as well as some construction undertaken by the Department of National Defence. A few men, likewise, had been placed on extra gangs for the railways. Trade was fair. As in the other provinces, a scarcity of household help prevailed, it being particularly difficult to fill vacancies in outlying points.

Farming was quiet in British Columbia. Orchardists at Penticton were finishing their second spraying. Mining also was slacker, although at Kamloops a one-hundred ton mill had started production. Logging, too, recorded no new activity, lack of ships still causing great concern to the sawmills. Troll fishermen at Prince Rupert were leaving for outside camps and halibut landings were heavy. Construction was better, placements being made on Defence and airport work; some road work was also available for unskilled labour. Drydocks and shipyards, as well as the waterfront, at Prince Rupert were busy, but quiet at New Westminster and Victoria. Trade was dull. A shortage of experienced applicants for household service was reported in the Women's division, but placements of charwomen for spring housecleaning were numerous.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, April, 1940, summarized the employment situation as follows:—

There was a very substantial improvement in employment between February 12, and March 11. Between these two dates the number of unemployed persons on the registers of Employment Exchanges in Great Britain fell by 382,887. A large part of the increase in employment was due to the improvement in weather conditions, but in addition there was a general increase in industrial activity from other causes, and there were reductions in the numbers unemployed in nearly all industries.

As compared with March 13, 1939, the number unemployed at March 11, 1940, in Great Britain was lower by 605,716. For Great Britain and Northern Ireland there was a total of 1,193,259 wholly unemployed (1,080,936) or temporarily stopped (112,323) on the registers at March 11, a reduction of 392,625 compared with February 12, 1940 and a reduction of 620,728 compared with the figures for March 13, 1939.

The improvement in employment was most marked in building, public works contracting, and agriculture and horticulture. The principal other industries in which employment increased included coal mining, brick making, stone quarrying, iron and steel and metal goods manufacture, engineering, ship building and repairing, road transport, tailoring, printing and bookbinding, the distributive trades, and hotel and boarding house service.

The numbers unemployed showed marked decreases in all divisions. The decreases were numerically greatest in the North-Western, Midlands, London and North-Eastern Divisions; there were also proportionately large decreases in the North-Midlands, Eastern and Southern Divisions.

The number of insured persons, aged 16 to 64, recorded as unemployed in Great Britain and Northern Ireland at March 11, 1940, represented 7·7 per cent of the total number of insured persons, aged 16 to 64, at July, 1939, as compared with 10·3 per cent, at February 12, 1940. At March 13, 1939, the percentage unemployed was 12·0. For persons under the general scheme the corresponding percentages were 7·8 at March 11, 1940, 10·2 at February 12, 1940, and 12·2 at March 13, 1939. For persons within the agricultural scheme the percentages were 7·0, 11·1 and 7·9 respectively.

United States

According to an official press release issued on April 26 by Miss Frances Perkins, United States Secretary of Labor, total non-agricultural employment increased by 165,000 from February to March although the increase was somewhat smaller than usual because of reductions in factory employment. Compared with a year ago, there were nearly 1,000,000 more people at work, exclusive of those engaged in emergency projects financed by government agencies.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

The principal employment gain in March was in retail stores, which hired additional workers for the Easter trade.

The lay-off of an additional 55,000 wage earners in manufacturing from mid-February to mid-March was reported as unusual for this time of year and reflected primarily further curtailment of operations in steel and textile mills. Ordinarily there is an increase of more than 1 per cent, or nearly 90,000 wage earners, in March. Although employment declined, pay rolls for manufacturing as a whole were slightly higher (+0·2 per cent), as a number of industries operated on longer schedules in March than in early February.

Principal declines in employment in the durable-goods industries were in steel mills, where a further 5 per cent reduction affected 24,000 men, and in foundries and machine shops and hardware manufacturing. The textile and hosiery industries reduced working forces sharply. In woollen mills 24,000 employees were laid off, bringing employment to the lowest level since the summer of 1938. Seasonal declines were reported in meat-packing and leather manufactures.

There were further gains in industries stimulated directly or indirectly by governmental and war-time orders. Aircraft and machine tools reported record-high employment and shipbuilding was at the highest level since 1921. Automobile plants and glass factories also took on more men in March. In the clothing industries reported gains were somewhat smaller than usual, while in other seasonally active industries, such as millinery, beverages, ice cream, fertilizers, etc., gains were about average for the season.

Quarries and non-metal mines increased their working forces slightly, and in anthracite mines a small employment gain (0·9 per cent) from February was accompanied by an increase of 18 per cent in pay rolls, reflecting a marked expansion in production from the unusually low levels of early February. In bituminous coal, employment decreased seasonally by 2·1 per cent, while metal mines and oil companies reported little change.

Retail stores added nearly 150,000 workers to their staffs in March to handle Easter and other spring business. Gains were especially large in general merchandise, variety, and apparel stores. In wholesale trade there was little net change in employment.

In private building construction employment rose by about 3 per cent, with gains being reported from all parts of the country. Work on public construction, except P.W.A. projects, also increased slightly.

Railroads reduced employment by 6,700 workers. In other lines of industry, changes for the most part followed the usual seasonal pattern, with only small variations in employment in public utilities.

Regularization of Employment in U.S.A.

"Employment Regularization" is the title of a booklet published recently by the National Association of Manufacturers in the United States, based on a survey made by that organization into the practical problems of employment regularization and the various methods utilized by many of its members to reduce fluctuations in production and employment.

In the booklet an analysis is made of the experiences of 183 of the National Association of Manufacturers' member companies, the report being divided into seven sections. Section three of the report deals with company experiences with employment regularization under the following headings: Significant facts revealed; practical benefits of employment regularization; problems and success vary in different companies; comparison of employment curve with production and sales curves; employment regularization methods and techniques; some handicaps to employment regularization, and conclusion.

In a conclusion to the report it is stated that "it is apparent from the findings presented in this report, which is based on the practical experiences of 183 respondents with different employment stabilization problems, techniques and methods, that a considerable amount of progress has been made by many individual companies in achieving a more stable level of employment."

Copies of the booklet, at 15 cents each, may be obtained on request to the National Association of Manufacturers, 14 W. 49th St., New York, N.Y.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marged "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates than fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;
>
> The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contributions, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental

supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here. Particulars of the contracts which have been awarded recently by various other departments of the Government of Canada, however, appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Public Works

Construction of repairs to Vitre Street elevation, Craig Street Armoury, Montreal, P.Q. Name of contractors, Sutherland Construction Co., Montreal, P.Q. Date of contract, March 8, 1940. Amount of contract, $98,813 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Engineer on steel erection	0 75
Engineer operating steam:	
Single or double drum	0 65
Fireman, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 60
Labourers	0 40
Lathers (metal)	0 75
Mastic floor—	
Layers	0 70
Rubbers and finishers	0 55
Kettlemen	0 55
Labourers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 66
Painters and glaziers	0 66
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Roofers, felt and gravel: patent	0 45
Roofers, sheet metal	0 70
Rodmen—reinforced steel	0 50
Sheet metal workers	0 70
Stonecutters	0 80
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 45
Structural steel workers	0 75
Watchman	0 35
Waxers and polishers (floor)	0 45
Welders and burners on steel erection	0 75

Note.—Working hours must not exceed 8 per day and 44 per week.

Repairing, painting, etc. the hull of Dredge P.W.D. No. 13. Name of contractors, Port Hawkesbury Marine Co., Ltd., Port Hawkesbury, N.S. Date of contract, March 23, 1940. Amount of contract, $8,700. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 58
Blacksmith's helper	0 40
Caulker and chipper	0 58
Carpenter (ship)	0 58
Crane operator	0 48
Driller and reamer	0 45
Labourer	0 35
Painter	0 48
Plater	0 58
Punch and shear men	0 45
Riveter	0 58
Holders-on	0 45
Rivet heater	0 40
Template maker	0 58
Welder (electric)	0 58

Construction of bank protection on the south bank of the North arm of the Fraser River on Lulu and Sea Islands, B.C. Name of contractors, Gilley Bros., Ltd., New Westminster, B.C. Date of contract, April 16, 1940. Amount of contract, approximately $53,080.95. A fair wages schedule was included in the contract as follows:—

	Per month
Tugboat—	
Captain—Class A	$200 00
Captain—Class B	190 00
Captain—Class C	180 00
Engineer—Class A	190 00
Engineer—Class B	180 00
Engineer—Class C	170 00
	Per hour
Fireman	0 56½
Deckhand	0 54
Piledriver derrick—	
Engineer	1 12½
Fireman	0 68¾
Men	1 00
Steam shovel—	
Engineer	1 12½
Craneman	0 90
Fireman	0 74½
Oilers	0 60
Shovel operators (gasoline)	1 12½
Labourers	0 45
Launch operator (work boat)	0 50
Pile driver—	
Foreman	1 25
Engineer	1 12½
Fireman	0 68¾
Bridgeman	1 00
Boomman	1 00
Man	1 00
Watchman	0 45

Completion of improvements on the northerly bank of Woodward's Island, Fraser River, New Westminster District, B.C. Name of contractors, Gilley Bros. Ltd., New Westminster, B.C. Date of contract, April 16, 1940.

Amount of contract, $41,376.74. The preceding fair wages schedule was also included in this contract.

Construction of a heating plant for the new annex laboratories at the National Research Council, Ottawa, Ont. Name of contractors, J. L. Guay & Frere, Ltee., Montreal, P.Q. Date of contract, April 12, 1940. Amount of contract, $139,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Boiler makers	$0 80
Blacksmiths	0 70
Blacksmiths' helpers	0 50
Brick and hollow tile layers	1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 55
Drivers	0 45
Driver—	
Horse and cart	0 60
Team and wagon	0 80
Electricians (inside wiremen)	0 80
Engineers, operating, steam—	
Single or double drums	0 70
Three or more drums	0 80
Engineers on steel erection	0 80
Firemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 55
Insulation workers (cork, asbestos)	0 70
Labourers	0 45
Lathers (metal)	0 70
Machinist	0 70
Machinists' helpers	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters, spray	0 85
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers, felt and gravel: patent	0 50
Roofers, sheet metal	0 85
Sheet metal workers	0 85
Stonecutters	0 80
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 80
Tile setters (ceramic)	1 00
Tile setters (asphalt, mastic)	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40
Waxers and polishers (floor)	0 50
Welders and burners (acetylene or electric)	0 70
Welders and burners on steel erection	0 80

Laying a new bronze 4" pipe water main between Fort Dufferin and Partridge Island, Saint John Harbour, N.B. Name of contractors, St. John Tug Boat Co., Ltd., East Saint John, N.B. Date of contract, April 10, 1940. Amount of contract, approximately, $19,675. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmith's helpers	0 45
Boatman (rowboat)	0 40
Compressor operators (gasoline or electric)	0 50
Drill runners	0 50
	Per day
*Diver	14 00
*Diver's tenders	5 00
	Per hour
Engineer, operating, steam: Single or double drum	0 65
Firemen, stationary	0 45
Labourers	0 40
Motor boat operator	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Pipe fitter (surface, temporary work)	0 55
Pipe layers, caulkers and solderers	0 50
Powderman	0 50
Pumpman	0 50
Plumbers and steamfitters	0 70
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 50
Watchman	0 35
Welders and burners (acetylene or electric)	0 65

* Full day's pay to be allowed whether employed full or part time.

Construction of a fishermen's landing at Steveston, B.C. Name of contractors, Fraser River Pile Driving Co., Ltd., New Westminster, B.C. Date of contract, April 9, 1940. Amount of contract, approximately, $4,807.17. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver—	
Foreman	$1 25
Engineer	1 12½
Men	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Pile driver and derrick—	
Engineers	1 12½
Men	1 00
Firemen	0 68¾
Labourer	0 45
Motor truck driver	0 50
Motor truck driver and truck	1 50

Construction of additions and alterations to the Entomological Laboratory at Fredericton, N.B. Name of contractors, New Brunswick Contractors Ltd., Fredericton, N.B. Date of contract, March 11, 1940. Amount of contract, $13,971 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 55
Brick and hollow tile layers	0 75
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 55

	Per hour
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Electricians (inside wiremen)	0 60
Engineers, operating, steam—

Linen hand towels	Caldwell Linen Mills Ltd., Iroquois, Ont.
Woollen socks	Mercury Mills Ltd., Hamilton, Ont.
Cotton sheets and pillow slips	Dominion Textile Co., Ltd., Montreal, P.Q.

The International Nickel Company of Canada, Limited, employing 18,123 at last year-end (11,745 in Canada) has recently summarized its industrial welfare activities as follows:

"The retirement system for the benefit of employees, which is financed entirely by the company, completed its twelfth year of operation, and 386 pensions and 69 death benefits were paid during 1939. At the year-end the amount of the retirement system liability, as determined by actuarial calculation, was $14,486,968. Against this liability, government bonds in an amount of $14,465,655 were held under control of the Board of Directors.

"The contributory sickness and non-occupational accident insurance plan was continued in effect. Its importance as a welfare measure was again demonstrated, and during the year 4,568 employes participated in the cash benefits stipulated in the plan."

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Metal Products

VANCOUVER (NORTH VANCOUVER), B.C.—A CERTAIN SHIPBUILDING FIRM AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS, LOCAL 138 (PAINTERS).

See below under "Construction: Shipbuilding."

VICTORIA, B.C.—TWO SHIPBUILDING FIRMS AND THE BOILERMAKERS AND IRON SHIPBUILDERS' UNION OF CANADA, LOCAL NO. 1.

See below under "Construction: Shipbuilding."

Construction: Buildings and Structures

TORONTO, ONTARIO.—CONTRACTING PLASTERERS' ASSOCIATION AND THE LATHERS INTERNATIONAL UNION, LOCAL NO. 97.

Agreement to be in effect from March 25, 1940, to March 1, 1941, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 941, with these exceptions:

Minimum hourly wage rates in effect from April 1: $1 per hour for metal furring, tie on work, corner beads, simplex, tri-seal, etc. (an increase of 10 cents per hour). (The rate for nail on work is unchanged at 75 cents per hour.)

There is no longer any provision for transportation and travelling time to be paid by the employer for work out of the city.

TORONTO, ONTARIO.—CONTRACTING PLASTERERS' ASSOCIATION AND THE OPERATIVE PLASTERERS' AND CEMENT FINISHERS' INTERNATIONAL ASSOCIATION, LOCAL NO. 48 (PLASTERERS).

Agreement made following the strike which was reported in the April LABOUR GAZETTE, page 332. Agreement to be in effect from March 25, 1940, to March 1, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1939, page 1061, with these exceptions:

Minimum hourly wage rate for plasterers, in effect from April 1: $1 per hour (an increase of 10 cents per hour over the previous rate).

There is no longer any provision for transportation and travelling time to be paid by the employer for work out of the city.

Construction: Shipbuilding

VANCOUVER (NORTH VANCOUVER), B.C.—A CERTAIN SHIPBUILDING FIRM AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS, LOCAL 138 (PAINTERS).

Agreement to be in effect from April 10, 1940, for the duration of the war and thereafter until completion of any contracts entered into previous to cessation of hostilities.

Only union members to be employed.

Hours: 8 per day, 44 per week for men employed on day work; for those employed on second shift, shift to be 8 hours with ½ hour for lunch, for which 8 hours' pay to be given; for those employed on third shift, shift to be 7½ hours, with a 20 minute lunch period, for which 9 hours' pay allowed. Forty hours to constitute a week's work for second and third shifts.

Overtime: time and one-half for first four hours and double time thereafter. Double time for work on Sundays and nine specified holidays.

Wage rate for painters and decorators: 75 cents per hour, $6 per day. "The above rates to be subject to adjustment quarterly in accordance with the cost of living, and wages to be increased or decreased in an equal percentage to the increase or decrease in cost of living, as ascertained by the Department of Labour of the Provincial Government of British Columbia, it being understood that the cost of living figures as at December 1, 1939, be the basis of this arrangement. It is also understood that the above rates are to be the minimum rates to be paid during the life of the agreement."

Every man to be paid for at least two hours if hired after starting time.

As this firm is located at North Vancouver, men required to work in Vancouver or New Westminster are to have their transportation provided by the employer and a limited amount of travelling time paid for.

VICTORIA, B.C.—TWO SHIPBUILDING FIRMS AND THE BOILERMAKERS AND IRON SHIPBUILDER'S UNION OF CANADA, LOCAL NO. 2.

Agreements to be in effect from April 1, and April 6, 1940, respectively for the duration of the war and thereafter until the completion of any contracts entered into previous to the cessation of hostilities.

No discrimination against any employee belonging to the union. Only union members to be employed, if available.

Hours: 8 per day, 44 per week for day work. In shift work: second shift, when necessary, to work 8 hours with ½ hour off for lunch, and be paid for 8 hours; third shift to work 7½ hours with ½ hour off for lunch, and be paid for 8 hours. "Forty hours shall constitute a week's work for second and third shifts, except in the case of a second shift employed on all emergent war work, when they may work 44 hours."

Overtime: time and one-half for the first four hours and double time thereafter; double

time for work on Sundays and specified holidays (seven holidays specified in one agreement, eight in the other).

Wages: mechanics, anglesmiths, boilermakers, chippers, caulkers, riveters, shipfitters, all welders, burners, drillers and tappers 90 cents per hour, $7.20 per day; punch and shearmen and holder-on 76 cents per hour, $6.08 per day; passer boys 45 cents per hour, $3.60 per day; reamers and countersinkers 70 cents per hour, $5.60 per day; heaters 68 cents per hour, $5.44 per day; drilling out rivets 75 cents per hour, $6 per day; ironworkers' helpers 67 cents per hour, $5.36 per day; blacksmiths' helpers 67 cents per hour, $5.36 per day; blacksmiths 85 cents per hour, $6.80 per day. When employees are required to work at outside points they shall be paid travelling time and first-class board and room at the field scale of: mechanics $7.20 per day; helpers $6.20 per day.

"The above rates to be subject to adjustment quarterly in accordance with the cost of living and wages to be increased or decreased in an equal percentage to the increase or decrease in cost of living, as ascertained by the Department of Labour of the Provincial Government of British Columbia, it being understood that the cost of living figures as at December 1, 1939, be the basis of this arrangement. It is also understood that the above rates are to be the minimum rates to be paid during the life of this agreement."

Time and one-quarter to be paid for all dirty work and work in confined places full of gas as a result of rivet fires and torches, as in fore-peaks, tanks, etc., the foreman, union representative and committee to decide work to be so classed.

Every man to be paid not less than 4 hours if hired after starting time, or if hired after 4.50 p.m. or after 12.10 noon on Saturdays or on Sundays or holidays.

No mechanic of this union to be allowed to work as a helper while there are helpers of the union available.

Transportation and Public Utilities: Water Transportation

SAINT JOHN, N.B.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL NO. 273.

Agreement to be in effect from December 1, 1939, to November 30, 1940, and thereafter from year to year subject to notice. Should the war end before the termination date in any year, the companies may, if circumstances warrant, terminate the agreement at any date by giving 60 days' prior notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, February, 1938, page 213, with these exceptions:

Wages: a war bonus of 8 cents per hour is added to the regular wage rates of 80 cents per hour for handling general cargo and 90 cents for hauling bulk cargoes, making these rates 88 cents and 98 cents per hour respectively.

For the duration of the war, certain minor changes are made in working conditions, more favourable to the companies.

If the arbitration committee formed to settle any dispute cannot do so within 20 days, a new arbitration committee to be selected.

SAINT JOHN, N.B.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL NO. 1039 (STEAMSHIP HORSE AND CATTLE FITTERS, SEALERS, LINERS AND CLEANERS).

Agreement to be in effect from December 1, 1939, to November 30, 1940, and thereafter from year to year, subject to notice. Should the war end before the termination date in any year, the companies may, if circumstances warrant, terminate the agreement at any date by giving 60 days' prior notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1935, page 1155, May, 1938, page 573, and December, 1938, page 1416, with these exceptions:

Hours: Saturday half holiday to prevail from June 1 to September 30, but men to work them if required, double time rates to prevail from 1 p.m. Saturday to midnight on Sunday.

Wages: a war bonus of 5 cents per hour is added to the regular wage rate of 70 cents per hour for day work, and a bonus of 7½ cents per hour is added to the regular wage of $1.05 per hour for night work, making the rates 75 cents per hour for day work and $1.12½ for night work.

If the arbitration committee formed to settle any dispute cannot do so within 20 days a new arbitration committee to be selected.

SAINT JOHN, N.B.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 810 (COAL HANDLERS AND TRIMMERS).

Agreement to be in effect from December 11, 1939, to November 30, 1940, and thereafter from year to year subject to notice. Should the war end before the termination date in any year, the companies may, if circumstances warrant, terminate the agreement at any date, by giving 60 days' prior notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 573, with these exceptions:

Wages: a war bonus of 8 cents per hour is added to the regular wage rates, making them 98 cents per hour for day work and $1.18 for night work.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Cloak and Suit Industry, Province of Quebec (amendment).
Paper Box (Uncorrugated Paper) Industry, Province of Quebec (amendment).
Can, Container and Metal Utensil Industry, Province of Quebec.
Building trades, Chicoutimi and Lake St. John District (amendment).
Building trades, Three Rivers.
Building trades, Joliette.
Building trades, St. Jerome.
Building trades, Montreal (amendment).
Barbers and Hairdressers, Quebec (amendment).

Barbers and Hairdressers, Portneuf County (repeal).
Barbers and Hairdressers, Rouyn and Noranda (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Logging, Thunder Bay District.
Carpenters, St. Thomas.

MANITOBA

Barbers, Winnipeg.

SASKATCHEWAN

Plumbers, Saskatoon and Sutherland.
Gravel Hauling Industry, Regina.
Beauty Culture Industry, Regina.
Beauty Culture Industry, Swift Current.

ALBERTA

Plumbers and Steamfitters, Edmonton.
Taxi Drivers, Calgary.
Barbers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issue beginning May, 1938.

Recent proceedings under the Act include the extension of four new agreements, the amendment of six other agreements, and the repeal of another agreement, all of which new agreements or amendments are summarized below. A request for the extension of a new agreement in the retail fur industry in Montreal was published in the *Quebec*

Official Gazette, April 6; for the extension of an agreement for the ornamental iron and bronze industry at Montreal and another for the plumbers, asbestos workers and sheet metal workers at Montreal in the issue of April 13; for the extension of an agreement for grocers and butchers in Sherbrooke in the issue of April 27. In addition, Orders in Council were published in the *Quebec Official Gazette* during April approving the constitution and by-laws of certain joint committees and authorizing certain joint committees to levy assessments on employers and employees, as listed below.

Manufacturing: Textiles, Clothing, etc.

CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved April 3, and published in the *Quebec Official Gazette,* April 13, amends the original Order in Council (LABOUR GAZETTE, October, 1937, page 1157). The original agreement provided that it remain in effect until June 30, 1940, and thereafter from year to year, subject to 90 days' notice. By this amendment the 90 days' notice previously required is changed to 30 days' notice.

Manufacturng: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved April 19, and published in the *Quebec Official Gazette,* April 27, amends the previous Orders in Council for this industry (LABOUR GAZETTE, April, 1939, page 528 and September, page 950). The term of the agreement is extended to March 31, 1941.

A new wage scale replaces the former one, substituting one minimum rate for each class for the range of wage rates in the previous scale.

	Minimum Hourly Wage Rates Zone I	Zone II
	$	$
Female employees		
Foreladies	.28	.26
Handwork, first class	.27	.25
S. & S. Machine operators	.24	.22
Top piece machine operators	.24	.22
Covering machine operators	.24	.22
Tiers	.24	.22
Staying machine operators	.24	.22
Stitchers	.24	.22
Gluers	.24	.22
Apprentices on S & S machines, top piece machines, covering machines, tying machines, stitching machines:		
1st 6 months	.20	.18
2nd 6 months	.22	.20
Other help	.17	.15
Male employees		
Foremen	.50	.45
Scorers	.43	.40½
Cutters on knife	.38	.35½
End piece operators, single and double	.34	.31½
Slitter operators	.30	.28
Bale press operators	.30	.28
Punch operators	.25	.23
Die makers	.50	.47
Assistant die makers	.30	.28
Cylinder box press operators	.38	.35½
Colt press operators	.38	.35½
Cylinder box press feeders	.28	.26
Colt press feeders	.28	.26
Automatic glueing machine first class operators	.33	.30½
Shippers	.33	.30½
Truck drivers	.33	.30½
Boiler men	.40	.37
Machinists	.45	.42
Maintenance and repair men	.33	.30½
Apprentice scorers:		
1st 6 months	.30	.27½
2nd 6 months	.32	.29½
3rd 6 months	.35	.32½
4th 6 months	.38	.35½
Apprentices on knife, single and double end piece, slitters, cylinder press, Colt press, automatic glueing machine:		
1st 6 months	20% less than minimum	
2nd 6 months	10% less than minimum	
Other help	.17	.15

The minimum hourly rates for female employees must average at least 25 cents per hour in Zone I and 23 cents in Zone II, and for male employees 30 cents in Zone I and 28 cents in Zone II. In computing the averages, apprentices' wages are included but the wages of employees receiving over a certain rate of wages (specified for each class) are not included. (These minimum average rates are one cent per hour higher than in the previous agreement, except in case of male employees in Zone I, for whom the minimum average rate is 3 cents per hour higher.)

Manufacturing: Metal Products

CAN, CONTAINER AND METAL UTENSIL INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved April 3, and published in the *Quebec Official Gazette,* April 6, makes obligatory the terms of an agreement between the American Can Company, General Steel Wares Ltd., the Continental Can Company of Canada, Ltd., and the Canco Can Makers' Association of Montreal, General Steel Wares Ltd. Employees' Association and the Continental Can Makers' Association of Montreal.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1938, page 1298, January, 1939, page 96 and December, page 1279, with these changes:

Hours: the standard work week is still 48 hours per week, but it is now further provided that the daily period be limited to 10 hours in any day, except on Saturday when the regular daily period shall end at 12 noon. For stationary enginemen and firemen, however,

regular weekly hours are unchanged at 54 per week.

Minimum hourly wage rates for general employees: boys of 16 years of age 20 cents, of 17 years 22½ cents, of 18 years 25 cents, of 19 years 27½ cents, of 20 years 30 cents, on reaching 21 years 35 cents per hour to be increased by 2½ cents per hour each six months until he reaches his classification rate; female employees 20 cents per hour for beginners, 23 cents after six months and 26 cents after one year; electric truck drivers 40 cents (assistant shippers are not now mentioned). The minimum rates for other general employees are increased by 2½ cents per hour.

Minimum hourly wage rates for specialized employees: the rates for enginemen and firemen are unchanged; the minimum rates for all other specialized employees are 2½ cents higher than previously.

Minimum hourly wage rates for mechanical employees are increased 2½ cents per hour, except for journeymen machinists (including tool makers, diemakers and general machinists) for whom the rate for beginners is increased 5 cents per hour.

Minimum hourly wage rates for watchmen, truck drivers and service men are increased 2½ cents per hour.

Minimum weekly salaries for office employees: $7 for office boys and messengers, $10 for other employees.

There shall be no reduction in wages while the agreement is in effect.

Construction: Building and Structures

BUILDING TRADES, CHICOUTIMI AND LAKE ST. JOHN DISTRICT.—An Order in Council, approved April 9, and published in the *Quebec Official Gazette,* April 13, amends the previous Orders in Council for these trades (LABOUR GAZETTE, January, 1937, page 103, January, 1939, page 96, October, page 1065, and April, 1940, page 390).

In the amendment summarized in the April, 1940, LABOUR GAZETTE setting wage rates in the structural iron industry and sprinkler fitting trade, etc., it was provided that that amendment should not apply to building contracts signed before the date of the publication of the amendment. In the latest amendment published in the *Quebec Official Gazette,* April 13, this provision that the rates do not apply to contracts signed before publication is rescinded in so far as the structural iron industry is concerned.

BUILDING TRADES, THREE RIVERS.—An Order in Council, approved April 19, and published in the *Quebec Official Gazette,* April 27, makes obligatory the terms of an agreement between certain contractors and L'Union Nationale Catholique des Charpentiers-menuisiers, Inc. des Trois Rivières (the National Catholic Union of Carpenters and Joiners, Incorporated of Three Rivers), L'Union Nationale Catholique des Journaliers, Inc. (The National Catholic Union of Labourers, Inc.), L'Union Nationale Catholique des Electriciens, Inc. des Trois Rivières (the National Catholic Union of Electricians, Inc. of Three Rivers), L'Union Nationale Catholique des Mécaniciens de Machines fixés Inc. des Trois Rivières (the National Catholic Union of Stationary Engineers, Inc. of Three Rivers), L'Union Nationale Catholique des Peintres Inc. des Trois Rivières (the National Catholic Union of Painters, Inc. of Three Rivers) and L'Union Nationale Catholique des Briqueteurs, Plâtriers et Maçons, Inc. des Trois Rivières (the National Catholic Union of Bricklayers, Plasterers and Masons, Inc. of Three Rivers), le Syndicat National Catholique des Finisseurs de Ciment des Trois-Rivières, Inc. (The National Catholic Union of Cement Finishers of Three Rivers, Inc.), le Syndicat National Catholique des Métiers de la construction de Louiseville (The National Catholic Union of Building Trades of Louiseville), le Syndicat national catholique des charpentiers menuisiers des chutes de Shawinigan (the National Catholic Union of Carpenters and Joiners of Shawinigan Falls).

The territorial jurisdiction includes the counties of Maskinonge, St. Maurice, Laviolette, Champlain and Three Rivers, and the agreement is to be in effect from April 27, 1940, to April 26, 1941, and then be renewed automatically unless all the contracting parties request its repeal or amendment.

The industrial jurisdiction of the present Order in Council comprises all building, repair, maintenance, demolishing works and transportation of immovables and buildings and works pertaining to roads, bridges, dams, streets, wharfs, sidewalks, earthworks, retaining walls, sewers, viaducts, tunnels, wells, boats, canals, locks, parks, playgrounds, aqueducts, gas, electric or telephone lines, fences and every other work having any connection with these. The pulp and paper industry is exempt.

The district is divided into two zones of which zone I comprises municipalities of a population of 8,000 or more, and also all contracts exceeding $10,000 in the rest of the district; zone II comprises municipalities of less than 8,000 for contracts not exceeding $10,000. However, wage earners living in zone I and working in zone II will be paid at the zone I rates.

Hours: 8 per day (a 48 hour week).

Overtime: time and one-half; work on Sundays and holidays, double time.

	Minimum Hourly Wage Rates	
	Zone I	Zone II
	$	$
Bricklayers and masons	.80	.80
Plasterers	.80	.80

Horse drivers	.40	.30
Structural iron erectors	.75	.75
Roofers, slate and tile	.65	.55
Roofers, composition	.50	.40

(These are increases of 5 cents per hour in most cases, 10 cents for bricklayers, masons, plasterers and cement finishers, over the rates of the previous agreement, which was summarized in the LABOUR GAZETTE, August, 1938, page 944, May, 1939, page 528, July, page 728 and September, page 951.)

Apprentices: not more than one apprentice allowed to each five bricklayer, mason or plasterer journeymen, or fraction of five; not more than one apprentice to each electrician journeyman; not more than one apprentice to each three painters, paperhangers, millwrights, machinists, blacksmiths, marble, terrazzo, tile and mosaic setters, cement finishers, joint pointer and whitewashers, or fraction of three; not more than one apprentice to each three carpenter-joiner journeymen, or fraction thereof.

Hourly wages of apprentices: apprentice bricklayers, masons and plasterers 15 cents during first year to 40 cents during third year; apprentice electrician from 20 cents in zone I and 15 cents in zone II during first year to 35 cents in both zones during fourth year; apprentice painters, paperhangers, millwrights, machinists, blacksmiths, marble, terrazzo, tile and mosaic setters, cement finishers, joint pointers and white-washers from 15 cents during first year to 35 cents in zone I and 25 cents in zone II during third year; apprentice carpenters and joiners from 15 cents during first year to 45 cents in zone I and 25 cents in zone II during third year.

Maintenance men employed permanently may be paid 20 per cent less than the above minimum rates.

The employer may not deduct more than $3 per month for room from the employee's wages if he supplies a room, nor more than 25 cents per meal for board.

Contracts signed before this Order in Council came into effect will be governed by the Orders in Council previously in force.

BUILDING TRADES, JOLIETTE.—An Order in Council, approved April 3, and published in the LABOUR GAZETTE, April 6, makes obligatory the terms of an agreement between Le Syndicat patronal catholique et national de la construction de Joliette (the National Catholic Union of Construction Employers of Joliette) and le Syndicat catholique et national des ouvriers du bâtiment de Joliette (the National Catholic Union of Building Workers of Joliette).

The agreement is to be effect from March 1, 1940, to February 28, 1941, and shall be automatically renewed unless one of the parties gives notice on or before February 1 of any year.

The territorial jurisdiction includes the counties of Joliette, Berthier, Montcalm and l'Assomption.

It is divided into two zones, of which zone I includes municipalities of a population of 4,000 or more and contracts of $2,000 or more in the rest of the district; zone II consists of municipalities of less than 4,000 for contracts of less than $2,000.

The agreement covers all work as to construction, installation, rebuilding, repair, maintenance and demolishing of buildings, roads, aqueducts, sewers, wharves, canals, tunnels, bridges, culverts, retaining walls, airports, landing fields, levelling and embankment grounds, electrical installations and transmission wires, plumbing and heating systems, driving piles (wood or cement), cement side walks and any other similar work.

Hours: 8 per day, a 48 hour week.

Overtime: time and one-half; double time for work on Sundays and eight specified holidays.

(These rates are unchanged for some trades and increased for other trades 5, 10 or 15 cents per hour, from the previous agreement which was summarized in the LABOUR GAZETTE, June, 1938, page 694, November, page 1299, July, 1939, page 728 and September, page 951).

Foremen to be paid 10 cents per hour extra. Contractors employing no tradesmen but doing the work themselves to be paid 25 per cent over the regular rate for their trade.

Journeymen who are handicapped may be paid lower rates if so approved by the joint committee, but in no case may such rate be more than 10 cents per hour lower than the regular minimum rate, and in any plant or shop the number of such workmen may not exceed one to each ten qualified journeymen.

One apprentice allowed to each five journeymen bricklayer, mason, plasterer, carpenter-joiner and painter journeymen or fraction of five; one apprentice to each journeyman plumber, steamfitter and tinsmith. Apprentices to be registered and under the jurisdiction of the joint committee.

Maintenance men permanently employed to be paid a minimum of $18 per week of 48 hours if journeymen and $12 per week of 48 hours if common labourers. Any work over 48 hours in a week to be paid at the minimum hourly wage rate for the trade concerned.

Employers may not charge more than $3 per month per room where provided by the employer or 25 cents per meal where meals provided.

Contracts signed before this Order in Council came into effect will be governed by the Order in Council previously in force.

BUILDING TRADES, ST. JEROME.—An Order in Council approved April 23, and published in the *Quebec Official Gazette*, April 27, makes obligatory the terms of an agreement between certain contractors and le Syndicat de la construction incorporé de St. Jerome (The Union of Building Trades, Incorporated of St. Jerome).

Agreement to be in effect from April 1, 1940, to March 31, 1941, and shall be renewed automatically unless one of the parties gives notice of change at least 30 days before April 1 of any year.

The territorial jurisdiction comprises the county of Terrebonne.

The industrial jurisdiction comprises all work pertaining to the construction, installation, rebuilding, repair, maintenance and demolishing of buildings, roads, aqueducts, sewers, wharves, canals, tunnels, bridges, culverts, retaining walls, plumbing systems, heating systems (wood or coal), cement sidewalks and any other work performed by building trades workers.

The terms of this agreement are similar to those of the agreement previously in effect and summarized in the LABOUR GAZETTE, May, 1939, page 529 with these exceptions:

	Minimum Hourly Wage Rates $
Screen setters (wood and metal)	.60
Sash and window setters	.60
Steel partition erectors	.60
Weatherstrippers	.60
Roofers (asbestos, slate and tile)	.60
Joiners (concrete moulds, shop or job)	.60
Hard-wood floor layers and any other related trade	.60
Tile setters	.70
Cement finishers	.55
Common labourers or bricklayers' and plasterers' helpers	.45
Labourers	.35
Painters	.50
Decorators	.55
Glaziers	.50
Wall-paper hangers	.50
Sprayers	.55
Letterers (commercial)	.70
Floor finishers (shop or job)	.50
Plasterers	.70
Lathers (metal)	.60
Lathers (wood), ten test, gyproc and any other related trade	.60
Electricians	.60
Masons	.70
Bricklayers	.75
Floor finishers (hand or machine)	.60
Roofers (composition)	.60
Sheet metal workers (shop or field)	.55
Pipe mechanics and pipefitters	.55
Junior journeymen plumbers—first and second years	.45
Enginemen—steam, gas or electric shovels	.60
Enginemen-compressors	.50
Firemen	.50
Stationary or movable engine men	.60

Foremen supervising a shift of four or more men shall be paid ten cents more per hour than the rates established for their trades.

(These rates are in most cases 5 or 10 cents per hour higher than in the previous agreement, except for pipe mechanics and pipefitters whose rates are 5 cents per hour lower than last year.)

Board if paid by the employee not to exceed $6 per week; if it does exceed $6, the surplus to be paid by the employer.

Maintenance men permanently employed to be paid $18 per week of 48 hours if journeymen and $12 per week of 48 hours if common labourers. Overtime done by maintenance men to be paid at regular hourly rate established for the trade concerned. Employers may deduct $3 per month per room if maintenance man lodges in the establishment and 25 cents per meal if he boards in the establishment.

Contracts signed before April 1, 1940, will be governed by the Orders in Council previously in force.

BUILDING TRADES, MONTREAL.—An Order in Council approved April 3, and published in the *Quebec Official Gazette*, April 13, amends the previous Order in Council for these trades (LABOUR GAZETTE, July, 1939, page 729, Septem-

ber, page 951, and October, page 1066) by extending the term of the agreement from March 31 to June 1, 1940.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC.—An Order in Council, approved April 16, and published in the *Quebec Official Gazette,* April 20, amends the previous Order in Council for these trades (LABOUR GAZETTE, October, 1937, page 1158, December, page 1388, October, 1938, page 1174, and October, 1939, page 1068) by extending the period of the agreement from March 1, 1940, to February 28, 1941.

BARBERS AND HAIRDRESSERS, PORTNEUF COUNTY.—An Order in Council, approved April 6, and published in the *Quebec Official Gazette,* April 13, repeals the Order in Council making this agreement obligatory and the amendments to it (LABOUR GAZETTE, October, 1935, page 952, June, 1936, page 548, June, 1937, page 696).

BARBERS AND HAIRDRESSERS, ROUYN AND NORANDA.—An Order in Council, approved April 6, and published in the *Quebec Official Gazette,* April 13, amends the previous Orders in Council (LABOUR GAZETTE, November, 1935, page 1063, June, 1938, page 699, and July, page 801).

Weekly hours are still limited to 57 per week and it is further provided that shops be open only between 8 a.m. and 7 p.m. except pay days of the Noranda mine and days before holidays when shops may be open to 9 p.m. and on Saturdays and the three days before Christmas eve and New Year's eve when they may be open till 11 p.m. It is however provided that in no case may an engagement be taken in hair-dressing parlours for work to be done after 7 p.m.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette,* April 6, 13 and 27:

Hardware stores, Quebec.
Printing trades, Quebec.
Men's and boys hat and cap industry, Province of Quebec.

Notices were published in the *Quebec Official Gazette,* April 13, 20 and 27, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Barbers and hairdressers, St. John.
Bakers, Hull.
Building trades, Chicoutimi (amendment).
Printing trades, Quebec.
Longshoremen (inland navigation), Montreal (amendment).
Hardware stores, Quebec.
Building trades, Montreal (amendment).
Men's and boys' hat and cap industry, Province of Quebec.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Manitoba, Saskatchewan and Alberta

IN five provinces—Ontario, Alberta, Nova Scotia, Saskatchewan and New Brunswick—legislation provides that, following a petition from representatives of employers or employees in any industry, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommnedation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour; in Saskatchewan under the Commissioner of Labour and Public Welfare; in New Brunswick under the Minister of Health and Labour. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939,

page 581; New Brunswick, in the issue of October, 1939, page 996. Similar legislation is in effect in Part II of the Fair Wages Act of Manitoba for certain industries (LABOUR GAZETTE, May, 1938, page 499, and June, 1939, page 570). Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Logging

LOGGING, THUNDER BAY DISTRICT.—An Order in Council, dated April 17, and published in *The Ontario Gazette*, April 20, makes binding in the Thunder Bay district (vicinity of Port Arthur) the terms of a schedule for the logging industry.

The schedule governs: cutting pulp, cutting timber, saw logs, peeling, skidding, river driving, tie making, loading, cutting of piling, maintenance of men in camps, cooking, etc. It is to be in effect from April 1, 1940 to March 31, 1941.

Minimum monthly wage rates to be paid in addition to suitable board and lodging (which is to be provided free for all days in the month): cookees and kitchen staff and camp watchmen, $46.75 for a calendar month; general bushmen and handyman helpers, $46.75 for a maximum 26 days' work per month; landing men engaged in unloading wood, loaders, skidders, helpers, feeders of ties to and on to jackladders, sorters and sluicers of pulpwood and ties, $49.50 for a maximum 26 days' work per month; bull cooks and night watchmen, $49.50 for a calendar month; teamsters and skidders driving less than 4 horses, $55 for a maximum 26 days' work per month; teamsters driving 4 or more horses, $60.50 for a maximum 26 days' work per month; barn bosses, $60.50 for a calendar month; truck drivers (hauling wood products), $82.50 for a maximum 26 days' work per month; tractor drivers, $93.50 for 26 days' work per month.

Minimum daily wage rates to be paid in addition to suitable board and lodging for all days in the calendar month: river drivers, raftsmen (in charge of a raft) and boatmen (on river driving), $2.86; employees engaged in watering wood or making rafts throughout the progress of the drive, $2.86; camp and dam builders, $2.75.

Piece rates are set for pulpwood cutters employed on this basis, and for those engaged on piece work a charge not exceeding 95 cents per day may be made for suitable board and lodging.

(These wage rates are approximately 10 per cent higher than those of the previous schedule.)

The Advisory Committee may set a rate less than the above for handicapped workers. There shall be no change in the rates of employees receiving higher than the above minimum rates at the time the schedule was made effective.

All tools and merchandise sold by the employer to be sold at a retail price not exceeding the retail prices prevailing in Port Arthur.

Construction: Buildings and Structures

CARPENTERS, ST. THOMAS.—An Order in Council, dated March 29, and published in *The Ontario Gazette*, April 6, makes binding the terms of a schedule for the carpentry industry in the city of St. Thomas.

The Order in Council is to be in effect from April 16, 1940, "during pleasure".

Hours: 8 per day between 8 a.m. and 5 p.m., 4 on Saturdays, between 8 a.m. and noon, a 44 hour week.

Overtime: Overtime necessary to permit the pouring of concrete if performed on Saturday before 6 p.m., and work performed at night whenever owing to the nature of the work it cannot reasonably be performed during the regular working periods, may be done at regular rates for the first 8 hours; overtime on Saturdays before 4 p.m. to be paid at time and one-half; all other overtime including all work on Sundays and nine specified holidays, double time. The Advisory Committee may issue an overtime permit at special minimum rate of wages.

Minimum hourly wage rate for carpenters: 60 cents. The Advisory Committee may fix a lower minimum rate for any handicapped employee.

Manitoba

Service: Business and Personal

BARBERS, WINNIPEG.—An Order in Council, approved April 16, and published in *The Manitoba Gazette*, April 20, makes effective the first schedule of wages and hours under Part II of the Fair Wage Act.

This schedule governs wages and hours in the barbering trade in the city of Winnipeg, the city of St. Boniface and the municipalities of St. Vital, Fort Garry, St. James and East and West Kildonan, town of Tuxedo and village of Brooklands and the town of Transcona. It is to be in effect from May 1, 1940, until repealed.

Hours: subject to the provisions of any municipal bylaw relating thereto, no barber shop or barber school to remain open for more than 10 hours in any one day except Saturday or the day preceding a holiday when they may be open for 11½ hours.

Minimum wage rates: for those employed full time on a straight wage basis, $13.50 per week; for those employed full time on a percentage or commission basis or on a wage plus a percentage or commission, $13.50 in a week or 60 per cent of gross earnings, whichever is the greater; those employed part time on either a wage or commission basis or a combination of both, $3 per day or any part of a day except Saturday or the day before a holiday for which $5 must be paid for such day or portion of such day.

A schedule of minimum prices for each operation which must be charged by barber shops is included; and it is further provided that in the absence of any other regulations governing the operation of barber schools, these same prices must be charged by barber schools.

No deduction from wages may be made for any materials supplied, laundry service or operating expenses.

Saskatchewan

Construction: Buildings and Structures

PLUMBERS, SASKATCHEWAN AND SUTHERLAND.—An Order in Council, approved March 27, and published in *The Saskatchewan Gazette*, April 15, makes binding for the city of Saskatoon and the town of Sutherland and within five miles of them, the terms of a schedule for the plumbing and steamfitting industry, to be in effect from April 25, 1940, "during pleasure".

Hours: 8 per day from Monday to Friday between 8 a.m. and 5 p.m., a 40 hour week except that work may be done on Saturday before 12 noon at straight time rates on any work required for the protection of life or property and the setting of sleeves and inserts.

Overtime: time and one-half to midnight; overtime after midnight and all work on Sundays and eight specified holidays, double time. No overtime may be done without a permit from the Advisory Board.

Minimum hourly wage rate for plumbers and steamfitters: $1 per hour (no change from the previous schedule).

Transportation and Public Utilities: Local Transportation

GRAVEL HAULING INDUSTRY, REGINA.—An Order in Council, approved March 9, and published in *The Saskatchewan Gazette*, March 15, makes binding the terms of a schedule for the gravel hauling industry in the city of Regina and adjacent townships, to be effective from March 25, "during pleasure."

The gravel hauling industry is defined as the hauling by motor truck for gain of gravel, sand, crushed rock or stones, field stones, concrete mix, black top or any road surfacing material. A "yard hour" is defined as the hauling of one cubic yard of material for one hour or of any fraction of one cubic yard for a corresponding multiple of one hour or any multiple of one cubic yard for a corresponding fraction of one hour. A "yard mile" is defined as the hauling of one cubic yard of material for one mile, or of any fraction of one cubic yard for a corresponding multiple of one mile, or any multiple of one cubic yard for a corresponding fraction of one mile.

Hours: 48 per week.

Overtime including all work on Sundays and holidays: to be paid at 55 cents per hour.

Minimum wage rate: 45 cents per hour.

The minimum charge which an employer or employee may contract for or accept for hauling material is 60 cents per yard hour where the haul is 2 miles or less; 12 cents per yard mile where the haul is more than 2 miles and less than 5 miles; 9 cents per yard mile where the haul is 5 miles or more.

Service: Business and Personal

BEAUTY CULTURE INDUSTRY, REGINA.—An Order in Council, approved March 12, and published in *The Saskatchewan Gazette*, April 1, makes binding the terms of a schedule governing the beauty culture industry in the city of Regina and within five miles of it.

Hours: 45 per week, divided into 5½ regular working days, that is between 9 a.m. and 6 p.m. (less one hour off for dinner) on Mondays, Tuesdays, Thursdays and Fridays, 9 a.m. and 12 noon on Wednesdays (except Wednesday of the week in which a holiday occurs) and between 9 a.m. and 8 p.m. on Saturdays (less one hour for dinner).

Overtime is limited to 10 hours in any week unless a permit given by the advisory board for more; overtime to be paid at 35 cents per hour with bonus as noted below.

Minimum wage rate for full time experienced employees (those with 18 months or more experience) $13 per week together with the bonus as noted below. For those with less than 18 months' experience, $8 per week during first six months, $10 during second six months and $12 during third six months, plus bonus. For part time employees, 35 cents per hour plus bonus, provided that the minimum rate for work done in any day be $1.40.

Bonus: every employee to be paid as part of his or her wages a bonus equivalent to the amount by which 40 per cent of all charges made for permanent waving and dyeing done by such employee and 60 per cent of all charges for other work done by such employee during each week exceeds the amount paid to such employee for full time, part time or overtime work.

A minimum scale of charges which must be made for each operation is included in the schedule.

No deduction may be made from the wages for materials, laundry service or equipment supplied by the employer.

No employer may employ more than one part time employee for each four (or fraction thereof) full time employees employed by such employer.

No employer may employ more than one inexperienced employee for each four (or fraction thereof) experienced employees employed by such employer.

BEAUTY CULTURE INDUSTRY, SWIFT CURRENT.—An Order in Council, approved March 9, and published in *The Saskatchewan Gazette*, March 15, makes binding the terms of a schedule governing the beauty culture industry in the city of Swift Current and the territory within a radius of 5 miles therefrom.

The terms of this schedule are similar to those of the schedule for Regina summarized above, with these exceptions:

Hours: from January 1 to August 15, 45 per week; from August 16 to December 31, 48 hours per week. On Monday, Tuesday, Thursday and Friday, hours 9 a.m. to 6 p.m. (less one hour for dinner); on Wednesday hours from 9 a.m. to 12 noon between January 1 and August 15, and from 9 a.m. to 6 p.m. (less one hour for dinner) from August 16 to December 31; on Saturday, 9 a.m. to 7 p.m. (less one hour for dinner) between January 1 and March 31, and 9 a.m. to 9 p.m. (less one hour for dinner) from April 1 to December 31; provided that in any week during which a holiday occurs the shops may remain open until 9 p.m. before such holiday and in such week the shops may remain open till 6 p.m. on Wednesday.

There are also some differences in the scale of charges to be made to customers.

Alberta

Construction: Buildings and Structures

PLUMBERS AND STEAMFITTERS, EDMONTON.—An Order in Council, dated April 27, and published in *The Alberta Gazette*, April 30, makes binding the terms of a schedule for the plumbing, steamfitting and gas fitting industry in the city of Edmonton and adjacent district, to be in effect from May 10, 1940, to March 9, 1941.

The terms of this schedule are similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1939, page 532, and September, 1938, page 1048, with this exception:

No provision is made for payment by the employer of travelling fare and board for journeymen required to work out of the city, nor for payment for travelling time going to or from such work.

The minimum wage rate is unchanged from that which came into effect August 1, 1939, that is $1.05 per hour, with a 44 hour week.

The same nine holidays are named for which double time is payable, but it is provided that when necessary for this trade to follow other trades which do not recognize certain of these holidays, ten such holidays shall not apply and shall be worked at straight time rates.

Transportation and Public Utilities
Local Transportation

TAXI DRIVERS, CALGARY.—An Order in Council, dated April 26, and published in *The Alberta Gazette*, April 30, makes binding the terms of a schedule for the taxi livery industry in the city of Calgary, from May 10, 1940, "during pleasure."

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, February, 1939, page 220, with these exceptions:

Minimum weekly wage rates for taxi drivers: $15 per week plus 25 per cent commission on all receipts from fares and authorized credit accounts in excess of $60 per week.

"The number of spare or part-time chauffeurs in any one business shall not exceed 20 per cent of the number of regularly employed chauffeurs in such business provided, however, that any employer who employs five regular chauffeurs or fewer than five shall be permitted to employ one temporary driver."

"All chauffeurs shall be deemed to be employed while they are on or about the employer's premises, having been called to work, while in charge of any car belonging to his employer or in any other manner serving the employer by his instructions."

Service: Business and Personal

BARBERS, EDMONTON.—Under the Department of Trade and Industry Act, a code set minimum wage rates for barbers throughout the province of Alberta (LABOUR GAZETTE, October, 1938, page 1093, and October, 1939, page 999). An amendment to this code, dated April 27 and published in *The Alberta Gazette*, April 30, provides that these rates shall not apply whenever wages for such employees are governed by a schedule under the Industrial Standards Act.

An Order in Council under the Industrial Standards Act, dated April 26, and published in *The Alberta Gazette*, April 30, makes binding a schedule of wages and hours for the barbering industry in the city of Edmonton.

This Order in Council is to be in effect from May 10, 1940, to May 9, 1941, or thereafter "during pleasure."

Hours: 10 per day, 54 per week, with a daily minimum of 4 hours; for female employees hours may not exceed 9 per day or 48 per week.

Overtime: the weekly maximum of 54 hours may be exceeded by six hours per week for the month of December only.

Wages: for male employees given full time employment on a straight salary basis or paid a salary plus commission, 60 per cent of total proceeds over $23 with a guarantee of not less than $15 per week; female employees given full time employment on a straight salary basis or paid a salary plus commission, 60 per cent of total proceeds over $22 per week with a guarantee of not less than $14 per week; for those employed on an hourly basis, 40 cents per hour with a minimum payment for 4 consecutive hours every day employed; for those employed by the day, 60 per cent of total proceeds with a guarantee of $3 per day except Saturdays when the guarantee is $3.50 or 60 per cent of total proceeds whichever is the greater; apprentices, 60 per cent of total proceeds with a guarantee of not less than $8 per week.

No deduction may be made from wages for material supplied, laundry service or operating expenses.

A scale of minimum prices which must be charged customers is included.

Apprentices: one apprentice allowed to each barber shop; apprenticeship to be for two years and all apprentices must be duly indentured.

Any employer who rents or sub-lets a chair on his premises shall be considered to be an employer.

WAGES OF EMPLOYEES ON FARMS IN CANADA, 1929, 1933 AND 1937 TO 1939

THE Dominion Bureau of Statistics secures each year from its agricultural correspondents throughout Canada information as to the wages of employees on farms in Canada during the year just ended. The figures so secured are published in the *Monthly Bulletin of Agricultural Statistics* for the February of the following year. Tables of these figures have appeared in the reports on Wages and Hours of Labour in Canada issued as supplements to the LABOUR GAZETTE for January, 1925 to 1938, inclusive, and March, 1939, and 1940, the first of these giving figures back to 1914. The accompanying table includes figures taken from the issue of the *Bulletin* for February, 1940, and from previous issues.

The figures are for the years 1929, when farm wages in Canada were around the general level from 1921 to 1929, for 1933 when these wages were down to about the lowest point since 1914, and the last three years. These figures reveal that wages of employees on farms in Canada fell approximately fifty per cent from 1929 to 1933 and thereafter tended to increase gradually. From 1938 to 1939 there were fairly general increases in the yearly wages while the monthly wages were little changed in the average for Canada.

PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1940

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was again slight. The cost per week of a list of certain staple foods, fuel and lighting and rent entering into a family budget and the Dominion Bureau of Statistics weekly index number of wholesale prices were both little changed from the figures of the two months preceding.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was $8.78 at the beginning of April as compared with $8.76 for March. Nine items in the list were higher in cost than in the preceding month, nine were lower and eleven were unchanged. Such changes as occurred were of a minor nature, the most important being declines in eggs, lard and veal and advances in butter and potatoes. Comparative figures for the cost of the list for certain previous dates are $8.14 for the beginning of April, 1939; $8.69 for April, 1938; $8.54 for April, 1937; $6.67 for March, 1933, the low point in recent years; $11.24 for April, 1930; $10.26 for April, 1922; and $16.92 for June, 1920, the post war peak. Including the cost of fuel and rent with that of foods the total cost was $17.76 at the beginning of April as compared with $17.75 for March; $17.04 for April, 1939; $17.50 for April, 1938; $15.41 for June, 1933, the low point in recent years; $21.53 for April, 1930; $20.66 for April, 1922; and $26.92 for July, 1920, the post war peak. Fuel was practically unchanged while the cost of rent was the same as for the previous month.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 recorded a fractional decline to 83·0 for the week of May 3 following a period of six consecutive weeks during which the index was unchanged at 83·2. Other figures are 82·8 for the week ended March 1; 82·2 for that ended February 2 and 82·3 for that ended January 5. The latest figures available on a monthly basis are for March when the index was 83·2 as compared with 73·4 for April, 1939; 82·3 for April, 1938; 86·2 for April, 1937; 63·5 for February, 1933, the low point in recent years; 94·5 for April, 1929; 98·4 for April, 1922; and 164·3 for May, 1920, the post war peak. The Vegetable Products group did not show much change during the month under review. The prices of grains and potatoes advanced during the early part of the month but toward the end were lower. The Animal Products group declined from 78·9 at the beginning of the month to 76·7 for the week ended May 5 influenced in this movement by declines in live stock, fresh meats, butter and hides. Changes in other groups were slight there being minor declines in the Textile Products group, the Iron Products group and the Non-Metallic Mineral Products group, while the Wood Products group and the Non-Ferrous Metals group advanced slightly.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of April of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†December only. ‡Kind most sold.

††An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent.

§Lamb.

February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of food tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended May 3,1940; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 507)

Retail Prices

Changes in meat prices were slight. Sirloin steak was down from an average of 28·4 cents per pound in March to 28·3 cents in April, and other cuts of beef were unchanged. Veal declined from an average of 17·6 cents per pound to 17·2 cents. Fresh pork was unchanged at 23·2 cents per pound while bacon was fractionally higher at 29·9 cents per pound. The price of lard was down in the average from 11·7 cents per pound to 11·4 cents. Fresh eggs were lower in most localities except in British Columbia where the average was up 1 cent per dozen to 27·7 cents. The Dominion average price was 27·5 cents per dozen at the beginning of April as compared with 28·3 cents at the beginning of March. Milk has been unchanged for the last three months at an average price of 11 cents per quart. Creamery butter was slightly higher in most localities the Dominion average price being up from 31·3 cents to 32 cents. The price of cheese which had advanced each month between September, 1939, and March, 1940, was slightly lower at the beginning of April. The figures are 26·4 cents for April, 26·5 cents for March and 21·5 cents for September, 1939. Canned tomatoes were again fractionally higher at 12·6 cents per can at the beginning of April. The price of potatoes continued gradually upward, the Dominion average being $1.92 per 100 pounds as compared with $1.90 in March and $1.69 in January. Prices in the prairie provinces were somewhat higher than in other provinces. The price of anthracite coal has changed little in the last three months averaging $15.03 per ton for April.

The following are the prices reported for Welsh coal "cobbles" and "French nut" at the beginning of April, 1940: Halifax, $17.75; Charlottetown, $14.50-$15.50; Saint John, $16; Quebec, $14.75; Three Rivers, $16; Sherbrooke, $16.75; St. Hyacinthe, $15; Thetford Mines, $17.50; Montreal, $15-$15.25; Ottawa, $16.75; Kingston, $16; Belleville, $16.50; Peterborough, $17.50; Oshawa, $15.50; Toronto, $15; St. Catharines, $15.75; Hamilton, $15.50; Galt, $16; St. Thomas, $16.50; Cobalt, $20; Timmins, $19.75; Port Arthur, $18; Fort William, $18; Winnipeg, $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the April issue of the LABOUR GAZETTE.

Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force with consequent effect upon prices. In some of these countries the publication of price data has been suspended and in the case of Germany, direct information will henceforth be unobtainable although information contained in the official publications of neutral countries and in the press will be noted.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 129·5 for March as compared with 128·5 for February, an increase of 0·8 per cent for the month. The index of prices of food and tobacco decreased 0·9 per cent, there having been small decreases in all three of its subgroups. The index for industrial materials and manufactures increased 1·5 per cent; of the eight sub-groups entering into this index six showed increases but with the exception of the wool sub-group, which increased 16·3 per cent, the changes were not large. As compared with the figure for the corresponding month of 1939 the all commodities index number for March showed an increase of 34·1 per cent.

The *Statist* index number, on the base 1867-1877=100, was 123·4 at the end of March as compared with 124·5 at the end of February, a decrease of 0·9 per cent for the month. During March the index of the combined food groups declined 0·5 per cent, the animal food index being unchanged and the other two groups showing slight decreases. The index for the combined materials groups declined 1·1 per cent, there being decreases in all its components except minerals. The all commodities index for March 31, 1940, was 38·7 per cent higher than that for the same date in 1939.

COST OF LIVING.—The Ministry of Labour index number, on the base July, 1914=100, was 178 at the beginning of April as compared with 179 at the first of March, a decrease of 0·6 per cent for the month. The index of food prices decreased 1·8 per cent to 158, the chief reduction being in the price of eggs. During the month the index of clothing prices increased from 265-270 to 270-275. The indexes of rent, fuel and sundries were unchanged at 162, 205 and 193 respectively. The cost of living index for April 1, 1940, was 16·3 per cent higher than that for the same date in 1939.

Eire

COST OF LIVING.—The cost of living index number of the Department of Industry and Commerce, on the base July 1914=100, was 197 at mid-February, 1940, as compared to 194 at mid-November, 1939. During the quarter the index of food prices decreased from 178 to 177, the decline being due to decreases in the prices of eggs, nearly all other items of food showing increases. The index of clothing prices increased from 246 to 270 and that for fuel and lighting materials increased from 207 to 217.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 135 for December as compared with 133 for November, an increase of 1·5 per cent for the month. The index of food prices declined from 139 to 132 or 5·0 per cent while that for non-foods increased from 129 to 137 or 6·2 per cent.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934=100, was 114 for January as compared with 113 the previous month, an increase of 0·9 per cent. During the same period the index of food prices rose from 126 to 128 and that for clothing rose from 91 to 92. The indexes for fuel and lighting materials, rent and sundries were unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labor Statistics index number, on the base 1926=100, was 78·4 for March as compared with 78·7 for February, a decrease of 0·4 per cent

for the month. Of the ten groups which make up the index eight declined, the largest decreases being in textile products which declined 1·8 per cent, chemicals and drugs 1·4 per cent, foods 1·3 per cent and farm products 1·2 per cent. The two groups which did not show decreases were metals and metal products and building materials which increased 0·2 per cent and 0·1 per cent respectively. The all commodities index for March, 1940, was 2·2 per cent higher than the corresponding figure for 1939.

COST OF LIVING.—The index number of the Industrial Conference Board, on the base 1923=100, was 85·5 for March as compared to 85·8 for February, a decrease of 0·3 per cent for the month. The indexes for housing, clothing and sundries were unchanged at 86·6, 73·2 and 96·9 respectively. The index of food prices decreased 1·3 per cent to 78·8 while that for fuel and lighting materials decreased 0·2 per cent to 85·8. The index of all items for March of this year was 0·7 per cent higher than the corresponding index in 1939.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1940

DURING the first quarter of 1940 there were 181 fatal industrial accidents (including deaths from industrial diseases reported by workmen's compensation boards, etc., as well as fatalities incidental to occupational pursuits) as compared with 188 fatal accidents in the first quarter of 1939. Of the 181 fatalities in the first quarter of 1940, 60 occurred in January, 70 in February and 51 in March. (Fatal accidents during 1939 were recorded by quarterly periods in the issues of the LABOUR GAZETTE for May, August and November, 1939, and in February, 1940.

The supplementary list of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contains 28 fatalities for 1939.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Information concerning industrial accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners of Canada, certain other official sources as well as from the correspondents of the LABOUR GAZETTE, and newspaper reports.

Classified by groups of industries the fatalities occurring during the first quarter of 1940 were as follows: agriculture, 19; logging, 34; fishing and trapping, 2; mining, non-ferrous smelting and quarrying, 36; manufacturing, 23; construction, 19; electric light and power, 2; transportation and public utilities, 31; trade, 8; service, 7.

Of the mining accidents, 23 were in "metalliferous mining," 10 in "coal mining," one in "non-metallic mineral mining and quarrying, n.e.s.," and two in "structural materials."

Of the accidents in manufacturing, one was in "vegetable foods, drink and tobacco" section, two in "textiles and clothing," nine in "saw and planing mill products," three in "pulp, paper and paper products," six in "iron, steel and products," and two in "non-metallic mineral products."

In construction there were 11 fatalities in "buildings and structures," three in "highway and bridge," and five in "miscellaneous construction."

In transportation and public utilities there were 19 fatalities in "steam railways," one in "street and electric railways," two in "water transportation," one in "air transportation," seven in "local and highway transportation," and one in "storage."

In trade there were four fatalities in "wholesale," and four in "retail."

Of the fatalities in service, four were in "public administration," two in "custom and repair," and one in "personal, domestic and business."

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:—

Two farmers lost their lives near Gleichen, Alberta, on January 7, when overcome by gas fumes in a truck.

On March 9, two miners were killed by fall of rock, at Malartic, Quebec; and two coal miners lost their lives in a similar accident at Mountain Park, Alberta, on February 7.

Two gravel pit workers were killed under a cave-in of gravel at Nashwaaksis, New Brunswick, on March 28.

While repairing a pier at Upper Bonnington, British Columbia, two labourers fell into a river and were drowned on February 12.

When a train struck a truck, near Ottawa, on February 18, a dairyman and his son were killed.

During this quarter one fatality occurred in Canadian waters which is not included in the statistical record. In this case a seaman employed on a ship registered in Great Britain was killed on January 29, at Saint John. He fell into a hold of a British steamer,

Supplementary List of Accidents

A supplementary list of accidents occurring during 1939 has been compiled which contains 28 fatalities, of which five were in logging, one in fishing and trapping, six in mining, non-ferrous smelting and quarrying, four in manufacturing, four in construction, three in transportation and public utilities, and five in trade. One of these accidents occurred in June, one in July, two in August, five in September, three in October, five in November, and nine in December.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1940 BY GROUPS OF INDUSTRIES AND CAUSES

RECENT LEGAL DECISIONS AFFECTING LABOUR

Amendment Allowed to Statement of Claim in Ontario Picketing Case

Mr. Justice Roach of the Ontario High Court of Justice on March 19 dismissed the appeal and upheld the order of F. H. Barlow, K.C., the Master, made in Chambers at Toronto when he dismissed a motion by the defendant for an order striking out certain paragraphs of an amended statement of claim on the ground that they were embarrassing, prejudicial and irrelevant.

The plaintiff's claim was for an injunction restraining the defendant from exhibiting sandwich boards, handbills, etc., with the statement that the plaintiff, or his business was unfair to organized labour or that there was or had been a strike by the plaintiff's employees and from publishing any other defamatory statement concerning the plaintiff or its business and from picketing premises for any purpose; and from procuring or endeavouring to procure any person to break his contract with the plaintiff; and from creating a nuisance near or adjacent to the plaintiff's place of business; and otherwise interfering with the conduct of its business. The plaintiff asked for an interim injunction and for damages.

The defendant was alleged in the plaintiff's original claim to have displayed the statement: "Canada Dairy on Strike International Milk Drivers Union Local 647 A.F.L." When on a motion for an injunction the truth of this assertion was questioned, the plaintiff amended his statement of claim to allege that on the day following the return of the injunction the defendant displayed a sandwich board containing certain other words. It was this amendment that the defendants sought to have struck out. The Master, however, refused to accept the defence counsel's argument that it was in fact a new cause of action but considered that it was proper to allow the statement of claim as amended to stand, that the plaintiff should not, by technicalities, be prevented from having the issues properly defined and disposed of by the trial Judge and that should he succeed he would in any

event be entitled to assess damages to the date of assessment. *The Canada Dairies Ltd.* v. *Seggie* (1940) 11 Ontario Weekly Notes 130.

Quebec Court Awards Damages and Injunction against Pickets

Mr. Justice Décary of the Superior Court of Montreal on April 5 awarded the plaintiffs damages in the sum of $300 with interest and costs and declared absolute an interlocutory injunction which after both sides had been heard, had continued in force an interim injunction restraining the defendants from picketing the plaintiffs' places of business, especially one located in the City of Verdun, from distributing to the public circulars concerning the plaintiffs' business or their employees, from molesting employees or would-be employees of the plaintiffs and from otherwise interfering with the plaintiffs' business. The claim was for $5,000. The picketing took place during November and December, 1939, with a view to compelling the plaintiffs to employ only members of the Retail Clerks Union, Local 23. *Greenberg et al* v. *Arie et al,* Montreal Superior Court, April 5, 1940.

Quebec Appeal Court Holds that Validity of Order in Council under Collective Agreements Act may be Considered in Libel Action

On February 28 the Court of King's Bench unanimously reversed the judgment of Mr. Justice Décary of the Superior Court of Montreal on October 23, 1939, in which he allowed the defendant's motion to have procedure suspended until the plaintiff chose between his claim for $10,000 damages for libel and a request for a declaration of invalidity of a collective agreement made binding on garage employees and their employers under the Collective Labour Agreements Act and requiring a minimum charge of $1 per car for greasing. The libel alleged was that in radio broadcasts sponsored by the defendant association, criticism had been made of certain firms which disobeyed the agreement by charging less than the rate fixed. The plaintiff company was specifically mentioned.

Sec. 177 (6) of the Quebec Code of Civil Procedure gives the defendant the right to a postponement of the case if the plaintiff has joined in his action several claims which are incompatible or which are susceptible to different modes of trial and in such case the defendant cannot be bound to answer the action until the plaintiff has declared his option. In support of his motion the defendant had contended that the damage claim could be decided in a jury trial but that the validity of the agreement could not be decided in the same action. However, the Appeal Court expressed the opinion that for a commercial action to be triable by jury it is not essential that all the claims be money demands. The cases that were cited by the defendant, where joining of two actions was not allowed, could all be distinguished from this one. They included joining a commercial debt with a civil debt; claims for damages for breach of contract and for slander; claims for debt and for damages for bodily injury; a claim under the Workmen's Compensation Act and an alternative common law claim. The Court felt that in the case in question the appellant was exercising only one right and not joining several causes of action and there was nothing to prevent trial by jury.

The plaintiff's contention was that the claim as to invalidity of the agreement was merely incidental to the alleged falsity of the accusations made by the defendant. Had it been a question of contesting the constitutional validity of a statute, the procedure to be followed is laid down in the Code of Civil Procedure. The plaintiff asked for a declaration that the order in council was invalid as infringing the freedom of trade guaranteed under the Criminal Code and the Combines Investigation Act. The Court of Appeal agreed that it was not a question of asking for annulment of a voidable law but rather it was asking for a declaration that the law does not in fact exist. In the latter case the plaintiff should not suffer for non-compliance. The Court held that Courts which have to apply the law have a duty to see if what is submitted to them as the law is true or not. It was accordingly held that the two claims could be joined in one action. *Shell Oil Company of Canada* v. *Retail Merchants' Association of Canada, Inc.* (1940) 68 Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel), 322.

Sewer Construction Labourers not under Quebec Collective Agreement for Building Industry

A unanimous judgment of the Court of King's Bench sitting on appeals in Montreal on February 28 upheld the decision of Mr. Justice Verret of the Superior Court of Bedford who on May 1, 1939, dismissed an action under the Collective Labour Agreements Act brought by the joint committee in the building industry in the Eastern Townships against the defendent village corporation which refused to pay labourers employed in digging a trench for sewer pipes the 25-cent hourly rate fixed by an agreement binding in the district on labourers in the building industry. The labourers were paid 15 cents an hour and

the claim for balance of wages and damages was $815.39.

In the French version the agreement was declared to cover "l'industrie de la construction" in the district in question, but as the English version was "the building industry" and as all the classes specially mentioned in the agreement are found in the building industry it was apparently intended to regulate only that part of the construction industry and could not be interpreted as dealing with the "construction" of a trench. The rate for labourers was only for those covered by the agreement. This followed the decision of Mr. Justice Forest in Comité Conjoint des Metiers de la Construction v. Toussaint Frères (LABOUR GAZETTE, 1939, p. 748) which decision was upheld by the Quebec Court of King's Bench. *Comité Conjoint de l'Industrie de la Construction du Comte de Sherbrooke v. Corporation du Village de Ste-Pudentienne,* 68 Rapports Judiciaires de Québec, Cour du Banc du Roi, 236.

Quebec Court Upholds Power of Fair Wage Board to Prohibit Reduction of Wages to Minimum Fixed by Board

In an action for recovery of wages pursuant to an order of the Fair Wage Board, Mr. Justice Archambault in the Montreal Superior Court gave judgment for the wages with interest and costs. Before Order 4 of the Fair Wage Board was revised on May 15, 1938, the plaintiff, a motion-picture operator, had received a weekly salary of $25 which was then reduced to $19. Basing his action upon an article of Order 4 which states that if an employee is in receipt of a salary higher than the minimum set by the Board, this higher salary must not be reduced, the plaintiff sued for the difference between $25 and $19 per week for six months, this being the limited period allowed in the Act for recovery of back wages. The defendant argued that the article requiring the payment of a wage higher than the minimum fixed by the Order is ultra vires of the Board, that the employee had signed a document renouncing his right to the back pay and pleaded that business conditions had been unfavourable and necessitated the reduction in salary.

The Judge found that the Board has power to prohibit the reduction of an existing wage-rate which is higher than the ordinary minimum fixed by an order by virtue of the sections of the Act empowering it to make any ordinance regarding fair wages and other labour conditions and declaring such ordinance to be a matter of public order and obligatory on those within its scope. The agreement with the employee for a lower rate he declared null and void since it was made under threat of dismissal and the business circumstances of the defendant, though unfortunate and such that he may not be able to continue in business, did not constitute, in the Court's opinion, a reason for not applying the law. *Evanhoe Ruel vs. Standard Amusement Company and the Attorney General of Quebec,* Superior Court, Montreal, April 12, 1940.

Company Officials not Individually Liable in Quebec for Accident to Employee if not Personally at Fault

An action for recovery of damages for an accident in the course of employment which was brought in the Superior Court of Montreal against officers of a corporation by a machine operator whose hand had been damaged by a circular saw, alleged to be defective and without an adequate guard, was dismissed with costs subject to appeal. It was charged that the defendants had been guilty of negligence and were personally liable both under the Civil Code and various provincial laws and regulations, and it was specifically argued that the Workmen's Compensation Act provides that an action may be brought in such a case against persons other than the employer for a sum in addition to the award under the Workmen's Compensation Act.

The Court found that nothing in the plaintiff's statement could be considered a personal fault of the defendants. It was pointed out that directors and foremen of a company act for it and are responsible to it, and the company alone is responsible for accidents to its employees. In this case the Judge found that the Workmen's Compensation Act applies and that there was no other recourse. *Sylva Beauchamp vs. Jacques Belanger et al,* Superior Court, Montreal, March 27, 1940.

Supreme Court Restores Jury's Verdict and Allows Damages for Death of Trainman in Saskatchewan

The Supreme Court of Canada on February 26, with Rinfret and Kerwin JJ. dissenting, reversed the judgment of the Saskatchewan Court of Appeal and restored the jury's decision awarding $8,000 damages in an action under the Fatal Accidents Act resulting from the death of a trainman which occurred in the course of his employment (LABOUR GAZETTE, 1939, p. 112). Costs were awarded to the plaintiff throughout.

Reference was made to decisions of the House of Lords in which it was pointed out that the question to be decided is whether the proved facts reasonably support the conclusion which has rested upon them. More-

over, a jury verdict should be set aside only if the Appellate Court considers that it could not have been arrived at by reasonable men acting judicially.

Mr. Justice Kerwin agreed with the Chief Justice of Saskatchewan that the question as to how the accident happened is one of pure conjecture and he would therefore have dismissed the appeal with costs. *Danley v. C.P.R.* (1940) 2 Dominion Law Reports 145.

Application for Dismissal of Action for Compensation for Mother of Railway Employee in Saskatchewan Rejected

On March 11 Judge Bryant of the District Court of Saskatoon, allowing costs to the plaintiff, refused to grant an application by the defendant railway company for an Order dismissing an action for workmen's compensation on the ground of admissions made on examination for discovery by the mother of the locomotive fireman for whose benefit the action was launched by the administrator of his estate. The action was brought under the Workmen's Compensation Act, 1911, which applies to most railway employees in Saskatchewan and under which it is necessary to bring an action to recover damages.

The statement of claim alleged that the deceased died as a result of an accident in the course of employment and that his mother was a dependant within the meaning of the Act. The 83-year-old mother who had some small means of her own lived in her son's home and on the examination for discovery she agreed that in a general way her supervision and doing light housekeeping was more or less the equivalent of her board and lodging with the deceased. After the motion questioning her dependency was launched her counsel filed an affidavit to the effect that this answer was made inadvertently and without proper appreciation of the question. While not making a decision on that point the Court expressed the opinion that any service rendered by the deceased's mother at her age would be of the lightest kind and that the question was as to dependency on her son at the time of his death. It was held that the mother's admission as to her own means did not prove that she was not dependent at least in part on her son's earnings and as the Act expressly states that the amount of compensation recoverable is not to be susceptible to reduction by reason of any matter or thing whatsoever the fact that she received a legacy from his estate did not make her ineligible for compensation. It was directed that a separate trial be held on the question of dependency and compensation. *Fisher v. Canadian National Railways* (1940) 1 Western Weekly Reports 583.

Saskatchewan Appeal Court Upholds Farm Labourer's Wage Claim

The Saskatchewan Court of Appeal on January 19 dismissed the appeal of the executor of a farmer's estate against a decision of Mr. Justice Bigelow of the Court of King's Bench who on October 10, 1939, allowed the claim of a farm labourer for $2,879.57, the balance of wages due him by the deceased for whom he had worked from 1922 until the employer's death in 1938. The evidence showed that the deceased did not pay the defendant's wages in cash but liquidated his store bills for supplies and furnished him with some cash while he kept the accounts between them in which he charged the sums so disbursed against the wages with which he credited the plaintiff from month to month. From 1928 to 1931, the wage-rate had been $100 a month during which time the plaintiff's wife gave board to the other farm workers for $25 a month. In 1931, the parties agreed on a reduction to $75 a month and $20 for boarding the men. The plaintiff denied that he had accepted the further reductions indicated in the defendant's books and the Appeal Court agreed with the trial judge that the plaintiff's statement supported by witnesses who had heard the deceased state at various times that the wage was $75 must be accepted. *Borrezee v. Bingham* (Executor of Leonard Estate), (1940) 1 Western Weekly Reports 561.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME XL] JUNE, 1940 [NUMBER 6

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada showed a large increase at the beginning of May, according to returns received by the Dominion Bureau of Statistics from 11,970 firms, each employing a minimum of 15 workers and representing all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 1,117,547 persons, or 22,947 more than in the preceding month. The employment index (with the average in the calendar year 1926, as the base equal to 100) stood at 114·3, as compared with 111·9 at April 1, and 106·2 at the beginning of May last spring. The indexes for May 1 of preceding years are as follows: 1938, 107·4; 1937, 106·3; 1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8 and 1927, 101·8. The latest index was higher than in any other May of the record, except that of 1929.

The industrial expansion indicated at May 1, 1940, was on a greater-than-average scale, according to the experience of the years, 1921-1939; the index of employment, after correction for seasonal influences, therefore gained slightly, rising from 118·5 in the preceding month, to 118·7 at the beginning of May.

Unemployment in Trade Unions.—At the beginning of May, 1940, the percentage of unemployment reported to the Department of Labour by local trade unions stood at 9·6, contrasted with 10·8 per cent of idleness at the beginning of April and with 13·9 per cent at the beginning of May, 1939. The May percentage was based on the reports received from 1,969 labour organizations with a total of 253,541 members.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada for the month of April, 1940, recorded increases over the previous month and also over April a year ago in the average daily placements effected, services showing the highest gains under both comparisons, augmented in the first instance by substantial increases in farming and construction and maintenance, and in the second, in manufacturing. Logging recorded a decline from March, 1940, and mining and construction and maintenance from April, 1939, but none of these was very outstanding. Vacancies in April, 1940, numbered 33,892, applications 71,729, and placements in regular and casual employment 30,497.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget was $17.85 at the beginning of May as compared with $17.76 for April; $17.02 for May, 1939; $17.36 for May, 1938; $17.28 for May, 1937; $15.41 for June, 1933, the low point in recent years; $21.49 for May, 1930; $20.57 for May, 1922; and $26.92 for July, 1920, the post war peak. In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100 was 81·7 for the week ended May 31 as compared with 83·0 for the week ended May 3 and 83·2 for the week ended April 5. Comparative figures on a monthly basis are 83·1 for April, 1940; 73·7 for May, 1939; 80·3 for May, 1938; 85·3 for May, 1937; 63·5 for February, 1933, the low point in recent years; 93·4 for May, 1928; 98·5 for May, 1922; and 164·3 for May, 1920, the post war peak.

Business Statistics.—The latest statistics available reflecting industrial conditions in Canada are given in the table on page 522. The index of the physical volume of business calculated by the Dominion Bureau of Statistics recorded an increase in April over the preceding month but owing to a change in the period covered by the monthly export and import statistics certain of which are used in measuring the level of business operations changes in the index in March and April are somewhat artificial. There were certain important advances recorded in April in the manufacturing group. The ouput of sugar was in considerably greater volume than in

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended May 31, 1940.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending June 1, 1940, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending May 18, April 20 and March 23, 1940; May 20, April 22 and March 25, 1939

(7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

(9) Excluding gold.

(10) Changes in the index for March and April 1940 somewhat artificial owing to a change in the period covered by the statistics of imports and exports.

March and the increase in dairy production was greater than normal for the season. The output of steel ingots was somewhat lower than in March, but much higher than in April, 1939. The output of automobiles and of newsprint were in greater volume in April than in March and greater also than in April, 1939. Information available for May shows a decline in wholesale prices from the figures for April while improvement was recorded by the figures for employment, construction contracts awarded and in the gross earnings of the Canadian National Railways.

Strikes and Lockouts.—The number of strikes and lockouts in May was 22, involving 8,565 workers and resulting in a time loss of 51,997 man working days, as compared with 18 disputes during April, involving 13,807 workers and causing 67,104 days' time loss. Only one dispute in progress during May involved a large number of workers for a considerable period, that of 2,000 artificial silk factory workers at Drummondville, P.Q., which caused a loss of 34,000 man working days. In seven strikes of coal miners in Nova Scotia, however, there were upwards of 3,000 workers and these strikes resulted in the loss of more than 7,500 working days. A time loss of 4,680 days resulted from a dispute of 360 glass factory workers at Ville St. Pierre, P.Q. In April the higher figures recorded for numbers involved and time loss were due chiefly to a dispute of 4,500 women's clothing factory workers in Montreal, P.Q., which resulted in a time loss of 29,000 man working days, and to a dispute of some 6,000 seamen on the Great Lakes and St. Lawrence River which caused a time loss of 10,000 days.

In May, 1939, there were 13 disputes, involving 3,728 workers and causing a time loss of 16,732 man working days. The most important of these disputes were two strikes at Kitchener, Ont., involving 500 rubber factory workers and causing a loss of 10,700 man working days, while two strikes in Nova Scotia involved more than 2,500 coal miners in a loss of 4,600 days.

Of the twenty-two disputes recorded for May, 1940, twenty were recorded as terminated during the month, five resulting in favour of the employees and three in favour of the workers involved; compromise settlements were reached in seven cases; one was partially successful and the results of four were recorded as indefinite. Two disputes involving approximately 2,014 workers, were recorded as unterminated at the end of May. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions affected.

Unanimous Response of Canadian Industry to Urgent War Appeal

The unleashing of the "all-out" offensive of the German forces in Holland, Belgium and France, served only to harden British and French resolve and to immediately accelerate greatly the production of essential war materials. The manifestation of this spirit in Canadian industry was indicated in the prompt and unanimous response from all sections of the Dominion on the part of industrialists and manufacturers to the telegraphic appeals of the Hon. C. D. Howe, Minister of Munitions and Supply, and the Hon. Norman A. McLarty, Minister of Labour.

The first of these messages was sent on May 22 by the Hon. Mr. Howe to all industrialists, manufacturers and contractors who are engaged in the production of munitions, explosives, aircraft, ships, and other vital materials of war. It read:

"Urgency of immediate requirements necessitates all contractors manufacturing munitions of war particularly shells, ammunitions, explosives, weapons and gauges, working day and night shifts including holidays and Sundays until further notice. Kindly relay this message to your sub-contractors and machine tool suppliers."

On June 1, a joint telegram from the Hon. Mr. Howe and the Hon. Mr. McLarty was sent to all contractors thanking them for their immediate and whole-hearted response in expediting production. Amplifying this first appeal, the joint message pointed out that in requesting overtime and holiday work in this emergency the "Government anticipated and desires that such work be paid for in accordance with whatever agreements or arrangements were in effect between the individual employers and their employees with respect to the matter of wage rates for overtime or holiday work prior to the receipt of our telegram of May 22."

Continuing its emphasis on rapid and uninterrupted production, the joint message concluded:

"It is further the desire of this Government that existing legislation regarding industrial disputes be given the broadest possible interpretation in the best interests of the nation and that any misunderstandings between employers and employees which may exist or which may arise be referred at once to the Federal Department of Labour which will investigate the same without delay, and that pending such investigation, work on war contracts must on no account be suspended or interrupted."

Canadian Labour Leaders Re-affirm Support in War Crisis

Equal readiness in rallying to the supreme effort demanded by the war crisis was indicated by Canadian labour leaders in re-affirming their full support.

Mr. Tom Moore, president of the Trades and Labour Congress of Canada, said that the position of the Congress remains the same as at the outbreak of war when full co-operation was pledged the Government in its war program. He declared further:

"We are ready to co-operate at all times in anything necessary for the efficient prosecution of the war effort. On the other hand if any changes from established conditions are required, labour should be consulted as to the need for the changes and the best method of bringing them about."

Mr. A. R. Mosher, president of the All-Canadian Congress of Labour, said that his organization supported the Government's decision to urge industry to push its resources to the limit. But, he said, the work should be distributed among all the labour available.

"Absorption of the unemployed should be a consideration in the speed-up. When we have provided jobs for all these unemployed, then I have no objection to long hours involved in day and night shifts and the seven-day week."

Mr. W. T. Burford, secretary-treasurer of the Canadian Federation of Labour, stated "there can be no question that the vast majority of Canadian workers will do their utmost to increase and to speed up the production of war supplies. Work, work, unceasing work should be the order of the day on Canada's home front, and any trade practice or convention which tends to limit the production or delivery of essential war materials should be scrapped without compunction now, while freedom of decision remains."

Mr. Alfred Charpentier, president of the Confederation of Catholic Workers, wholeheartedly endorsed the appeal to speed up war production. "Our affiliated bodies will be instructed to co-operate with employers in furthering the national effort", declared Mr. Charpentier, who added that "direction should be given from the government to prevent undue fatigue in any modification of present standards so as not to defeat the purpose of the speed-up."

(On page 530 of this issue there is a report of an important conference between the Government and representatives of Canadian Labour organizations.)

Establishment of Labour Supply Committee

Following the appeal to Canadian industry by the Minister of Munitions and Supply, Hon. C. D. Howe, and the subsequent response of manufacturers that they were prepared to operate their plants twenty-four hours a day for seven days a week, the Minister of Labour, Hon. Norman A. McLarty, on May 25 appointed an interdepartmental Labour Supply Committee to facilitate the necessary supply of skilled labour essential to the carrying out of the industrial speed-up campaign.

The Committee is under the chairmanship of Mr. Gerald H. Brown, Assistant Deputy Minister of Labour, and consists of the following members: Mr. H. B. Chase, Director of Labour Relations, Department of Munitions and Supply; Mr. R. A. Rigg, Director of the Employment Service of Canada; Mr. Harry Hereford, Dominion Commissioner of Unemployment Relief; Mr. Humphrey Mitchell, Director of Labour Transference: and Mr. R. F. Thompson, Director of Youth Training.

The functions of the Committee are to investigate and report upon such matters as the probable demand for labour in the trades concerned, and the available supply of industrial manpower and the best methods of increasing this supply and any other ancillary matters which might develop from the speed-up operations.

The Committee convened immediately upon appointment and has held three meetings in which the industrial situation was surveyed and preliminary steps taken to mobilize the required labour supply.

Death of Hon. Norman McLeod Rogers, Minister of National Defence

The Hon. Norman McLeod Rogers, Minister of National Defence, died on Monday, June 10, at 1.25 p.m. as a result of the crashing of an R.C.A.F. Hudson aircraft ten miles west of Port Hope. The Minister was en route to Toronto where he was to address a joint meeting of the Empire and Canadian clubs that day.

In his death in the path of duty the Hon. Norman Rogers became one of the first war casualties of the Canadian Active Service Force of which he was the directing chief. By this tragic event Canada is deprived of those high qualities of leadership and devotion which he was giving without stint to his country in its supreme hour.

This tragedy also claimed the sacrifice of three members of the Royal Canadian Air Force—Flying Officer John James Cotter, Halifax; Aircraftsman Oscar David Brownfield, Big River, Sask.; and Aircraftsman James Edward Nesbitt, Saskatoon.

The Department of Labour of which Mr. Rogers was Minister from October, 1935 to September, 1939 (shortly after the outbreak of war he was appointed Minister of National Defence) knew him as one who brought to his duties not only a thorough academic knowledge of the inter-play of social and economic factors, but also a profound understanding of those vital human factors which enter into the administration of a department that deals so intimately with the lives of men and women.

Born in Amherst, Nova Scotia, Hon. Mr. Rogers received his early education there, and then entered Acadia University in 1912. Following a period of overseas service in the first Great War he completed his studies at Acadia University in 1919, graduating with the degree of B.A. At this time he was elected to a Rhodes scholarship at Oxford where he studied until 1922 receiving degrees in History, Political Science and Law. On his return to Canada he was appointed Professor of History at Acadia University and was later admitted to the Nova Scotia bar. In 1927 he became Secretary to the Right Hon. W. L. Mackenzie King in his capacity as President of the Privy Council. From 1929 to 1935 he was Professor of Political Science at Queen's University. In 1934 he served as counsel for the Government of Nova Scotia before the Royal Commission of Economic Enquiry. Hon. Mr. Rogers had written many articles for Canadian periodicals on economic and constitutional policies.

In announcing the tragedy to the House of Commons the Prime Minister, Hon. W. L. Mackenzie King stated the circumstances under which the late Minister had left for Toronto—how with the threatening news of Italy's imminent entry into the war the Minister was considering the abandoning of his Toronto engagement and how it had been decided that he would proceed on his trip in order to allay any undue alarm that might result from such cancellation. The Prime Minister then continued to a hushed House as follows:

"I received this afternoon the intimation that my colleague and very dear friend had left this morning about eleven o'clock to go to Toronto keep his engagement. He had been working on departmental work until the moment he left. At twenty minutes to three this afternoon word came that the plane in which the Minister of National Defence and others were flying to Toronto had crashed somewhere near Newcastle. It is my very sad duty to have to inform hon. members of the house that among others who were killed in that accident was my friend the Minister of National Defence.

"I should say to the house that when we had concluded our conversation, the last words Mr. Rogers addressed to me were, 'Very well, I will carry on'—carry on with the engagement that he had made. I feel that these are the words that he would like me to give to my colleagues, to all hon. members of this house and to the people of the country at this time. Come what may, a solemn obligation rests upon the shoulders of all of us, and that obligation is to carry on, no matter what the circumstances may be.

"This house and the country will appreciate to the full, I believe, how great is the loss Canada has sustained in the death of the Minister of National Defence. I have known many noble characters in my life, but I believe I speak not only my own feelings but the feelings of my colleagues and of many others of those around me when I say that I have never known a more faithful public servant. I do not know that I have ever known a better administrator of public affairs. I have never known a more disinterested servant of the state, nor have I ever known a more beautiful nature or a nobler soul than that of Norman Rogers."

The Hon. R. B. Hanson, Leader of the Opposition; the Right Hon. Ernest Lapointe, Minister of Justice; Mr. M. J. Coldwell, Member for Rosetown-Biggar; and Mr. J. H. Blackmore, Member for Lethbridge, also voiced sincere tribute to the deceased Minister.

On June 12 a state funeral was accorded the late Minister of National Defence, the service being conducted in the Hall of Fame, House of Commons.

Canada's Declaration of War Against Italy

On June 10, following the declaration of war by Italy on the United Kingdom and France, the Prime Minister, Hon. W. L. Mackenzie King, moved, seconded by the leader of the Opposition, Hon. R. B. Hanson, the following resolution.

"Whereas Italy has declared her intention to enter the war on the side of Germany and against the allied powers; and,

"Whereas a state of war now exists between the United Kingdom and France on the one hand and Italy on the other; and

"Whereas at the outbreak of war the parliament of Canada decided to stand at the

side of the United Kingdom and France in their determined effort to resist aggression and to preserve freedom;

"It is expedient that the houses of parliament do approve the entry of Canada into a state of war with Italy, and that this house does approve the same."

Supported by all groups in the House of Commons the motion was unanimously agreed to and was subsequently similarly passed in the Senate. A Royal proclamation was published in a special issue of the *Canada Gazette* on June 11, announcing a state of war between Italy and Canada.

Contracts Placed By Department of Munitions and Supply

According to an official statement issued on June 3, of the total value of contracts placed by the Department of Munitions and Supply and its predecesssor purchasing bodies since July 14, 1939, less than three per cent was placed in the United States.

Of the total contracts amounting to over $193,000,000 placed up to the end of April, $5,500,000 were placed in the United States. In addition to the orders placed directly in the United States by the Department, substantial additional orders have been placed there by manufacturers who must obtain abroad a portion of the raw materials which they require in order to complete the orders which they have received.

Purchases in the United States on behalf of the allies are made by the British Purchasing Commission which has placed contracts there for a billion dollars.

Of the contracts placed by the Department of Munitions and Supply to date, approximately eight per cent of the total dollar value of the contracts has been placed in England. Thus, of the sums being expended by the Department, close to ninety per cent goes to Canadian firms.

Prevention of Industrial Accidents in War Time

With Canada's increasing war efforts, the speeding up of industry brings along additional accident hazards, according to a memorandum to industry issued recently by the Industrial Accident Prevention Associations of Ontario. New employees, if not properly trained and supervised, may readily become accident hazards, it was pointed out. Both old and new hands need careful instruction and supervision, the bulletin stated.

Warning was given that no new man should be placed in charge of a machine until he has shown, under supervision, that he is qualified for the job and can work safely. Mechanical equipment should be checked frequently to ensure that it is in safe working condition and that machine guards are kept in place.

Suggestions for ensuring the safety of new employees listed by the Accident Prevention Associations include:

1. Explain the safe way to do the job and explain what it means to the worker.
2. Show him how the job can be done safely by means of "slow motion" so that each step will be observed and understood.
3. Test him to make sure that he really understands how to do the job properly and safely.
4. Supervise and check him to ensure that he is following his instructions carefully.

It was pointed out that the cost of industrial accidents in Ontario for April, direct and indirect, totalled over $2,600,000, more than $650,000 being awarded during April by the Workmen's Compensation Board of Ontario for compensation and medical aid. It was calculated that the indirect cost of an accident costs the individual four times the direct cost. "Now, as much or more than ever before, accident prevention is vital to industry," the statement concluded.

Statistics of Relief Recipients for April

The grand total of all classes of persons on urban and agricultural relief across Canada in April of this year was 752,000, according to the preliminary results from the National Registration of all direct relief cases, carried out for the Department of Labour by the provinces and municipalities in April. The grand total for April, 1940, compared with the same month of 1939, showed a decrease of 25·2 per cent, while compared with April, 1938, the Dominion figure was less by 26·6 per cent: both urban and agricultural relief showed decreases from a year ago.

Unemployed but fully employable persons on relief in April this year numbered 166,000, a decrease of 3·9 per cent from the revised March total. The figure for April this year showed a decrease of 11 per cent from April a year ago, and a decrease of 1·6 per cent from April, 1938.

A total of 624,000 persons were receiving non-agricultural relief in April, a decrease of 3·8 per cent from the corrected figure for the previous month: April, 1939, had shown a slightly smaller decrease over March, 1939. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a decrease of 9 per cent from the figure for April, 1939, and a decrease of 1·3 per cent from the figure for April two years ago.

Due to improved crop conditions in 1939 in the Prairie Provinces, the Dominion total on agricultural relief in April this year was 60 per cent lower than April, 1939, and more than 67 per cent less than in April, 1938, although April, 1940, showed a minor increase —3·5 per cent over the previous month. Twenty-six thousand farmers who, together with their dependents, accounted for a farm population of 128,000, were receiving agricultural relief for subsistence in April. Figures for April for Saskatchewan alone showed decreases of 68 per cent and 75 per cent from April, 1939, and from April, 1938, respectively; the Saskatchewan total of persons on agricultural relief represented 66 per cent of the Dominion total in April this year.

Report of Dominion Commissioner of Unemployment Relief

In accordance with the provisions of The Unemployment and Agricultural Assistance Act, 1939, a report on its operations during the fiscal year 1939-40 has been submitted to Parliament. The administration of the Act was vested in the Minister of Labour, Mr. Harry Hereford being the Dominion Commissioner of Unemployment Relief. The report gives detailed relief statistics as reported by provinces and federal departments for the fiscal year.

In addition to a comprehensive review of relief administration under the 1939 Act, the report gives tabulated summaries of Dominion disbursements under the relief legislation in effect during the years 1930-38 inclusive. The total of the Dominion's disbursements (exclusive of loans and advances) under relief legislation from 1930 to the close of the fiscal year 1939-40 amounted to $377,964,890.

The report details the various phases of relief administration including direct relief, national forestry program, rehabilitation of older unemployed, transportation facilities into mining areas and development of tourist highways, aid in the drought areas, relief settlement, and relief to single unemployed persons.

Measure for Alleviation of Unemployment and Agricultural Distress

On May 31, 1940, the Minister of Labour moved that the House of Commons go into committee to consider the following resolution:—

"That it is expedient to bring in a measure to provide assistance in the alleviation of unemployment and agricultural distress out of moneys appropriated by parliament, and for such purpose to supplement the measures taken by the provinces towards providing assistance to those in need, establishing unemployed persons in employment and training and fitting suitable persons for productive occupations, and also to provide financial assistance to the provinces by way of loan, advance or guarantees out of unappropriated moneys in the consolidated revenue fund, and for the appointment of necessary officers, clerks and employees."

In making the motion the Minister stated that the Bill proposed to be introduced would provide legislation similar to The Unemployment and Agricultural Assistance Act of 1939, which had expired at the end of the fiscal year.

Prime Minister's statement re unemployment insurance

The Speech from the Throne, delivered in the Senate Chamber on May 16, stated that a resolution would be introduced for an amendment to the B.N.A. Act giving power to the Federal Government to pass an Unemployment Insurance Act. The passage in question reads:

"As a contribution to industrial stability in time of war, and to social security and justice in time of peace, resolutions will be introduced for an amendment to the British North America Act which would empower the Parliament of Canada to enact at the present session legislation to establish unemployment insurance on a national scale."

In the House of Commons on May 20, during the debate on the Speech from the Throne, the Prime Minister said:

"I am sure the members of the house will be pleased to know that the government has received the assurance of practically all the provinces that they will be prepared to support the administration in seeking an amendment to the British North America Act which will enable us forthwith to introduce an unemployment insurance act in this house. I am perhaps expressing the matter in too technical terms when I say that they approve an amendment to the British North America Act. What the provinces generally have approved is the enactment of the federal government of a national unemployment insurance scheme. This assurance has come from the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and British Columbia. I have a letter received this week from the Premier of Alberta, the only province whose name I have not mentioned. It expresses the view that the government of Alberta would like to have the report of the dominion-provincial relations commission or a copy of the bill itself before expressing a final opinion However, there is not in Premier Aberhart's letter any statement which would lead one to believe that if such a measure were introduced in this house, exception would be taken to it by the members from that particular province.

May I say that the government feels that with the backing of all the provinces I have mentioned—the letters will be tabled later on—we are justified in taking this step at this time. We feel moreover that it is desirable to take the earliest possible opportunity to introduce the measure now that assurance has been given so generally by the provinces. A time of war, when there is much in the way of employment

in heavy industry, offers perhaps the best of all opportunities to begin a measure of this kind. Contributions will come in more readily at such a time. Then, if unemployment comes, as it may once the war is over, there will be upon the statutes a law under which men will be able to obtain their allowances."

On June 18 the Prime Minister announced the agreement of all provinces to the amendment.

Trend of direct relief in Canada

Finally revised statistics from the National Registration, of the total numbers on direct relief, to which the Government of the Dominion contributes, show that the average monthly number assisted in the quarter January to March, 1940, fell to 746,583 persons, from 1,007,577 in the same quarter of 1939 and 1,034,613 in 1938. Numbers on urban relief for the first three months of this calendar year averaged 635,963, a reduction of 7·9 per cent from the average of the first quarter a year ago, and of 1·6 per cent from two years ago. Numbers on agricultural relief, that is to say, farmers and their dependents, showed a monthly average of 110,620, which was 65·1 per cent less than in 1939 and 71·5 per cent less than in 1938. The decreases in urban and agricultural relief combined, from the average of the first quarter of 1939, was 25·9 per cent, and from the first quarter in 1938, was 27.8 per cent.

Only two of the provinces distributing direct relief showed an increase over the year before in the monthly average number assisted in the first quarter of the present year, Prince Edward Island and Quebec. In the case of the Province of Quebec a reversion to direct relief to alleviate the effects of unemployment, from the policy of large scale public works which had been in effect for about two years, had raised substantially the numbers requiring direct relief in that province. This change in policy became effective in August, 1939, and although the volume of employment in the province in the late months of 1939 and the early months of 1940 showed improvement over the year before, the numbers on direct relief in the first quarter of 1940 averaged 52·2 per cent in excess of those of the year before, due to the change in policy noted. In urban relief alone the increase in the Province of Quebec was 48·3 per cent, and to a considerable extent this increase offset reductions in other provinces.

Fully employable persons on urban relief averaged 169,084 in January to March, 1940, a reduction of 10·1 per cent from the first quarter of 1939, and of 2·1 per cent from that of 1938. Fully employable persons include heads of families, individuals without dependents and dependents 16 years of age and over who may be regarded as seeking employment: wives, minor children and aged or infirm dependents are not regarded as eligible for employment. Numbers on urban relief as here given include both fully employable persons and their dependents and unemployable persons and their dependents, but, of course, exclude farmers and their families on relief because of crop failure.

The percentage distribution among the provinces of the monthly average number on urban relief in January to March, 1940, was as follows: Prince Edward Island, 1·4; Nova Scotia, ·7; Quebec, 33·8; Ontario, 32·6; Manitoba, 7·8; Saskatchewan, 9·6; Alberta, 4·8; British Columbia, 9·3; (as the Province of New Brunswick does not contribute to direct relief, figures for that province are not included). In the comparable months of 1939 Quebec showed only 21·0 per cent of the Dominion total and Ontario 41·4 per cent. The gross increase in the Province of Quebec, as well as the substantial decrease in the Province of Ontario, was responsible for the shift in the proportions of the problem located in these two provinces from 1939 to 1940.

Complete war time control in Great Britain

On May 22, in view of the grave situation confronting the country, an Act passed both Houses of the British Parliament, giving total powers to the Government enabling it to take complete control of all persons and property in Great Britain.

Under the Act the Government may:

Direct any person to perform any services required, the pay being "on the basis of the job".

Control all property, including land.

Take over industrial establishments, controlling wages and profits, or ordering firms, if necessary, to continue at a loss.

Control the finances of the country.

The bill was introduced in the House of Commons by the Lord Privy Seal, Mr. Clement Attlee, who said that the situation was so grave that all the resources of the country had to be mobilized. "Every private interest must give way to the urgent needs of the community", he declared.

In a radio broadcast in which he outlined the new powers given the Government under the Act, Mr. Attlee said:

"Parliament has given to the Government full power to control all persons and property. There is no distinction between rich and poor, between worker and employer, between men and women. The services and property of all must be at the disposal of the Government in the common task. This does not mean that everyone should give up what he is doing, or that everyone's property will be immediately seized. On the contrary everyone should continue doing his or her ordinary work until instructed otherwise.

"The Government now has the right to call upon any citizen to do the work that is

most immediately required in the national interest. It has power to control any business, factory, mine, shop, or bank, and to order it to be carried on in the way desired. It can take property of any kind. In the exercise of these powers the Government will of course do its utmost to avoid injustices to individuals. Claims for compensation will have to be considered in due course."

Mr. Attlee concluded: "I want to appeal to all of you to do your utmost to help. Above all, don't get rattled; there is no justification for it. With brave hearts and cool heads we shall come through this ordeal triumphantly. Everyone must contribute to our effort; there must be no laggards. Victory is our goal; we must and shall attain it."

On June 6 "absolute assurance" was given by the British Minister of Labour, Mr. Ernest Bevin, that Britain's new measures controlling the employment of workers would be abandoned once the war was over.

28th Convention International Association of Public Employment Services

At the Twenty-Eighth Annual Convention of the International Association of Public Employment Services of the United States and Canada, held at Kansas City, Missouri, on May 14 to May 17, 1940, V. C. Phelan, Director of Registration and Assistant Director of the Employment Service in the Department of Labour, at Ottawa, was elected President for the forthcoming year.

The Association is composed of officials of free public employment offices in Canada and the United States, and since the introduction of unemployment insurance in the United States, due to the co-ordination of the employment offices and the administration of the unemployment insurance features of the Social Security Legislation, many state and federal officials from the unemployment compensation staffs have also actively interested themselves in the work of the Association. During the four-day convention occupational counselling, employment service technique, promotion of the use of public employment services, lay-out and functioning of various types of employment offices, relationship of unemployment compensation administration to employment service work, and selection of personnel, were the chief subjects of addresses and of panel discussions.

The Association now numbers nearly 8,000 members, and there were present at the Kansas City Convention about 800 delegates.

Mr. G. E. Tomsett, Provincial General Superintendent of the Employment Service for Saskatchewan, was also present, representing Canada, Moreover, Major Jas. Neish, Provincial General Superintendent of the Employment Service for Manitoba, is an executive member of the Association for the forthcoming year, having been elected for a two year term at New Orleans in 1939.

The proceedings of the Convention, containing addresses given and a report on the panel discussions, are published by the Association itself and will probably be available in July of this year.

The 1941 Convention has been fixed for Denver, Colorado, early in June. It will be recalled that in 1938 the Association met at Ottawa.

Industrial Relations Policies in American Companies

A study of the changing personnel policies of American business was conducted by the National Industrial Conference Board of New York between May and October, 1939, in which 2,700 companies employing nearly five million workers co-operated by supplying data.

(Studies in Personnel Policy No. 20. National industrial Conference Board, Inc., N.Y. 1940.)

Over 82 per cent of the companies and 57 per cent of the workpeople concerned in the study were in the manufacturing industries. Some of the more important results of the study are compared with figures gathered by the same agency in 1935.

The growth of trade union activity is demonstrated by the fact that of the 2,452 companies reporting in 1935, only 11·7 per cent had agreements with trade unions while in 1939 56·8 per cent had entered into union agreements. Of this number the report states that:

> In 29·2 per cent of the companies there is collective dealing with unions affiliated with the A.F.L., 20·1 per cent of the establishments have dealings with unions affiliated with the C.I.O., and 15·5 per cent with independent unions. Other unions or groups, including the railway brotherhoods and various types of works councils and shop committees, have dealings with 4·4 per cent of the co-operating companies.

Some companies treat with more than one union and may be represented in the figures for two or more groups but of the employees of all companies reporting, the A.F.L. unions represent 50·6 per cent, the C.I.O. unions 36·2 per cent, independent unions 44·9 per cent and other unions or groups 14·6 per cent.

The trend towards shorter hours of work is shown by the increase in the proportion of reporting companies employing factory workers on a five-day week from 57·3 per cent in 1935 to 67·4 per cent in 1939.

The practice of granting annual holidays with pay has been extended, 46·4 per cent of the companies providing yearly holidays for workers paid at an hourly rate as compared with 17·9 per cent in 1935.

3450—2½

CONFERENCE ON WARTIME LABOUR RELATIONS

Organized Labour Confers With Government on "Speed-Up" of War Production—Declaration of Principles Governing Industrial Relations, and Labour Representation on War Boards.

ONE of the most important events in connection with Canada's rapidly accelerated program of war production occurred on Thursday, June 13, when the Prime Minister, Right Hon. W. L. Mackenzie King, held a conference in his office with the representatives of Canadian Labour. In addition to the Prime Minister the following members of the Cabinet were present: Hon. Norman A. McLarty, Minister of Labour; Hon. C. D. Howe, Minister of Munitions and Supply; and Hon. T. A. Crerar, Minister of Mines and Resources.

Labour was represented by a large delegation comprising a cross section of trades and industries and particularly those unions of workers engaged in the production of war material. The labour organizations represented and their chief officers present were:

Trades and Labour Congress of Canada—Mr. Tom Moore, president, Mr. Arthur D'Aoust, vice-president, and Mr. R. J. Tallon, secretary-treasurer.

All-Canadian Congress of Labour—Mr. A. R. Mosher, president, Mr. Norman Dowd, secretary, and Mr. M. M. Maclean.

Confederation of Catholic Workers of Canada—Mr. Alfred Charpentier, president, and Mr. Maurice Doran, vice-president.

Dominion Joint Legislative Committee of Railway Transportation Brotherhoods—Mr. A. J. Kelly, chairman, and Mr. W. L. Best, secretary.

Canadian Administrative Committee on Industrial Organization—Mr. C. H. Millard.

At the conference, which was conducted with frankness and friendly understanding, discussion centred on the following chief factors in labour's willing participation in the speed up:

(1) The declaration by the Government of a definite policy governing the relations between employers and employees in the national effort.

(2) Labour representation on bodies determining wartime industrial policy.

(3) Amending the Industrial Disputes Investigation Act to rescind the strike vote provision.

(4) Establishment of a national labour supply council.

(5) That the Department of Labour be the channel through which all matters concerning labour should be dealt with.

Mr. Moore, who was the chief spokesman of the delegation, prefaced the proceedings by voicing the deep regret of labour on the tragic death of the Hon. Norman McL. Rogers, Minister of National Defence and former Minister of Labour. "At all times he put himself at our convenience" stated Mr. Moore, "and he never set himself up as being superior to those with whom he was conferring."

The Prime Minister, in acknowledging this tribute, declared: "I can think of nothing he would value more than this tribute for there was no part of his life that he valued so much as that intimate association he enjoyed with labour."

With reference to the conference, Mr. Moore stated that the various sections of labour were present to ascertain "those things you want us to do" and to remove any difficulties or misunderstandings.

He felt that the co-operation which had been offered by organized labour, at the beginning of the war, had, in large measure, been frustrated as a result of the attitude of certain employers. Despite the willingness of the organizations represented at this meeting to assist in the war effort, they had encountered "stone walls."

Upon the Prime Minister's inquiry as to the nature of the obstacles, Mr. Moore referred to conferences he had had with the Hon. Mr. McLarty, Minister of Labour and the resultant notations subsequently recorded by the Minister.

At this juncture the Minister of Labour summarized the basis of the discussions with Messrs. Moore, Mosher, Barrett and Charpentier, as follows:

(1) That the order of the National Defence Department respecting priority of employment should be abrogated.

(2) That such assurance as is possible should be given by the government that labour would recover those rights and privileges which it was prepared to surrender in the present emergency.

(3) That longer hours should be put into effect only where it becomes apparent that a labour shortage exists which precludes the use of additional shifts, and should apply only to industries engaged in the production of munitions and supplies.

(4) That dilution of labour supply by the employment of females should be limited to cases in which it would be necessary.

(5) That the government should issue a statement setting forth the present rights of labour.

(6) That an industrial advisory council should be constituted, consisting of representatives of labour and employers, with a Chairman to be selected by the government, to advise upon labour problems connected with the war.

(7) That Sunday could be included as a working day provided employees were given one free day a week.

(8) That as far as possible employers and employees should enter into their own agreements as to additional hours of labour and other working conditions; if, however, they were unable to effect agreements independently, reference would be made to the National Industrial Advisory Council.

After the presentation of the memorandum by the Minister of Labour the Prime Minister observed that in his opinion the points enumerated by Mr. McLarty would not, in principle, present any difficulty, in so far as the government were concerned.

Continuing Mr. Moore stated that the difficulty was not one of principle, but one of application to the industrial field. He asserted that employers in many instances had refused to co-operate with organized labour.

The Prime Minister, pointing out that it was a war for freedom, asserted that in so far as he had any voice the hard won freedom of labour would be maintained. He emphasized that it was better not to proceed by coercion if the results could be achieved otherwise.

Declaration of Principles

The Prime Minister then stated that he was quite prepared to have an Order-in-Council issued setting forth the principles which should govern industrial relations in wartime "as an obligation that should be lived up to by all parties concerned."

Mr. Moore replied that it was his understanding that such a statement had been prepared. "But that declaration has never been issued and we have been left without that protection", he stated.

The Prime Minister admitted freely that it had been the intention of the Government to issue a statement of principles, at an earlier date, that the Minister of Labour had brought the matter up on several occasions, but that as a result of other problems relating to the war, there had not been time to give the matter the attention it deserved. "I must thank you for your forbearance and understanding of the situation" the Prime Minister added.

Recognizing the burden on the Prime Minister, Mr. Moore assured him that the delegation had not come in a spirit of criticism but animated by the desire to help to create conditions in which organized labour could best co-operate in the common cause.

Labour Representation on War Boards

Referring to the matter of war boards Mr. Moore stated it had been understood that labour would be represented on such. But there had been no labour representation on the War Supply Board. The new Department of Munitions and Supply had a Labour Relations Branch, headed by Mr. Howard Chase. The latter's position was not, however, representative of labour, but he was rather a labour relations officer whose primary duty was to safeguard the purchasing program. This, in the view of the organizations represented at the meeting, was not satisfactory or sufficient. He considered that lack of proper liaison between the Departments of Munitions and Supply and Labour had resulted in misunderstandings and unsatisfactory conditions.

"There is a channel through which complaints should be made and that channel should be the Labour Department," stated Mr. Moore, who added that it was agreed at the conference last October that the Labour Department should deal with matters which concern labour.

The Minister of Munitions and Supply observed that "it should be recognized that the problem of producing munitions is somewhat differently based along lines that should not apply on domestic production. He pointed out that Mr. Chase was now acting as a liaison between his department and the Department of Labour and he had been instructed to report to the Minister of Labour.

Mr. Moore drew attention to the difference between labour being given a place on boards which decided policy, and "of being merely used as part of the administrative machinery." He expressed the view that organized labour should be represented on the executive committee of the Departmnt of Munitions and Supply.

Mr. R. J. Tallon (Secretary of the Trades and Labour Congress of Canada) stated that co-operation between unions and managements was required and the development of machinery for continuous co-operation to prevent crises from arising.

The Prime Minister agreed that co-operative machinery should be devised that could assist in preventing difficulties. The government would give early consideration to the representation of labour upon boards dealing with policy.

Mr. Moore said that organized labour could be of great assistance where employers reported the existence of labour shortages. Cer-

tain employers stated such shortages to exist merely because they were determined not to admit union organization, and submit to union conditions. He cited the shipbuilding industry as one where the experience and knowledge of labour organizations could have prevented difficulties which had arisen, and which had subsequently necessitated use of the I.D.I. Act.

The Prime Minister said that he assumed that labour organizations would not wish to take advantage of war conditions to advance their claims.

Mr. Mosher, president of the All-Canadian Congress of Labour, said that Mr. Moore had also expressed the views which his own organization held. He hoped that the government would endeavour to induce reactionary employers to co-operate with organized labour.

Mr. Millard said that the C.I.O. represented certain basic heavy industry. In their view, labour would go all the way in co-operation in the war effort, but they wanted to know that their rights were being protected and that employers would co-operate with them. The organization of labour was an assistance in the war effort.

Mr. Charpentier, president of the Confederation of Catholic Workers, also endorsed Mr. Moore's expression of view. He emphasized the part that organized labour could play in the avoidance of strikes where employers would co-operate. Unfortunately some employers refused to do so and labour organizations were blamed for strikes for which they were not responsible. The Catholic syndicates were most willing to co-operate in the war effort.

Industrial Disputes Investigation Act

Referring to the extension of the Industrial Disputes Investigation Act to war industries, Mr. Moore was of the opinion that the provisions of Section 16 requiring a strike vote before a Board could be set up should be rescinded. The provision increased the tension and made conciliation more difficult.

Mr. Mosher suggested that it might be provided that applications for Boards should be granted where responsible labour organizations had endorsed such applications.

The Prime Minister suggested that the mistake should not be made of considering all employers as being alike. The unfortunate part was, however, that bad employers tended to drive out good employers. He said that the government did not propose to condone the action of any employers who tried to take advantage of war conditions to lower standards of employment in their industries.

Mr. Moore expressed the hope that the government, even if higher costs were involved, would consider favourably for war contracts, firms which were known to maintain a high standard of labour conditions.

The Prime Minister asked the meeting to try to appreciate the difficult position of the Minister of Munitions and Supply. He emphasized the seriousness of the present situation, and stated that only a spirit of co-operation would achieve victory.

Mr Moore emphasized "the stake of labour in this war." He said that not only was labour contributing in war production, but that it was also from the great mass of workers that the fighting forces were recruited. In addition, Mr. Moore stated it was recognized that the entire structure of the free labour movement was now menaced.

Before the conference adjourned the Prime Minister stated his intention of making an early statement on these matters in the House of Commons.

Minimum Restaurant Wages in New York State

It was announced recently by Miss Frieda S. Miller, Industrial Commissioner of New York State, that a directory minimum wage order affecting approximately 50,000 women and minors in the restaurant industry in New York State would become effective June 3. The basic hourly rates of 20 cents for table waitresses and 30 cents for women and minors in non-service occupations, unanimously recommended by a wage board composed of employers, workers and representatives of the public, were accepted by Miss Miller after public hearings throughout the State.

"In these perilous times when there is already talk of lower labour standards, the restaurant industry has taken a long step in the other direction," said Miss Miller. "Restaurant employers for the most part recognize that the minimum wage order will undoubtedly have the same kind of stabilizing effect on their industry as the other orders have had on the laundry, beauty service, confectionery and cleaning and dyeing industries.

"That a majority of the restaurateurs will be ready for the order on June 3 is shown by the number who have already consulted the Division of Women in Industry and Minimum Wage about necessary adjustments. Copies of the wage order have already been mailed to restaurant owners throughout the State.

"As a matter of fact, our Minimum Wage Law provides for the directory period in order to give employers a chance to make adjustments to the new wage rates. During this educational period our investigators not only inspect establishments but act as instructors for employers who need help. The penalty for not paying the minimum wage is publication of names of violators under the directory order."

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From approximately 1,725 employees of the Trenton Steel Works, Limited, the Eastern Car Company, and the New Glasgow plant of Standard Clay Products, Limited. The employees are members of Local 1231, Amalgamated Association of Iron, Steel and Tin Workers of Steel Workers' Organizing Committee. The dispute with each company arose in connection with the employees' request for increased wages. Two Boards of Conciliation and Investigation were established in connection with this application. One Board will deal with the dispute between the Standard Clay Products, Limited, and its employees, and is composed as follows: Mr. George Patterson (formerly a County Court Judge), of New Glasgow, N.S., chairman, appointed on the joint recommendation of the other Board members; Mr. George D. McDougall, of New Glasgow, N.S., nominated by the company; and Mr. Drummond Wren, of Toronto, Ontario, nominated by the employees. The second Board will deal with the disputes involving the Trenton Steel Works, Limited, and the Eastern Car Company, and their employees. Following is the personnel of this Board; Professor Norman A. M. MacKenzie, of Toronto University, chairman, appointed on the joint recommendation of the other Board members; Mr. Russell McInnes, of Halifax, N.S., nominated by the employers; and Mr. Drummond Wren, of Toronto, nominated by the employees.

(2) From employees of the Consumers Gas Company of Toronto, being members of the National Union of Domestic and Industrial Gas Workers. Approximately 700 employees are stated to be directly affected by the dispute, which relates to the employees' request for an agreement including increased wages.

(3) From 125 employees of the Algoma Steel Corporation, Limited, being engineers, firemen, conductors and brakemen engaged in switching service, members of the Brotherhood of Locomotive Firemen and Enginemen and the Brotherhood of Railroad Trainmen, respectively. The employees' request for revision of wage rates is stated to be the cause of the dispute.

(4) From approximately 120 employees of the Canadian Car and Foundry Company, Limited, in the Aeronautical Division of its Point St. Charles Plant, being members of Lodge 712, International Association of Machinists. The dispute relates to the matter of wages and classification of employees.

(5) From approximately 400 employees of the Canadian Vickers, Limited, being machinists and aircraft production workers, members of Lodge 712, International Association of Machinists. The dispute concerns the question of wage rates. A Board of Conciliation and Investigation was established on June 8 to deal with this dispute and with the last mentioned case, i.e., the dispute between the Canadian Car and Foundry Company, Limited, and the employees in the Aeronautical Division of its Point St. Charles Plant. Members of the Board were appointed as follows: On the recommendation of the two companies, Mr. D. A. Paterson, of Montreal, P.Q.; on the employees' recommendation, Mr. J. A. McClelland, of Valois, P.Q. These two members will confer looking to a joint recommendation for third member who will be chairman of the Board.

(6) From 140 employees of the John Inglis Company, Limited, Toronto, Ontario, being boiler makers, iron ship builders, welders and machine hand helpers, members of Local 637, Brotherhood of Boiler Makers, Iron Ship Builders, Welders and Helpers of America. The dispute relates to the employees' request for an agreement including increased wages and union recognition.

Boards Established and Other Proceedings

A Board of Conciliation and Investigation was established by the Minister of Labour on May 8 to deal with a dispute between the Davie Shipbuilding and Repairing Company, Limited, at Lauzon, P.Q., and its mechanics, helpers, labourers, etc. (LABOUR GAZETTE, May, 1940, page 415). The personnel of the Board is as follows: Honourable Mr. Justice J. G. Gillanders, of Toronto, Ontario, chairman, appointed on the joint recommendation of the other Board members; Mr. F. Curzon Dobell, of Montreal, P.Q., appointed on the company's recommendation; and Mr. Tancrède Ethier, K.C., of Hull, P.Q., appointed on the employees' recommendation.

A Board was established by the Minister on May 30 to deal with applications received from (1) employees of the Acadia Coal Company, Limited, at Stellarton, N.S., and (2) employees of the Old Sydney Collieries, Limited, at Sydney Mines, N.S. (LABOUR GAZETTE, May, 1940, page 415). The employees in each case are members of the United Mine Workers of America, District 26. Board mem-

bers have been appointed as follows: on the employees' recommendation Mr. P. G. Muise, of New Waterford, N.S; on the companies' recommendation Mr. Lionel Forsyth, of Montreal, P.Q. Messrs. Muise and Forsyth will confer looking to a joint recommendation for third member who will be chairman of the Board.

In connection with the application received from employees of the Sydney and Louisburg Railway Company, at Glace Bay, N.S., being members of the United Mine Workers of America, District 26, (LABOUR GAZETTE, May, 1940, page 415), a protest against the establishment of a Board in this case was made to the Department of Labour on behalf of the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen, it being contended that the employees concerned (Glace Bay roundhouse employees and other classifications) desired these brotherhoods to represent them in any negotiations with the company. A vote taken under the supervision of the Department of Labour, with scrutineers from the U.M.W.A. and the two railway brotherhoods present, showed that a majority of the employees concerned desired that the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen should be recognized as the bargaining agency on behalf of the employees.

An application for a Board received during December, 1939, from employees of the City Engineer's and Waterworks Departments of the City of Edmonton, being members of the Edmonton Civic Employees Federal Union No. 30, (LABOUR GAZETTE, December, 1939, page 1207), was withdrawn on May 15, a settlement having been reached as a result of mediation by an officer of the Department of Labour.

An adjustment was also reached as a result of departmental mediation in the case of a dispute between the Canadian Pacific Railway Company and certain of its employees at Britt and Jack Fish, Ontario, being clam tower operators, riggers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, March, 1940, page 198). The application for a Board was withdrawn early in June.

It was reported in the LABOUR GAZETTE for April, 1940, page 320, that an application for a Board had been received from employees of the McGillivray Creek Coal and Coke Company, Limited, and the International Coal and Coke Company, Limited, at Coleman, Alta., the majority of whom were stated to be members of Coleman Local Union No. 2633, United Mine Workers of America. It developed, however, that an inter-union dispute was involved, both the United Mine Workers of America and the Coleman's Miners Association claiming to represent the majority of the miners. At the request of the two organizations an officer of the Department of Labour supervised the taking of a secret ballot to determine which union the employees desired to represent them in negotiations. A substantial majority voted in favour of the United Mine Workers of America, and this union, on behalf of the employees, subsequently negotiated a new agreement with the companies.

The department was advised early in June that an agreement respecting wages and working conditions had been reached between the various grain elevator companies at the Head of the Great Lakes and their employees, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The agreement is the same as that recommended by the Board of Conciliation and Investigation which dealt with this dispute recently (LABOUR GAZETTE, February, 1940, page 102), with the exception that the companies agreed to an increase of 5c. an hour in the overtime rate, together with other minor changes.

Report of Board in Dispute between Burrard Dry Dock Company, Limited, and its Machinists, Plumbers and Sheet Metal Workers

A unanimous report has been received from the Board of Conciliation and Investigation established by the Minister of Labour to deal with wages disputes between the Burrard Dry Dock Company, Limited, and the following classes of its employees:—

(1) Machinists, fitters, specialists and helpers, members of Vancouver Lodge No. 692, International Association of Machinists;
(2) Pipe-fitters, plumbers and helpers, members of Local Union No. 170, United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada; and
(3) Sheet metal workers, members of Local Union No. 260, Sheet Metal Workers' International Association.

The personnel of the Board was as follows:—Professor H. F. Angus, of Vancouver, B.C., chairman; Mr. W. D. McLaren, of Vancouver, the company's nominee, and Mr. Percy R. Bengough, also of Vancouver, the employees' nominee.

The text of the report follows:—

Report of Board

In the matter of The Industrial Disputes Investigation Act and of a dispute between The Burrard Dry Dock Company, Limited, Employer; and the following classes of its employees: Machinists, fitters, specialists and helpers, members of Vancouver Lodge No. 692, International Association of Machinists; pipe-fitters, plumbers and helpers, members of Local Union No. 170, United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada; and sheet metal workers, members of Local Union No. 280, Sheet Metal Workers' International Association, Employees.

For the purpose of fully ascertaining all the facts and circumstances of the dispute referred to it, the Board held two public hearings at No. 5 Victory Hall, 535 Homer Street, Vancouver, B.C., on April 26 and April 29. The parties were represented as follows: The machinists by Mr. George Sangster; the plumbers and steam fitters by Mr. C. Pritchard; the metal workers by Mr. Daniel Macpherson; and the employers by Mr. Clarence Wallace.

The very friendly atmosphere which prevailed throughout made it possible, and desirable, to adopt the most informal procedure and to allow the parties the utmost latitude in presenting their views. Stenographic notes were taken of the proceedings, but it was not considered necessary to have a transcript made. As will appear, no important questions of fact were in dispute and there was no occasion to require the few witnesses produced by the parties to give evidence on oath. No witnesses were summoned by subpoena. All parties declared themselves completely satisfied that they had had ample opportunity of placing their views before the Board. It was not possible for the Board to bring about a voluntary settlement of the dispute, and indeed the parties seemed disposed to treat the Conciliation Board as an Arbitration Board, though the representatives reserved the right to submit its findings to their unions for ratification. It therefore became necessary for the Board to meet in private for the purpose of deciding on recommendations for the settlement of the dispute according to the merits and substantial justice of the case. This meeting, held on April 30, resulted in unanimous recommendations.

The dispute consisted of three separate claims which it will be convenient to discuss separately.

(1) The first claim was that of the Machinists, members of Lodge 692, International Association of Machinists.

The Machinists had been parties to an agreement with their employers, the Burrard Dry Dock Co. Ltd., which terminated October 1, 1939. This agreement appears to have been satisfactory to both parties except as regards wage rates, and employment has continued at the rates fixed under it while negotiations have been in progress.

The rates under the agreement were:

	per hour	per day
Machinists	.75	$6 00
Fitters	.75	6 00
Specialists	.56¼	4 50
Helpers	.50	4 00

The rates now asked for by the Machinists are:

	per hour	per day
Machinists	$1 00	$8 00
Fitters	1 00	8 00
Specialists	75	6 00
Helpers	67	5 36

The employers' offer, on March 14, 1940, was:

	per hour	per day
Machinists	.85	$6 80
Fitters	.85	6 80
Specialists	60	4 80
Helpers	.50	4 00

The main ground advanced by the representative of the Machinists, Mr. George Sangster, for considering the wages demanded fair and reasonable, was the desirability of making them similar to those of the other metal trades employed by the Burrard Dry Dock. It appeared that the wages in these occupations had been similar under an award made in 1918, and continued to be so until some time in 1926. Since that time the other metal trades have had somewhat higher wages than the machinists. For this difference two explanations were offered. The machinists attributed it to the fact that they were not organized in 1926. The employer contended that the working conditions of the machinists were less arduous than those with which the other metal trades were faced, and that the machinists' work was competitive in the sense that much of it could be let out by sub-contract and done where lower costs obtained. It appeared from evidence that at other points on the Pacific Coast and in eastern Canada the wages of other metal trades and of machinists were usually the same; but that in Great Britain the machinists usually received less than the other metal trades.

The present rate of pay of boilermakers and iron shipbuilders at the Burrard Dry Dock is 90 cents per hour (and not $1 per hour, the wage asked for by the machinists). In substance, then, the issue is between the employer's offer of 85 cents, and the boilermakers' and iron shipbuilders' wages of 90 cents.

The recommendation of the Board is that the wages should be:

	per hour	per day
Machinists	.90	$7 20
Fitters	.90	7 20
Specialists	.65	5 20
Helpers (First Six Months)	.50	4 00
Helpers (Second Six Mos.)	.55	4 40
Helpers (After One Year)	.60	4 80

It is understood that the wish of the parties is to fit the new wage rates into the old agreement. It remains to make a recommendation as to the date as from which the new rates should begin, and as to the duration of the new agreement.

The representative of the machinists suggested that the new rates (if higher than those under the contract which ended last October) should be retroactive because of the protracted character of the negotiations. The employer contended that it would be difficult to make rates retroactive in view of the labour turn-over and because some of the work had been done on repair contracts, the price of which was fixed on the assumption of existing wage rates. The recommendation of the Board on this point is that the rates recommended in this report should begin as from May 1, 1940, and that the agreement embodying these rates should be effective as from that date.

The representative of the Union expressed a preference for a contract for one year under which all risk of an increase in living costs would be assumed by the employees. The Employer's preference was for a contract for the duration of the war and until the completion of contracts incidental thereto. The latter arrangement appears to the Board to be preferable from the standpoint of the stability of the industry, and from that of the country in general. It is accordingly recommended that the arrangement should be for the duration of the war, and of contracts incidental thereto, and that if the cost of living rises a proportionate increase should be made in wages which should be reviewed every three months on the basis of the cost of living figures for British Columbia as determined and publicized by the Dominion Department of Labour.

(2) The second case in the dispute, that of Local Union No. 170, United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada, raises a somewhat different point. The agreement between this union and the Employer expired April 1, 1939, and was continued under a clause providing for its termination by thirty days' notice in writing. Such notice was given on November 6, 1939. Negotiations followed. The prevailing wage had been 75 cents per hour for Mechanics, and 50 cents as a minimum wage for Helpers. On March 25 an offer of 85 cents per hour, with a cost of living clause, was refused by the Union which asks for $1.05 per hour for Plumbers and Pipe-fitters and 77½ cents per hour for Helpers.

The main reason given for considering this demand reasonable was that the proposed wages would conform with those paid in the district (mainly in the building trades) for men of the same qualifications. The main reason given in opposition to it was that the building trades do not have to compete, as shipbuilding does, with work done in other places where costs are lower than in Vancouver. Not only was it said that shipbuilding was chronically in a highly competitive position, but it was added that the contracts on which the Dry Dock is now at work were obtained by an abnormal reduction in the margin for overhead costs and profit.

It is peculiarly difficult to compare the merits of these contentions. It is easy to say, on the one hand, that places where wages are high should not try to engage in competitive shipbuilding unless there are off-setting factors; each to say on the other that the establishment of a permanent industry may justify some concessions by which labour accepts less than the standard wages of the district, and capital less than the standard profits. It was argued that the labour was not ordinarily interchangeable and that there were really two separate markets: one for labour in shipbuilding; the other for labour in the building trades. It was also argued that a de facto steadiness in employment on shipbuilding contracts was an important consideration justifying a somewhat lower hourly wage than that paid in more precarious employment. The difficulty lies in the fact that all these contentions are theoretical possibilities and that it is difficult to verify any of them and more difficult still to forecast future conditions with confidence.

A more realistic approach seems to be that wages in shipbuilding will always, if lower than wages in comparable occupations in the building trades, be in a state of unstable equilibrium and that unions will always aim at securing parity. To renounce the effort to close the gap at a time when the demand for shipbuilders seems likely to be greater than usual is a substantial sacrifice unless it is offset by some substantial concession.

The recommendation of the Board is that the wages for Plumbers and Steamfitters should be 90 cents per hour, $7.20 per day.

The argument used by the Union does not apply to the case of Helpers, whose wage is at the same minimum both in shipbuilding and in comparable occupations. The argument here is that if the Plumbers get an advance the Helpers should get one also. On this

point the recommendation of the Board is that the wage for Helpers should be 50 cents per hour for the first six months of employment, 55 cents per hour for the next six months and 60 cents per hour thereafter.

The Board recommends that the new rates should commence as from May 1, 1940.

The advance in wages justifies the proviso that the arrangement should hold for the duration of the war and the war-time contracts, with a cost of living clause under which, if the cost of living should rise, wage rates will be reviewed every three months on the basis of the cost of living figures for British Columbia as determined and publicized by the Dominion Department of Labour.

(3) In the third case, that of Sheet Metal Workers, members of Sheet Metal Workers' Association, Local No. 280, somewhat similar issues arise, but Helpers are not involved. The rate in the Burrard Dry Dock was recently raised from 85½ cents to 90 cents per hour. The Union now asks that, on a new agreement being entered into, the wage should be increased to $1 per hour to conform with that paid under agreements with the leading firms in the district which employ members of the Union. Such an increase would, however, operate so as to establish a difference between the wages of Sheet Metal Workers and those of other Metal Workers in the shipyards. The Board recommends that the wage rate for Sheet Metal Workers be 90 cents per hour. This will maintain the uniformity within the shipyards which has been the basis of the recommendations in the two other disputes.

The Board recommends that the Sheet Metal Workers' agreement run from May 1, 1940, and that it last for the duration of the war and of contracts incidental thereto. It further recommends that the agreement be subject to a cost of living clause to protect employees against a rise in the cost of living. Under this clause, if the cost of living rises the wage rates should be adjusted every three months in proportion to the changes in the cost of living figures for British Columbia as determined and publicized by the Dominion Department of Labour. The existence of this clause should be something to set off against the higher wage paid to these workers under contracts with other employers in the district.

Signed this Second Day of May, 1940:

Home Improvement and National Housing Act Loans

On June 6, the Hon. J. L. Ralston, Minister of Finance, released figures showing total Home Improvement and National Housing Act loans for May aggregating more than $3,700,000. The volume of Home Improvement loans reported during the month was $1,397,970. The balance, $2,310,544, is accounted for by approvals under the National Housing Act.

Establishing a new peak for any month to date the number of National Housing Act loans approved in May was 776. These loans provided for 811 new dwelling units, also a near record—May, 1940, being exceeded only by July, 1939, when 866 units were financed.

As compared with May, 1939, the number of loans approved shows an increase of 86 per cent, and the number of dwelling units financed shows an increase of 9 per cent.

In line with the Government's recent decision to concentrate entirely in the low and medium price field where the housing shortage is greatest, practically all units approved were of a low cost character. Of the total of 811 units, 324 or approximately 40 per cent were financed by loans of $2,500 or less, 545 or more than two-thirds were financed by loans of $3,000 or less, and 678 or 83·5 per cent were financed by loans of $3,500 or less. The average loan per unit for the month was $2,849.

The number of small 90 per cent loans continued to increase from 77 in March and 134 in April to 159 in May. The number approved in May last year was 77. These loans are limited to a maximum of $2,250 and are available to finance single family houses for owner occupancy only.

The lending facilities of the Act were extended to seven new communities where previously no loans had been made, bringing the total number of communities in which loans are now being made to 410.

For the second consecutive month the number of new applications submitted to the Department has broken previous records. In April 820 applications were received and in May 843.

Total National Housing Act loans approved to May 31, 1940, and since the inception of the Act, now total $56,706,629, providing for 16,497 dwelling units.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1940

THE following table shows the number of disputes, workers involved and time loss for May, 1940, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time lost in man working days
*May, 1940	22	8,565	51,997
*April, 1940	18	13,807	67,104
May, 1939	13	3,728	16,732

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While there was a considerable increase in the number of strikes and lockouts recorded for May, the number of workers involved and the time loss incurred were slightly smaller, there being only one strike which involved a large number of workers for a considerable period, that of artificial silk factory workers at Drummondville, P.Q., involving 2,000 workers and a loss of 34,000 man working days. Seven strikes of coal miners in Nova Scotia, however, together involved upwards of 3,000 workers and caused the loss of more than 7,500 working days and a dispute involving 360 glass factory workers at Ville St. Pierre, P.Q., resulted in a loss of 4,680 days. In April the higher figures recorded for numbers involved and time loss were due chiefly to a dispute of women's clothing factory workers in Montreal, P.Q., which involved 4,500 workers and resulted in a time loss of 29,000 man working days, and to a dispute involving some 6,000 seamen on the Great Lakes and St. Lawrence River which caused a time loss of 10,000 days. In May, 1939, the most important disputes were two strikes at Kitchener, Ont., involving 500 rubber factory workers and causing a loss of 10,700 man working days, while two strikes in Nova Scotia involved more than 2,500 coal miners in a loss of 4,600 days.

Four disputes, involving 263 workers, were carried over from April and eighteen disputes commenced during the month. Of these twenty-two disputes, twenty were terminated during the month, five resulting in favour of the employers and three in favour of the workers involved; compromise settlements were reached in seven cases; the results of four were recorded as indefinite and one was partially successful. At the end of the month, therefore, there were two strikes or lockouts recorded as in progress, namely: hat factory workers, Montreal, P.Q., and artificial silk factory workers, Drummondville, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to one such dispute, namely: fur factory workers, Toronto, Ont., October 17, 1939-October 31, 1939, one employer. Two disputes appearing in this paragraph last month have been reported by the unions concerned to have terminated during May, namely: work clothing factory workers, Winnipeg, Man., one employer, commenced December 1, 1939, and shoe factory workers, Montreal, P.Q., one employer, commenced March 28, 1940. The first of these had terminated by May 3, 1940, but was followed on that date by a half day strike (see table of strikes page 541). This strike resulted in an agreement reviewed elsewhere in this issue. In the other dispute all on strike secured work elsewhere by May 15.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A minor dispute involved a number of menders in one department of a woollen mill at Kingston, Ont., for an hour and one-half on May 1. It apears that the dispute was as to payment for and the distribution of cloth requiring more work than the average and that a satisfactory arrangement was made.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in progress prior to May

SHOE FACTORY WORKERS, TORONTO, ONT.—This dispute, which caused a cessation of work on April 9, was terminated on May 22 when a new agreement between the manage-

ment and the Canadian Shoe Workers' Union and Allied Crafts was signed as a result of conciliation by the Ontario Department of Labour and officials of the National Labour Council of Toronto and the All Canadian Congress of Labour with which the union is affiliated. The agreement provides for closed union shop, arbitration, and for wage rates not less than in the schedule for shoe factories in the province of Quebec under the Collective Labour Agreements Act. It was expected that work would be fully resumed by May 27. The agreement is outlined elsewhere in this issue.

Foundry and Machine Shop Workers, Toronto, Ont.—A termination of this strike, in progress since April 24, was reached on May 8 following conciliation by the Federal Department of Labour. A basis of settlement was arranged including the resumption of work immediately on the understanding that all the employees were to be given employment as available without discrimination, wage concessions as offered by the employer prior to the strike to be made effective, and negotiations for a final settlement on the basis of a signed agreement between the company and its own employees to commence as soon as work was resumed. Maintenance men returned to the plant on May 9 and on May 10 the majority of the employees resumed work. While the strike was still in progress, and prior to the interview with the conciliation officer of the Department, officials of the Steel Workers' Organizing Committee on behalf of Local 1089 of the Amalgamated Association of Iron, Steel and Tin Workers of North America, applied for a Board of Conciliation under the Industrial Disputes Investigation Act (Labour Gazette, May, 1940, page 415). It was anticipated, however, that a direct settlement would be made without the necessity of board procedure.

Beverage Room Works, St. Catharines, Ont.—This dispute, which involved several hotels during April, was terminated on May 10 when agreements were signed with those establishments which had not made agreements with the union by the end of April.

Disputes commencing during May

Fishermen, North Sydney, N.S.—The fishermen employed on twenty-five fishing vessels attempted to negotiate for higher prices for fish from the buyers for the spring catch and, this being refused, no boats were operated from May 14 to May 22 when certain increases in the prices were agreed upon. Fishing boats from other localities arriving with fish were reported to have taken their catch elsewhere during the dispute. The parties in dispute met with the Town Council and negotiations were brought about which resulted in the settlement.

Coal Miners, Glace Bay, N.S.—Eight miners refused to work on May 3 when their demand for payment for brushing (cleaning the wall, etc.) was refused as the working place was four feet in height and brushing is paid for only when the height is less. They were supported by some 240 other men in the shift. Union officials advised against the stoppage but arranged that the dispute would be taken up with the management and work would be resumed on the next working day. On investigation it was agreed that the claim was not justified.

Coal Miners, Florence, N.S.—Employees in one colliery ceased work on May 6 in protest against delay in dealing with a demand for extra pay for work in a difficult place. The management had met a committee and agreed to investigate and give a decision by May 7. The miners agreed to resume work pending negotiations and it was arranged that the union would negotiate to prevent disputes in future. The management agreed to extra pay for the thirty-two men particularly affected in the difficult place.

Coal Miners, Reserve, N.S.—Employees ceased work for one day, May 14, in protest against the reinstatement of a miner suspended when alleged to have switched tallies used for crediting coal produced by contract miners. The management reported that it had been agreed that there was insufficient evidence to justify the suspension. The miners demanded further investigation and work was resumed. Later the accused miner was arrested and committed for trial.

Coal Miners, Glace Bay, N.S.—Employees on one shift refused to work on May 15 with certain workers of alien enemy origin, some of whom were alleged to have made hostile statements. Work was resumed on May 18 after it was decided at a union meeting to lodge any complaints with the authorities. The management was not involved in the dispute.

Coal Miners, Sydney Mines, N.S.—Employees ceased work on May 15 to secure datal rates of pay for certain loaders whose earnings were alleged to be reduced by difficult conditions. Work was resumed on May 20 but was stopped again on May 23, five shifts being lost. It was reported that no changes were made.

Coal Miners, Glace Bay, N.S.—Miners in one working place left work on May 15 following what was alleged to be an explosion and demanded payment for certain time lost. Work was resumed on May 27 pending an

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1940*

*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

investigation by provincial inspectors as to the alleged explosion and the claim for payment.

COAL MINERS, SPRINGHILL, N.S.—Miners in two collieries operated by one company refused on May 30 to work with foreign born employees following the discovery of unauthorized explosives in one of the mines. As a result of negotiations work was resumed on June 1, an investigation to be made by the police authorities.

CANNING FACTORY WORKERS, ST. DAVID'S, ONT.—A number of women in one establishment on May 27 ceased work to request an increase in wages. The manager stated that an official from the head office would arrive at noon of the next day. By that time it

happened that there was insufficient produce for half of the women to work on during the afternoon and all refused to continue until the dispute was settled. They were offered an increase from 22 cents per hour to 25 cents but held out for 27 cents. The delivery of asparagus by growers was stopped for the time. Finally the compromise at 25 cents per hour was accepted and work was resumed the next morning.

ARTIFICIAL SILK FACTORY WORKERS, DRUMMONDVILLE, P.Q.—Employees in the spinning and weaving departments of one establishment ceased work on May 11 and were joined by other workers, approximately 2,000 out of 2,500 employees being reported on strike, a large number of maintenance men and other workers remaining on duty. A clash occurred between the strikers and the others. Electric power and telephone connections were reported to have been interfered with and the pumps stopped. The spinners and weavers had claimed that they had been required to attend an increased number of machines without increases in pay. The employees demanded recognition of the National Catholic Union of Textile Workers of Drummondville to which 2,000 of the workers were stated to belong. Several days before the strike occurred, at the request of municipal officials, a conciliation officer of the Quebec Department of Labour had met with the management and representatives of the employees and the company offered to grant increases in wages of ten to twenty-five per cent but refused to recognize the union. Apparently a closed shop agreement was demanded. Negotiations for a settlement continued and it was arranged that maintenance men would care for the plant equipment. On May 14 it was announced that the company had closed the plant until the employees were ready to resume work. The Quebec conciliation officer had proposed that the dispute should be referred to arbitration under the Quebec Trade Disputes Act but the company had refused to arbitrate on union recognition. The Dominion and provincial Ministries of Labour joined in requesting the head office officials of the company in New York to send representatives to a conference. A committee of twelve employees and three company representatives was set up in the last week in May but a settlement was not reached by the end of the month.

GLASS FACTORY WORKERS, MONTREAL, P.Q.—Employees in one establishment ceased work on May 5 when their demand for recognition of the Brotherhood of Glass Workers affiliated with the All Canadian Congress of Labour was refused. It was reported that a closed shop union agreement was demanded and the management offered to negotiate with a shop committee. In connection with picketing a number of strikers were arrested on charges of assault, intimidation, obstructing police, conspiracy to damage property, etc. On May 18 five were sentenced to imprisonment and others were remanded on bail for trial. A conciliation officer of the Quebec Department of Labour attempted to bring about a settlement and officials of the Federal Department of Labour took up the matter with representatives of both parties. The management refused to negotiate while the men were on strike. Work was resumed on May 21 following an exchange of telegrams between the management and the Quebec Minister of Labour, all employees who had not been implicated in disorders returning to work as required.

AUTOMOBILE FACTORY WORKERS, WINDSOR, ONT.—On May 20 a number of workmen in one establishment informed the management that some of the employees objected to working with employees of alien enemy origin. The management stated that this would be referred to the Dominion authorities. On May 22 a number of workmen, reported to be 1,600, ceased work, not having received further word. The management stated that definite word would be given on May 28 and work was resumed after twenty minutes. Notices were posted that only the English and French languages were to be spoken in the plant and all employees were given questionnaries to give particulars as to birth, citizenship, etc. On May 28 the management stated that workers of alien enemy origin and not naturalized would not be employed. It was reported the brief cessation of work on May 22 did not cause any loss of production.

BOX FACTORY WORKERS, MONTREAL, P.Q.—A number of the employees in one establishment ceased work on May 15 to secure an increase in wages of twenty per cent. In negotiations with the management the workers were represented by officials of the National Catholic Unions in Montreal although the employees had not been organized. A ten per cent increase was given to machine operators and arrangements were made to adjust the wages of the others. Work was resumed on May 17.

DOCK WORKERS, NEWCASTLE & DISTRICT, N.B.—A dispute between timber operators and shippers at Newcastle, N.B., and nearby ports and men to load freight boats with timber purchased for the British government held up the loading of boats from May 4 to

May 7. The dock workers demanded 70 cents per hour instead of 45 cents as paid in 1939 or 50 cents offered by the shippers and induced certain men to stop work. Police were summoned to prevent any disturbance. The Dominion Department of Labour was informed of the dispute immediately and requested the New Brunswick Department of Labour to deal with it either through the provincial Fair Wage Board or through proceedings under the Industrial Disputes Investigation Act as the dispute came directly within the scope of the statute. The Fair Wage Officer of New Brunswick reached Newcastle on May 4 and met the parties involved. It was arranged that 55 cents per hour would be paid pending a hearing by the New Brunswick Fair Wage Board as to the rate to be established for the season. Work was resumed at 3 p.m. on May 7.

Dock Workers, Sydney, N.S.—A number of men engaged to unload a ship on May 21 ceased work demanding an increase in the rates of pay from 50 cents per hour for day work and 60 cents per hour for night work to 60 cents and 90 cents respectively. The crew of the ship completed the work later in the day so that the ship could sail on schedule. It was reported that on the next day the dock workers offered to compromise but finally accepted further employment at the rate previously paid.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month bringing down to date that given in the March, 1940, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1939. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more important ones.

On June 6, legislation was introduced in the House of Commons which will make the acceptance of the findings of arbitration boards mandatory and will make strikes illegal.

The number of disputes which began during April was 91 and eight were unterminated at the end of March, making a total of 99 in progress during April. The number of workers involved was 22,500 and the resulting time loss was 82,000 man working days.

Of the 91 strikes which began during April, 27 arose out of demands for increased wages, seven out of proposed wage reductions and 13 were over other wage questions; five were over questions of working hours; 18 arose out of questions respecting the employment of particular classes or persons; 15 were over questions of working conditions; and six were over questions of trade union principle.

During April final settlements were reached in the case of 72 disputes. Of these, 16 were settled in favour of the workers, 41 were settled in favour of the employers and 15 resulted in compromises. In 15 other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during April began on April 25, when 1,866 workers employed in a ball bearing factory at Luton, Bedfordshire, ceased work demanding an increase in wages. They resumed work unconditionally on May 4.

A demand that a contract should be "scheduled" by the Tribunal of the National Joint Council for the Building Industry as one on which the special agreement regarding payment of travelling and subsistence allowances should operate led to a strike of 176 bricklayers, masons, joiners, painters and building labourers at Ravenglass, Cumberland, on April 23, 1,526 others were indirectly involved. On April 27 work was resumed pending negotiations.

Settlement of a strike of 1,450 employees of a linen factory in Belfast, which began on February 26, was reached on April 13. The strikers had refused to work with non-unionists. By the terms of the settlement there were to be further negotiations in regard to working conditions.

At a colliery near Rotherham, Yorkshire, 307 haulage hands went on strike in protest against employing new workmen as fillers instead of promoting haulage hands. Others

indirectly affected numbered 875. Work was resumed on April 27, the employers having promised to investigate the question of promoting haulage hands.

Australia

On May 15, the Prime Minister of Australia announced that work would be resumed immediately by the coal miners who had been on strike since about March 11 (LABOUR GAZETTE, April, 1940, page 337, and May, 1940, page 444). About 25,000 miners were directly involved, but a greater number of workers in various industries were indirectly affected. The mining unions have undertaken to maintain continuity of production throughout the war by observing the awards of arbitration courts and by resorting only to legal methods for the settlement of disputes. It was agreed that on the date of full resumption of work the chief judge of the Arbitration Court would call a conference to determine all outstanding differences. The Commonwealth Government promised to withdraw labourers placed in the mines during the strike.

Eire

The Department of Industry and Commerce of Eire has recently published statistics dealing with industrial disputes during 1939.

The number of disputes which began during 1939 was 99 and four were unterminated at the end of 1938 making a total of 103 in progress during the year; these involved 6,667 workers with a resultant time loss of 106,476 man working days. During 1938 there were 139 strikes in progress which involved 13,736 workers and resulted in a time loss of 106,476 man working days.

Of the 99 strikes which began during 1939, 42 arose out of disputes in connection with wages, 40 were over questions respecting the engagement or dismissal of workers, four arose out of trade union questions with which are grouped refusals to conclude collective agreements, three strikes were over hours of labour and 10 were over other questions. During 1939 disputes over wages caused 42·2 per cent of all strikes, accounting for 53·8 per cent of the number of workers involved, and 62·3 per cent of all time loss.

Final settlements reached during 1939 numbered 98. Of these 31 were settled in favour of the workers, 19 in favour of the employers, 28 resulted in compromises and the results of 20 were indefinite.

United States

Preliminary estimates of strikes in March, 1940, which as the Bureau of Labor Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 155 strikes as having begun during the month, which with 90 unterminated made a total of 245 in progress during the month. The number of workers involved in these disputes was approximately 45,000 with a resultant time loss of 400,000 man-working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 225 strikes in progress involving about 38,000 workers with a resultant time loss of about 300,000 man working days.

On May 1 members of the Milk Wagon Drivers Union at Chicago went on strike when certain employers wished to lower wages below those provided in an agreement which expired April 30. Work was resumed on May 3 to allow further negotiations but on May 19 the strike was resumed. The strikers numbered about 3,500 and it was reported in the press that about 16,000 farmers were affected by being unable to dispose of their milk. Approximately 1,000 members of the union employed by about 50 small firms who signed temporary agreements did not strike. Deliveries to hospitals and nurseries were maintained. On May 26, work was resumed, the employers agreeing to pay the old rates of wages until June 10 and the union agreeing to continue negotiations until that date.

On April 24, about 5,500 employees of two taxi cab companies in New York struck, demanding increased commissions, closed shop and other concessions. The strikers were members of the Transport Workers' Union, an affiliate of the Congress of Industrial Organizations. Conferences were arranged by the municipal government and on May 25 union representatives agreed to arbitration but this was refused by the employers. No settlement had been noted by the end of the month.

Group Insurance Plan of Granby Consolidated Mining, Smelting and Power Company, Limited

The Granby Consolidated Mining, Smelting and Power Company Limited announced recently the inauguration of a co-operative group insurance plan with its employees.

Under the plan, which became effective March 1, approximately 750 men will receive benefit. Every employee of the company is protected to the extent of $500 insurance after three months' service and up to one year. After one year's service, the insurance protection is increased to $1,000 for each employee. Each employee contributes 50 cents per month, after one year's employment, towards the cost of the insurance, the balance of the cost being contributed by the company.

ROYAL COMMISSION ON DOMINION-PROVINCIAL RELATIONS

Recommendations Concerning Unemployment Insurance, Labour Legislation, etc.—Demarcation of Jurisdiction in Social Services

THE Royal Commission on Dominion-Provincial Relations—which was appointed on August 14, 1937 to "re-examine the economic and financial basis of Confederation and the distribution of legislative powers in the light of the economic and social developments of the last seventy years"—has released recently its comprehensive report and recommendations (the appointment of this Commission, its original personnel and terms of reference were given in the LABOUR GAZETTE for September, 1937, pages 945-946).

The Commission's recommendations—covering as they do practically every phase of this Dominion's social and economic life—cannot be presented adequately in any limited summary (the report is issued in three volumes). Accordingly this review will be restricted to those sections which deal with such matters as unemployment insurance, labour legislation, employment and unemployment, relief, pensions, health, and social services.

In an abstract of its leading recommendations the Commission sets forth its approach to its task and emphasized the unanimity of its decisions as follows:

"The Report which the Commission has prepared is the outcome of two-and-a-half years of carefully planned study. In the course of this period the Commission has held sessions in the capital of every province of Canada and at Ottawa. It has had the benefit of the collaboration of many of the provincial governments, of the evidence of federal and provincial civil servants, of representations made by a large number of organizations in every province of Canada. The Commission has given careful consideration to the requests and suggestions presented to it and has also, with the assistance of a very able research staff, instituted inquiries of its own into the financial, economic and social problems which came within the scope of its terms of reference.

"The conclusions which the Commission has reached are, therefore, not sudden inspirations but the result of careful deliberation. The Commissioners consider it both remarkable and significant that, on questions on which the most divergent views are widely and tenaciously held both by public men and by private citizens, they should have arrived at complete agreement. This agreement is not the result of compromise or of give and take but reflects a sincere unanimity of judgment on the great issues which confront the nation. Its significance is enhanced by the fact that the four Commissioners are men from different regions of Canada, men who differ widely in background and in training, as well as in general outlook; and it is also significant that the conclusions which they have reached are far from being the views which any one of them held at the outset of the inquiry. Whether or not the Report will be successful in presenting clearly and forcefully to others the considerations which have carried weight with the Commission, and in convincing others of the validity of the conclusions which the Commissioners have formed, the future alone can show. But in drawing attention to the changes which have taken place in their own views, in the light of the studies which have been made, the Commissioners hope that they may predispose others to peruse both the Report and the research studies which accompany it before arriving at their final opinion as to the merits of the recommendations which the Commission has made. . . . ."

Social Services

In its chapter on social services, the Commission deals with the problem under five main headings, viz.: (1) The Disparity between Jurisdiction and Financial Resources; (2) The Reallocation of Responsibility in the Social Services; (3) State Medicine and Public Health; (4) Social Insurance and Contributory Social Services; (5) The Financing of Provincial and Municipal Social Services.

Reallocation of Responsibility

The Commission is quite definite in its demarcation of responsibility in regard to social services and declares:

The experience of the past decade is conclusive evidence that unemployment relief should be a Dominion function. By unemployment relief we mean relief or aid for unemployed employables as distinct from unemployables. Provincial responsibility for other welfare services should continue, and the provinces should be enabled financially to perform these services adequately. Provincial responsibility for social welfare should be deemed basic and general; Dominion responsibility, on the other hand, should be deemed an exception to the general rule, and as such should be strictly defined. But the Dominion should be given adequate jurisdiction to perform efficiently whatever responsibilities are entrusted to it.

Prevention and Relief of Unemployment

The Commission's designation of responsibility in the prevention and relief of unemployment is contained in part in the following paragraphs:

"The assumption of responsibility by the Dominion for relief or aid of unemployed employables would entail: (1) complete financial responsibility; (2) full control of administration. For efficient administration it would also be essential:—

(*a*) That the Dominion define employability for purposes of administering unemployment aid.
(*b*) That the Dominion have full control of administration of unemployment aid.
(*c*) That a national employment service be established and administered by the Dominion without prejudice to the right of the province to continue or develop an employment service of its own.
(*d*) That the Dominion be empowered to establish a system of compulsory unemployment insurance.

"The first three of these essentials might or might not require constitutional amendments, but unemployment insurance is quite another matter in view of the recent decision of the Judicial Committee of the Privy Council. While the desirability of unemployment insurance as a means of alleviating the burden of unemployment is debatable—and we discuss this later—it is highly unlikely that any province would institute a scheme of insurance for a group for which the Dominion had assumed financial responsibility. Further, it is important that the Dominion should be able, if it deems desirable, to institute an insurance scheme as part of its general method for handling unemployment relief. We recommend therefore:—

(1) that all doubts should be removed as to the power of the Dominion to pay and administer unemployment aid, and to establish a national employment service; and
(2) that the Dominion Parliament be given jurisdiction to establish unemployment insurance.

"Jurisdiction in these matters might be made *concurrent* (as in the case of immigration and agriculture) or the Dominion might be given *exclusive* jurisdiction over relief for unemployed employables, the establishment of employment offices for this class, and unemployment insurance. If the latter course is adopted the extent of jurisdiction transferred to the Dominion should, however, be clearly and precisely defined. . . . . "

The Employment Service

In regard to the Employment Service, the Royal Commission declared that "a national employment service under Dominion control is a vital link in our proposals." It "thoroughly agreed with the findings and recommendations of the National Commission" on this point and quoted them as follows:

"Early in the Commission's investigations it became evident that the first and most vital step necessary to the successful handling of employment, re-employment and Aid administration problems is the development of more efficient Employment Services throughout Canada. The present Provincial Employment Services are in practice unfitted to meet the exigencies of the situation. Divided responsibilities and diversity of aims between different Provinces; unequal development as regards numbers, types and functions of local offices; unsuitable locations of premises; defects in Provincial boundaries when used as economic administrative units, etc., have all tended to result in the Provincial Employment Services not being utilized fully either by employer or by employee.

"The provision of a proper link between employer and employee; of local advisory councils supplementary to local Employment Service offices in order to provide focal points for attacks on local problems; of means for gauging the relative degree of employability of those in receipt of Aid, are of pre-eminent importance if any real progress is to be achieved in handling unemployment problems. Indeed this is the experience of other countries also.

"Bearing in mind the desirability of uniformity of practice where financial Aid for the Dominion is in question; of freedom from local pressure in adminstration; of a Dominion source of local information independent of Province or Municipality in respect to unemployment assistance, etc., the Commission recommended in August, 1936, that the Employment Service be administered nationally. In any case the situation requires increased and improved service which will cost more, but it is recognized that national administration in itself would not add anything to the total cost to the country as a whole. The Commission, however, believes the extra cost to the Dominion government of the transfer from the Provinces would be more than offset by efficiencies and, therefore, economies which would result."

Provincial Welfare Functions

Discussing provincial welfare functions the report stated:

"It is fundamental to our recommendations that the residual responsibility for social welfare functions should remain with the provinces, and that Dominion functions should be deemed exceptions to the general rule of provincial responsibility. We have recommended that the Dominion should assume responsibility for the prevention and relief of unemployment. We shall later discuss the special problems of non-contributory old age pensions, public health and social insurance. But it is basic that the provinces should be deemed responsible for providing for cases of

need not actually covered by Dominion services."

Examining the main services which would remain with the provinces, the report proceeds in part as follows:

"Indigency or 'Poor Relief'.—This is the residual category of the social services and under our recommendations it covers those in need who are not qualified for inclusion on the unemployment aid rolls of the Federal Government or provided for by other specific social services. "Poor relief" has been the traditional responsibility of the provinces and municipalities, and in our opinion it should so remain. Those to be provided for by the service will include many who are totally and even permanently unemployable, many who are partially employable but who cannot become fully self-supporting and, at any given time, men and women who are not without some claim to be employable but who, for one reason or another, may be refused a place on the employment rolls of the Dominion. It is an essential part of our proposal that there should be no possible doubt as to the exclusive responsibility of the provinces for these groups. . . .

"The assumption by the Dominion of responsibility for unemployment aid would . . . solve many of the present problems of transiency and non-residence, both as between provinces and as between municipalities in the same province. These problems would, however, remain in respect of the provincial services of poor relief and medical care. It is our hope that the provinces will be in a position to deal with these evils within the province, as some have already done, either by uniform residence rules or by assuming the cost themselves. By improving the provision for the destitute in the poorer municipalities within the province, the drift of dependent classes to the centres of population might be arrested. As between provinces the remaining problem of transiency and non-residence are matters which could appropriately be dealt with by interprovincial agreement or at Dominion-Provincial Conferences.

"Widows' Pensions, Mothers' Allowances, Child Welfare.—These services are, we think, of peculiar interest to the province since they involve questions of social policy with respect to the preservation of the family unit, and the care and upbringing of children. Moreover, their administration involves detailed supervision which in many cases must be highly personal and discretionary in character. On both grounds, therefore, we think that they are primarily provincial services.

"It is possible that all these services might be financed in part by social insurance. If such a scheme were developed under Dominion jurisdiction. . . the effect would be to lessen the costs of these services to the province since widows in receipt of annuities from the Dominion would stand less in need of provincial assistance. Nevertheless there would undoubtedly still remain a residue of widows, deserted mothers, and orphans to be provided for. These would remain a provincial responsibility."

Old Age Pensions—Non-Contributory and Contributory

Dealing with old age pensions, the Commission outlined the special problem of the needy aged and the arrangement whereby pensions are paid on a basis of the Federal government bearing 75 per cent of the cost, exclusive of administration, which at present is a function of the provinces. Though this arrangement had its admitted defects, the Commission was convinced "that it is more satisfactory that the provinces should continue to administer non-contributory old age pensions" though "it could not recommend any further financial help to the provinces" in view of the fact that "the Federal government is already bearing as high a proportion of the cost as it can reasonably pay without assuming control of the administration of the pensions."

Contributory old age pensions.—Emphasizing the increasing cost of the non-contributory old age pension system in Canada (with the possibility of it being doubled within 30 years), the Commission pointed to the change-over (adopted in most countries which had started with non-contributory pensions) to pensions on a compulsory contributory or insurance basis. Taking into account the probable demand for such action in Canada, the Commission proceeded to an analysis of systems and administration, and recommended "that the Dominion be given jurisdiction to institute a compulsory system of old age annuities"—not immediately but following a recommended "general reorganization of the present tax structure" when such a system would be fitted into the proposed new Financial Plan "more equitably to workers and employers alike and with less danger of adversely affecting the national income."

In such a compulsory contributory system, it was further recommended that the Dominion should be empowered to include provision for pensions for widows and orphans of annuitants and provision for pension on retirement from industry due to invalidity or permanent disability. The Commission further pointed out that:

"Such additional features to a contributory old age pensions system are important

for promoting social security for dependents of workers, and have been widely adopted in other countries. We do not think they would in any way impair provincial autonomy in other social welfare matters, since they would simply provide cash benefits to dependents (or the annuitant in case of permanent disability). Indeed, such provisions in a contributory old age pension scheme would tend to relieve provincial budgets from their present burdens for mothers' allowances and the maintenance of orphan children.

"But it is clear that a contributory system would not entirely supersede the need for non-contributory pensions. For many years to come no one would have accumulated enough to his credit to pay for the minimum pension, and this would have to be supplemented. There will always be some who, owing to irregularity of employment, will not accumulate enough to buy the minimum pension at the retiring age; and some who are never wage-earners at all and from whom it is impracticable to exact contributions (at double rates since they have no employer) by other means."

State Medicine and Public Health

The Commission drew attention to the fact that "the economic and social changes of the past seventy years, which have been briefly outlined at the beginning of this section of the report, have made necessary state activities and state expenditures on health matters to an extent undreamed of by the Fathers" (of Confederation).

Enumerating the factors that entered into a highly mechanized age, the Commission pointed out that these social changes "have compelled governments at all levels to be concerned with the health of their citizens." The report then observes:

"It may be confidently predicted that the health activities of governments are indeed only beginning, and that expenditures in this field are likely to increase rapidly in Canada, especially in the field of preventive medicine, and medical aid for the lower income groups (either in the form of state medicine and hospitalization, or health insurance, or both)."

Subsequently in this section of its report, the Commission presented definite recommendations in regard to the division of functions as between the provinces and the Dominion in public health activities.

Health Insurance

In view of the fact that "social and economic conditions and social outlook differ so greatly from province to province," the Commission considered it essential that with certain exceptions responsibility for providing medical and hospital services and the choice of means should be left to the provinces.

Among the possible means advocated was that of health insurance, and the Commission adds:

"The desirability of co-ordinating all medical services within the province under provincial control is a strong argument against the establishment of any scheme which would remove any large group within the province from provincial responsibility, as a Dominion health insurance scheme would do. Any health insurance scheme should be closely co-ordinated with other medical services, especially with those services providing medical assistance for low income groups."

The Commission then proceeds to differentiate between health insurance and unemployment insurance and contributory old age pensions in their basic factors. In concluding this section the Commission reports:

"In recommending provincial jurisdiction over health insurance we are aware of the possibility incidental to any social insurance scheme put into effect province by province that it may result in inequalities of taxes on industry as between provinces. We think, however, that regional differences in Canada militate against an acceptable national scheme. But experience with provincial social welfare legislation in the past has been that once an important reform is instituted in one province it has been adopted relatively quickly by others. This was the case with workmen's compensation; it might well be the case with health insurance and, if so, any inequalities of tax burdens as between provinces resulting therefrom would soon be evened out. There is also the possibility that if certain provinces should desire a uniform scheme, administered by the Dominion, they could delegate to the Dominion the authority to institute such a scheme provided that our recommendation for general power of delegation. . . . . is implemented.

"It must not, of course, be assumed that the Commission is in any way recommending the adoption of health insurance by the provinces. This is clearly a matter of provincial policy in which the province should have full discretion. . . . ."

Workmen's Compensation

In regard to workmen's compensation, the Commission indicated its position as follows:

"Workmen's compensation is already covered by insurance under provincial legislation, and there seems to be no valid reason for disturbing this arrangement unless it is found that reasons of expediency (e.g. ease of collecting all insurance premiums *en bloc*) make it convenient to do so. We recommend,

therefore, that the Dominion should have power to take over this service in respect of any province if requested by that province to do so, but that in the absence of such request, the present provincial jurisdiction should be continued. . . . "

Unemployment Insurance

That part of the Commission's report dealing with unemployment insurance is as follows:

"We have recommended that provision for the employable unemployed should become the responsibility of the Dominion. It is almost ancillary to this recommendation that the Dominion should have power to enact a measure of unemployment insurance in order to reduce the burden to its general taxpayers. It would be out of place for us to go into the multitudinous details which have to be settled in any comprehensive scheme of unemployment insurance. But there are some general observations which can be made. In the first place no system of unemployment insurance will take care of all the unemployed at all times. There will always be some occupations which cannot conveniently be brought under an insurance plan, always some unemployed who have never been employed before (e.g. the very young), and always some unemployed who have exhausted the benefits to which they are entitled. So long as an unemployment insurance plan is kept on an actuarially sound basis (as contrasted with a plan which although called "insurance" is really a device for transmitting money raised by general taxation or by borrowing) there are bound to be many categories of labour which will remain outside its scope. In the second place, there will always be unemployment insurance premiums which in essence tax those in safe employment for the benefit of those in exposed positions, and yet exempt other and richer groups from contribution to this purpose. The problem of seasonal labour raises peculiar difficulty in this respect for any unemployment insurance program for Canada. It is probably a counsel of perfection to suggest that each industry should pay its premiums at a rate proportionate to the hazard of unemployment in it. Yet otherwise "safe industries" are taxed to help exposed industries. Here, if anywhere, in the field of social insurance we find security financed by taxes on production disguised as premiums. But, in spite of all these considerations, there is probably a balance of advantage in favour of unemployment insurance and we may expect the Dominion to make some experiments in this field. Even if our main recommendation, that the care of employables who are unemployed should be a Dominion function, should not be implemented we recommend that the Dominion alone should have jurisdiction over unemployment insurance, for there are few provinces with sufficient diversification of industry to embark on such an enterprise with any confidence and it would be a great hindrance to the mobility of labour if men out of work were deterred from leaving a province in search of work because in so doing they would lose their insurance benefits.

"It is not surprising, therefore, that it has been generally recognized that if unemployment insurance is to be successful in Canada it must be on a national basis. The National Employment Commission emphasized that 'there are great, indeed decisive, advantages in a national, in contrast to a Provincial, system' of unemployment insurance. The Commission des Assurances Sociales de Québec, as early as 1933, pointed out that, although it is possible for member states in a federation to have schemes of their own, 'nevertheless elementary prudence urges us to give a federal character to insurance against unemployment.' In a memorandum submitted to the Executive Council of the Province of Quebec in February, 1939, by the Confédération des Travailleurs Catholiques du Canada, Inc., the following paragraph appears: 'La C.T.C.C. tient à redire au gouvernement fédéral qu'elle est en faveur d'un système d'assurance-chômage à base contributoire. . . . . notamment, en faveur d'une assurance chômage contributoire, établie sur le plan national, suivant les recommandations de la Commission des Assurances sociales.' After careful examination we are convinced that a system of unemployment insurance can be established which will in no way interfere with the provisions of the Quebec Civil Code concerning labour contracts and contracts of hiring. In our public hearings representations from most provinces and from many public bodies supported the view that unemployment insurance should be within the jurisdiction of the Dominion Parliament. We have no hesitation in so recommending. We think, however, that the nature and extent of the federal power over unemployment insurance should be defined with care and accuracy to prevent its extension under the theory of ancillary powers.

"So long as cash payments only are provided there is no reason why insurance against unemployment resulting from illness should not be dealt with along with other unemployment, and we recommend that the Dominion should have the necessary power to do this."

In regard to the type of Unemployment Insurance system, Appendix 6 (p. 67) states:—

"From the economic point of view it might be said that if a national system were based on flat-rate premiums and benefits it would not take into account regional differences in real wages. Premiums and benefits that were adjusted to Ontario, for instance, would not be suitable for the Maritime Provinces. This argument would not apply, however, if the national system were based on wage-classes or on premiums and benefits that were a percentage of wages."

Jurisdiction in Social Insurance

The conclusions of the Commission in regard to jurisdiction in social insurance were expressed as follows:—

"We have concluded that two types of social insurance—unemployment insurance and contributory old age pensions—are inherently of a national character, but health insurance and workmen's compensation are not, and that in view of Canadian conditions, these can be financed and efficiently administered by the provinces. It is not improbable that in the course of time it may be desirable to finance other social services by social insurance methods, or that conditions would warrant national health insurance; or a national system of workmen's compensation. It would, therefore, seem desirable that rigidity in the matter of jurisdiction should be avoided. The simplest method would appear to be to provide for concurrent jurisdiction in social insurance. This would enable the Dominion and the provinces to adjust their respective responsibilities over social insurance from time to time in accordance with changing conditions. In view of the cost of social insurance programs, duplication of provincial and Dominion services would not likely result even if there were concurrent jurisdiction.

"But it may well be that the simplest solution theoretically is not politically possible, though this is not for us to judge. In the event of concurrent jurisdiction over social insurance proving impossible of attainment, we recommend that the Dominion be given exclusive jurisdiction over the two services, unemployment insurance and contributory old age pensions. The general provision for a power of delegation by the Dominion to the provinces, or vice versa, which we recommend later, should provide some measure of elasticity in jurisdiction over social insurance, should conditions warrant changes later."

Labour Legislation

That section of the Commission's report dealing with labour legislation is as follows:—

Labour legislation is a convenient term covering such subjects as minimum age for employment; hours of work; the regulation of wages, and provision for minimum wages; trade unions and their status; conditions of work in factories, mines and elsewhere; employment offices; conciliation and arbitration in industrial disputes; technical education, apprenticeship, and youth training; workmen's compensation; a weekly day of rest. Some of these matters have been dealt with elsewhere because of their close relation to the problems of unemployment and of education.

Labour legislation as such is not mentioned in the British North America Act and at present jurisdiction over these matters is divided between the federal and the provincial legislatures on lines that are not very practical. Roughly speaking the federal jurisdiction is ancillary to jurisdiction in other matters, e.g. railways, criminal law, and the implementation of treaties under section 132 of the British North America Act. Provincial control over labour matters rests largely on provincial jurisdiction over "property and civil rights."

The result of this division of authority has been concisely stated in a research study prepared for this Commission by Professor A. E. Grauer:—

"The comparative survey of labour legislation in Canada . . . reveals the following general facts. First, there is a marked lack of uniformity in legislation as between the provinces. Second, no single international convention has been implemented by all the provinces, technically or in substance; and no province has put into effect the standards of a substantial number of international conventions. Third, no technique has been worked out for co-operation in bringing about more uniform standards of labour legislation or in implementing international conventions. There is nothing in the Canadian field to resemble the International Labour Organization in the international field. The device adopted by British Columbia in 1921 of passing legislation but stipulating that it should not come in force until other provinces had enacted similar legislation, has not been successful."

Professor Grauer's opinion is that, upon the basis of the number of conventions of the International Labour Organization which have been ratified by various governments, Canada is relatively a backward country. He points out, however, that Canadian workers in fact enjoy better conditions than workers in many countries such as China and Japan whose

records in the implementation of international labour conventions are better than that of Canada. From this he concludes that the enactment of legislation to implement labour conventions is hampered in Canada not by unwillingness to improve working conditions, but by constitutional difficulties arising from the present division of legislative power. The Dominion Parliament has, on occasion, been willing to act but powerless to do so, while individual provinces have been reluctant to take any action which might place their industries at a disadvantage in comparison with industries in other provinces.

It was contended before this Commission that the jurisdiction of the Dominion Parliament over labour legislation should be considerably enlarged. One reason is the desire for uniformity in these matters throughout Canada, and another is the circumstance already noted that labour legislation which imposes a burden on industry can often be delayed in any one province by the argument that its adoption would place that province at a competitive disadvantage in comparison with other provinces. Yet those who were most anxious that the Dominion Parliament should have power to establish minimum standards below which no province might fall, were also desirous that any province which wished to establish higher standards and felt that it was economically in a position to do so, should not be prevented from acting.

Provincial control over many phases of labour legislation is desirable for several reasons. The relations of employer and employee, and notably such matters as apprenticeship, should conform to the general social outlook of the region. Further, situations may arise in labour matters in which prompt action may be needed and it may often be the provincial government which is the better able to act promptly and effectively. Men with a sense of grievance are naturally insistent on meeting with those in whose power it lies to take effective action to redress the grievance. In practice this may mean ministers rather than officials. There are many industries in which workers and employers find it more convenient to approach the provincial government than Dominion ministers in Ottawa. Some of the industrial standards acts recently enacted by certain provinces require elaborate administrative machinery. An intimate knowledge of local conditions is requisite if detailed regulations are to be applied intelligently and modified both intelligently and promptly to meet unforeseen contingencies. This point has been well illustrated in the case of legislation providing for workmen's compensation and for precautions against industrial accidents which has long been administered by the provinces. Even if the possibility once existed of securing more economical administration of these types of legislation by greater centralization, economies could now be effected only at the cost of upsetting a considerable volume of provincial legislation.

Yet in other matters uniformity is desirable. Theoretically, uniformity could be achieved by agreement between the provinces implemented by joint legislation. But the difficulties of securing agreement between nine provinces and of effecting uniform changes in legislation enacted in this way are obvious. In labour matters where uniformity is desirable there is thus a strong case for jurisdiction by the Dominion Parliament.

Wages, Hours of Labour, Age of Employment

On three subjects in particular, minimum wages, maximum hours, and age of employment, basic uniformity of legislation throughout Canada would be highly desirable. In the first place, so long as there are wide differences between provincial laws on these subjects, there are strong incentives for a province with high standards on these matters to discriminate against the products of other provinces with lower standards in order to protect both capital and labour within the province from unfair competition from without. Legislation of this sort almost inevitably leads to retaliation, and in any case tends to impair freedom of trade between provinces. In the second place, federal jurisdiction over maximum hours, minimum wages, and age of employment, while not absolutely essential for administration of unemployment relief by the Dominion would facilitate effective and systematic action. Neither in the case of protecting internal freedom of trade, nor for purposes of handling unemployment relief, would complete and exclusive jurisdiction over these matters be required. It would be sufficient if the Dominion had authority to establish basic minimum standards in each case, leaving to each province the power to impose such higher standards as it desired. The power of the Dominion Parliament in these respects should, however, be precisely delimited because, as we have pointed out in our discussions of the social services, there is real danger to provincial autonomy if much latitude is left to the courts in deciding what legislative power is to be regarded as ancillary to a defined federal power.

The relationship between minimum wages and relief is especially close. If wages are lower, or a little higher than relief rates,

workers will be tempted to leave their employment and claim relief. This may be especially so in the case of men with large families, since their incomes from relief may be much higher than their wages if employed. Indeed, the test of willingness to work is meaningless, except in relation to a wage scale. On the other hand, when there is a labour surplus, employers may be tempted to pay wages below relief rates, leaving the state to make up the difference in relief. As was pointed out in hearings, this situation is especially liable to develop in the case of part-time employment. If the Dominion assumes responsibility for relief of employables it would follow that it ought to have power to establish basic minimum wages in order to protect the taxpayer against abuses of relief by employee or employer.

Enforcement of Labour Legislation

Labour legislation requires vigilant enforcement, and in matters in which interprovincial friction may give any suspicion that legislation is not being adequately enforced may lead to ill-feeling. In many cases the province is in a far stronger position than the Dominion for securing thorough observance of the law. For instance, the enforcement and modification of rules of safety in factories and mines can conveniently be combined with workmen's compensation. On the other hand the enforcement of minimum wage legislation could probably be very efficiently combined with any system of social insurance under which premiums were collected which were fixed as a percentage of wages. But, in a general way, enforcement seems to be appropriately a provincial problem.

Status of Labour Unions and Jurisdiction in Industrial Disputes

Our discussion of the status of labour unions and of conciliation and arbitration must be in very general terms. These topics are not as closely allied to financial problems as are other phases of labour legislation, and we have had very little evidence concerning them. Such limitations as are imposed on the activities of unions of employers or employees by the criminal law are matters of federal jurisdiction, and the power of the Federal Parliament to give labour unions a certain status and capacity and to regulate the internal rights of their members is analogous to its implied power to incorporate companies with Dominion objects. On the other hand, the civil rights and liabilities of labour unions are, in general, determined by the provinces. Some degree of uniformity in provincial legislation is highly desirable, but its attainment must be by agreement between the provinces as transfer of jurisdiction on such a subject to the Federal Parliament would present insuperable difficulties. We later propose regular Dominion-provincial labour conferences and these might be a convenient means of facilitating uniformity of provincial legislation in the matter of civil rights and liabilities of labour unions.

Since some industrial disputes are matters of merely local concern while others extend to two or more provinces the allocation of jurisdiction over arbitration and conciliation in such disputes presents great difficulties in the Canadian as in other federal systems. But these difficulties were not apparent in 1867 and were not foreseen when the British North America Act was drafted. The Dominion in 1907 attempted, in the Industrial Disputes Act, to exercise a wider jurisdiction than is possible under the British North America Act by purporting to deal with a number of public utilities only some of which were under federal jurisdiction. Although as a result of litigation in 1925 this Act was amended and its scope restricted, it cannot be said that it had caused serious inconvenience to the provinces while it had been believed to be law. All the provinces, except Prince Edward Island, subsequently passed enabling legislation (as to the constitutionality of which there appears to be some doubt) applying the amended Act to disputes within exclusive provincial jurisdiction. British Columbia has since repealed this legislation. But each province has its own legislation as well and, therefore, in some provinces there are two methods by which the same dispute may be dealt with: one under the federal Act as extended to the province, the other under provincial legislation.

This overlapping of jurisdiction is apt to lead to dissatisfaction among employers and employees and to friction between governments. One side to a dispute may wish to call in the Dominion service, the other the provincial. It has even happened that both have been called in. Even if both sides have accepted the same service, the side dissatisfied with the final result may be inclined to feel that it would have been better off if the other conciliation service had been employed. In different disputes in somewhat similar industries, decisions based on different principles may be reached because the same conciliation service is not used.

In some cases (other than those within the legislative competence of the Dominion as defined in the Snider Case) a Dominion conciliation service can achieve beneficial results which would not be possible for a provincial service. Dominion officers with some knowl-

edge of conditions in all provinces may be in the best position to handle disputes in industries which are found in two or more provinces. Such industries may have an interprovincial character resulting from the existence of labour unions, employers' associations, or controlling financial interests organized on a national scale. Consumers in one province may be seriously affected by the prolongation of an industrial dispute in another province. There are, therefore, possibilities that different action by different provincial services, especially if a dispute is in progress at the same time in two or more provinces, may prolong industrial unrest and attendant economic dislocation.

We fully recognize that circumstances in some provinces will tend to make the range of disputes over which authority can conveniently be transferred to the Dominion smaller than in others. We recommend, therefore, that it should be made possible for any province to transfer to the Dominion jurisdiction over conciliation and arbitration in any category of industrial dispute. Should a transfer be made it will be important that any such category should be clearly defined in order that no possibility of dual jurisdiction should exist.

International Labour Conventions

In one very important respect the situation with regard to labour legislation has changed completely since Confederation. For the last twenty years Canada has been a member of the League of Nations and of the International Labour Organization. Labour conventions of an international character are adopted from time to time and member-states of the International Labour Organization are invited to ratify them. Canada among other nations has ratified a number of these conventions. To give effect to their provisions, which are designed to establish uniform labour standards throughout the world, requires legislation which it is not within the competence of the Parliament of Canada to enact, and which the provinces are under no legal obligation to enact. It might have been supposed that on joining an international organization a state would at once alter its constitution to conform to the new relationship so that it could play its part effectively in the activities which it recognized as desirable. But no such action was taken by Canada. This situation is entirely unsatisfactory and we recommend that the Dominion and the provinces together should decide how International Labour Conventions should be implemented. It seems that the best method would be for the provinces to give to the Parliament of Canada power to implement such international labour conventions as the Government of Canada has ratified, or may ratify in the future.

These labour conventions are the work of representatives of many countries, and it is inconceivable that an international convention could be formulated as part of a colourable attempt by the Dominion to encroach upon provincial jurisdiction. We do not feel, therefore, that (if the Dominion is given full power to implement these international labour conventions) there is any legitimate cause for fear that this method will be used for the purpose of invading provincial rights. It is true that existing provincial jurisdiction may be curtailed to some extent, but only in cases in which a large number of sovereign states have agreed to accept uniform labour standards, which they consider should prevail throughout the whole world.

The same considerations do not apply to the power to implement treaties which may be concluded between Canada and some other single country, and what we have said about the jurisdiction to implement international labour conventions must not be taken to apply to the more general issue of legislative competence to implement Canadian treaties, which we consider is outside our terms of reference. A number of submissions made to the Commission argued that the recent accession of Canada to the status of a fully self-governing nation required that the Dominion Parliament should have power to implement such treaties as Canada's international status enabled her to conclude. In these submissions the inability to implement international labour conventions was quoted as a striking example of the difficulties arising from the absence of such a power. Our proposal that the Dominion Parliament should have power to implement these conventions will meet this particular difficulty, but it does not touch the more general issue raised in these submissions.

Dominion-Provincial Labour Conferences

We have already referred to the lack of uniformity in labour standards among the provinces, and have pointed out the undesirability of undue centralization of jurisdiction as a means of effecting uniformity. The alternative method is co-operation and agreement among the provinces on labour standards, but heretofore there has been no particular means for facilitating co-operation, and it has, therefore, been lacking. There is also lack of co-operation between the Dominion and the provinces in labour matters generally. As we point out elsewhere a similar situation has hitherto existed in the matter of Company Law, but this condition

3450—3½

seems to have been remedied by co-operation between companies branches of provincial governments and the Dominion Secretary of State's Department to work out a uniform Companies Act. We think that much could be done to promote uniformity in labour legislation in a similar way by co-operation among the Departments of Labour of various governments. Moreover, there are many other labour matters in which all governments, including the Dominion, have a common interest, as, for example, the administration of labour legislation, investigation and research in labour problems, and the preparation of statistics in labour matters.

The situation appears to call for regular conferences of representatives of Labour Departments. A conference of this sort did indeed meet in May, 1938, and appears to have been highly successful. We commend this step, and we think that annual conferences, either of officials of Labour Departments meeting in a separate conference, or as part of a general and regular Dominion-Provincial Conference should be carefully considered by the appropriate authorities. Such a conference should go far to facilitate uniformity in labour legislation and to promote a better understanding among governments of their respective labour problems.

Conclusions

It will be convenient to summarize here our conclusions and recommendations:—

1. In order to protect the principle of freedom of trade between provinces and to facilitate the handling of relief for employables by the Dominion, the Dominion Parliament should have jurisdiction to establish basic minimum wages and maximum hours of labour, and to fix the age of employment, leaving to any province jurisdiction to raise minimum wages, lower hours of labour, or raise the age of employment if it so desires. But, as noted previously, the powers of Parliament should be precisely defined in order to protect the autonomy of the provinces.

2. In the case of industrial disputes, provinces should be empowered to delegate jurisdiction to the Dominion over any category of industrial disputes now within provincial jurisdiction.

3. The Dominion should be empowered to implement any labour conventions of the International Labour Organization. It should be understood, however, that we do not here make any recommendations with respect to treaties in general.

4. Frequent and regular conferences should be held between Dominion and provincial Departments of Labour.

Reduction of Accidents in the Lumbering Industry of Northern Ontario Considered

Thirty operators, members of the Lumbermen's Safety Association, from Cochrane, Hearst and Timmins, met recently to consider ways and means of reducing the number of accidents in the lumbering industry.

Many subjects were discussed at the meeting including: accident prevention methods; first aid to the injured, and infirmaries; medical and hospital services and rehabilitation of the injured. Many of the operators spoke on their individual methods of coping with the hazards of accidents.

Dr. W. S. Barnhart, of Ottawa, general manager of the association and chief medical officer, told of a rehabilitation clinic being operated by the industry at Ottawa. (LABOUR GAZETTE, February, 1939, page 122).

"This clinic might be described as a combination lumber camp and a hospital," said Dr. Barnhart. "Camp discipline is maintained and the men are given thereapeutical treatments which have, in time, brought even stubborn cases around to normal. We have had knee and arm and joint injuries of all kinds at this clinic and men who, it appeared, would be on compensation for a long, long time, have been able to go back to their jobs.

"At this camp," continued Dr. Barnhart, "the patients cut all their own cordwood and do their own work. They have a clubroom and a radio and gymnastic equipment for exercise. They are free to leave if they wish but it is impressed upon them that they are there for their own good and that their departure is considered by the Compensation Board similarly to refusal of treatment—and so their compensation is cut off."

Dr. Day and Dr. McInnis spoke briefly. Both thought that examination of employees prior to their employment by lumber companies, was a good thing. Both too were of the opinion that men qualified in first aid work should be in all lumber and timber camps.

LABOUR LEGISLATION IN NOVA SCOTIA, MANITOBA AND SASKATCHEWAN IN 1940

Nova Scotia

AT the recent session of the Nova Scotia Legislature from March 5 to April 13 amendments were made in the three statutes relating to mines to change the name of the Department administering them and to provide for a Chief Inspector. Under the Workmen's Compensation Act, commissioners are no longer limited to a ten-year term; dental treatment may be given in certain cases and silicosis in some circumstances is recognized as an industrial disease. To the Housing Commission Act were added provisions dealing with low rental housing projects.

Mining

Some amendments were made in the labour provisions of the Mines Act. The definition now includes Chief Inspector as well as Inspector. Both of these and the deputy inspector hold office during pleasure and are to inspect mines belonging to or under licence or lease from the Crown to see that the mines are effectively worked and to report from time to time to the Minister.

In line with this amendment the definition of Inspector in the Coal Mines regulation Act now includes Chief Inspector. He may delegate powers to the inspectors and deputy inspectors.

A new provision in the Metalliferous Mines and Quarries Regulation Act requires every person entering a mine to wear a protective hat of a design provided by the inspector.

Amendments in the Coal Mines Regulation Act and the Metalliferous Mines and Quarries Regulation Act, as well as the Mines Act change the name of the department administering them from Department of Public Works and Mines to the Department of Mines.

Workmen's Compensation

An amendment in the Workmen's Compensation Act stipulates that the Commissioners are to hold office "during good behaviour" instead of for 10 years with power in the Governor in Council to dismiss them for cause. The age limit of 75 years is unchanged.

Silicosis is recognized as an industrial disease within the meaning of the Act when the workman has been a resident of Nova Scotia for at least five years and has been exposed to silica dust in his employment in the coal mining industry of the province for periods amounting in all to at least five years preceding his disablement. Silicosis is defined as "a characteristic fibrotic condition of the lungs caused by the inhalation of silica dust." The Workmen's Compensation Board may employ qualified experts in determining whether or not and to what degree a workman has been disabled by silicosis and no decision is to be arrived at until the workman has been under observation of competent persons for at least six months. If it appears that the workman has been exposed to silica dust elsewhere than in Nova Scotia before working in the province for the periods making up the five years the compensation is to be reduced by the proportion that the period he has worked elsewhere so exposed bears to the total period he has worked so exposed.

Where there is a private arrangement for the furnishing of medical care to workmen and under the Act the Board is not liable for medical care to such workmen, it is now provided that the Board is liable to furnish dental treatment if the attending physician considers such treatment urgently necessary.

Employment of Non-Residents of Province

The Nova Scotia Labour Act is again continued in force for another year to May 1, 1941. The Act forbids any person or corporation employing 25 or more workers to hire a person who has not been a resident of the province for at least a year, unless the person so hired produces a certificate from the Government Employment Agent or Municipal Clerk in the place where he is to be employed stating that there are no unemployed residents capable of doing and willing to do the work.

Relief

The Municipal Act as amended and consolidated is to come into force on proclamation. There is no change in the provisions allowing municipal councils to enforce the support of the poor by polling districts and to determine by resolution that the expenses of the support of all poor persons having a settlement in any poor district in the municipality are to be borne by the municipality and not by the respective poor districts in which such persons have a settlement.

Early Closing of Shops

Also unchanged is the provision in the Municipal Act, which was added in 1933, allowing the council to make by-laws providing for the closing on certain days during certain hours for the whole or any part of the year of all or any class or classes of shops, or

places in which goods are exposed or offered for sale by retail in the municipality.

Housing

A new division called Part II has been added to the Housing Commission Act. It applies to companies formed with the object of erecting, renting and managing low rental houses. The amount payable by the company in dividends is limited to five per cent per annum. The Housing Commission may encourage and promote the formation of companies eligible to receive loans in aid of low rental housing projects under the Dominion National Housing Act 1938. The Governor in Council may waive the payment of all fees payable by any such company under the Nova Scotia Companies Act or any other fees or taxes payable under any other Act or Acts of the Legislature as long as any loan remains unpaid. Any city in which such a company proposes to carry out a low rental housing scheme may concede a reduction in taxes of all kinds, including school taxes, levied in respect of the property owned by such company, to a maximum of one per cent of the cost of construction of the houses built under the project. No taxes are to be levied on the income of any such company until it has repaid any loan.

Any city may make an agreement with a company that, if at any time before a loan has been fully paid its net earnings are insufficient to make the semi-annual payments of principal and interest due under the loan, the city will forego all taxes payable at the time or thereafter by the company, or such smaller amount as will enable the company to make the payments in full. Further, a city which has exercised, or has passed a resolution of its intention to exercise any option to acquire the project of any such company may enter into an agreement with the Provincial Government, whereby the Province agrees to pay semi-annually any part of the amount of the semi-annual payments due in respect of such a loan which have not been paid by the city.

Credit Unions

The Credit Union Societies Act is amended specifically to provide that no credit union may change its own name except by resolution passed by two-thirds of its members present at a general meeting called for the purpose and with the approval of the Governor in Council. The Registrar may as before change the name of a credit union if it appears to him that the name is or resembles that of any other credit union or company or is on any ground objectionable.

Manitoba

The Manitoba legislature, in session from February 20 to April 5, amended the Acts relating to strikes and lockouts, fair wages, civil service superannuation, trade schools, mines, unemployment relief and the recovery of wages. The Employment of Female Labour Act of 1913, which prohibited the employment of women by Orientals but which had never been proclaimed in force, was repealed. A resolution was passed concerning interprovincial highway transport taxation.

Freedom of Association

The section of the Strikes and Lockouts Prevention Act dealing with freedom of association was amended to make it an offence for any person, in contravention of the sections of the Act recognizing the right of employers and employees to organize and the right to bargain individually or collectively, to attempt by intimidation to compel an employee to belong to or continue as a member of a union or a voluntary association of employees or for any person to restrain any employee from belonging to or continuing as a member of a union or association. The section thus amended referred only to the matter of joining or refraining from joining such an association. The Bill as introduced in the legislature contained a subsection stipulating that a union consisting of a majority of the employees of an employer or employers should have the right to negotiate on behalf of the employees and that should a dispute arise as to the rights of a union under this provision it should be deemed a labour dispute subject under the Act to conciliation and investigation. This clause was struck out by the legislature.

Fair Wages

Amendments in the Fair Wage Act are designed to prevent the purpose of the Act being defeated through the formation of partnerships or otherwise. The definition of an employee now includes any one performing labour on public or private works who undertakes it either alone or as a member of a partnership under contract with the owner, contractor or sub-contractor. In so far as such person employs labour, however, he is to be considered an employer. "Wages" in the case of such a person is defined as any compensation fixed by contract or otherwise. New sections provide that any arrangement made by an owner, contractor or subcontractor with such an employee to defeat or circumvent the Act or any order made under the Act, in so far as it relates to public or private works within the scope of the

statute, is null and void. Any contract involving lower remuneration than would be paid in wages is to be prima facie evidence of evasion. Another new clause declares that nothing in the Act is to impair the right of an employee to recover wages by civil action except in so far as an order has been made under the Wages Recovery Act.

Mines

Sections of the Mines Act of 1930 which gave force to the regulations of 1928 and others made under the Act of 1913 were repealed from June 1. New regulations are reported elsewhere in this issue of The Labour Gazette.

Trade Schools

The Trade Schools Regulation Act of 1938, but still unproclaimed, was amended as to the registration of schools, the status of trade schools outside the province and the powers of the Lieutenant-Governor in Council to make regulations.

Unincorporated associations operating trade schools are brought within the Act and are required to be registered. Trade schools outside the province must now be registered themselves instead of their agents and are not permitted to sue in Manitoba for payment for any course of instruction unless registered. It is declared an offence for any trade school to sell a course of instruction which is not specified in the certificate of registration. The power of the Lieutenant-Governor in Council to prescribe suitable examiners to conduct examinations before diplomas may be granted to students in specified trade schools has been extended to include all such schools and a new provision permits the making of regulations as to the form which such a diploma should take. A new section forbids the use of any document or designation which purports to indicate competency in any trade unless approved by the Act.

Unemployment Relief

The provisions of the Unemployment Relief Loan Act, 1933, which enables the province to finance unemployment relief by means of borrowed money and by use of the Consolidated Fund and permits municipalities to borrow for relief purposes have been extended to April 30, 1941.

Wages of Domestic Servants

An amendment in the Wages Recovery Act provides that a person may not be summarily committed to gaol for non-payment of an order in respect of the wages of a domestic servant until he has first been given notice of a hearing. The employer must now pay the costs occasioned by his default as well as the amount of the order.

Civil Service Superannuation

The Civil Service Superannuation Act as amended makes provision for the continued application of the Act to employees who enlist for war service and to employees on leave of absence under certain conditions as well as clarifying several parts of the Act.

An employee who becomes a member of the Allied Forces after August 31, 1939, and who returns to his work within three months of his discharge is to be considered for the purposes of the fund as having been continuously employed and in receipt of an annual salary equal to that received immediately prior to his enlistment. Such a person is not required to make any contribution to the fund during his war service and the three months' period before his re-engagement, but the Government is to continue to make contributions on the basis of his salary immediately before enlistment. Any deficiency in the fund on account of war causes is to be made up after an actuarial valuation which is to take place within 18 months after the termination of the war. Where an enlisted employee becomes totally or permanently disabled as a result of service in the present war he is to be subject to the provisions of the Act for disabled employees unless the effect of such a grant would be to reduce the amount of any pension he might receive from the Dominion Government. To secure greater uniformity with these new provisions the section providing for the counting of service performed during the Great War has been changed and now declares that continuity of service is to be deemed unbroken only in the case of those employees who returned to their work after six months from their discharge instead of at any subsequent date.

A new section makes provision for continuing as contributors to the Fund at their election, Government employees loaned to another Government or to a university or public corporation.

Provision is made also for an annual allowance for an employee of 15 or more years' service retired on account of illness or disability which does not amount to total and permanent disability. The section of the Act which provides that certain employees shall receive an allowance of not less than $360 per annum and in no case shall exceed two-thirds of his average annual salary does not apply to disability allowances; which are subject to review by the board and may be cancelled or suspended by it, or in the case of limited disability may be increased to the amount of the total disability allowance.

The Lieutenant-Governor in Council may make regulations providing for including in the scheme on their graduation, student attendants and pupil nurses in mental institutions on May 1, 1939, such inclusion dating from the beginning of their training, and for the retroactive inclusion of those persons connected with boards, commissions or corporations newly designated as civil servants under the provisions of the Act.

Resolutions

A resolution passed on April 4 in favour of uniformity of legislation concerning transport facilities throughout the Dominion especially with regard to taxation and regulation of bus and truck traffic declared that the lack of uniformity in provincial laws is partly responsible for the wide divergence in working conditions between road and rail transport workers and that if bus and truck traffic were placed on a basis comparable to the operating conditions of the railways the economic resources of the Dominion would be more effectively utilized. The motion directed that the matter should be brought to the attention of the Dominion-Provincial Conference.

Saskatchewan

The Saskatchewan Legislature, in session from February 8 to March 16, revised the Minimum Wage Act, provided for superannuation for members of the Workmen's Compensation Board, amended the Industrial Standards Act, the City Act and laws relating to the attachment of debts, regulation of factories, hours of labour in fire departments, municipal health services, schools, teachers' superannuation, weekly half-holidays, motor vehicles, vocational education and unemployment relief.

Minimum Wages

The Minimum Wage Act, as revised and amended, applies to both male and female workers and it is no longer necessary to extend its application to male workers by order in council. As formerly, the statute has to do with employment in cities and in those portions of the province to which its provisions have been, or may be, extended by order in council. In October, 1939, the Act was declared to apply to Estevan and Melville and territory within a five-mile radius of those towns.

The direct industrial application of the Act appears to be somewhat broader than that of the repealed statute. The latter applied to factories and shops, "shop" being defined as a place where goods are exposed or offered for sale by retail or auction and any place used in connection with the sale of goods by retail and included a mail order house, hotel, boarding or rooming house having more than five beds for boarders or lodgers, a restaurant in which meals are served daily, for a consideration, to more than five persons, refreshment room, barber shop, beauty parlour and the place of business of a tobacconist or news agent. By order in council the former Act could be applied to any business, trade or occupation and for the purposes of the Act the place where such business or occupation was carried on became a "shop". The revised Act relates to employees in a factory, shop or other premises. A "shop" includes a place where goods are sold by wholesale and where goods are stored pending sale as well as the places mentioned in the 1937 Act. "Other premises" is defined to include certain places to which the former Act had been extended, such as a place where a warehousing or cartage business was carried on and theatres and dance halls as well as bowling alleys, billiard rooms, skating rinks and places to which the Lieutenant-Governor in Council declared the Act to apply.

The Minimum Wage Board is to continue to consist of five members, including two women, and after determining the amount of wages needed in relation to the necessary cost of living and reasonable hours of labour, the Board may make orders fixing maximum hours of work, subject to the Factories Act, establishing the minimum wages to be paid for such number of hours and for short time and overtime, the maximum charge which an employer may make for board and lodging, and the minimum period to be allowed for meals. The board may classify and determine the number or proportion of parttime, inexperienced or handicapped employees and apprentices to be allowed in any establishment, and fix special wage rates for these classes. As heretofore, orders of the Board may be general in their application or may be restricted to a specified area.

New provisions require the employer to produce registers of wages and hours for examination on request of any persons having the written authority of the Minister and stipulate that an employer must give a week's notice of termination of employment to any employee with three months' or more continuous service instead of six as in the old Act. In addition to the penalty for which he is liable, an employer convicted of paying wages at a rate lower than the minimum fixed by the Board may be ordered to pay not only the difference between the amount

actually paid and that to which the employee was entitled but also a reasonable counsel fee not exceeding $25 to the complainant's solicitor.

An amendment in the School Act, which comes into force on July 1, 1940, sets a minimum salary of $700 per year for teachers except in cases where the Minister of Education grants permission to pay a smaller salary for a specified time.

Factories

The Factories Act was amended to provide that where a time other than Mountain Standard Time is in common use in a municipality any reference in the Act to time shall, so far as that municipality is concerned, be deemed to be a reference to the time actually in use.

Hours of Labour

An amendment in the Fire Departments Two-platoon Act extends it to all cities having a population of 10,000 or over. Such extension was possible under an amendment of 1939 but cities of from 10,000 to 15,000 population were permitted to contract out by by-law passed within eight months of the date (April 1, 1940) on which the amending Act came into force.

To the Weekly Half-holiday Act was added a section which is retroactive to July 1, 1939. This Act requires that in cities of 7,000 population and over, all shops, other than those exempted under the Act shall close at 12 o'clock noon on Wednesdays between April 1 and August 31 in each year. The new section provides that where a shop includes a mail order department, the Commissioner of Labour, on application of the employer, may grant permission for the weekly half-holiday in that department on a day other than Wednesday.

An amendment in the City Act also relates to the closing of shops. The city council had in the original Act wide powers to regulate the hours during which any classes of shops must remain closed and also to designate one day during the week in the period May 1 to September 30 on which they must be closed at 12 noon or later. This has been amended to provide that any particular class of shops may be ordered closed on a day differing from that applying to others. The amendment also stipulates that a by-law may prescribe conditions under which gasoline, oil and grease may be sold in garages when automobile filling stations are closed in accordance with a civic by-law.

Several changes made in the Industrial Standards Act came into force on May 1. A schedule of wages and hours made binding under the Act may now prescribe the number or proportion of part-time employees of any employer. It is binding upon a person who, though not engaged in the industry referred to in the schedule, is directly or indirectly responsible for payment of wages to an employee to whom the schedule applies, or to any other person, for work ordinarily done by employees in the industry referred to in the schedule. Such a person is to be considered an employer for the purpose of the penalty section of the Act. It is also binding upon one who performs for wages work ordinarily done by employees of the industry whether or not such person is an employee in that industry and whether or not the work is done for an employer to whom the schedule applies, and such a person is included as an employee for the purpose of the penalty section. These provisions do not apply to work done on a private dwelling occupied by the employer, or to work done on premises owned or occupied by the employer by his regular employees if the work consists of minor repairs specified by regulation for the purpose of this provision.

Superannuation

Amendments in several statutes have to do with pensions for teachers, civic employees and persons employed by the Workmen's Compensation Board. As regards teachers a new exception to the requirement of continuous service for eligibility for superannuation under the Teachers' Superannuation Act, 1935, was made in the case of persons serving in His Majesty's forces during the present war providing such persons return to the teaching profession in Saskatchewan within two years after the close of the war. This service is to be reckoned as contributory teaching service provided contributions are paid into the fund on the basis of the last salary received as a teacher and is to apply to women engaged in war service. Boards of trustees are permitted by amendments in the School Act, Secondary Education Act and Vocational Education Act to pay these contributions to the Teachers' Superannuation Commission.

Amendments in the Secondary Education Act and Vocational Education Act provide that the board of trustees of a district situated wholly or partly within a city, which has or may set up a superannuation scheme for civic employees, may arrange with the city for the inclusion of non-teaching employees in this scheme and may pay the contributions required of an employer. The City Act is amended in line with these changes. A similar provision is made by a new clause in the School Act with respect to boards of town districts situated wholly or partly in a city.

A superannuation scheme for employees of the Workmen's Compensation Board who are not covered by the Public Service Superannuation Act was embodied in the Workmen's Compensation Board Superannuation Act in force on March 1, 1940. Provision is made for compulsory retirement at the age of 65 for men and 60 for women and for retirement at the discretion of the Board of men at 60 and women at 55 after 35 years' continuous service. The Board may retain an employee, with his consent, for five years after retirement age and in all cases must give six months' notice to those about to be retired.

Allowances payable after a minimum of 10 years' service amount to one-fiftieth of the average yearly salary for every year of continuous service after February 29, 1940, not to exceed 35. The maximum allowance is $2,000 or not more than the final annual salary of the superannuate concerned and the minimum allowance is $300. Special provision is made for persons reaching retirement age before having served 10 years after the coming into effect of the Act and for allowances to widows, children and dependent relations of retired employees.

The scheme is to be financed from a fund accumulated by a 4 per cent monthly deduction from the salary of each employee affected, although after 35 years of continuous service no further contributions are required.

The Workmen's Compensation Board is to administer the Act and has various discretionary powers including the determination of the application of the Act to employees and of the average salary upon which the allowance is to be based. The Board may make regulations for carrying out the Act subject to the approval of the Lieutenant-Governor in Council.

Unemployment Relief

A number of changes were made in the Direct Relief Act, 1936. Where a resident of a rural municipality has moved to an urban municipality and has received aid or relief from the former at any time within the three months prior to his departure or from the latter at any time within three months of his arrival, he is to be deemed to retain his residence until he has resided for two years in the urban municipality.

New provisions are made for the return of indigents to their municipality of residence. Formerly, such return was to be effected at the request of the municipality and if the indigent refused to return he might be removed on the order of a magistrate, costs of removal in all cases being recoverable from the municipality of residence. Under the new sections where an application for aid or relief is made by the resident of a municipality, the municipality of residence or the municipality in which such person actually resides or the Director of Relief may, by written notice, require him to return to and reside in the municipality of residence during the time that aid or relief is required. The muncipality of residence is to furnish reasonable facilities for transportation of such person and his dependants and effects and provide living quarters fit for human habitation. If the notice is not complied with within 15 days an order may be obtained from a police magistrate or two justices of the peace requiring the resident to comply with the notice within a fixed period.

A new section forbids a municipality to grant aid or relief to an indigent not actually residing in the municipality without first obtaining the consent of the Minister of Municipal Affairs. The Minister is empowered to exercise any of the functions and take any proceedings which a municipal council may exercise or take under the Act. An amendment in the section enabling the Director or an official of a municipality to demand information from any person, bank or corporation whom it believes to have paid or to be liable to pay money to any person in receipt of relief now covers money paid or payable to any dependent or agent of the applicant or recipient of relief.

Penalty clauses are also added under which a prison term not exceeding six months may be imposed for contravention of the Act or of any order made under its authority. Any person who knowingly gives false information or conceals information in order to obtain relief for himself or another person is liable to a fine of not more than $200 and costs and in default of payment a prison term not exceeding six months.

The Relief Act, 1935, was amended by repealing the section providing that the Act should expire on March 31, 1940. This Act authorizes the Lieutenant-Governor in Council to enter into agreements with the Government of Canada and with cities, towns and villages respecting relief measures, to pay an agreed proportion of the cost and to undertake such measures alone or with the Dominion Government and cities, towns and villages.

Another statute cancelled outstanding indebtedness of the residents of numerous specified communities in the distressed areas under the various relief Acts to their local governments in respect of advances made for direct relief or for the maintenance of livestock during stated periods, while the indebtedness of the local governments to the Provincial Treasurer in respect of the same causes and for the same periods was likewise cancelled.

An amendment in the Attachment of Debts Act provides that where debts are sued for or

judgment recovered on account of sums recoverable by a municipality or the Minister of Municipal Affairs under the provisions of the Local Improvement Districts Relief Act, exemption of a part of the salary or wages of the debtor, as provided under other circumstances, shall not apply.

Education

An amendment in the Secondary Education Act gives a new power to boards of trustees to set up night classes and engage instructors. A grant from the provincial government may be obtained amounting to 40 per cent of the teachers' salaries, but not exceeding $2 per teacher per night.

Miscellaneous

The Industrial Development Board Act was amended to authorize the Board to appoint special committees, consisting of members of the Board or non-members or both, and delegate to them such duties as it deems expedient. Formerly, such committees were to consist only of Board members.

The Act amending the Municipal Medical and Hospital Services Act, 1939, provides that in a municipality which has made a by-law to provide for health services the requirement that the head of a family must pay the tax for the dependent members of the family has been extended to cover any dependent person residing with him whether or not this person is a member of the family. Where a person becomes resident in the municipality after October 31 he is now required to pay the tax only for that portion of the fiscal year in which he is so resident. The fiscal year commences October 1.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Minimum Wages and Hours of Labour in Quebec, Manitoba, Saskatchewan and British Columbia—Miners in Manitoba and Saskatchewan—Workmen's Compensation in British Columbia

IN Quebec an order was passed governing wages, hours and other labour conditions in forest operations, and two rules of interpretation relating to Order 4 were published as well as notices concerning the zones referred to in the order. New regulations under the Manitoba Mines Act contain provisions relating to hours of labour and the safety and health of workmen, while the minimum wage rates set for mine workers in Saskatchewan are revised. In British Columbia new minimum wage orders were issued governing painters and decorators in Vancouver and district, and carpenters in Nanaimo and Alberni. Annual registration fees for certain classes of workmen in Alberta have been rescinded during any year the person affected is in active service. In British Columbia pneumoconiosis is now among the industrial diseases compensated for under the Workmen's Compensation Act.

Alberta Boilers Act and Tradesmen's Qualification Act

An Order in Council gazetted May 15 exempts pressure welders, engineers and welders from the payment of annual registration fees under the above Acts during any year in which they are in active military service, upon filing confirmation of their enlistment with the Department of Public Works.

British Columbia Male Minimum Wage Act

A new Order No. 71 under this Act regulates wages for painters, decorators and paperhangers in Vancouver, Point Grey, New Westminster, Burnaby, West Vancouver and the City and District of North Vancouver, and is to become effective on June 1.

Subject to the provision of the Act which allows the Board of Industrial Relations to classify employees as handicapped, part-time or apprentices and to permit the payment of lower rates to such persons, and to exempt apprentices indentured under the Apprenticeship Act as well as persons permanently employed in maintenance work, the minimum hourly rate for employees in this trade is set at 75 cents. Every employer is required to pay wages and salaries at least as often as semi-monthly, each payment to include the total amount due up to a date not more than seven days earlier.

Two Orders, Nos. 72 and 73, relating to carpenters on Vancouver Island became effective on May 27 and apply to the areas which lie within a radius of five miles from the centres of the cities of Alberni and Nanaimo respectively. A minimum rate of 75 cents per hour is fixed for workers engaged in carpentry work connected with new construction or the alteration of buildings, except duly indentured apprentices, persons who may be classed as apprentices or handicapped employees under

3450—4½

the authority of the Act, and permanent employees doing maintenance work in industrial and manufacturing establishments and public or private buildings.

British Columbia Workmen's Compensation Act

A regulation of the Workmen's Compensation Board of April 11 added pneumoconiosis to the list of diseases for which compensation is payable when it is contracted by a workman engaged in monument lettering and setting, stone dressing and cutting, sand-blasting, reduction and smelting of ores, and the manufacture of alabastine, lime and gypsum.

Manitoba Mines Act

Regulations governing the operation of mines in Manitoba were approved by a recent Order in Council and supersede those of 1928. The new rules have been enlarged to conform more closely with modern practice and are broadly similar to those of other provinces.

A significant change lies in the prohibition of the employment of boys under 16 above ground or of those under 18 below ground and of girls and women in or about any mine or metallurgical works except those in a technical, clerical or domestic capacity. The minimum age for the operation of elevators and cranes is 18 and where a hoisting machine is used for handling men it is 21. The rules do not cover maximum working hours, except in regard to persons operating engines used for hoisting men or materials. For this class of labour, a maximum of eight hours per day is set, except that where a regular hoistman is absent from work and no competent substitute is available extra time up to four hours per day for ten days may be worked, and that where the mine does not operate continuously on a three-shift system the hoistmen may work the extra time required to lower and raise the workmen at the beginning and end of each shift.

Unless the regulations under the Public Health Act dealing with silicosis are observed no workman is permitted to work in any underground or rock-crushing operations unless the ore or rock is crushed in water or a chemical solution and is kept constantly in a wet or moistened condition. The regulations referred to require a workman engaged in mining for more than 50 hours in a calendar month to obtain a licence from the Minister after a yearly medical examination which must include X-ray examination of the chest, or a six-month temporary permit may be obtained subject to the same conditions, employment of non-licensed persons being an offence against the regulations. (LABOUR GAZETTE, 1937, p. 349.)

Provision is made, to come into force on proclamation of the Lieutenant-Governor, for the certification of employees engaged in blasting operations and for the revocation of these certificates by the mine manager or the mines inspector in cases of a breach of the rules relating to blasting.

Persons in specified positions of responsibility are required to know the rules set out in the regulations for the protection of miners and certain of them may be suspended by a mines inspector for unfamiliarity with the rules governing the branch of work in which they are engaged. Knowledge of the English language is required of underground foremen and certain other employees. The rules relate to ventilation, sanitation, fire protection, aid to the injured, handling water, care, use and transportation of explosives, protection in working places, shafts, winzes, raises, etc., raising or lowering persons, signals, protection from machinery, use of electricity, dust protection, notice of accidents and other matters.

More adequate facilities for sanitation and aid to the injured are required by the new regulations. The shaft equipment for raising and lowering men is to be fitted with a safety appliance capable of holding the cage or skip at any point in the shaft unless the Chief Inspector gives exemption in writing, being satisfied that the maximum safety is already provided. Any device used for hoisting from a mine must be equipped, among other things, with an interlocking brake or clutch, and if operated by electricity the brakes must be automatic in case of power failure. Testing of brakes, monthly testing of safety appliances and weekly examination of hoisting equipment is provided for. Fly-wheels, geared-wheels and other moving machinery, if in a place where an employee might come into contact with it, must be enclosed by a substantial railing or casing, uneven projections must be covered, while persons in dangerous proximity to such machinery are prohibited from wearing loose clothing.

The mine manager is assigned much more responsibility in the new regulations for the observance of rules relating to the safety of miners, and may appoint in writing any person in a superintending capacity to relieve him of this responsibility and where no other person is referred to throughout the regulations as being particularly responsible the manager or superintendent is deemed so unless he can show the contravention to be caused by neglect or wrongful act of another. Where a contractor or sub-contractor takes over any work in a mine he must take responsibility for the observance of the rules.

Quebec Fair Wage Act

A rule of interpretation of the Fair Wage Board gazetted on May 18 permits those municipal corporations and school commis-

sions which took advantage of an Order in Council of December, 1938, exempting them from the provisions of Order 4 of the board, if the majority of their members so desired, to continue to be exempt for the unexpired portion of the fiscal year current on January 20, 1940, when the earlier order in council was abrogated (LABOUR GAZETTE, 1940, p. 122).

A notice of the Board gazetted May 18 lists the municipalities in each of the four zones established by Order 4. The town of Terrebonne is declared to be in Zone 3 instead of Zone 1 for the purposes of Order 4 by an order in council approved May 6 and the order, retroactive to October 15, 1939, is effective until August 1, 1940.

A new rule of interpretation relating to the levy by-law of the Fair Wage Board approved by Order in Council of May 17 lays down that the levy applies in the case of employees such as salesmen or agents, part of whose working hours are spent in the employer's establishment while the remainder are not subject to control by the employer only on those hours which are controllable.

Quebec Forest Operations Act

A new Order establishing minimum wages and other working conditions for woodsmen and stream drivers to replace those issued last year (LABOUR GAZETTE, 1939, p. 1233) was gazetted on May 11. The minimum wages of $45 per month for adults and $30 for inexperienced youths have been increased but different rates are set for the various classes of work. The provisions relating to piece work and the exception from the Order of certain types of private lands have not been renewed.

Men engaged in work preparatory or accessory to the drive are to receive a minimum of $50 per month, except sorters whose minimum is $52. Floaters and drivers, except in a waiting period before the drive during which they may be engaged in work at the camp and are subject to the $50 rate, must be paid at least $3 per day. Persons bringing logs or pulp-wood from holding ponds at a distance of two miles or less from the mill are not classed as floaters or drivers. The minimum wage for cooks is $90 per month, for assistant cooks or those preparing meals for gangs of 25 men or less, $58 and for chore-boys $50 per month. Teamsters are to receive not less than $60 per month and an additional $25 if using their own team or $12.50 for a single horse, while the minimum for stablemen is $58. Shoeing and feeding the horses and repairing harness is a charge on the employer. Contractors or sub-contractors are classed as employers and may not demand the set minima.

The former order allowed for 12½ per cent of all employees to be made up of inexperienced youths and handicapped persons, whereas the new Order provides that 15 per cent of all employees may be apprentices at a minimum rate of $2 per day.

The hours provisions of the order remain as before, a working month consisting of 26 working days of 10 hours and a week of 60 hours, but do not apply to cooks, chore-boys, teamsters and stablemen. Overtime rates have been altered from time and a quarter on week days and time and a half for necessary Sunday work to stated hourly amounts. For floaters and drivers, the hourly overtime rate is 35 cents for week days and 45 cents for Sundays, for apprentices 25 and 35 cents; sorters' rates are the same as those of the general class at 30 and 35 cents.

No charge may be made by the employer to any class of worker for medical assistance, hospitalization, first aid, board and lodging or cost of worn or broken tools, and board and lodging must be up to the standard prescribed by the Department of Health. The employer is not obliged to pay the wages of one who leaves his job, refuses to work or is sick as the result of a non-industrial accident, nor is he obliged to pay the wages of any other sick workman, although in this case he must supply board and lodging. He has the option of paying the man's transportation to his home.

The transportation expense of an employee to and from the camp is paid by the employer except for that portion of the journey made by rail or other public transportation vehicle, unless the employee leaves his work voluntarily before 15 days from the date of his engagement.

Saskatchewan Minimum Wage Act

Following the recent revision of the Minimum Wage Act the order extending the provisions of the Act to the towns of Estevan and Melville and areas within a five-mile radius thereof has been reissued. The two orders governing certain shops and factories in these towns have been also repeated in identical terms with those of last year (LABOUR GAZETTE, 1939, p. 1234) and all three are to come into force on June 17.

Saskatchewan Coal Mining Industry Act

An Order in Council of April 16 establishes minimum rates of wages for employees in all types of coal mines, the rates varying according to the class of work. In deep seam mines the minimum hourly rates for work above or below ground range from 25 cents for boys with a five-cent increase per year for three years, to 55 cents for carpenters, blacksmiths, electricians, general repair men and locomotive engineers. Intermediate rates include 40 cents

per hour for common labourers, several types of unskilled workers and tradesmen's helpers and 50 cents for machine operators, shot firers and hoist engineers. Contract rates are set for work in deep seam mines as well as for machine cutting and truck driving.

In the strip mines two hourly rates are set for each class of employees working with machinery, an operating and a repair rate. The operating wage ranges from 40 cents for common labour to $1 for mechanical shovel operators. Box car shovellers receive 42½ cents per hour and mechanics 75 cents. Some additional rates are set for workers in small mines.

The working day in coal mines in the absence of an agreement between employers and employees is eight hours per day exclusive of time taken for lunch and in going to and from the working place. The eight-hour limit has been in the Coal Mines Safety and Welfare Act since 1932.

A person convicted of violating the regulations is subject to a penalty not exceeding $100 and costs or in default two months' imprisonment, and a corporation to a fine not exceeding $500 and costs. The penalty for three convictions is loss of the operating licence.

Saskatchewan Trade Schools Regulation Act

Administration of the above Act was assigned by an Order in Council of March 30 to the Bureau of Labour and Public Welfare.

Industrial Health in War

A report entitled "Industrial Health in War; a Summary of Research Findings capable of Immediate Application in furtherance of the National Effort" has been issued by the Industrial Health Research Board (Great Britain), formerly the Industrial Fatigue Research Board, which was first appointed in direct succession to the Committee on the Health of Munition Workers set up during the war of 1914-18.

A brief summary of the report appears in the British *Ministry of Labour Gazette* for May as follows:

In a preface to the report it is remarked that "one of the lessons learned in the last war was that excessive hours of work do not ultimately pay—even when considered solely on the basis of output and apart from the effect on the health of the workers. Some of the earliest investigations undertaken by the Board were concerned with hours of work under various conditions. . . . Since then, under the direction of the Board, many researches have been promoted into the human problems of modern industrial conditions."

The results of twenty years' work were reviewed in the eighteenth annnal report of the Board, and special attention was drawn to such of the proved results of investigations as had already found a place in industrial practice or were ripe for practical application. The present moment seems to the Board timely to express in simpler form those results which ought to be applied either at once or as soon as may be practicable; and the present report is issued accordingly.

The contents of the report are presented in sections relating to: (1) Hours of work and fatigue, (2) lighting and vision, (3) heating and ventilation, (4) accidents, (5) sickness absence and labour wastage. In each of these sections facts are stated in terms as simple and non-technical as the subject-matter permits, and recommendations are made. These sections are followed by a conclusion, in which the belief is expressed that the adoption of definite recommendations made in the report "would result in increased efficiency all round and in the increased health, both bodily and mental, which is the workers' main guard against discontent."

Wages and Conditions in British Road Transport

The British *Ministry of Labour Gazette* for May reports a new order dated April 25, issued by the Minister of Labour and National Service. The order is issued under the Road Haulage Wages Act, 1938, and amends the statutory remuneration for road haulage workers prescribed by the first order made by him under the section on January 8, 1940. The effect of the new order briefly is (1) to increase the weekly remuneration by 5s. in the case of workers attached to depots in the London and Grade 1 areas, by 4s. in Grade 2 areas, and by 3s. in Grade 3 areas; and (2) to bring within the scope of the new rates road haulage workers of the classes covered by the order who are employed on road haulage work in connection with motor goods vehicles authorized to be used under A and B Defence Permit Certificates, *i.e.*, authorities for which A and B licences would have been necessary before the war under the Road and Rail Traffic Act, 1933. Appropriate increases are also made by the order in hourly rates, overtime, subsistence and holiday remuneration. The new order, which supersedes that made on January 8, 1940, is effective as from May 6, 1940.

REPORT OF INDUSTRIAL RELATIONS COMMITTEE OF CANADIAN MANUFACTURERS' ASSOCIATION

INCORPORATED in the report of the Executive Council to the annual general meeting of the Canadian Manufacturers' Association held at Winnipeg May 29, 30 and 31, was a report from the Industrial Relations Committee in which such subjects as International Labour Organization, unemployment insurance, wage policy in wartime and conciliation in wartime were dealt with.

International Labour Organization

Referring to the 1939 session of the International Labour Conference, the Committee summarized the proceedings of the Conference, and the action taken by the employers, who were represented by Mr. A. R. Goldie and Mr. G. V. V. Nicholls who acted as delegate and adviser respectively. (A full report of the proceedings of the 1939 session of the International Labour Conference appeared in the July 1939 issue of the LABOUR GAZETTE, pages 750-773).

Unemployment Insurance

The Committee reported that the sub-committee on unemployment insurance appointed at the 1939 annual general meeting of the Association, would make a report on its study, and on the several interviews which it had had with the Dominion Minister of Labour.

At one of the sessions of the meeting a resolution was passed as follows:

> "Whereas the following resolution was presented to the Government on May 15th, 1940, by representatives of this Association and other organizations:
>
> 'Whereas it has been intimated that an Unemployment Insurance bill will be introduced at the coming session of Parliament;
> Be it resolved that, if any Bill is introduced, it should not be proceeded with at the coming session of Parliament, but that an opportunity should be given for consideration of the bill by all interested persons and groups, so that all approved suggestions may be incorporated in any bill which may be proceeded with at a subsequent session.'
>
> This meeting confirms the above resolution and trusts that the Government will accede to this request."

Wage Policy in Wartime

Dealing with the subject of wages in wartime the Committee's report declared

> The Committee having learned that the Dominion Government was considering the question of laying down the principle that changes in wages should be tied to changes in the cost of living, took the view that it would be unwise for any such principle to be endorsed. For the Government to do so would, in the view of the Committee, be to encourage demands for wage increases on every increase in the cost of living. If such increases were granted, "it could only", to quote the then Prime Minister of Great Britain, "give an impetus to the vicious spiral of alternately rising prices and wages." The fact is that in war time, as in peace time, while some employers make money, others merely "break even", and others again lose money. While it might be possible for those who make money to grant wage increases, it is difficult to see how increases could be granted by those who merely "break even," or those who lose money. While the cost of living is no doubt one of the factors which must be taken into account in fixing wages, it is, by no means, the only factor; and as the economists say "wages are a function of income,"—in other words, the question of what wages can be paid depends on the amount of the income. Furthermore, while it is perfectly true that employees cannot be allowed to suffer, as a result of increases in the cost of living, the question of their well-being really depends not so much on the rate of pay, as on the amount of their annual income, and therefore the objective should be to maintain and increase employment which will certainly not be done by setting in motion a "vicious spiral of alternately rising prices and wages." To take a step which would inevitably have such a result would tend to nullify the effort the Government is making by setting up the Wartime Prices Board, to prevent undue rise of prices, and would militate against the efficient and economical production of war supplies, and the maintenance and expansion of export trade, which is naturally a matter of vital importance in the present circumstances.

These views, the report states, were submitted on behalf of the Association to the Minister of Labour, Hon. Norman A. McLarty.

Conciliation in Wartime

On this subject the Committee referred to the Association's position as follows:

> The Committee having learned that the Dominion Minister of Labour was considering the reviving of an Order-in-Council on war labour policy which was passed on the 11th of July, 1918, when there was a growing amount of industrial unrest, has made representations to the Minister of Labour deprecating the passing of any such Order-in-Council at the present time. What the 1918 Order-in-Council did in addition to deprecating strikes and lock-outs during wartime was to lay it down that employees had the right to form and join trade unions and to bargain collectively through such trade unions and that employers must

recognize trade unions and bargain collectively with them. Apart from the fact that the Order-in-Council contained no definition of "trade union" and was unsatisfactorily ambiguous in other respects, the Committee took the view that it was unnecessary and was calculated to do more harm than good. It was unnecessary, first, because there is no appreciable amount of labour unrest, secondly, because the majority of the provinces have since the last war passed legislation recognizing the right of employees to form and join trade unions and bargain collectively and, thirdly, since the last war employers have increasingly developed conciliation machinery of various kinds in their own plants and have built up goodwill in connection therewith. In these circumstances the Committee felt that to pass such an Order-in-Council as that proposed would have the effect of inducing workers to turn their backs on the conciliation machinery and the goodwill built up over the last twenty years and listen to the representations of those who tell them that the only way in which they can get justice is by banding themselves together and fighting their employers. Finally, so far as prevention of strikes and lockouts affecting the supply of war materials is concerned, the Committee felt that this was taken care of by the extension of the Industrial Disputes Investigation Act to all work in connection with war contracts.

LABOUR EDUCATIONAL ASSOCIATION OF ONTARIO

Annual Convention Affirms Loyalty—Mr. Tom Moore Emphasizes Labour's Stake in War

FEATURED by a pledge of loyalty and support to the democratic cause in the war, coupled with a resolute address from Mr. Tom Moore, president of the Trades and Labour Congress of Canada, the 38th annual convention of the Labour Educational Association of Ontario was held in the Labour Temple, Kitchener, on May 24. Approximately 100 delegates from the chief industrial sections of the province were in attendance at the sessions which were presided over by Mr. O. H. Hughes, of Kitchener, the president of the Association.

The resolution of loyalty, submitted by the Executive Committee, was adopted unanimously as follows:

"We further pledge our loyal support to the Government in its war efforts to the end that the democratic privileges which we enjoy as Canadians be perpetuated, not only for ourselves as part of the great British Commonwealth of Nations, but for all freedom-loving peoples of the world."

Referring to this resolution, Mr. Tom Moore, in a notable address to the delegates, set forth the implications and vital issues of the struggle as it affected labour in the following words:

"What has been the history of Czecho-Slovakia, Poland, Denmark, Norway and all other Nazi-invaded countries? As soon as the Germans marched in they put an end to all trade unionism. In passing this resolution we should realize that for that reason alone this war is our war, and therefore we must be prepared to do far more than declare our loyalty to the cause for which this conflict is being fought. It is this belief that caused labour in England to throw in its lot with Churchill in support of the war."

Mr. Moore further declared that emergencies may arise which would necessitate the temporary relinquishing of some of the conditions which have been built up by labour through fifty years of struggle. "If such should occur, while seeking to protect these conditions disputes should not be entered into which would delay or interfere with production. If changes were made without consultation with labour then those doing so must accept the responsibilities. Labour's duty would be to keep its forces strong in order to ensure that no permanent regression should result, and that any conditions surrendered in order to achieve victory should be fully restored when that objective is accomplished."

Reviewing the work of the Executive, the report of that Committee, in dealing with trade union education, recommended a departure from the practice developed in the last ten years of legislative recommendations emanating from the annual convention to legislative bodies. Having regard to the purpose for which the Association was founded in 1903 and its relationship to the international trade union movement, the Executive recommended that such legislative activities be left to the jurisdiction of the Trades and Labour Congress and that the Association devote its efforts primarily to making better known and understood the policies of the international trade union movement. This recommendation was adopted unanimously.

The resolutions adopted contained the following recommendations:

Revision of the Workmen's Compensation Act to meet present needs and cover all workers, male and female, irrespective of occupation; re-establishment of the tariff on

imported printing and book-binding for Canadian circulation and that permission be obtained to print and bind the Holy Bible in Canada; that all forms of commercial transportation be compelled to pay for right of way services and other necessary facilities with a view to effecting reduction in property taxation and thereby encourage the building of homes, etc., and action making for greater safety in power plants in public buildings through various amendments to the Operating Engineers' Act.

The election of officers was conducted by President Tom Moore of the Trades and Labour Congress of Canada and resulted as follows: President, Ald. Peter Grant, St. Catharines; Vice-president, Arthur Lacey, St. Catharines; Secretary-Treasurer, Rod Plant, Ottawa; Executive Board, Fred Ackerknecht, Kitchener; Mrs. E. Finkle, Toronto; J. G. Park, Ottawa; Thomas Vyles, London; H. Durliat, Niagara Falls; George Lauder, Windsor; J. P. Nicol, Thorold; J. F. Cauley, Hamilton; Len. Lear, Brantford; William Stokes, St. Thomas; T. Dealy, St. Catharines; and O. H. Hughes, Kitchener, who, by virtue of an amendment made to the Constitution, becomes a member of the Executive as the immediate Past President.

St. Thomas was chosen as the convention city for 1941.

WELFARE PLAN OF HUDSON BAY MINING AND SMELTING COMPANY, LIMITED

Employees' Retirement Financed Through Dominion Government Annuities

EFFECTIVE May 1, 1940, the Hudson Bay Mining and Smelting Company, Limited, Flin Flon, Manitoba and its subsidiary companies inaugurated a threefold plan to provide for the welfare and security of the company's employees resident in Canada. A brief outline of the plan follows.

Available to both male and female employees, participation is voluntary with respect to all those who were employed by the company on the effective date of the plan, and is designed to make provision against the following contingencies: (1) insecurity in old age; (2) death; and (3) loss of remuneration through non-occupational sickness and accidents. The first of these will be financed by joint contributions of the company and the employees. The second will be financed solely by the Company and the third will be a co-operative scheme shared equally by the company and the employees.

Retirement Pension Plan

To provide retirement income for the employees under the plan, annuity contracts will be purchased from the Annuities Branch, Dominion Department of Labour. Each participating employee will pay a percentage of his or her earnings into a fund and after normal retirement will receive a pension each year equal to at least 45 per cent of the total amount paid in. This retirement pension will be paid during the remainder of his or her life and is guaranteed for ten years in any event. (It was provided in the regulations that the retirement pension plan was to become effective only when at least 75 per cent of the eligible employees agreed to participate. Subsequent information indicates that 1,550 or 80·5 per cent of the total number of employees of participating companies have joined in the plan).

Eligibility.—All employees who have completed two years of continuous service with the company on the date of initiation of the plan are eligible for membership, and other employes become eligible on the completion of such a period of service, providing that in the case of males they have not reached their 65th birthday and in the case of females their 60th birthday. Provision is made whereby employees who have not completed the required two years of continuous service upon the effective date of the plan may contribute 3 per cent of earnings, deducted monthly, and every new employee taken into the company after the effective date shall contribute 3 per cent of earnings to the fund. These contributions are to be held in trust until the completion of two years of service when the money will be paid over in a lump sum to the Annuities Branch. Refunds of contributions are provided in the event of employees leaving the employ of the company during the probationary period.

Contributions.—Every member of the plan will contribute 3 per cent of earnings deducted monthly, the company paying the balance necessary to provide the employee with a retirement income.

Death Benefit.—In the event of the death of an employee prior to his normal retirement

date, the employee's own contributions to the fund, together with 4 per cent compound interest up to the date of his death, will be paid to his estate in a lump sum. The company's contributions on behalf of such deceased employee will be credited with interest against premiums falling due in respect of other members of the plan.

Sickness and Accident Benefit.—The plan provides that no contributions will be made for any period during which no earnings are received and, therefore, no pension will accumulate. Authorized leave of absence, due to sickness, accident or other reasons are not to constitute termination of service for the purposes of the plan.

Employees' Advisory Committee.—A committee of five, composed of one participating member of the plan from each of four sections of the company and one member elected by the participating employees at large, will be established "for the purpose of conveying to the company the views of the participating employees and considering and consulting with the company in regard to the operation of the plan generally" and in regard to matters of application and interpretation of the regulations governing the fund, etc.

Group Life Insurance

Under the group life insurance section of the plan present employees in the service of the company on the date the pension plan became effective, except those who by reason of injury or illness were not then engaged in their regular employment, are eligible to the benefit of group life insurance, provided that such present employees have joined the pension plan, or have signed application in writing which provides for their becoming a member of the pension plan when eligible.

Employees who were absent from active work on the date the pension plan became operative, because of sickness or injury or for other reasons, become eligible employees for group life insurance on the date of their return to active work.

Under the pension plan regulations, membership therein is a condition of employment; therefore all new employees become eligible for group life insurance benefits immediately on their starting to work.

Cost of Insurance.—Insurance under the plan is provided without charge to the employee, the entire cost being borne by the company.

Schedule of Insurance.—The maximum amount of insurance for which any employee may be eligible under the plan is $1,500. The following schedule of insurance is appended to the plan.

(*a*) Eligible employees with less than 2 years of service	$ 500
(*b*) Eligible employees with 2 or more years of service	1,000
(*c*) Eligible employees with 2 or more years of service will also be granted additional amounts as follows:	
For dependent wife	200
For each dependent child, not exceeding three, all under 19 years of age	100

Benefits.—No medical examination is required for any employee for any amount of life insurance provided under the plan. The insurance is payable to the beneficiary named by the employee, and the insured is to be provided with an individual certificate of insurance showing the amount of insurance, name of beneficiary and conversion privileges.

If an employee continues as a member of the pension plan until normal retirement, his insurance does not terminate until three months after such retirement. If he leaves prior to the normal retirement date, the insurance terminates thirty-one days after leaving the company's service. The plan also provides conversion privileges should an insured employee leave the company's employ.

Sickness and Accidents

In order to provide benefits for employees in the event of disability due to sickness or non-occupational accidents, the company will co-operate with the employees' advisory committee and will contribute equally with the employees towards such benefits as may be agreed upon. It was announced that a supplementary booklet to be published at a later date will set forth the details of this section of the plan.

Establishment of War Council in New Zealand

According to a Canadian Press dispatch of May 26, the Prime Minister of New Zealand had announced the immediate establishment of a War Council representing all sections of the population to take charge of war activities.

The Council will be allocated powers to call, where necessary for the war effort, compulsory national service—civil, military and financial.

The Council will consist of members of the Cabinet associated directly with the war effort, representatives of the Opposition, industrial employers, trade unions and farmers. Joint sessions of the Cabinet and the War Council will be held when necessary.

LABOUR AND INDUSTRY IN NOVA SCOTIA AND SASKATCHEWAN, 1939

Review of Annual Reports of Provincial Departments of Labour

THE annual reports of the Nova Scotia Department of Labour and the Saskatchewan Bureau of Labour and Public Welfare have recently been received, a summary of each appearing herewith.

Nova Scotia

The annual report of the Nova Scotia Department of Labour contains a detailed account of administrative operations during the fiscal year ending November 30, 1939, in regard to direct relief and relief work projects, mine apprenticeship, unemployed youth training, the employment service, inspection of factories, activities under the Industrial Standards Act, the Minimum Wage Act, and the Fishermen's Loan Board.

Unemployment and Relief.—Expenditures on direct relief and special relief work projects during the fiscal period covered by the report, amounted to $1,108,957.69, compared with $892,252.11 expended in the year 1937-38. The report states that in connection with the expenditures for both direct relief and relief work projects the Federal Government contributed "a fair percentage of the cost" and "also rendered full co-operation and assistance in a most satisfactory way." A similar comment is also made with regard to the Federal Government's participation in the Mine Apprenticeship Project, Youth Training Projects, the Fishermen's Loan Board and the Employment Service of Canada.

Mine Apprenticeship Project.—The Mine Apprenticeship Project is designed to be part of the General Apprenticeship Training Plan and covers the training of unemployed young men for the vocation of hard-rock mining and the placing of such young men when trained, in employment.

In the conduct of this project the Dominion Government contributed 40 per cent of the cost of training, living allowance for apprentices, etc. Since the commencement of the project in May, 1937, and up to December 1, 1938, a total of 455 young men had received some training. Except for those still in training, 342 or 75 per cent received employment, 28 mining companies in Nova Scotia and northern Canada having provided this employment.

The report shows that 237 apprentices, for whom records are available, received $289,375, up to December 31, 1936, the average earnings being $1,100 a year.

Youth Training.—The report contains a detailed survey of the varied activities under the Dominion-Provincial Youth Training Plan. An interesting description of the development of a youth training project is given outlining the manner in which vocational and occupational surveys are made preparatory to the organization of a project together with a description of the various progressive steps in the carrying out of a project. Interesting case histories are recorded together with other information concerning the trainees.

At the beginning of December, 1938, the number of persons in training was 104. During the following year 179 new enrollees attended classes of instruction. As a result of these classes, 115 apprentices were placed; 95 trainees secured employment, and 38 left the project without securing work while 6 left to attend college. At December 1, 1939, those in training numbered 127. A total of 52 different classes or courses were started and the average attendance at these classes was 18. Vocational guidance was given to 446; 96 persons received special instruction and 20 persons who were not trainees were placed in regular employment.

Employment Service.—The business transacted by the provincial offices of the Employment Service of Canada increased during the period reviewed by the report. Total placements for 1939 were 14,347 compared with 13,376 in 1938—an increase of 971. Cost per placement showed a corresponding decrease from $1.31 per placement in 1938 to $1.17 in 1939, the total decrease in expenditure on this account being $743.78. Applications during the fiscal year totalled 16,721, vacancies 14,664. Of the vacancies 14,347 were filled, 5,461 being regular and 8,886 in casual employment.

Factory Inspection and Industrial Standards Act.—The report of the Factory Inspector which includes a review of the activities under the Industrial Standards Act, states that during the year 387 factories and mills were inspected, several special investigations necessitating two or three visits to some of these establishments. Four hundred and seventy-six accident reports were received, of which six concerned fatal accidents. The number of industrial accidents

reported in 1938 was 456 of which six were fatal.

Commenting on the number of accidents the Factory Inspector's report states:

> It may appear that there are a large number of accidents occurring in the industrial establishments of the Province, but it must be borne in mind that in some of our large metal industries the workers are exposed to many risks —risks inherent in their work. However, by way of encouragement it should be made known that we are making notable improvement. For example, from fifteen to twenty years ago, there was an average of 1,365 accidents per year, the fatalities during the same period averaging 11 per year. For the past five years the average number of accidents per year has been 482, the fatal accidents averaging only five per year.

The inspector's report also reviews the activities of the Factory Inspection Branch in the improvement of sanitary conditions in factories, elimination of dust, fumes, smoke or gases incidental to manufacturing, etc.

Dealing with the operations under the Industrial Standards Act, the inspector's report states that there were no prosecutions for violation of the Act but that towards the close of the year reviewed, two important cases were being investigated which would probably result in court action.

Minimum Wages.—The report of the Chairman of the Minimum Wage Board indicates that at November 30, 1939, minimum wage regulations applied to the following establishments: Laundries, dry cleaning and dye works, hotels, restaurants, tea rooms, confectioners, bakers and allied foods trades, textiles, needle trades, leather trades, telephone operators, printing and paper trades, small factories, stores and shops, beauty parlours and office help.

Special attention was given to the 'Textile Trades' "due to many complaints received in connection with the girls working on the piece-rates." Following investigation, the Minimum Wage Board decided to revise the order covering this class of industry to provide that 80 per cent of the total working force in all such industries must receive the minimum wage conforming with the regulations of the Board, the remaining 20 per cent to consist of inexperienced and handicapped workers.

The report also states that all complaints received were investigated, claims for back wages and overtime due were settled, some of them amounting to $150. It was also shown that there had been a slight increase in the number of women employed during the year, the average wage remaining about the same.

Saskatchewan

The fifth annual report of the Saskatchewan Bureau of Labour and Public Welfare records the work of the Bureau for the twelve months ending April 30, 1939. Although the current report is the fifth of the Bureau of Labour and Public Welfare it constitutes the nineteenth annual report since the original Bureau of Labour and Industries was organized.

The report contains a review of labour legislation promulgated during the year reviewed, and a summary of the legislative recommendations made by the Saskatchewan Executive of the Trades and Labour Congress to the provincial government. (LABOUR GAZETTE, February, 1939, page 166.)

Strikes and Lockouts.—During the calendar year, 1938, there were three industrial disputes in the coal mines of Saskatchewan, resulting in time loss amounting to 3,400 man working days. The number of employees affected in the three disputes was 481.

One Day's Rest in Seven Act.—During the year seven charges covering three establishments were laid under the One Day's Rest in Seven Act. In three cases the defendant was found guilty and fines were imposed with costs of the court. Three cases were dismissed and one was withdrawn.

Freedom of Trade Union Association Act.—The Freedom of Trade Union Association Act, 1938, requires that every trade union file a copy of its constitution and by-laws, with the Bureau of Labour and Public Welfare, as well as a list of the names and addresses of its officers and the number of its members. A total of 137 associations registered during the year and the number of members reported was 8,710.

Minimum Wage Act.—The report refers to the appointment of a new Minimum Wage Board which held its organization meeting, the only one during the period, late in the fiscal year. During the greater part of the year, the personnel of the previous Board continued in office.

Apprenticeship Agreements.—Nine apprenticeship agreements were approved during the fiscal year, covering the trades of printing, photography, baking, window dressing, armature winding and motor mechanics.

Inspections.—During the year ended April 30, 1939, no inspections were made of factories other than those made under the Minimum Wage Act.

Overtime permits issued during the year numbered 23 and were issued to factories as required under the Factories Act.

Without resorting to court proceedings, inspectors were successful in making wage adjustments amounting to $6,488.55 to the benefit of 78 females and 146 males. In the cases of ten firms it was necessary to take court proceedings, in all eighteen charges being laid. Fines were imposed in thirteen cases, three cases were dismissed and two withdrawn.

Industrial Standards Act.—The report notes that the Industrial Standards Act was amended and during the year there were three prosecutions for infraction of schedules drawn up under the Act; two in connection with the barbering industry and one in connection with the carpentry trade, fines being imposed in each instance. Thirty-two schedules were in force during the year under review in eight cities and three towns of the province, covering fifteen industries and affecting the working conditions of approximately 495 employers and 960 employees.

Employment Service. — Nine employment offices were maintained throughout the province and a sub-office was operated in Melville during the months of September, October and November, to facilitate the placing of men on farms during the harvest season. During the fiscal year 1938-39, applications numbered 46,482, vacancies 41,829 and placements 40,142.

Farm Wages.—The average wage for workers prevailing throughout the year was: Farm work, winter, $5 per month plus government bonus, spring, $10 to $25 a month, harvest $1.50 to $3.00 per day, after threshing to freeze-up, $10 to $20 per month; work in lumber camps, $13 a month and board.

Farm Improvement and Employment.—The winter Farm Improvement and Employment Plan, financed jointly by the Federal and Provincial governments, for the purpose of placing single, homeless, destitute, unemployed persons in farm employment was administered through the Bureau. The receiving of applications and the placement work was done through the local employment offices.

Under the plan, 23,956 applications were received and 16,350 accepted, composed of 12,376 males and 3,974 females. Accepted applicants received $5 per month, with a bonus of $2.50 per month if they remained in employment for the full winter period.

Youth Training.—During the period November 1, 1938, to March 31, 1939, 1,416 boys and 1,052 girls in the province took advantage of practical free courses for young men and women. Commenting on the plan the report states: "This plan undoubtedly proved a success as we are informed by a number of these students they have been able to secure employment, and, if suitable employment was not available for some of the students at the completion of their course, they undertook the study of another subject."

ANNUAL CENSUS OF MANUFACTURING AND CERTAIN OTHER INDUSTRIES IN CANADA, 1938

Statistics Respecting Employees, Wages, Etc.

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, railways, etc., and general manufacturing in Canada. Preliminary figures for all manufacturing industries for the year 1938 have been issued and the accompanying tables give the figures in some detail.

The first table contains summary figures for all the manufacturing industries for 1930, 1933, and from 1936 to 1938, showing the number of establishments, capital invested, the number of employees on salaries and wages together with the amount of such salaries and wages, the cost of materials entering into manufactures and the value of the finished products. While the figures for 1938 were not, in some cases, as favourable as those for 1937 they did, in all cases, show increases over the figures for 1936. From 1930 to 1933 industrial activity declined but from 1934 to 1937 improvement was shown. Comparing 1938 with 1937, the number of employees on salaries increased 4·1 per cent, the total amount of salaries 5·8 per cent and the average salary 1·6 per cent. The number of employees on wages decreased 4·3 per cent, the total amount of wages 5·2 per cent and the average wage 0·9 per cent. The cost of materials entering into manufactures declined 9·9 per cent, due in part to a decline in prices during the year. The value of finished products declined 7·9 per cent, while the value added by manufacture was less by 5·3 per cent. The number of establishments engaged in manufacturing was 1·5 per cent greater and capital invested increased by 0·6 per cent.

The second table shows the number of employees on salaries and on wages with the salaries and wages paid as well as the number

TABLE 1.—MANUFACTURING INDUSTRIES IN CANADA, PRINCIPAL STATISTICS, 1930, 1933 AND 1936 TO 1938

Items	1930[1]	1933	1936	1937	1938	Change per cent in 1938 from 1937

TABLE III.—NUMBERS OF EMPLOYEES, SALARIES AND WAGES, IN SPECIFIED INDUSTRIES, IN CANADA, 1930-1931, 1933 AND 1935-1938

Industries	1930	1931	1933	1935	1936	1937	1938
Fishing:							
Number of employees	63,836	61,832	65,506	68,557	71,735	69,981	71,380
***Mining:**							
Number of employees	89,200	72,809	63,334	80,256	90,999	105,414	107,275
Wages and salaries $	113,975,332	91,969,299	70,031,805	100,080,559	116,766,222	144,292,384	145,644,000
***Metalliferous mining:**							
Number of employess	30,623	25,434	25,443	38,603	46,455	55,046	56,491
Wages and salaries $	48,851,303	41,829,288	37,937,871	59,528,350	72,016,670	90,798,501	94,466,952
Coal mining:							
Number of employees	29,172	27,860	25,375	26,198	26,918	27,202	27,074
Wages and salaries $	36,442,361	28,802,428	22,378,736	26,595,344	28,873,135	31,641,679	28,699,781
Other Mining:							
Number of employees	29,405	19,515	12,516	15,455	17,626	23,166	23,710
Wages and salaries $	28,681,668	21,337,583	9,715,198	13,956,865	15,876,417	21,852,204	22,477,267
Manufacturing (a)							
Number of employees	626,581	540,412	479,186	567,416	594,359	660,451	642,016
Wages and salaries $	708,805,323	598,238,605	444,130,213	567,806,911	612,071,434	721,627,037	705,668,589
Electric light and power:							
Number of employees	17,858	17,014	14,717	15,458	16,087	17,018	17,929
Wages and salaries $	27,287,443	26,306,956	21,431,877	22,519,993	23,367,091	25,623,767	27,148,688
Steam railways: (b)							
Number of employees	174,485	154,569	121,923	127,526	132,781	133,467	127,824
Wages and salaries $	268,347,374	229,499,505	158,326,445	172,956,218	182,638,365	193,355,584	195,108,351
Street and electric railways:							
Number of employees	18,340	17,135	14,883	14,381	14,280	14,347	14,323
Wages and salaries $	26,954,994	24,647,391	18,692,236	18,649,517	18,958,832	19,778,118	20,100,533
Telegraphs: (c)							
Number of employees	7,331	6,637	5,263	5,903	6,064	6,401	6,347
Wages and salaries $	8,674,453	7,875,058	5,870,433	7,030,830	7,360,193	8,075,838	8,205,518
Telephones:							
Number of employees	26,575	23,825	18,796	17,414	17,775	18,413	17,925
Wages and salaries $	32,085,948	28,493,252	21,276,406	22,283,362	23,365,977	25,579,850	26,020,463
Express: (d)							
Number of employees	4,996	4,616	3,998	4,126	4,293	4,611	4,678
Wages and salaries $	8,132,525	7,375,492	5,759,047	6,071,962	6,313,911	6,816,027	7,168,480

(a) See note (1), Table I.
(b) Including about half of the express employees which are also shown under Express below.
(c) Not including operators paid on commission.
(d) Full time employees only.
*The figures for mining, etc., include non-ferrous smelting and refining, clay products, cement, lime and stone (monumental and ornamental) which are also shown as sub-groups under manufacturing.

of establishments for 1938, by provinces and by groups of industries and for each of the important industries in each group.

The third table gives the figures as to the number of employees and salaries and wages paid in other industries for which figures are collected annually. The number of employees increased in the following industries: fishing, mining, electric light and power and express. Decreases were recorded in manufacturing, steam railways, street and electric railways, telegraphs, and telephones. It should be noted that in the four last named industries the total amount of salaries and wages increased despite the decreases in numbers employed.

Statistics for 1937, comparable to those contained in the present article, appeared in the LABOUR GAZETTE, May, 1939, pages 482-485. Figures from the Decennial Census of 1931, Bulletin XXXI, showing numbers of gainfully employed persons in all industries were given in the LABOUR GAZETTE, August, 1933, pages 819-821, also figures from Bulletin XXXIII, as to numbers of wage earners, weeks employed and average earnings, were given in the LABOUR GAZETTE, November, 1933, pages 1094-1095.

Industrial Health Survey in New York State

The health of nearly 300,000 workers in dangerous trades in New York is safer to-day than it was three and one half years ago as a result of medical and chemical surveys and engineering control measures by industrial hygienists in the New York State Department of Labor, Industrial Commissioner Frieda S. Miller announced recently in a progress report to the Legislature on the use of a five year grant of $50,000 annually to study and control silicosis and other occupational diseases.

"Three and one half years of experience", the Commissioner stated, "have taught us, if not how to cure silicosis, at least much about how to prevent it through dust control measures. To be effective these must be continuously and persistently applied."

The latest data on the control of various hazards have been sent in the form of frequent bulletins and reports to employers, doctors, engineers and workers all over the state.

STATISTICS OF STEAM AND ELECTRIC RAILWAYS IN CANADA, 1938

THE Dominion Bureau of Statistics has recently issued its annual reports on Statistics of Steam Railways of Canada and Statistics of Electric Railways of Canada, both of which cover the year ending December 31, 1938. Copies of these reports may be obtained from the King's Printer, Ottawa, at a cost of 50 cents and 25 cents respectively.

Steam Railways

Gross revenues for the year 1938 were $336,833,400 which was $18,269,871 or 5·1 per cent less than the corresponding figure for 1937. Prior to 1938, the figure for gross revenues had shown an increase each year since 1933 when it had been at the low point of $270,278,276. Operation expenses totalled $295,705,638 or $4,946,910 (1·6 per cent) less than in 1937. Net operating revenues amounted to $41,127,762 . The net corporate income of all railways as carried to the profit and loss account was a debit of $55,023,359 as compared with a debit of $31,222,713 in 1937, $71,706,716 in 1936 and $98,495,119 in 1933.

Tons of freight carried, excluding duplication where two or more railways carried the same freight, decreased from 82,220,374 in 1937 to 76,175,305 in 1938. Compared with 1937, freight traffic for 1938 was lighter by 7·3 per cent in tons carried and 0·3 per cent in ton miles, while passenger traffic was lighter by 5·1 per cent in number of passengers carried and by 7·6 per cent in passenger miles.

The number of employees was reduced from 133,467 in 1937 to 127,824 in 1938, as compared with 121,923 in 1933. The total payroll, however, increased from $193,557,663 to $195,108,351. The average hourly wage of those employees on an hourly basis was 62.1 cents or 6.7 per cent above the 1937 average and the average daily wage of general officers, clerks, and all employees on a daily or monthly wage was $5.91 or 5.8 per cent above the 1937 average. The lowest average wage was 28.6 cents per hour for labourers in maintenance of way and the highest was $1·652 passenger engineers. Among those paid on a basis other than an hourly one, the lowest rate was for news agents at $2.202 per day, while messengers, office boys and miscellaneous trade workers averaged $2.632 per day. The highest average pay was $21.759 per day for executives, general officers and assistants. The average yearly compensation for all positions was $1,526.38.

The report contains a table showing by classes of employees the average number employed during the year, the total hours or days on duty, total salaries and wages paid, the average number of hours or days worked per employee in each class or occupation, the average earnings per hour or per day and also per year.

The figures as to numbers of employees in each class on hourly or equivalent rates and average earnings per hour and per year are included in the supplement to the LABOUR GAZETTE on Wages and Hours of Labour in Canada, 1929, 1938 and 1939, Appendix B.

Fatal accidents to employees numbered 45 in connection with the movement of trains and 9 from other causes, while non-fatal accidents affected 898 employees in connection with the movement of trains and 4,063 employees in non-train accidents. The time lost by employees through injuries was 142,302 days.

The report contains figures for each railway as to capital, receipts, expenditure, traffic, track, equipment, etc.

Electric Railways

The mileage of main line track operated in 1938 was 1,693, which was 78 miles less than that operated in 1937 but the number of buses increased from 653 to 760.

The number of passengers carried during 1938 was 629,778,738 as compared with 631,894,662 in 1937. This decrease of 0.3 per cent was the first recorded since 1933 when 585,385,094 passengers were carried.

The gross operating earnings during 1938 were $42,537,767 and operating expenses were $29,683,131 leaving net operating revenues of $12,854,636. Dividends amounted to $2,440,319 while interest paid on funded debt was $6,703,176.

The number of employees was 14,323 with total compensation of $20,100,533. There were 6,724 motormen, conductors and conductor-motormen, their total earnings being $9,226,457. There were 757 motor bus, coach and truck drivers whose earnings were $1,394,815.

Accidents to employees were, one fatal and 314 non-fatal; to passengers, one fatal, 1,712 non-fatal; to other persons, 34 fatal and 679 non-fatal.

Figures are given for each electric railway as to capital receipts and expenditures, trackage, equipment, traffic, employees, accidents, etc.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, APRIL, 1940

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on May 1 was 11,970, the employees on their pay-rolls numbering 1,117,547 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for April was 1,969 having an aggregate membership of 253,541 persons, 9·6 per cent of whom were without employment on May 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of May, 1940, as Reported by Employers

Industrial activity at May 1 showed a decidedly upward movement which resulted in a higher level of employment than at the same date in any other year for which statistics are available, with the exception of 1929. The staffs of the 11,970 co-operating establishments aggregated 1,117,547, as compared with 1,094,600 at the first of April. This was an increase of 22,947 persons, or 2·1 per cent, a gain which slightly exceeded the average for May 1 in earlier years of the record. Based on the 1926 average as 100, the crude index rose from 111·9 at April 1, 1940, to 114·3 at the date under review, when it was 7·6 per cent higher than at the beginning of May of last spring; while the May 1, 1929 figure had been 116·2, the latest index was otherwise the highest for that date in the twenty years during which the monthly surveys have been made.

Since the general increase in employment at the first of May was rather above the normal, the seasonally adjusted index gained slightly, rising from 118·5 at April 1, to 118·7 at May 1, 1940.

Manufacturing reported substantial seasonal improvement, which carried the index to a new high level. Standing at 125·7 per cent of the 1926 average, this figure compared favourably with the previous maximum of 123·4 at April 1, 1940; in the period from 1920 until the expansion which followed the outbreak of war last autumn, the high indexes had been those of 121·7 at October 1, 1937, and 121·6 at August 1, 1929. The largest increases at the date under review were in the food, lumber, pulp and paper, clay, glass and stone and iron and steel divisions, but many others shared in the upward movement. The exceptions were the leather and tobacco groups.

Following an extremely active winter, logging camps showed seasonal curtailment on a scale that has rarely been exceeded at May 1 in the years since 1920; nearly 8,700 men were laid-off from the co-operating camps. Coal-mining also released a considerable number of workers, although the general loss was below average. The remaining non-manufacturing divisions reported substantial improvement, the most noteworthy being in construction and transportation.

For May 1, 1939, 11,607 firms had furnished data, showing that they employed 1,030,718 persons, as compared with 1,018,569 in the preceding month. Most of the improvement had been reported in services, trade, transportation and construction.

The unadjusted index numbers at May 1 in recent years are as follows: 1940, 114·3; 1939, 106·2; 1938, 107·4; 1937, 106·3; 1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8 and 1927, 101·8. The average for the calendar year 1926 is taken as 100 in calculating these indexes.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators.

For May 1, 408 firms and branches in these lines of business reported staffs aggregating 33,493 person, compared with 33,498 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings the total number of employees included in the May 1 survey of employment to 1,151,040 in 12,378 establishments, while the largest increases in personnel reported were those of 3,850 in British Columbia, 5,000 in Quebec and 8,700 in Ontario. In the Maritime and Western Provinces, the level of employment was higher than at May 1 in any other year since 1930; in Ontario, the favourable comparison goes back to 1929, while the index in Quebec was higher than in any other May for which statistics are available, (i.e. since 1920.)

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

and slightly lowers the index of 114·3 in the industries above enumerated, to 114·2; the April 1 index of 111·9 was unchanged by the inclusion of the data from financial institutions, while that for May, 1939, stood at 106·3 when such returns were included, as compared with 106·2 for the industries named in the third sentence of this paragraph.

Employment by Economic Areas

Heightened activity was indicated in all provinces except Prince Edward Island, the increases in staff ranging from 0·3 per cent in Nova Scotia to 9·8 per cent in Saskatchewan,

Maritime Provinces.—The advance in employment in the Maritime Provinces generally was not equal to the average gain at May 1 in the years since 1920; nevertheless, the index was higher than in any other May of the record except that in 1930. Eight hundred and thirty-seven firms reported 83,657 employees, or 772 more than at April 1, 1940. Activity was seasonally curtailed in logging camps and in transportation and railway construction and maintenance. On the other hand, manufacturing was decidedly brisker, mainly in the fish-preserving, pulp and paper and chemical divisions. Construction also showed con-

siderable improvement, while the changes in the remaining divisions were slight.

The 822 establishments furnishing statistics for the beginning of May last year had an aggregate payroll of 73,872 persons, being greater by 311 than at April 1, 1939. The index then stood at 100·2, compared with 112·8 at May 1, 1940.

Quebec.—An upward movement was indicated in Quebec, according to 2,984 employers of 325,940 men and women, as against 320,918 in the preceding month. While this increase of 5,022 was smaller than that noted at May 1, 1939, and was also less-than-average in the experience of the last nineteen years, it raised employment to a level higher than at any other May 1 for which data are available.

Improvement from April 1, 1940, took place in manufacturing; there were additions to staffs in lumber, food, pulp and paper, chemical, clay, glass and stone, iron and steel and non-ferrous metal plants, while leather and tobacco factories were quieter. Logging camps continued to make large seasonal reductions in their personnel, over 5,000 men being released in this industry, and the railway construction and maintenance group was slacker. On the other hand, mining, transportation, building and highway construction, services and trade showed greater activity, the gains in transportation and construction being most pronounced. Employment was brisker than at the beginning of May of last year, when 2,857 firms had reported 317,373 employees, or 6,145 more than in the preceding month; the index then stood at 111·6 or 2·3 points lower than at the date under review.

Ontario.—There was marked industrial expansion in Ontario, repeating the movement usually indicated at May 1 in earlier years of the record. Improvement was reported in manufacturing, mining, transportation, construction and maintenance, services and trade, while seasonal contractions were noted in logging. In the manufacturing group, there were considerable gains in all divisions except leather, rubber and tobacco, the largest being in iron and steel, lumber, textile, clay, glass and stone and pulp and paper products. The working forces of the 5,212 co-operating establishments included 482,406 persons, compared with 473,714 at April 1. The latest index (121·0), was higher than in the spring of any other year since 1920, with the exception of May 1, 1929, when it stood at 123·8.

Employment at the beginning of May, 1939, had declined slightly, according to statistics from 5,076 employers whose staffs aggregated 427,463. The index was then 107·9.

Prairie Provinces.—Manufacturing, transportation, construction and services showed heightened activity, the greatest additions being in highway and railway construction and in steam railway operation; in the factory group, a substantial part of the advance took place in the food, iron and steel, clay, glass and stone and oil-refining divisions. On the other hand, coal-mining and logging were seasonally slacker. Statements were compiled from 1,704 firms in the Prairie Provinces, whose employees increased from 126,386 at the beginning of April, to 130,998 at May 1. This advance was more pronounced than that recorded at the same date in 1939, and also

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
May 1, 1927	101·8	100·5	100·6	104·5	99·0	99·4
May 1, 1928	106·8	101·3	103·0	110·1	108·5	105·4

ALL INDUSTRIES	100·0	114·3	111·9	106·2

[1]For explanation of term "Relative Weight", see footnote to Table I.

rather exceeded the average gain at the beginning of May in the years since 1920. The index, standing at 100·2, was several points above that of 94·5 at the corresponding date of last year, being also higher than in any other May since that of 1930. Statistics for May 1, 1939, had been received from 1,669 establishments providing work for 122,072 men and women.

British Columbia.—The situation in British Columbia showed further and greater improvement, which was on a scale above the average at May 1 in the experience of the last nineteen years. The latest index stood at 107·2, compared with 103·3 at May 1, 1939; these indexes are higher than at the same date in other years since 1930. An aggregate payroll of 94,546 persons was reported by the 1,233

employers furnishing data, who had 90,697 on their staffs at April 1, 1940. Mining, transportation, construction and maintenance, services and manufacturing showed heightened activity; within the last-named, the greatest gains were made by lumber, iron and steel and food factories. On the other hand, logging was quieter. For May 1, 1939, 1,183 firms had reported 89,938 workers, as compared with 87,612 in the preceding month.

Table 1 gives index numbers by economic areas.

Employment by Cities

Improvement was indicated in the eight cities for which separate tabulations are made; firms in Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver reported greater activity. The largest gains were in Montreal, Toronto and Vancouver. A comparison with the figures for last year shows a higher level of employment in each of these centres except Quebec. In Ottawa and Winnipeg, the index was also higher than in any other year since 1931; in Montreal, Toronto, Hamilton and Windsor, the favourable comparison goes back to 1929, while in Vancouver employment was at its maximum for May 1 in the years for which data are available.

Montreal.—Manufacturing, transportation, construction, services and trade recorded advances in Montreal, those in the two groups first-named being extensive. Within the manufacturing division, considerable additions to staffs were made in lumber, food and iron and steel factories. The 1,770 co-operating employers reported 173,275 persons on their payrolls, compared with 169,448 at April 1. This increase exceeded that noted at May 1, 1939, but was rather below the average gain at the same date in preceding years of the record. The level of employment was higher than at May 1, 1939, when the industrial expansion reported by 1,674 establishments had resulted in an increase in their employees from 158,092 at April 1 to 161,646 at the beginning of May.

Quebec.—Statements were tabulated from 209 firms with 16,044 employees, as against 15,005 at April 1. Most of the betterment took place in manufacturing, shipping and construction, while retail trade, hotels and restaurants and other groups were also somewhat more active. The general gain was the largest recorded in any month for which statistics are available. However, the index was lower than at May 1, 1939, when the advance had also been marked. The 209 employers furnishing data had then had 17,223 workers on their payrolls.

Toronto.—Transportation, construction and maintenance, services and manufacturing reported increases in personnel in Toronto; within the last-named, iron and steel, textile and printing and publishing plants showed most improvement. According to information furnished by 1,791 concerns in Toronto, their staffs aggregated 152,209, as compared with 149,710 at April 1. This advance was much larger than that indicated at May 1 of last spring, and also exceeded the average gain at the same date in the years since 1922, when the record for Toronto was commenced. Employment was in greater volume than at the beginning of May, 1939, when statistics had been received from 1,731 establishments employing 137,683 assistants, or 1,752 more than in the preceding month; the index then stood at 107·6, compared with 117·9 at the latest date.

Ottawa.—Manufacturing and services showed a moderately upward movement in Ottawa, but construction was not so active; 233 employers reported payrolls aggregating 15,060, compared with 15,008 in the preceding month. The index, at 111·0, was over three points higher than at the same date of last spring. Two hundred and twenty-six firms had then made returns, and their employees had numbered 14,532, compared with 14,658 at April 1, 1939.

Hamilton.—A combined working force of 39,175 was indicated by the 332 co-operating establishments, as against 37,952 in their last monthly report. Manufacturing was brisker, and trade, transportation and construction also showed some improvement. Industrial activity in Hamilton was at a higher level than at the same date of last year, when a smaller advance had been recorded by the 327 reporting employers, whose personnel included 33,251 men and women.

Windsor.—There was a slight gain in Windsor; returns for May 1 were tabulated from 194 firms with 21,464 workers, compared with 21,445 in the preceding month. There was a moderate loss in manufacturing, but construction and other divisions were rather more active. Additions to their payrolls had been indicated by the 198 industries reporting at May 1, 1939, when they employed 19,461 persons. Employment was then at a lower level, the index standing at 140·8, as compared with 155·2 at the date under review.

Winnipeg.—Manufacturing and construction showed heightened activity in Winnipeg, where the 534 co-operating employers had a staff of 42,245, compared with 41,693 at April 1. Employment generally was more active than at the same date of last year, although a rather larger advance had then been noted

in the 518 establishments from which information had been received; their personnel had included 39,033 men and women.

Vancouver.—The number engaged in manufacturing operations increased in Vancouver, mainly in iron and steel and food factories; services, transportation and construction were also brisker, while other divisions showed little general change. According to data received from 538 firms in this city, they had an aggregate working force of 39,007 persons, compared with 37,662 at April 1. The index was several points higher than at the beginning of May, 1939, when a smaller advance had been reported in the payrolls of the 515 co-operating businessmen, whose employees had numbered 36,627.

Employment by Industries

Manufacturing.—Further marked expansion was recorded at the beginning of May in manufacturing operations, which provided work for a larger number of persons than in any other month of the nearly twenty years during which the monthly surveys have been made. Returns were tabulated from 6,600 establishments with a combined payroll of 645,941 men and women, as compared with 634,333 in the preceding month. This increase of 11,608 employees raised the index from 123·4 at April 1 to its all-time peak of 125·7 at May 1; the figure for the same date in 1939 had been 108·4, while the previous high index for May was that of 119·8 in 1929. The 1926 average is taken as 100 in calculating these index numbers.

The improvement at the latest date, though seasonal in character, slightly exceeded the average gain at May 1 in earlier years of the record. Accordingly, the seasonally-adjusted index showed an increase, rising fractionally from 124·4 at April 1 to 124·8 at the beginning of May.

Large additions to the staffs were reported in the lumber, iron and steel, pulp and paper, clay, glass and stone and animal foods industries, while somewhat smaller, but noteworthy gains were made in textile, beverage, chemical, electrical apparatus, non-ferrous metal, oil refining and other non-metallic mineral and miscellaneous manufacturing plants. On the other hand, leather, rubber and tobacco works were slacker, the losses in tobacco being seasonal.

For May 1, 1939, information had been received from 6,329 factories, employing 553,579 persons, an increase of 6,563 from their April 1 payrolls. The most marked gains had then occurred in the lumber and iron and steel divisions.

The unadjusted index numbers in manufacturing at May 1 in recent years are as follows, based on the 1926 average as 100:—1940, 125·7; 1939, 108·4; 1938, 110·6; 1937, 113·8; 1936, 102·7; 1935, 95·6; 1934, 90·2; 1933, 76·8; 1932, 85·8; 1931, 100·7; 1930, 112·4; 1929, 119·8; 1928, 109·0 and 1927, 103·9.

Animal Products, Edible.—Increased employment was noted in the meat, fish and dairying divisions; the improvement was more extensive than that reported at May 1, 1939, when the index was over ten points lower. Statements were tabulated from 315 firms in this group, employing 26,906 persons, or 1,090 more than at the beginning of April. There was expansion in all provinces except Alberta, that in British Columbia being most pronounced.

Fur and Fur Products.—The fur products group showed slightly more activity, according to the 80 co-operating manufacturers, who had 2,799 workers, compared with 2,658 at April 1; the index was much higher than at the same date of last year, when a decrease had been indicated.

Leather and Products.—The leather industries reported some curtailment, according to 340 establishments with 25,075 employees, a reduction of 523 from their staffs in the preceding month. The loss, which occurred chiefly in Ontario, exceeded that noted at May 1, 1939, but the index then was many points lower.

Lumber and Products.—Marked seasonal improvement was recorded in this group, particularly in sawmills. Data were received from 966 employers of 46,394 men and women, as against 43,028 in the preceding month. There were fairly general additions to personnel, those in Quebec being greatest. A much smaller increase had been registered at May 1, 1939, when the index was considerably below that of 85·8 at the beginning of May of the present year.

Plant Products, Edible.—The production of vegetable foods showed a slight advance, mainly in sugar and syrup factories, while flour and cereal mills and fruit and vegetable canning were rather quieter. The upward movement was not so pronounced as that indicated by the firms co-operating at May 1, 1939; however, the index then stood at 107·7, as compared with the latest figure of 115·4. Statements were compiled from 540 plants, whose payrolls aggregated 35,431, as against 35,342 at April 1, 1940.

Pulp and Paper Products.—Increased activity was noted in these industries, in which employment on the whole was decidedly brisker than at the same date in 1939, when smaller gains had been reported. The improvement at May 1, 1940, took place largely in pulp

and paper mills. The working forces of the 719 co-operating establishments aggregated 70,082, as against 68,766 in their last report. The greatest advances were in Quebec and Ontario.

Rubber Products.—Employment in rubber factories showed a falling-off from April; returns were tabulated from 53 manufacturers employing 13,542 workers, or 121 fewer than in the preceding month. The index was about three points higher than at the corresponding date of last year, when the situation had been unchanged from April 1, 1939.

Textile Products.—The trend of employment continued upward in this group at the beginning of May, according to statistics from 1,237 manufacturers having 126,054 men and women on their payrolls, compared with 125,622 in the preceding month. There were moderate gains in most of the various textile divisions. A slight contraction had been shown at the same date of last spring; and the index then stood at 120·4, compared with 144·9 at the date under review.

Beverages.—Data were received from 148 plants in this group employing 9,451 persons, or 408 more than in the preceding month. Employment was in greater volume than at May 1 in 1939.

Tobacco.—Important seasonal curtailment was reported in tobacco factories at the first of May; 47 establishments had a combined paylist of 11,094 workers, compared with 13,664 at April 1. Most of the loss occurred in Ontario. The index was many points higher than at the beginning of May of last year, although a smaller decline had then been noted.

Chemicals and Allied Products.—Employment in chemical and allied products showed a further increase; this took place mainly in Nova Scotia, New Brunswick, Quebec and Ontario. Information was compiled from 320 manufacturers, whose staffs included 22,476 employees, as against 21,480 in the preceding month. This gain considerably exceeded that of the same date in 1939, when the index was decidedly lower.

Clay, Glass and Stone Products.—Building material factories in all provinces indicated seasonal improvement, which resulted in the employment of a much larger number of additional workers than that reported at the beginning of May last year; the index then stood at 82·2, as compared with 95·5 at the date under review. The 222 co-operating firms had 10,803 employees at May 1, 1940, as against 9,718 in the preceding month.

Electric Light and Power.—Greater activity was recorded at the beginning of May in central electric stations, in which employment was brisker than in the spring of 1939. Statements were received from 102 companies employing 16,993 workers, an increase of 419 over their April 1 forces.

Electrical Apparatus.—Employment, on the whole, advanced moderately in electrical appliance works, according to data furnished by 127 establishments which had 19,594 employees, compared with 19,385 in the preceding month. Additions to staffs had also been registered at May 1, 1939, when the index was many points lower.

Iron and Steel Products.—Most branches of the iron and steel industry showed heightened activity, the most pronounced gains being in the shipbuilding and other vehicle, crude, rolled and forged, boiler, engine and tank and general machinery divisions. The trend was upward except in the Maritime Provinces and Saskatchewan, while the greatest gains were in Ontario. Returns were tabulated from 938 manufacturers with 160,426 operatives, as compared with 156,069 at April 1. Expansion on a much smaller scale had been indicated at the beginning of May of last year, and the level of employment then was decidedly lower. The index at May 1, 1940, was higher than in any other month since the summer of 1929.

Non-Ferrous Metal Products.—Non-ferrous metal products showed further improvement, according to statistics from 196 firms with a working force of 27,700 persons, or 459 more than at April 1. There was an advance in smelting and refining, and other branches of the industry were also busier. Little general change had been recorded in this group in the same month of 1939, and the index number then was many points lower.

Mineral Products.—Oil refineries and other plants classed in this division reported increased activity; the gain in personnel was smaller than that shown at May 1 of a year ago, but employment was then at a lower level. Data were received from 99 manufacturers, whose payrolls included 13,164 persons, as compared with 12,884 in the preceding month. The greatest gains were in Ontario.

Logging

The seasonal losses in logging indicated at May 1 were on a larger scale than those reported at the same date in 1939, and also exceeded the average for May 1 in the last nineteen years. There were decreases in all provinces, those in Quebec being particularly large. The 412 co-operating firms employed 17,802 men, or 8,687 fewer than at April 1. The index, at 60·5, was higher than at the

beginning of May in 1939, but was lower than in the spring of other years since 1933.

Mining

Coal.—Employment in coal-mining showed a contraction of a seasonal character; this was smaller than that noted in the same month of last year, when the index was a few points below that at May 1, 1940. Data were received from 107 operators with 23,671 employees, as compared with 24,638 in the preceding month. The decline took place mainly in Alberta, the changes in the other coal-fields generally being slight.

Metallic Ores.—The movement was favourable in metallic ore mines, chiefly in Ontario and British Columbia. An aggregate working force of 43,981 persons was employed by the 211 co-operating firms, who had 43,627 in their last report. There had also been a gain at the beginning of May a year ago, but activity then was not quite so great as at the date under review, when it reached the maximum recorded at May 1 in the years since 1920.

Non-Metallic Minerals (Other than Coal).—Employment in this group showed a seasonal up-turn; 101 employers enlarged their payrolls by 683 workers to 9,035 at the beginning of May. The index was between eleven and twelve points lower than at May 1, 1939, the advance then indicated having been on a smaller scale.

Communications

Increased activity on the whole was noted in communications, in which the level of employment was very slightly higher than at the corresponding date of last year. The co-operating branches and companies had a personnel of 22,379 men and women, compared with 22,223 in the preceding month; of the former number, 17,213 persons belonged in the telephone division.

Transportation

Street Railways and Cartage.—Improvement was shown in local transportation at May 1, when the 308 firms from whom information was received, reported 29,678 employees, or 836 more than at April 1. The index was several points higher than at the same date in 1939, when a smaller gain had been noted. Ontario registered most of the advance recorded at May 1, 1940, although there were widespread increases.

Steam Railways.—Steam railway operation afforded less employment in the Maritime Provinces, while in the other economic areas substantially heightened activity was shown. Statements were received from 101 employers in this division, whose payrolls were enlarged from 60,196 at April 1, to 61,557 at the beginning of May. A reduction had been noted at May 1, 1939, and the index was then several points lower.

Shipping and Stevedoring.—A combined staff of 16,532 men, as compared with 11,439 in the preceding month, was reported by the 123 firms furnishing statistics in the water transportation group. This improvement was more pronounced than that noted at the same date last year, when the index was many points lower. There were seasonal losses at May 1, 1940, in the Maritime Provinces, but elsewhere the tendency was upward, most of the gain being in Quebec and Ontario.

Construction and Maintenance

Building.—Employment in building construction showed seasonal expansion; the working forces of the 838 co-operating contractors aggregated 23,101 persons, as against 19,612 at the beginning of April. There was general improvement, that in Quebec and Ontario being most noteworthy. The index was nearly eight points higher than at May 1, 1939, when the general increase had been on a much smaller scale.

Highway.—Work on roads and highways was more active at the beginning of May; 5,148 men were taken on by the 367 employers making returns, who had 35,160 on their staffs. While there were gains in all five economic areas, those in Nova Scotia, Quebec and Saskatchewan were greatest. Although a much smaller advance on the whole had been recorded at the same date last year, highways construction and maintenance then provided employment for many more persons than in the spring of the present year.

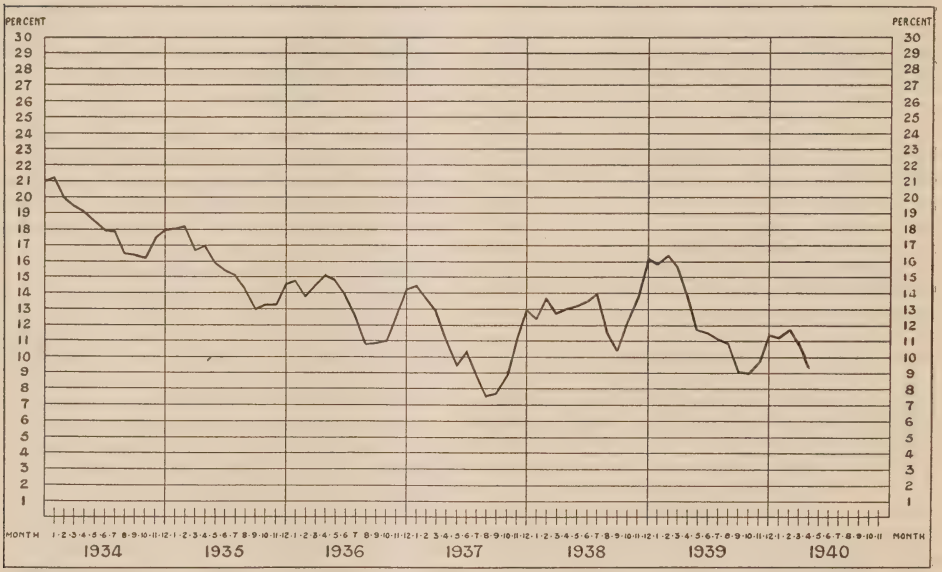
Railway.—Twenty-nine companies and divisional superintendents in this group employed 24,541 workers, as against 22,496 in their last report. There were increases in Ontario and the Western Provinces. A rather smaller gain had been noted at the beginning of May a year ago, when the index number was slightly lower than at the date under review.

Services

The service group showed considerably heightened activity, according to statements from 596 establishments employing 30,561 persons, as against 29,504 in their last report. There was improvement in the situation in laundries and dry-cleaning plants, and in hotels and restaurants. Employment was brisker than at May 1 of 1939, when the movement had also been favourable.

Trade

Continued additions to personnel were shown in wholesale and retail trade; 2,091 merchandising establishments enlarged their forces by 771 persons to 133,608 at the date under review. This increase was not equal to the average for May 1 in the years, 1921-1939; nevertheless, the index was higher than at the beginning of May in any other year of the record.



TABLES

The accompanying tables give index numbers of employment by economic areas, leading cities and industries. The columns headed "relative weight", show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at May 1, 1940.

(2) Unemployment in Trade Unions at the Close of April, 1940

The term unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons engaged at work in other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The upward movement in employment for local trade union members which was apparent at the end of March extended throughout April, with slightly increased impetus, indicating at the close of the month an unemployment percentage of 9.6, in contrast with 10.8 per cent of idleness in March. Improvement in greater measure, however, was manifest from April, 1939, when 13.9 per cent of the members reported were out of work. The percentage for April this year was based on the reports received from 1,969 labour organizations, with 253,541 members, 24,425 of whom were out of work on the last day of the month. Alberta and British Columbia unions alone, indicated a lessening in available employment from March, which was of rather slight degree, the mining industry in the former province, and the fishing industry in the latter being the determining factors in this adverse trend. Of the gains in activity in the remaining provinces that of slightly over 3 per cent in Saskatchewan was the most important viewed from a percentage basis, the steam railway division accounting almost in entirety for the change. Employment advancement of over 2 per cent was recorded from Quebec, the building trades in that

province showing considerably stimulated activity, while improvement on a somewhat smaller scale was indicated by steam railway employees. In Nova Scotia and Ontario the increases reported were of slightly over one per cent, and in New Brunswick and Manitoba the changes were so small as to be almost negligible, though tending in a favourable direction. All provinces reflected a greater volume of activity during April than in the corresponding month of 1939, Ontario and New Brunswick unions especially indicating noteworthy gains. The situation in Nova Scotia, Manitoba, Saskatchewan, British Columbia and Quebec showed more moderate expansion and in Alberta the trend was but slightly more favourable.

Each month a separate tabulation is made of unemployment affecting trade union members in the largest city in each province, with the exception of Prince Edward Island. Edmonton unions during April reported a gain of over 6 per cent in employment from March, while in Regina, Halifax and Montreal the increase recorded in each city was around 3 per cent. In Saint John and Toronto the expansion noted was slight. Vancouver unions, on the other hand, showed a small drop in work afforded from March and in Winnipeg activity was but slightly retarded. In all cities a higher level of employment was apparent than in April, 1939, Halifax, Saint John, Edmonton and Toronto particularly showing substantial increases in available work. Rather noteworthy advances were manifest also by Vancouver and Winnipeg unions and in Montreal and Regina the improvement shown was of lesser degree.

Accompanying this article is a chart which illustrates the trend of unemployment by months from January, 1934, to date. During April the curve continued in the downward course of the preceding month, denoting a somewhat greater prevalence of available employment. The divergence in the level of the curve was more marked when compared with April of last year and indicative of a considerably better situation during the period under review.

Employment in the manufacturing industries eased off slightly during April from the previous month, though moderate improvement in conditions was manifest from April a year ago. This was apparent from the reports tabulated from 591 labour organizations, embracing a total of 100,882 members, 7,320 of whom, or a percentage of 7.3 were unemployed on the last day of the month, in comparison with a percentage of 6.9 in March and with 11.8 per cent of inactivity in April, 1939. General labourers, gas workers and meat cutters and butchers showed substantial increases in employment from March and moderately better conditions obtained for fur workers. The tendency was also favourable for electric current employees, wood, hat, cap and glove, cigar and tobacco, brewery and iron and steel workers, papermakers and bakers and confectioners, though the variations from March were quite slight. Of the recessions which were more than sufficient to offset these gains the most extensive were reported by metal polishers and glass workers. Rubber workers also indicated marked increases in slackness and losses on a smaller scale were noted by leather and garment workers. Among textile and carpet workers, and printing tradesmen the trend was toward lessened employment, but the changes from March were only fractional. The situation for jewellery workers remained identical with that of March. When compared with the returns for April, 1939, the iron and steel trades recorded increases in employment involving the greatest number of members, and meat cutters and butchers, textile and carpet and leather workers were much more busily engaged. Employment expansion of noteworthy degree was apparent also among jewellery and brewery workers, general labourers and papermakers. The situation like-

wise tended favourably for wood, cigar and tobacco, hat, cap and glove, and gas workers, and bakers and confectioners. On the other hand, decidedly less favourable conditions prevailed for metal polishers and fur, rubber and glass workers. Contractions in employment of moderate degree were evident among garment workers and electric current employees, while printing tradesmen showed but fractional employment cessation.

From unions of coal miners 58 reports were tabulated during April, covering an aggregate of 21,016 members, 2,398 of whom, or a percentage of 11.4, were idle at the end of the month, contrasted with 10.4 per cent of unemployment in March and with 14.3 per cent in April last year. This less favourable tendency apparent from March was attributable to the between season lull in the Alberta and British Columbia mining areas, Nova Scotia members showing a slightly upward employment movement, while in New Brunswick all miners were reported at work, as in the previous month. Conditions in the western mining districts, however, showed some slight improvement during April from the corresponding month of last year and in Nova Scotia moderate employment advancement was apparent. New Brunswick members were, however, all busily engaged compared with a rather small percentage of idleness in April last year. Short time work also continued prevalent throughout the month.

Continued and more pronounced expansion in building and construction activities was apparent during April, the percentage of unemployment at the close of the month being maintained at 30.2 per cent, in contrast with a percentage of 36.5 in March. For April the percentage was based on the reports forwarded by 221 organizations of these tradesmen, with a membership numbering 24,974 persons. A greater measure of improvement was manifest from April a year ago when 40.0 per cent of the members reported were without employment. Extensive gains in activity from March were reflected by hod carriers and building labourers, bridge and structural iron workers, painters, decorators and paperhangers, and granite and stonecutters. Bricklayers, masons and plasterers, and steam shovelmen were also afforded a much better volume of employment. Among carpenters and joiners the advances recorded were of a more moderate degree, electrical workers showing but a nominal upward trend. Tile layers, lathers and roofers, on the contrary, indicated a large falling off in activity, but as their membership was rather small they did not greatly affect the percentage in the building trades as a whole. Among plumbers and steamfitters also, the recessions evident were rather noteworthy. In comparing with the returns for April last year decided employment advancement was reflected by carpenters and joiners, electrical workers, bridge and structural iron workers, and hod carriers and building labourers during the month under review and employment gains of considerable importance were registered by steam shovelmen. Improvement in conditions on a more moderate scale was apparent among bricklayers, masons and plasterers, and painters, decorators and paperhangers. Tile layers, lathers and roofers, however, sustained pronounced losses in work afforded and employment curtailment of much lesser degree was evident among granite and stone cutters. The trend of employment for plumbers and steam fitters was also in a less favourable direction, though the change from March was but nominal.

The 829 organizations in the transportation industries making returns at the close of April, with a total of 70,941 members, showed that 4,606 or a percentage of 6.5 were without work in comparison with percentages of 9.1 in March and 9.5 in April a year ago. In the steam railway division, which included over 80 per cent of the entire group membership reported, and among navigation workers a higher level of employment was indicated both in contrast with the preceding month and April last year, the changes in each case being rather moderate. Among teamsters and chauffeurs the situation was somewhat improved from March, though curtailment in activity in smaller measure was noted from April last year. Street and electric railway employees indicated approximately the same situation as in March, but conditions tended in a slightly more favourable direction than in April, 1939.

From associations of retail shop clerks 6 returns were compiled at the end of April, embracing a membership of 1,833 persons, of whom only 0.1 per cent were reported idle, in comparison with a fully engaged situation in March and with an unemployment percentage of 0.5 in April last year.

There was little variation in the volume of work afforded civic employees during April from either the previous month or April, 1939, according to the reports furnished by 83 organizations with 9,915 members. Of these, 201 or a percentage of 2.0 were idle at the end of the month, in contrast with percentages of 2.8 in March and 1.4 in April a year ago.

Reports tabulated from 139 unions in the miscellaneous group of trades at the close of April, with a membership total of 10,691 persons, indicated that 506 or 4.7 per cent were unemployed, compared with 4.2 per cent in

March. Theatre and stage employees showed moderate losses in work afforded from March and among stationary engineers and firemen minor contractions occurred. The tendency for barbers, hotel and restaurant employees and unclassified workers, on the other hand, was toward increased employment, though the changes were quite slight. Contrasted with the returns for April, 1939, when 6.6 per cent of idleness was recorded in the miscellaneous group of trades as a whole, unclassified workers indicated noteworthy improvement in conditions during the month reviewed and slight gains were apparent among stationary engineers and firemen, hotel and restaurant, and theatre and stage employees. Barbers alone showed curtailment in activity, which was of moderate degree.

Fishermen were much slacker during April than the previous month, the 5 unions making returns with 2,763 members showing that 504 or a percentage of 18.2 were unemployed, in comparison with 4.3 per cent of inactivity in March. Reduced employment on a small scale was noted from April last year when 16.6 per cent of idleness was recorded.

Lumber workers and loggers were moderately better engaged during April than in March, while quite pronounced expansion was apparent from April last year. Reporting for the month under review were 7 associations of these workers combining a membership of 2,638 persons, 311 or 11.8 per cent of whom were unemployed on the last day of the month, in contrast with percentages of 14.8 in March and 30.7 in April a year ago.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1939, inclusive, and also the percentages of unemployment for April of each year from 1929 to 1938, inclusive, and for each month from April, 1939, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for April, 1940

The volume of business transacted by the offices of the Employment Service of Canada during April, 1940, as indicated by the average daily placements effected, showed gains of over 17 per cent and 7 per cent, respectively, in comparison with that of the previous month and also of the corresponding month a year ago. Noteworthy gains over March were recorded in services, farming and construction and maintenance, augmented by others of smaller proportions in manufacturing and transportation. Increases shown in mining and trade were nominal only. Logging was the one group to register a decline, but this was fairly large. In comparison with April, 1939, more placements were reported in all industrial divisions, except construction and maintenance and mining, which showed small losses, the most substantial gains being in services and manufacturing.

The accompanying chart shows the trend of employment from January, 1938, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the offices of the Service throughout Canada, computations being made semi-monthly. As may be seen from the graph, the curves of vacancies and placements in relation to applications showed little variation during the first half of April, but followed a marked upward trend during the latter half of the month, and at the close of the period had attained levels about five points above those reached at the close of April a year ago. The ratios of vacancies to each 100 applications were 43.3 and 51.5 during the first and the second half of April, respectively, in contrast with ratios of 48.3 and 45.8 during the corresponding periods of 1939. The ratios of placements to each 100 applications during the periods under review were 39.0 and 46.4, as compared with 45.6 and 42.1 during April last year.

The average number of vacancies reported daily to the offices of the Service throughout Canada was 1,304, as compared with 1,096 in the previous month and with 1,174 in April a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,759, as compared with 2,623 in March, 1940, and with 2,499 in April a year ago.

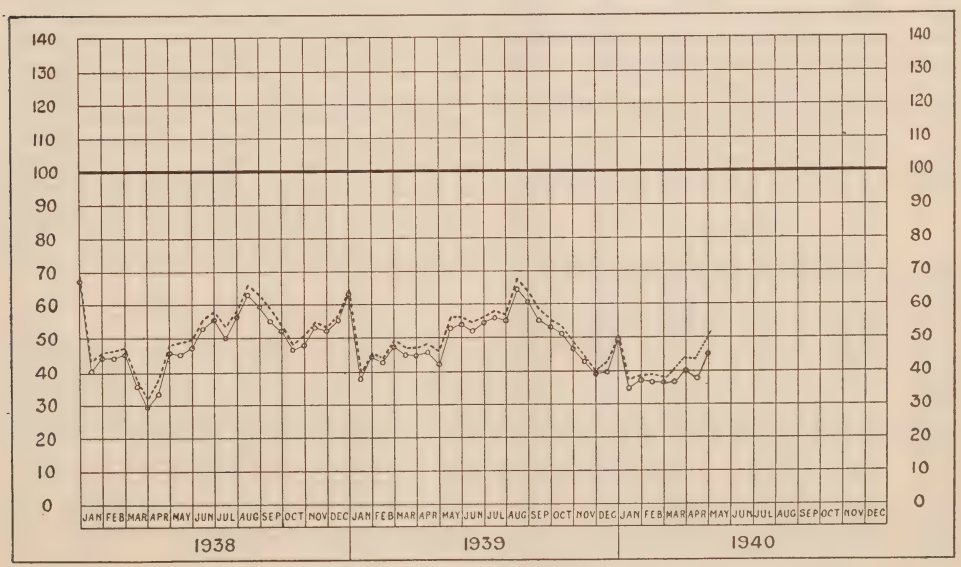
The average number of placements made daily by the offices of the Service during April, 1940, was 1,173, of which 708 were in regular employment and 465 in work of one week's duration or less, as compared with a total daily average of 1,000 during the preceding month. Placements in April last year averaged 1,094 daily, consisting of 590 placements in regular and 504 in casual employment.

During the month of April, 1940, offices of the Service referred 32,057 persons to vacancies and effected a total of 30,497 placements. Of these, the placements in regular employment were 18,405, of which 12,544 were of men and 5,861 of women, while placements in casual work totalled 12,092. The number of vacancies reported by employers was 19,036 for men

and 14,856 for women, a total of 33,892, while applications for work numbered 71,729, of which 51,832 were from men and 19,897 from women. Reports for March, 1940, showed 26,286 positions available, 62,931 applications made and 23,978 placements effected, while in April, 1939, there were recorded 26,994 vacancies, 57,469 applications for work and 25,146 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1930, to date:—

Year	Placements		
	Regular	Casual	Totals
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,064	182,527	405,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940 (4 months)	62,654	40,934	103,588



NOVA SCOTIA

During the month of April, 1940, positions offered through Employment Offices in Nova Scotia were nearly 20 per cent higher than in the preceding month, and over 71 per cent above the corresponding month of last year. There was an increase also in placements of over 19 per cent when compared with March and of nearly 65 per cent in comparison with April, 1939. The large increase in placements over April of last year was almost entirely due to gains in services and construction and maintenance, although placements were slightly higher also in manufacturing and trade. There was a small loss in logging and minor changes only in all other groups. Placements by industrial divisions included construction and maintenance 673, and services 1,016, of which 715 were of household workers. During the month 581 men and 183 women were placed in regular employment.

NEW BRUNSWICK

Opportunities for employment, as indicated by orders received at Employment Offices in New Brunswick during April, were nearly 20 per cent better than in the preceding month and over 35 per cent above the corresponding month of last year. Approximately the same percentages of gain were reported in placements under both comparisons. Gains in construction and maintenance and services accounted for the increase in placements over April, 1939, as small changes only were reported in all other groups. Placements under construction and maintenance numbered 539 and in services 788, of the latter 631 were of household workers. There were 150 men and 139 women placed in regular employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

QUEBEC

There was an increase of over 23 per cent in the number of positions offered through Employment Offices in the province of Quebec during April, when compared with the preceding month and of over 49 per cent in comparison with the corresponding month of last year. Placements also were nearly 14 per cent higher than in March and nearly 37 per cent above April, 1939. With the exception of a decrease in the highway division of construction and maintenance, due to the curtailment of highway construction, all industrial divisions showed gains in placements over April of last year, the most important increase being in services, with more moderate improvement in logging and manufacturing. Industrial divisions in which most of the placements were effected during the month were manufacturing 378; logging 502; farming 111; construction and maintenance 1,766; trade 147 and services 4,101, of which 3,697 were of household workers. Placements in regular employment numbered 2,716 of men and 2,188 of women.

ONTARIO

Employment opportunities, as indicated by orders received at Employment Offices in Ontario during April, were over 41 per cent better than in the preceding month and nearly 26 per cent above the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. All industrial divisions, except mining, participated in the increase in placements over April, 1939, the most important improvement being in services and manufacturing, with smaller gains in construction and maintenance, trade and farming. Placements by industrial divisions included manufacturing 1,276; logging 106; farming 1,363; transportation 112; construction and maintenance 3,922; trade 400, and services 4,500, of which 2,990 were of household workers. There were 4,815 men and 1,655 women placed in regular employment.

MANITOBA

Orders received at Employment Offices in Manitoba during April called for nearly 16 per cent more workers than in the preceding month and nearly 4 per cent more than during the corresponding month of last year. There was an increase of 18 per cent in placements when compared with March and of over 5 per cent in comparison with April, 1939. The only changes of importance in placements from April a year ago were in construction and maintenance and farming, a gain in the former being largely offset by a decline in the latter. Placements by industrial divisions included manufacturing 63; farming 660; construction and maintenance 359, and services 844, of which 731 were of household workers. During the month 1,121 men and 407 women were placed in regular employment.

SASKATCHEWAN

The demand for workers, as indicated by orders received at Employment Offices in Saskatchewan during April, was nearly 95 per cent greater than in the preceding month, and over 25 per cent above the corresponding month of last year. There was an increase also in placements of nearly 105 per cent when compared with March and over 20 per cent in comparison with April, 1939. The increase in placements over April of last year was mainly due to gains in services and farming, although placements in all other groups were either higher or on the same level as in April, 1939. Industrial divisions in which most of the placements were effected during the month were farming 975; construction and maintenance 81, and services 751, of which 565 were of household workers. During the month 1,069 men and 466 women were placed in regular employment.

ALBERTA

Positions offered through Employment Offices in Alberta during April were nearly 10 per cent more than in the preceding month, but over 6 per cent fewer than during the corresponding month of last year. There was an increase of nearly 13 per cent in placements when compared with March, but a decrease of nearly 7 per cent in comparison with April, 1939. A decrease in the highway division of construction and maintenance accounted for the decline in placements from April of last year, as an increase in logging was offset by a loss in services. The changes in all other groups were quite small. Placements by industrial divisions included manufacturing 48; logging 58; farming 652; transportation 54; construction and maintenance 116, and services 589, of which 478 were of household workers. There were 899 men and 415 women placed in regular employment during the month.

BRITISH COLUMBIA

Employment Offices in British Columbia were notified of over 8 per cent more vacancies in April than in the preceding month, but nearly 10 per cent fewer than during the corresponding month of last year. Placements showed the same percentages of change under both comparisons. A reduction in placements in the highway division of construction and maintenance accounted for the decline from April, 1939, although there was a moderate loss

* 66 Placements effected by offices now closed.

also in logging. These decreases were largely offset by a fairly large gain in services and moderate increases in transportation, manufacturing, farming and trade. Industrial divisions in which most of the placements were effected during the month were manufacturing 83; transportation 79; farming 164; construction and maintenance 1,430, and services 1,094, of which 737 were of household workers. Placements in regular employment numbered 1,193 of men and 408 of women.

Movement of Labour

During the month of April, 1940, the offices of the Employment Service of Canada effected 18,405 placements in regular employment, 8,445 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter 347 were granted the Employment Service reduced transportation rate, 258 going to centres within the same province as the despatching office and 89 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during April numbered 59, all of which were of bushmen bound for employment in the Pembroke zone on certificates secured at the Hull office. Business transacted by Ontario offices during April involved the issue of 144 certificates to provincial centres. From Port Arthur the labour movement consisted of the transfer of 110 bush workers, 7 carpenters and one hotel employee within the territory covered by that city office, while for points within their respective zones also the Fort William office shipped 6 bushmen, one dock hand and one cook and the Sudbury office 6 bush workers and one mine cook. In addition, the Sudbury zone was the destination of one foreman travelling from Pembroke. From North Bay 3 painters and one farm hand were conveyed to Timmins and 5 machinists to Barrie. The Barrie zone also received one shipbuilder from Windsor. The movement of labour in Manitoba during April emanated from Winnipeg and included the despatch of 41 persons, 11 of whom travelled to provincial situations and 30 outside the province. Within the province the transfers were of 10 farm hands and one miner destined to employment in the Winnipeg zone. Of the workers going to other provinces 20 bushmen, 6 mine employees, one laundress, one cook and one hotel waiter were transported to Port Arthur, while one farm hand proceeded to a point in the Prince Albert zone. In Saskatchewan during April 2 certificates for reduced transportation were issued, both to provincial points. Receiving certificates at Regina one chore boy travelled to Swift Current, while the Saskatoon office transferred one farm hand within its own zone. Taking advantage of the reduced rate in Alberta during April 96 persons proceeded to employment at centres within the province. The Edmonton office was instrumental in the despatch of 41 water transportation employees, 17 farm hands, one farm domestic, 4 highway construction labourers, 4 fish company employees, 2 mine workers, 2 hotel employees, 2 cooks, one sawmill hand, one store clerk, one teamster and one maid to various sections of the Edmonton zone. From Calgary 7 farm hands were shipped to Drumheller, one farm hand to Lethbridge and 10 farm hands within the Calgary zone. The one remaining transfer was of a cook sent from Lethbridge to Edmonton. The Vancouver office was responsible for the 5 transfers at the reduced rate effected in British Columbia during April, which were to provincial situations. To points in the Vancouver zone were conveyed one bridge foreman, one hotel employee, one farm hand and one ranch cook, while the Penticton zone received one sawmill engineer.

Of the 347 persons transferred at the Employment Service reduced rate during April 201 journeyed over the Canadian National Railways, 139 over the Canadian Pacific Railway, 4 over the Temiskaming and Northern Ontario Railway and 3 over the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada during April, 1940

The Dominion Bureau of Statistics in its April report of building permits issued by municipalities in Canada includes returns from 175 municipalities, 25 more than the number shown in the March report. Of this number, 164 reported detailed permits, while the remaining 11 advised that none had been issued by them during that month. Twenty-seven municipalities failed to report. The total value of permits reported as having been issued in the month of April is $9,916,639. Revised values for the month of March now show permits from 197 municipalities, valued at $5,584,166.

Of the 58 original municipalities, 57 reported a value of $6,959,537 for the month of April. The revised value for the total 58 for the month of March amounts to $4,535,791. The

corresponding value for April, 1939, was $5,960,638.

The total value of permits issued during the first 4 months of 1940 by all municipalities is $22,756,183, and the revised value for the 58 municipalities is $16,981,166. The corresponding value for the 58 in 1939 was $12,953,605.

New construction of all types amounted to 72·9 per cent of the total value and the percentage of new residential construction was 51·4.

As an accurate and authentic index value for the 202 municipalities can only be arrived at from values covering a 12 month period, such index will not be available until 1941.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MAY, 1940

Reports of the Superintendents of the Employment Service

The employment situation at the end of May, 1940, was reported by the superintendents of the Employment Service of Canada to be as follows:—

Farmers in the Maritime Provinces were busily engaged in putting in their crops although in some districts the soil still remained too cold and wet for planting. Produce at the markets was abundant and of good variety. Good catches of lobsters were brought in and bait was plentiful, also cod and haddock. Logging was confined chiefly to pulpwood cutting and peeling, stream driving being very light in volume. Mines in the New Glasgow area operated four and five days per week, while those in Cape Breton and vicinity worked from three and a half to six days. Some manufacturing concerns were slacker, but the majority were very busy, and no idleness was reported by the iron and steel industry. Road and building construction continued steady, although few new projects were being started. Passenger and freight traffic was heavy and trade was good, with collections fair. Numerous requests were received for household and char workers and placements were made.

The call for farm help in the Province of Quebec was fairly good, with seeding under way. Logging was more active, particularly at Chicoutimi, Matane and Hull, and there and elsewhere, river driving provided additional work for experienced men. With the exception of shoe factories in Quebec City, which reported some slackness, all other industrial concerns in this centre, as well as those in Chicoutimi, Hull, Three Rivers and Matane were operating at full capacity. At Montreal, leather, clothing and textile establishments also were working steadily. Sherbrooke iron works were engaged in the making of machinery needed for the manufacture of ammunition, but concerns producing building materials at Val d'Or were not so busy, as poor weather had delayed building operations. Construction, in general, throughout the province was much more active and nearly all skilled labour was employed. Road work likewise continued. Trade was satisfactory and requests for household domestics favourable.

An average demand existed in Ontario for farm help, though in several localities prolonged wet weather had prevented much work being done on low land. Logging was very active, there being many calls for peelers and pulpcutters. Sawmills also were busy, with sufficient labour available to meet a normal turnover. Mining was rather quiet. Iron and steel and textile establishments continued to report improvement, both in production and staff levels and factories on war contracts were preparing to speed up output and work longer hours. All other lines were operating as usual, with few cases being recorded of any reduction in staffs. Good progress was shown on building projects previously reported, and hiring of men for construction work on summer quarters for troops at Camp Borden had reached its peak, while erection of huts at Petawawa Military Camp was nearing completion. In nearly all districts the volume of work under way was adequate to retain in employment practically all skilled tradesmen. Work also was available on landing fields in connection with airport operation, also on highway construction and maintenance, although inclement weather had held up some paving operations. Transportation of freight, by lake and rail, was very good and trade improved. Requests for capable cooks and cooks-general were more numerous, but considerable difficulty was experienced in locating fully qualified applicants. However, housecleaning had afforded increased opportunities for charworkers and these orders were easily filled. Some women and girls also were placed in clerical and industrial employment.

Seeding operations in the Prairie Provinces being practically completed, the demand for farm help showed a decline, but logging was a little more active. Mining was quiet, likewise manufacturing. Building permits at Winnipeg had passed the million dollar mark and were nearly double those of the corresponding period last year. National Defence projects at various centres were being rushed to completion and other construction was proceeding normally, with some highway work also under way. Oil well production was fairly steady, drilling operations at Lethbridge having again begun. Trade was fair. Requests were received in the Women's Division for household workers, but eligible applicants were scarce.

Requests for farm help in British Columbia were confined chiefly to those for experienced milkers; however, orchard work and peach thinning would soon begin, the crop being fairly heavy. Logging, although slow, showed a little more activity, and the fact that ships were being made available for export of lumber to Great Britain, greatly relieved the local

situation at Vancouver. Mining was fairly constant, but with no call for workers. Construction was more active, there being an upward trend in nearly all divisions, so that skilled tradesmen were well employed. Road work also continued. Shipping and longshore work were quiet at New Westminster and busier at Prince Rupert, where heavy landings of halibut had resulted in increased work for longshoremen; at Victoria, although activity prevailed at shipyards and docks, no extra hands were required. Trade was fair. More work was offered in the Women's Section, particularly at Victoria, where there were many calls for berry pickers, but a number of applicants were registered for positions in stores who were unwilling to take domestic and field work.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, May, 1940, summarized the employment situation as follows:—

There was a further substantial improvement in employment between March 11 and April 15. Between these two dates the number of unemployed persons on the registers of Employment Exchanges in Great Britain fell by 148,518, and the total of 972,695 registered at April 15 was the lowest recorded since the end of 1920, when the extended unemployment insurance scheme came into operation.

As compared with April 17, 1939, the number unemployed at April 15, 1940, in Great Britain was lower by 671,699. For Great Britain and Northern Ireland there was a total of 1,040,344 wholly unemployed (947,043) or temporarily stopped (93,301) on the registers at April 15, a reduction of 152,915 compared with the total as at March 11, 1940, and a decrease of 685,739 compared with the figures for April 17, 1939.

The reduction in unemployment between March and April, 1940, was distributed over nearly all the principal industries, the greatest reductions occurring in building and public works contracting, the distributive trades and agriculture. There were also substantial decreases in hotel and boarding house service, coal mining, engineering, metal goods manufacture, furniture manufacture, printing and bookbinding, local government service, dock, harbour, etc., service, road transport, brick and tile manufacture, tailoring and dressmaking.

There was a further decrease in the numbers unemployed in every division. The decreases were numerically greatest in the London and North-Western Divisions and in Scotland; there were proportionately large decreases in the North-Midlands, Midlands and Eastern Divisions.

The number of insured persons, aged 16 to 64, recorded as unemployed in Great Britain and Northern Ireland at April 15, 1940, represented 6·7 per cent of the total number of insured persons, aged 16 to 64, at July, 1939, as compared with 7·7 per cent at March 11, 1940. At April 17, 1939, the percentage unemployed was 11·2. For persons under the general scheme the corresponding percentages were 6·8 at April 15, 1940, 7·8 at March 11, 1940, and 11·5 at April 17, 1939. For persons within the agricultural scheme the percentages were 4·4, 7·0, and 6·2 respectively.

United States

In an official press release issued on May 22, by Miss Frances Perkins, United States Secretary of Labor, it was stated that: "Because of the further reduction in factory employment and the decline in retail trade resulting from the earlier Easter season this year, there was little change in non-agricultural employment in April. Ordinarily there is a substantial gain at this time of year."

The following paragraphs taken from the press release indicate the employment situation in the United States to be as follows:—

Seasonal employment gains in public and private construction and the construction material industries, in quarrying and metal mining, and in the war-supply and food manufacturing industries, were offset by reductions in other factory employment, in coal mines and on railroads.

Employment in private industry and in regular government services continues to be higher than a year ago at this time. Last April nearly 300,000 fewer coal miners were at work, pending the signing of new wage agreements. Allowing for this unusual situation last year in coal mines, a comparison of non-agricultural employment in April of this year with 1939 shows a gain of about three-quarters of a million.

In manufacturing, there was a net reduction of 0·9 per cent in employment, affecting 75,000 workers. Usually, there is little change at this time of year. Lay-offs were reported in two-thirds of the 90 reporting industries.

The reductions in employment included iron and steel (12,600 workers) automobiles

(10,100 workers), woollen and cotton textiles (14,300 workers) and the clothing industries, which laid off 29,500 workers as activity slackened seasonally.

Factories stimulated directly or indirectly by government or war-time orders continued to absorb additional employees. Employment in aircraft, machine tool and engine manufacturers again increased to new highs in April. Aircraft firms employed nearly twice as many workers as last year and makers of machine tools and of engines both reported a gain of more than 50 per cent from 1939. Shipyards had about one-third more workers than a year ago, with the highest level of employment since 1921. Manufacturers of explosives showed a gain of 35 per cent over April of last year.

During April there were also substantial seasonal employment gains in the fertilizer, canning, ice cream, brick and cement industries.

Employment on Class I steam railroads, according to preliminary reports of the Interstate Commerce Commission, was reduced by 2,200 from March to April, and anthracite and bituminous coal mines reported a combined decrease of more than 18,000 workers.

The principal gains in employment were in private building construction, where contractors reported a seasonal gain of 11·3 per cent, and in Federal public building and State road construction, which together were using about 45,000 more men than in March. Public utilities added approximately 5,000 workers to their pay rolls and some seasonal gains were reported in the hotel, dyeing and cleaning, laundry and quarrying industries. Metal mines also enlarged their forces in April.

There was a rather unusual reduction in employment in retail stores, where large numbers of temporary workers engaged in March to handle Easter trade and early spring business, were released, with a net decline of 42,000. At this level, however, employment in retail trade was approximately 2 per cent above that of April, 1939. Principal reductions were in department, variety, and apparel stores, which had shown unusually marked employment gains in March. Some seasonal increases were reported in other retail lines, especially by building supply, farm implement, and automotive dealers.

Wholesale firms reported a slightly greater-than-seasonal decline of 1·6 per cent, or 24,000 workers. In addition to expected seasonal recessions in wholesale lines dealing with farm products, firms handling dry goods and apparel, petroleum and chemicals also reduced their staffs.

FAIR WAGE SCHEDULE FOR PUBLIC AND CERTAIN PRIVATE CONSTRUCTION WORKS IN MANITOBA

UNDER the authority of section 11 of the Fair Wage Act of Manitoba, 1916 (Consolidated Amendments, 1924, chapter 99—as amended, 1934, chapter 13; 1935, chapter 17; 1937-38, chapter 15; 1939 chapter 21, 22; 1940, chapter 17) the provincial Minister of Public Works has approved a schedule effective June 1, 1940, establishing the minimum rate per hour and the maximum working hours applicable on public works for building construction under contract and on private works as described in the Act.

"Private Works," as defined by the Act "means the building, construction, remodelling, demolition, or the repairing at a cost of all work done irrespective of the number of contracts made exceeding one hundred dollars, of any building or construction work within the Greater Winnipeg Water District or any city or town which has a population exceeding two thousand, or any other portion of the Province to which the provisions of this Act are extended by the Lieutenant-Governor in Council, but shall not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant thereof if no more than three men are employed in addition to the regular maintenance staff, if any, and if such work be not undertaken with a view to sale or rental of the property and shall not include work which is done by a maintenance man, or men, employed by the month."

The public work to which this schedule applies is that authorized by the Minister for the execution of which a contract has, or contracts have been entered into between the Minister and an employer, consisting of construction, remodelling, demolition or the repairing or painting of buildings in Manitoba, and, or, highway, road, bridge or drainage construction work, when a contract has been entered into, and when done outside the "Greater Winnipeg Water District Area."

Fair Wage Schedule

The following schedule shall apply from and after June 1, 1940, on "Public Works" and on "Private Work."

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Govt. Work, Wpg. and radius of 30 miles	B—Other than Area described in "A" (applies to private work when population exceeds 2,000)	Max'm Hours per week
	Minimum rate per hour		
1. Asbestos Workers—			
(a) Journeymen	$ .75	$ .75	44
(b) Improvers	.60	.60	44
2. Asphalters—			
(a) Finishers and Rakers	.571	.525	44
3. Blacksmiths	.65	.60	44
4. Bricklayers	1.10	.90	44
Helpers—			
(a) Continuously employed at mixing and tempering mortar	.50	.42½	48
(b) Attending on or at scaffold	.45	.37½	48
Subject to any other agreement between the Builders' Exchange and the Bricklayers' Union.			
5. Bridge and Structural Steel and Iron Workers	.85	.85	44
6. Carpenters	.85	.70	44
Subject to any other agreement between the Builders' Exchange and Carpenters' Union, Local 343.			
7. Cement Finishers (in warehouse or large floor area jobs)	.60	.55	48
8. Electrical Workers (inside wiremen, licensed journeymen)	.85	.75	44
Apprentices indentured for a four-year period shall be paid in accordance with the following classification. Men are not to be classed as apprentices unless employed on work or approved instruction for a minimum of 36 weeks and subject to lost time being worked out. Not more than one apprentice to two journeymen is permitted.			
First Year	.25	Nil	44
Second Year	.30	Nil	44
Third Year	.40	Nil	44
Fourth Year	.75	Nil	44
Providing that these rates for apprentices shall be changed to agree with any rates which may be fixed, at a later date, by agreement.			
9. Labourers—			
(a) Skilled	·47½	·40	48
(b) Unskilled	.42½	.35	48
10. Lathers (Metal, Wood)—			
(a) Metal Lathers	.75	.70	44
(b) Wood Lathers	.70	.65	44
(Wood lathers—work may be paid for on a square yard basis at not less than 6c per square yard.)			
11. Linoleum Floor Layers	.60	.55	48
12. Marble Setters	1.05	.90	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
13. Mastic Floor Spreaders and Layers	.85	.85	48
14. Mastic Floor Rubbers and Finishers	·55	·55	48
15. Mastic Floor Kettlemen	.45	.45	48
16. Operating Engineers and Firemen on Construction—			
Class "A": Engineers in charge of hoisting engines of three drums or more operating any type of machine, or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over, or operating drop hammer pile drivers; in all cases irrespective of motive power	.95	.75	48
Class "B": Engineers in charge of hoisting engines having only two drums or of single drum, used in handling building material; or steam shovels and draglines not specified in "A" hereof; irrespective of motive power	.90	.70	48

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Govt. Work, Wpg. and radius of 30 miles	B—Other than Area described in "A" (applies to private work when population exceeds 2,000)	Max'm Hours per week
	Minimum rate per hour		
16. Operating Engineers, etc.—*Con.*			
Class "C": Engineers in charge of any steam operated machine not specified in "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provision of "The Steam Boiler Act"; or air compressor delivering air for the operation of riveting guns on steel erection work, or pumps in caissons, or concrete mixers of over ½ yard capacity, irrespective of motive power	.80	.65	48
Class "D": Men firing boilers of machines classified in "A", "B", or "C" hereof or assisting engineers in charge of same	.55	.45	48
Class "E": Operators of gas or electric engines for machines not otherwise specified in "A", "B", or "C" hereof of a type usually operated by skilled labourers	.45	.37½	48
17. Painters, Decorators, Paperhangers and Glaziers	.70	.65	44
18. Plasterers	1.10	.90	44
(a) Helpers (continuously employed at mixing and tempering material including the making of putty and operation of machinery)	.50	.42½	48
19. Plumbers	.95	.80	44
(a) Helpers (all men assigned to help tradesmen)	·50	·42½	48
20. Roofers (felt and gravel)—			
(a) Man in charge	.60	.55	48
(b) Roofers	.45	.37½	48
21. Reinforcing Steel Rodmen; when specially hired for, or when exclusively occupied on such work for a longer period than 16 consecutive hours on the work of bending, placing, tieing and similar skilled work in connection with reinforcing steel work	.50	Nil	44
22. Sheet Metal Workers	.70	.65	44
23. Steamfitters	·95	·80	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
24. Stonecutters	.90	.80	44
25. Stonemasons	1.10	.90	44
(a) Helpers—			
(1) Continuously employed at mixing and tempering mortar	.50	.42½	48
(2) Attending on or at scaffold	.45	.37½	48
26. (a) Teamsters	.40	Nil	54
(b) Teamsters with Teams (if employed on the construction or demolition of the building by the owner, contractor or sub-contractor)	.80	Nil	54
27. Terrazzo Workers—			
(a) Layers	·70	·67½	44
(b) Machine Rubbers (Dry)	.55	.47½	48
(c) Machine Rubbers (Wet) and Helpers	.50	.45	48
28. Tile Setters, including all clay product tile	1.05	.90	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
29. Tile Setters (asphalt and other composition tile)	.85	.70	44
30. Timber Men and Crib Men working on grain elevators or bridges doing the "crib work" on grain elevators, or rough timber work on bridges (such men shall be restricted to the use of hammers, saws, axes and augers)	.60	.50	48
31. Truck Drivers	.45	.40	48
32. Truck Only—			
(a) When paid by the hour—When truck is hauling not more than 1 cubic yard	.55		
For each additional 1/10 cubic yard load	.04		

RULE—All men hired in Winnipeg to go into the country to work on buildings shall be paid the City schedule rate, excepting where other definite agreements are made.

Attention is called to the fact that Winnipeg Contractors have agreed with tradesmen that 40 hours per week only shall be worked during period July 1 to September 2, 1940, inclusive.

PUBLIC ROAD AND BRIDGE WORKS

The following schedule shall apply from and after June 1, A.D. 1940, on "public works" outside the Greater Winnipeg Water District Area in all parts of Manitoba for highway, road, bridge or drainage construction work where a contract has been entered into by the Honourable Minister of Public Works.

Occupation	Minimum Rate per Hour	Maximum Hours per Week
Teamsters	$ .30	48
Labourers	.30	48
Teamster and two-horse team	.55	48
Teamster and four-horse team	.80	48
Grader and Tractor Operators (excepting permanent municipal employees)	.60	48
Truck Drivers (regardless of basis for payment of truck)	.40	48
Truck only—		
(a) When paid by the hour—		
When truck is hauling not more than 1 cubic yard	.55	..
For each additional 1/10 cubic yard	.04	..
(b) When paid by the mile		
If the basis of payment is per yard mile, the minimum rate shall be 5c. per yard mile of load haul plus an allowance of 10c. per cubic yard.		
If the basis of payment is per ton mile, the minimum rate shall be 3⅛c. per ton mile of load haul plus an allowance of 6¼c. per ton.		
In area "A"		
If the basis of payment is per yard mile or per ton mile the minimum rate per yard mile or per ton mile shall be the same as set out above.		
Timber Men: timber work where use of hammers, saws, axes and augers only are required	.50	48

NOTE.—Men occupied on subsistence work projects such as Forestry Work, The Pas-Mafeking Highway, Grassmere Drain and similar undertakings—not less than the Minimum Wage Rate set by the Minimum Wage Board.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages: The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are

fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here. Particulars of the contracts which have been awarded recently by various other departments of the Government of Canada, however, appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Construction of steel towers for handling timber at Laurier Pier, Montreal Harbour, P.Q. Name of contractors, Canadian Structural Steel Works Co., Ltd., Montreal P.Q. Date of contract, May 6, 1940. Amount of contract, $3,820.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Engineers on steel erection	$0 75
Hoist operators, tower (gas. or electric)	0 60
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Riggers (general)	0 60
Structural steel erectors	0 75
Welders on steel erection	0 75
Watchman	0 35

Construction of an extension (60 ft.) to the Transit Shed No. 27A in Montreal Harbour, P.Q. Name of contractor, Canadian Structural Steel Works Co., Ltd., Montreal, P.Q. Date of contract, May 6, 1940. Amount of contract, $2,800.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Compressor operators (gas. or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55

	Per hour
Driver, team and wagon	0 75
Engineers, operating steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers, crane (steam, gas, or electric)	0 70
Engineers on steel erection	0 75
Firemen, stationary	0 50
Jack hammer operators	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck drivers and truck	1 45
Painters (spray)	0 70
Painters and glaziers	0 66
Pipefitters—(surface, temp. work)	0 55
Riggers (general)	0 60
Structural steel workers	0 75
Watchmen	0 35
Welders and burners—acetylene or elec. on steel erection	0 75

Construction of a number of wooden trays and floor racks for the Cold Storage Annex, Halifax Harbour, N.S. Name of contractor, Mr. R. J. Bedwin, Halifax, N.S. Date of contract, May 6, 1940. Amount of contract, $1,424.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 70
Labourers	0 40

DEPARTMENT OF TRANSPORT

Additional development of Airport, Ottawa, Ont. Name of contractors, Dibblee Construction Co., Ltd., Ottawa, Ont. Date of contract, May 9, 1940. Amount of contract, $171,400. A fair wages schedule was included in the contract as follows:—

	Per hour
Drivers	$0 45
Driver, team and wagon	0 80
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck	1 45
Road grader operators (gas.)	0 55
Tractor operators	0 55
Watchmen	0 40

Erection of a radio range building at Crescent Valley, B.C. Name of contractor, R. C. Moncrieff, Vancouver, B.C. Date of contract, May 15, 1940. Amount of contract, $2,495.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 75
Cement finishers	0 60
Cement and concrete mixer operators (gas.)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Painters and glaziers	0 65
Roofers—shingles (wood, asbestos)	0 75
Roofers—sheet metal	0 65
Rodmen—reinforced steel	0 50
Sheet metal workers	0 65
Watchmen	0 40

Development work (grading, smoothing, seeding and fencing) at the Airport, Windsor Mills, P.Q. Name of contractors, Union Quarries and Paving Ltd., Quebec, P.Q. Date of contract, May 15, 1940. Amount of contract, $38,600. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Carpenters and joiners	0 55
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Road grader operators:	
Horsedrawn	0 40
Including team	0 65
Gas	0 45
Tractor operators	0 45
Watchmen	0 30

Additional development at Airport, Malton, Ont. Name of contractors, A. Cope & Sons, Ltd., Hamilton, Ont. Date of contract, May 15, 1940. Amount of contract, $42,824.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Road grader operators (gas.)	0 50
Tractor operators	0 50
Watchmen	0 35

Additional development at the Airport at Calgary, Alta. Name of contractor, Mr. Fred Mannix, Vancouver, B.C. Date of contract, May 23, 1940. Amount of contract, $57,901.00. A fair wages schedule was included in the contract as followed:—

	Per hour
Drivers	$0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck	1 50
Road grader operators:	
Horse-drawn	0 50
Including team	0 80
Gasoline	0 60
Tractor operators	0 67½
Watchmen	0 40

Development work (grading, smoothing, seeding and fencing) at the Airport at Prince Albert, Sask. Name of contractors, Dorosz Bros., Regina, Sask. Date of contract, May 23, 1940. Amount of contract, $9,000.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 75
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Road grader operators:	
Gas	0 55
Horse-drawn	0 45
Including team	0 80
Tractor operators	0 60
Watchmen	0 35

Development of an aerodrome at Airdrie, Alberta. Name of contractors, Dutton Bros. & Co., Calgary, Alta. Date of contract, May 23, 1940. Amount of contract, $26,145.00.

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 50
Drivers	0 45
Driver, team and wagon	0 75
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Road grader operators:	
Horse-drawn	0 50
Including team	0 80
Gasoline	0 60
Road roller operators (steam or gas.)	0 70
Tractor operators	0 67½
Watchmen	0 40

Development of aerodrome at Jarvis, Ont. Name of contractor, Johnson Bros. Co., Ltd., Brantford, Ont. Date of contract, May 20, 1940. Amount of contract, $156,792.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55

Overshoes	The B. F. Goodrich Rubber Co., Kitchener, Ont.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Wood Products

Saint John, N.B.—Certain Shipbuilding Firms and the United Brotherhood of Carpenters, Local 1901 (Ship Caulkers).

See below under "Construction: Shipbuilding".

Manufacturing: Boots and Shoes

Toronto, Ontario.—A Certain Shoe Manufacturing Firm and the Canadian Shoe Workers Union and Allied Crafts.

Agreement reached following strike reported on page 538 of this issue. Agreement to be in effect from May 22, 1940, to May 31, 1941, and thereafter subject to 30 days' notice.

Only union members to be employed if available. Any others employed to join the union. The company to deduct union dues from employees' wages, to be paid over to the union. The company agrees not to discharge any union employees until the union officers have been consulted.

Hours: 8½ per day, 4 on Saturdays, a 46½ hour week.

Overtime limited to 6 hours in any week, with no work on Saturday afternoon, Sundays or legal holidays.

Wages shall not be less than the rates of pay provided for in the agreement for the province of Quebec (Labour Gazette, October, 1937, page 1156, March, 1938, page 335, July, 1939, page 728) under the Collective Labour Agreements Act of Quebec. Where wages are now more favourable to the employees than those of that agreement, they shall not be changed to adversely affect the employee.

No strikes or lockouts to occur during the term of the agreement. Any disputes or any new conditions which may arise, if the question cannot be settled between the parties, will be referred to a joint arbitration committee. If the representatives of the two parties cannot agree on a third party, the Minister of Labour for the province of Ontario will be asked to name him. The decision of this committee to be final and binding.

Manufacturing: Textiles and Clothing

Winnipeg, Manitoba.—Garment Manufacturers Association of Western Canada and other Manufacturers of Men's Work Clothing, Etc. and the United Garment Workers of America, Local 35.

Agreements to be in effect from November 15, 1939, to December 31, 1940. (A successful strike to secure this agreement in one establishment is reported on page 541 of this issue.)

All employees, except new employees during first 21 days of their employment, to be union members. A business representative of the union to be admitted to the factory at all reasonable times for union business.

Hours in all working shops and cutting rooms: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one quarter. Work on legal holidays, time and one half.

Wages are piece rates and the minimum rates are the same as those previously in effect, that is "the 1934 Minimum Schedule of Prices issued in booklet form by the United Garment Workers of America, less 10 per cent," but with increases of 3 to 6 per cent for certain operators, folders, cleaners and pressers.

No strike or lockout to occur while this agreement is in effect. Any disputes which cannot be settled by the manufacturer and the union representative will be referred to a joint arbitration board, with an impartial chairman, the decision of this board to be final and binding.

Manufacturing: Metal Products

Vancouver, B.C.—A Certain Shipbuilding Company and the National Union of Operating Engineers, No. 3.

See below under "Construction: Shipbuilding".

Vancouver, B.C.—Certain Shipbuilding Companies and the Shipyard Labourers' Union of Vancouver and District.

See below under "Construction: Shipbuilding".

Construction: Buildings and Structures

Sydney, N.S.—The Master Carpenters of Sydney, N.S., and the United Brotherhood of Carpenters and Joiners, Local 1588.

Agreement to be in effect from May 1, 1940, to April 30, 1941. Notice of any desired change must be given 3 months before expiration date and an effort made to reach a settlement by March 1 following. If the party receiving the notice fails to negotiate, the desired change shall become a part of this agreement and made effective May 1, following.

Only union members to be employed, if available. Others employed to have union initiation fee deducted from their wages. The union representative may visit the job.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one half. Work on Sundays and on eight specified holidays, double time.

Minimum wage rate for carpenters: 90 cents per hour. Foremen to be paid at least 5 cents per hour over the journeyman's rate. Any member of the carpenter's union working for any other than a recognized contractor to charge 15 cents per hour more than the minimum rate. The advisory committee is authorized to fix a special minimum rate of wages lower than the regular rate for any employee who is handicapped.

Any grievance of either party to the agreement to be submitted to a committee composed of two members of each party.

One apprentice allowed to every five journeymen.

GLACE BAY, N.S.—MASTER CARPENTERS OF GLACE BAY AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1645.

The terms of this agreement which came into effect May 1, 1940, are similar to those of the agreement for carpenters at Sydney, as summarized above. The minimum wage rate is 90 cents per hour, with a 44-hour week, time and one-half for overtime and double time for work on Sundays and holidays.

HALIFAX, N.S.—CONSTRUCTIVE MECHANICAL TRADES EXCHANGE AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 56.

Agreement to be in effect from May 20, 1940, to April 30, 1942, and thereafter from year to year, subject to notice.

Employers agree to co-operate with the union that every effort will be made to employ members of the union. If none available, others may be employed but such men are to be discharged before members of the local union.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half to 10 p.m.; after 10 p.m. until 8 a.m., and all work on Sundays and nine specified holidays, double time.

Wages per hour: 95 cents (an increase of 10 cents per hour over the previous rate).

For work outside the city, fare, board and travelling time (to 5 p.m.) to be paid by the employer.

Apprentices limited to one apprentice to each three journeymen, apprentices to serve five years and then pass a satisfactory examination before receiving journeymen's rate. Not more than one apprentice or helper to be allowed to any journeymen, except in case of extra high or heavy work, when any additional help will be labourers who will not be required to do any mechanical work.

A joint conference board to be formed for the settlement of disputes. If they are unable to decide any dispute it will be referred to the international office of the union for a decision before there is any strike or lockout.

HAMILTON, ONTARIO.—HAMILTON CONSTRUCTION ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS, LOCAL 18.

Agreement to be in effect from May 2, 1940, to April 30, 1941, and thereafter subject to notice, and is effective in Hamilton and within 15 miles of it.

Only union members to be employed, if available.

Hours: 8 per day, Monday to Friday, a 40-hour week. When required to work on shifts, 8 hours' pay for 7 hours' work on second and third shifts.

Overtime: time and one-half; double time for work on Sundays and eight specified holidays.

Minimum hourly wage rate: 80 cents (an increase of 5 cents per hour over the previous rate).

For work out of the city transportation charges over 20 cents in any day and travelling time one way to be paid by the employer.

Any dispute which cannot be settled between the parties will be referred to a joint arbitration board. No strike or lockout to occur until an international officer of the union and the chairman of the Hamilton Construction Association have met and rendered a decision.

Construction: Shipbuilding

SAINT JOHN, N.B.—CERTAIN SHIPBUILDING AND SHIP REPAIR FIRMS AND THE UNITED BROTHERHOOD OF CARPENTERS, LOCAL 1901 (SHIP CAULKERS).

Agreement to be in effect from November 1, 1938, to October 31, 1939, and thereafter from year to year, subject to notice.

Preference in employment to be given union members. The union agrees to furnish competent men to perform the work when required.

Hours: 8 per day, a 48-hour week. When men are required to work on tide work, one full tide to constitute a day's work.

Overtime and work on Sundays and holidays, double time.

Minimum wage rates: foreman caulker $5.50 per day, journeyman caulker $5 per day, helpers or apprentices 40 cents per hour.

When men are ordered to work they are to be paid for at least two hours.

VANCOUVER, B.C.—A CERTAIN SHIPBUILDING COMPANY AND THE NATIONAL UNION OF OPERATING ENGINEERS, LOCAL NO. 3 (ENGINEERS AND FIREMEN).

Agreement to be in effect from May 15, 1940, for the duration of the war and thereafter until the completion of current contracts.

Only union members to be employed as engineers and firemen.

Hours: 8 per day, a 44-hour week for day work; 7⅓ hours per day, a 40-hour week for second shift; and 7⅓ hours per day, with a 40-hour week for third shift. For second and third shifts 8 hours' pay allowed for the regular hours of the shift (7⅓ and 7⅓ hours respectively).

Overtime: time and one-half for the first four hours and double time thereafter; work on Saturday afternoon time and one-half to 5 p.m. and double time thereafter; double time for work on Sundays and nine specified holidays.

Wages: engineers $7.20 per day, firemen $5 per day. These rates "to be subject to adjustment quarterly in accordance with the cost of living, and wages to be increased or decreased in an equal percentage to the increase or decrease in cost of living, as ascertained by the Department of Labour of the provincial government of British Columbia, it being understood that the cost of living figures as at December 1, 1939, be the basis of this arrangement." The minimum rates specified in the agreement may not be reduced during the life of the agreement.

Every man to be paid at least four hours if hired after starting time.

Employees required to report for work outside the city to be paid one hour each day for travelling and transportation.

Vancouver, B.C.—Certain Shipbuilding Firms and the Shipyard Labourers' Federal Union, Local 126.

Agreement to be in effect from May 15, 1940, for the duration of the present contracts.

The terms of this agreement are similar to those of the agreement for operating engineers, employees of this company, as summarized above, with these exceptions:

Minimum wage rates: labourers employed on ordinary work 50 cents per hour, $4 per day; chipping, machine painters' helper, winchmen and cementing seams 55 cents per hour, $4.40 per day; dockmen and tractor driver 56¼ cents per hour, $4.50 per day; cementer 62½ cents per hour, $5 per day; rigging 65½ cents per hour, $5.24 per day; boiler cleaning and scaling 65 cents per hour, $5.20 per day; machine painter 73 cents per hour, $5.84 per day. "The above rates to be subject to adjustment quarterly in accordance with the cost of living, and wages to be increased or decreased in an equal percentage to the increase or decrease in cost of living, as ascertained by the Department of Labour of the Provincial Government of British Columbia, it being understood that the cost of living figures as at December 1, 1939, be the basis of this arrangement."

Time and one-quarter to be paid for all dirty work, the foreman and shop steward to decide if work in question is to be so classed. Time and one-quarter to be paid for men cleaning, painting, cement washing or applying bitumastic in double bottom tanks or confined spaces, at the discretion of the foreman and shop steward.

Collective Labour Agreements Act, Quebec

The following agreements, amendments and repeal to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Textile and Jute Bag Manufacturing Industry, Montreal (amendment).

Can, Container and Metal Utensil Industry, Province of Quebec (amendment).

Building Trades, Quebec and District (agreement and amendment).

Building Trades, Three Rivers and District (amendment and correction).

Building Trades, Sherbrooke and Eastern Townships (amendment).

Building Trades, Montreal (amendment).

Longshoremen (inland and coastal navigation), Montreal (amendment).

Retail Store and Hotel Workers, Donnacona (amendment).

Grocers and Butchers, Sherbrooke (amendment).

Shoe Repairers, Sherbrooke (repeal).

Barbers and Hairdressers, Quebec City and District (amendment).

Hairdressers, Montreal (amendment).

Funeral Undertakers, Montreal.

Industrial Standards Acts

No new schedules under these acts were published in any of the provincial gazettes during May.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the Labour Gazette, page 503. Amendments to the Act are noted in the Labour Gazette, June, 1939, page 576. Agreements and regulations under the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*, or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette*. Unless otherwise stipulated, these

agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issue beginning May, 1938.

Recent proceedings under the Act include the extension of two new agreements, the amendment of ten agreements, the repeal of two agreements and the correction of one agreement, all of which are noted below. Requests for the extension of new agreements were published in the *Quebec Official Gazette*, as follows: an agreement affecting butchers and grocers at Coaticook in the issue of May 4; agreements affecting the dress manufacturing industry throughout the province of Quebec, the building materials industry throughout the province of Quebec, building trades at St. Hyacinthe and at Montreal and travelling salesmen for food products in the Quebec district, in the issue of May 11; municipal employees (outside services), municipal employees (permanent employees), the police department and the fire department, all of the city of Quebec, in the issue of May 25. In addition, Orders in Council were published in the *Quebec Official Gazette* during May, approving the constitution and by-laws of certain joint committees and others authorizing certain joint committees to levy assessments, as listed below.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING INDUSTRY, MONTREAL.—An Order in Council, approved May 17, and published in the *Quebec Official Gazette*, May 25, amends the previous Orders in Council (LABOUR GAZETTE, May, 1939, page 527, and March, 1940, page 282), by adding two further bag manufacturers to the parties to this agreement.

Manufacturing: Metal Products

CAN, CONTAINER AND METAL UTENSIL INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 18, amends the previous Order in Council for this industry (LABOUR GAZETTE, May, 1940, page 496) by providing that when a worker is transferred from one classification to another he will be paid the rate of wages for the classification in which he is actually working.

Construction: Buildings and Structures

BUILDING TRADES, QUEBEC AND DISTRICT.—An Order in Council, approved May 6, and published in the *Quebec Official Gazette*, May 11, amended by a further Order in Council approved May 17 and published in the issue of May 25, makes obligatory the terms of an agreement between L'Association des Constructeurs de Québec Inc. (The Builders' Association of Quebec, Inc.) and Le Conseil des Métiers de la Construction des Syndicats Catholiques Nationaux de Québec (The Building Trades Council of the National Catholic Unions of Quebec) and the separate National Catholic Unions for the following trades: bricklayers and masons, plasterers, carpenters, painters, plumbers and electricians, tinsmith roofers, stationary engineers, labourers.

The agreement is to be in effect from May 1, 1940 to April 30, 1941, and thereafter from year to year subject to notice. (This agreement covers ornamental iron and bronze workers and tinsmith roofers, whether on the job or in a workshop.)

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, June, 1938, page 692, with these exceptions:—

The county of Matane is added to the territorial jurisdiction. For zone I the following municipalities are added: Ville Guay, St. Ambroise, Les Saules, Chateau d'Eau, Notre Dame des Anges.

Junior journeymen are provided for in some trades, and the number of junior journeymen is limited to one to each five senior journeymen or fraction thereof in the trades of plumber, steamfitter and tinsmith roofer.

The conditions for apprenticeship are changed for ornamental iron and bronze mechanics and adjusters, providing that one apprentice may be allowed to each three journeymen or fraction thereof, and apprentices in this trade are to be paid 15 cents per hour during first year, 20 cents second year, 25 cents third year and 35 cents fourth year.

For maintenance men the weekly wage rates are raised about $2 per week to $23 per week for qualified workmen, $17 for labourers in zone I, and $20 for qualified workmen and $16 for labourers in zone II, with a 48 hour week in both zones.

The hourly wage rates for most trades are increased by 5 cents per hour over the previous rates (10 cents in case of some contractors giving their personal services), but in the case of labourers, metal lathers, enginemen (mixers and compressors) and caulkers, there is no change. (See table on page 609.)

Contracts signed and being performed on March 1, 1940 are to be governed by the previous agreement.

BUILDING TRADES, THREE RIVERS AND DISTRICT.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette*, May 18, amends the previous Order in Council for these trades (LABOUR GAZETTE, May, 1940, page 497). It is provided that although the *Official Gazette* by omitting from the industrial jurisdiction work pertaining to boats, electric or telephone lines and fences.

BUILDING TRADES, SHERBROOKE AND EASTERN TOWNSHIPS.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 11, amends the previous Orders in Council (LABOUR GAZETTE, June, 1938, page 693, October, page 1173, November, page 1299, July, 1939, page 729, November, page 1183 and April, 1940, page 390). The last Order in Council had made provision for the inclusion of the county of Arthabaska in the territorial jurisdiction. This latest amendment provides that Arthabaska County be divided into two zones: zone I, the municipality of Victoriaville; Zone II, Princeville, Warwick and Tingwick and within 2 miles of them and the municipality of Arthabaska.

QUEBEC AND DISTRICT
MINIMUM HOURLY WAGE RATES

pulp and paper industry is exempt as provided in the previous Order in Council, it is now qualified to provide that this exemption apply to permanent employees of the industry and maintenance men and not in the event of the construction of a new building.

A correction to the Order in Council summarized in last month's LABOUR GAZETTE, was published in the May 25 issue of the *Quebec*

* If an employee who usually lives in zone I is hired for work in zone II or zone III, he must be paid the zone I rate; and in the cases of plumbers, electricians, tinsmith-roofers and painters, transportation and board to be paid if these trades go to work outside Quebec City, unless the contractor drives these men to work and return each day.

BUILDING TRADES, MONTREAL.—An Order in Council, approved May 23, and published in the *Quebec Official Gazette*, May 25, amends

the previous Orders in Council for these trades (LABOUR GAZETTE, July, 1939, page 729, September, page 951, October, page 1066 and May, 1940, page 499) by extending the terms of the agreement from June 1, 1940 to June 24, 1940. (As noted above, a request for the extension of a new agreement for these trades was published in the *Quebec Official Gazette,* May 11.)

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.—An Order in Council, approved May 10, and published in the *Quebec Official Gazette,* May 18, amends the previous Orders in Council for these workers (LABOUR GAZETTE, June, 1939, page 629, February, 1940, page 173 and April, page 391).

The agreement is renewed from May 15, 1940, for the 1940 navigation season and thereafter from year to year, subject to notice.

Hourly wages for longshoremen: for work between 7 p.m. and 7 a.m., 52 cents (an increase of one cent per hour). (The rate for work between 7 a.m. and 7 p.m. is unchanged at 50 cents per hour.)

Time and one half is still payable for Sundays and holidays, but the number of such holidays is now five. There are other minor changes in conditions.

Trade

RETAIL STORE AND HOTEL WORKERS, DONNACONA.—An Order in Council, approved May 1, and published in The *Quebec Official Gazette,* May 11, amends the previous Orders in Council (LABOUR GAZETTE, June, 1938, page 695, and June, 1939, page 630) by providing that the agreement remain in effect until May 1, 1941, subject to repeal on 60 days' notice from either party.

GROCERS AND BUTCHERS, SHERBROOKE.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 18, repeals the Orders in Council making this agreement and amendments to it obligatory. (The agreement and amendments were summarized in the LABOUR GAZETTE, September, 1938, page 1045, October, page 1174, and November, page 1300.)

Service: Custom and Repair

SHOE REPAIRERS, SHERBROOKE.—An Order in Council, approved May 1, and published in the *Quebec Official Gazette,* May 11, repeals the Orders in Council making this agreement and amendments to it obligatory. (The agreement and amendments were summarized in the LABOUR GAZETTE, July, 1938, page 800, September, page 1045 and November, page 1300.)

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC CITY AND DISTRICT.—An Order in Council, approved May 6, and published in the *Quebec Official Gazette,* May 11, amends the previous Orders in Council for these trades, (LABOUR GAZETTE, October, 1937, page 1158, December, page 1388, October, 1938, page 1174, October, 1939, page 1068 and May, 1940, page 500).

For female hairdressers, apprentices during their first three months may be paid $4 per week. After two years' experience, a female employee to be considered a skilled operator and is to be paid at least $10 per week and a 10 per cent commission on all gross receipts in excess of $10 in one week; employees receiving higher wages than the minimum shall be paid a 10 per cent commission when gross receipts shall exceed the double of their wages. In all cases, overtime hours shall be paid for, besides commissions.

For beauty parlours, also, hours are arranged differently with longer hours on Friday rather than Saturday.

There are also some changes in the hours for barbers and prices to be charged in the town of Thetford Mines and within 10 miles of it.

HAIRDRESSERS, MONTREAL.—An Order in Council, approved April 25, and published in the *Quebec Official Gazette,* May 4, amends the previous Orders in Council for these workers (LABOUR GAZETTE, August, 1939, page 862, and March, 1940, page 284) by providing that the agreement remain in effect for 30 days after April 30, 1940.

FUNERAL UNDERTAKERS, MONTREAL.—An Order in Council, approved April 25, and published in the *Quebec Official Gazette,* May 4, makes obligatory the terms of an agreement between La Section des directeurs de funérailles du district de Montréal de l'Association des marchés détaillants du Canada (The Funeral Directors' Section of the district of Montreal of the Retail Merchants Association of Canada) and le Syndicat des employés de pompes funèbres (The Union of Undertakers' Employees).

Agreement to be in effect from May 4, 1940 to May 3, 1941, and for a further 30 days if a new agreement has not been submitted in time for adoption on that date.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, January, 1939, page 97 and March, 1939, page 336, with these exceptions:

The jurisdiction includes all funeral directors and embalmers in cities and towns of at least 4,000 population on the Island of Montreal, Isle Jesus, and within 10 miles of the Island of Montreal.

The regular hours are 72 per week, with a 24 hours' rest each week or equivalent; funeral parlours to close at 11 p.m.

Wages for embalmers: first embalmer $28 per week, second embalmer $25 (if only one employed $28 per week for him); if not employed on a weekly basis, $8 for each embalming. (The rates for other employees are unchanged.)

Apprenticeship is to be for one year and an apprentice is not considered a regular employee of the concern.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agree-

ments were approved by Orders in Council and published in the *Quebec Official Gazette*, May 4, 18 and 25:

Can, container and metal utensil industry, Province of Quebec.
Building trades, Joliette.
Building trades, St. Jerome.
Building trades, Sherbrooke.
Funeral undertakers, Montreal.
Building trades, Quebec.
Building trades, Three Rivers.
Tannery employees, Province of Quebec.

Notices were published in the *Quebec Official Gazette*, May 4, 18 and 25, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Barbers and hairdressers, Quebec.
Hairdressers, Montreal (amendment).
Tavern employees, Quebec.
Building trades, Hull.
Paper box industry, Province of Quebec.
Building trades, Joliette.
Building trades, St. Jerome.
Funeral undertakers, Montreal.
Barbers and hairdressers, Sherbrooke.
Building trades, Hull.
Funeral undertakers, Montreal.
Building trades, Quebec.
Building trades, Montreal.
Building trades, Three Rivers.

COMBINES INVESTIGATION ACT

Decision of British Columbia Supreme Court in Case of Alleged Fruit Combine—Other Proceedings

ON May 20, 1940, Mr. Justice H. B. Robertson of the British Columbia Supreme Court acquitted eight companies and four individuals of charges laid by the Attorney General of British Columbia alleging that in connection with the marketing of British Columbia fruit, vegetables and other products of the soil, these companies and individuals had formed a merger, trust or monopoly to the detriment of the public, contrary to the Combines Investigation Act. The commencement of the trial on May 1 was reported in the May Labour Gazette, page 445. The prosecution by the Attorney General of British Columbia followed an investigation under the Combines Investigation Act, which was completed in November, 1939. Preliminary hearings were held in Kelowna in February, 1940, before Magistrate T. F. McWilliams who committed eight companies and four individuals for trial on combine charges.

The Crown alleged that Dominion Fruit Limited of Winnipeg, a wholly-owned subsidiary of Western Grocers Limited, had purchased fifty per cent of the common stock of Lander Company Limited, a shipper of fruits and vegetables in the Okanagan Valley, itself the owner of half or more of the shares in four fruit and vegetable shipping firms and one fruit and vegetable selling agent, Sales Service Limited, all in British Columbia.

The decision holds that an investment of fifty per cent of the shares of another company does not amount to "control" within the meaning of Section 2 (4) (*a*) of the Combines Investigation Act; nor does it amount to "an interest in the whole or part of the business of another" within the meaning of the said section.

"The ownership of one-half the shares in a company," reads the judgment, "does not give control of the company, and, in my opinion, does not give any control of the company's business which is an asset or property of the company." Further, "Then was there an interest in the business? Would anyone say that a shareholder in the Canadian Pacific Railway had an interest in its business? I think not. The 'interest' mentioned in the statute means I think a financial interest."

The opinion holds alternatively, that even if such investment should amount to control over or interest in the business such interest was not to the detriment or against the interest of the public, whether consumers, producers or others. His Lordship examined the facts of the industry and related the business practices complained of to the needs of the producers. He found that rebates given by shippers to Prairie jobbers were justified to help move the Okanagan fruit crop, and that there was nothing reprehensible about the particular rebates and claims paid by the accused Okanagan companies to the accused Prairie jobbers in the instant case. The Court accepted the explanation of officers of the accused companies who testified for the Crown that all claims and rebates were reasonable and given with no fraudulent intent, declaring "from the evidence I find the rebates were justified."

Certain other business practices were alleged by the Crown to show detriment to the public, such as the payment by brokers, representing the accused Okanagan Valley shippers and producers, of a certain percentage of their net profits to the accused Prairie jobbers in order to induce the said jobbers to purchase Okanagan products through them. On this point the judgment states:

"It is clear, however, that the monies paid by Robinson & Company to Dominion Fruit in this roundabout way were part of its broker-

age charges; and that these brokerage charges were paid to it by Sales Service who received the same from the grower by virtue of their contracts with them for acting as their shipper; so that, in any event, the growers were not entitled to this money so they did not suffer any detriment by reason of the payments."

Again, the Court did not find that the relationship between the Prairie jobber and the Okanagan Valley fruit shipper was a wrongful one since it did not affect the public or the growers and there was no evidence to show that the returns to the growers paid by the companies subject to the investment were any less than those received by other growers dealing with other fruit shippers.

Finally, the Court rejected the Crown's contention that detriment was to be found in the breach of Section 27 of the British Columbia Sales on Consignment Act which forbids any investment by jobbers in fruit and vegetable shipping firms in the province. "There is no evidence," concludes the judgment, "that Western-Dominion paid lower prices on sales put through by Sales Service than other jobbers with whom they competed paid on sales arranged by other agents. Further the safeguard to the growers would be that Sales Service would have to get as favourable prices as other sales agents to hold their growers.

"I find the merger, trust or monopoly, if one existed, had not operated or was likely to operate to the detriment of or against the interests of the public, whether consumers, producers or others."

Alleged Paperboard Container Combine

Presentation of evidence by the Crown in the trial of nineteen companies and one individual charged with offences against section 498 of the Criminal Code in relation to the manufacture and sale of paperboard containers concluded on May 29 in the Supreme Court in Toronto, before Mr. Justice J. A. Hope. (LABOUR GAZETTE, May, 1940, p. 445.) The Court then heard argument on the question of rulings as to the admissibility of certain evidence. On June 4 Mr. Justice Hope gave his reasoned judgment on the points raised and found that it was not necessary to make further rulings. No evidence was called for the defendants and the Court was adjoured until June 17 for the commencement of argument by counsel. J. C. McRuer, K.C., assisted by R. M. Fowler and J. L. McLennan is conducting the prosecution.

Stay of Proceedings against Alleged Tobacco Combine

The trial of thirty-five tobacco manufacturers and wholesalers which commenced in the Alberta Supreme Court before Mr. Justice A. A. McGillivray on April 29 (LABOUR GAZETTE, May, 1940, p. 445) was halted on May 10 when a stay of proceedings was entered by counsel for the Crown. The action taken on behalf of the Attorney-General followed the refusal of the Court to accept certain documents submitted as evidence by the prosecution.

The stay of proceedings against all defendants in the trial leaves further action in the case in the hands of the Attorney-General of Alberta.

On application made on behalf of the Attorney-General on May 20 the trial of nine defendants who had elected trial before a judge without the intervention of a jury was set over until the September sittings of the Supreme Court of Alberta.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY 1940

Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of a list of certain staple foods, fuel and lighting and rent entering into a family budget was somewhat higher than in the previous month due to an advance in rent, while the Dominion Bureau of Statistics weekly index number of wholesale prices was lower at the end of the month than at the beginning due to a considerable extent to declines in the prices of grains.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was $8.76 at the beginning of May as compared with $8.78 for April; $8.13 for May, 1939; $8.50 for May, 1938; $8.58 for May, 1937; $6.67 for March, 1933, the low point in recent years; $11.17 for May, 1930; $10.22 for May, 1922; and $16.92 for June, 1920, the post war peak. Ten items in the list were higher in cost than in the preceding month, ten were lower and nine were unchanged. Changes continued to be slight, the most important being advances in beef, lamb, flour, salt pork and potatoes and declines in lard, eggs, butter and cheese. Including the cost of fuel and rent with that of foods the total cost was $17.85 at the beginning of May as compared with $17.76 for April; $17.02 for May, 1939; $17.36 for May, 1938; $17.28 for May, 1937; $21.49 for May, 1930; $20.57 for May, 1922; $26.92 for July, 1920, the post war peak. Fuel was unchanged while rent averaged higher, increases being reported in a number of localities.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 declined from 83·2 for the

(*Continued on page 620*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended May 31, 1940; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 612)

week ended April 26 to 81·2 for the week ended May 24 and then advanced to 81·7 for the week ended May 31. The latest figures available on a monthly basis are for April when the index number was 83·1 as compared with 73·7 for May, 1939; 80·3 for May, 1938; 85·3 for May, 1937; 63·5 for February, 1933, the low point in recent years; 93·4 for May, 1929; 98·5 for May, 1922; and 164·3 for May, 1920, the post war peak. An index of the prices of Canadian farm products declined from 72·5 for the week ended April 26 to 64·8 for the week ended May 24 and then advanced to 65·8 at the end of the next week. In the classification according to chief component materials the Vegetable Products Group declined more than six per cent during May, the main influence being the decline in grain prices. Other group changes were less important, three groups being higher, three lower and one unchanged.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of May of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good

modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in some of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of food tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

The price of beef at the beginning of May was slightly upward from the level of the previous month. Changes since the beginning of the year have been slight. Sirloin steak averaged 28·5 cents per pound for May, 28·3 for April and 28·1 cents for January. Veal was down in the average from 17·2 cents per pound for April to 16·6 cents for May. Breakfast bacon and boiled ham were also fractionally lower. The price of lard continued downward averaging 11 cents per pound for May, 11·4 cents for April and 12·8 cents for January. Fresh eggs averaged 26·8 cents per dozen in May and 27·5 cents in April. Creamery butter averaged 30·5 cents per pound in May, 32 cents in April and 26·1 cents in May, 1939. Cheese was one cent per pound lower at 25·4 cents declines being reported from most localities. The price of flour was fractionally higher at 3·6 cents per pound. Potatoes were $1.95 per 100 pounds in May and $1.92 in April. The price of anthracite coal continued at about the same level as in recent months, averaging about $15 per ton.

The following are the prices reported for Welsh coal "cobbles" and "French nut" at the beginning of May, 1940; Charlottetown $17.40; Saint John $16; Quebec $14.75; Three Rivers $16; Sherbrooke $16.75; St. Hyacinthe $15; Thetford Mines $17.50; Montreal $15 and $15.25; Ottawa $18; Kingston $16; Belleville $16.50; Peterborough $17.50; Oshawa $15.50; Toronto $15; St. Catharines $15.75; Hamilton $15.50; Galt $16; Sudbury $18.50; Cobalt $20; Timmins $19.75; Port Arthur $18; Fort William $18; Winnipeg $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the April issue of the LABOUR GAZETTE.

Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force with consequent effect upon prices. In some of these countries the publication of price data has been suspended and in the case of Germany, direct information will henceforth be unobtainable although information contained in the official publications of neutral countries and in the press will be noted.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930 = 100, was 132·7 for April as compared with 129·4 for March, an increase of 2·6 per cent for the month. The index of food prices rose from 125·3 to 127·6 or 1·8 per cent, the increase being due mainly to an increase of 4·5 per cent in the "other food and tobacco" subgroup, as the indexes for "cereals" and for "meat, fish and eggs" were practically unchanged. The index of "industrial materials and manufactures" rose from 131·4 to 135·2 or 2·9 per cent, the more important increases in its sub-groups being in "miscellaneous" which increased 9·1 per cent and "cotton" which increased 4·3 per cent. As compared with the figure for the corresponding month in 1939 the "all commodities" index for April showed an increase of 36·5 per cent.

The *Statist* index number, on the base 1867-1877 = 100, was 126·0 at the end of April as

compared to 123·4 at the end of March, an increase of 2·1 per cent for the month. The index of food prices was unchanged at 107·0. The index of prices of industrial materials increased 3·5 per cent to 126·0, there having been increases in all its sub-groups. The "all commodities" index for April 30, 1940, was 39·2 per cent higher than the corresponding figure for 1939.

COST OF LIVING.—The Ministry of Labour index number, on the base July, 1914 = 100 was 180 at the beginning of May as compared with 178 at the beginning of April, an increase of 1·1 per cent for the month. The index of food prices increased 0·6 per cent to 159, the increase being almost entirely due to higher prices for eggs. The index of rents increased from 162 to 164 due to increases in property taxes in some districts. There had been no increase in the index of rent since May, 1939. Under the Rent and Mortgage Restriction Acts landlords are forbidden to raise rents unless there have been structural improvements or increases in property taxes. The index of clothing prices increased about 2·8 per cent to 280, that for fuel and lighting materials increased 1·5 per cent to 208 and that for sundries increased 8·8 per cent to 210. The cost of living index for May 1, 1940, was 17·6 per cent higher than that for the same date in 1939.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914 = 100, was 128 for January, 1940, as compared to 135 the previous month, a decrease of 5·2 per cent for the month. The index of food prices declined from 132 to 124 or 6·1 per cent while that for non-foods declined from 137 to 130 or 5·1 per cent.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 112 for February as compared to 114 the previous month, a decrease of 1·7 per cent. The index of food prices decreased from 128 to 124, that for sundries from 99 to 98. The index for fuel and lighting materials increased from 100 to 101 and that for clothing from 92 to 94. The index for rent was unchanged at 100.

United States

WHOLESALE PRICES.—The Bureau of Labor Statistics index number on the base 1926 = 100, was 78·6 for April as compared with 78·4 for March, an increase of 0·2 per cent for the month. Of the ten groups which make up this index, one, hides and leather products, was unchanged, four groups showed increases and five groups recorded decreases. The group indexes which increased during the month were as follows: farm products, 1·5 per cent, foods, 1·4 per cent, sundries, 0·8 per cent and house furnishing goods, 0·4 per cent. Those which showed decreases were, textile products, 1·1 per cent, metals and metal products, 1·0 per cent, building materials, 0·8 per cent, fuel and lighting materials, 0·4 per cent, and chemicals and drugs, 0·2 per cent. The all commodities index for April, 1940, was 3·1 per cent higher than the corresponding figure for 1939.

COST OF LIVING.—The index number of the Industrial Conference Board, on the base 1923=100, was 85·9 for April as compared to 85·5 for March, an increase of 0·5 per cent for the month. The index of food prices increased 1·4 per cent, and those for rent and sundries each increased 0·1 per cent. The index of prices of clothing was unchanged while that for fuel and lighting materials decreased 0·5 per cent. The index of all items for April of this year, was 1·1 per cent higher than the corresponding index in 1939.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Early Closing By-law Held Invalid by Ontario Court of Appeal when Terms Exceed Shopkeepers' Petition

On April 24 the Ontario Court of Appeal dismissed the appeal of the city of Toronto and upheld the Order of Judge Honeywell of the County Court of York who had allowed an appeal by the accused proprietor of a shoe repair shop from a conviction by Magistrate Prentice for having kept his shop open after 1 p.m. on Wednesday, January 10, 1940, contrary to a civic by-law. The by-law was passed following a petition from the shopkeepers, the statutory authority being in the Factory, Shop and Office Building Act which requires a city council within one month after a petition is presented signed by not less than three-quarters of the shopkeepers concerned to pass a by-law giving effect to it. The Court held that any substantial departure from the terms of the petition would render the whole by-law invalid.

In this case the petition asked for closing of shoe repair shops on Monday and Tuesday at 8 p.m. and on Wednesday at 1 p.m. "except in any week in which there is a legal holiday other than Sunday and on Thursday and Friday at 8 p.m. and on Saturday at 10.30 p.m. and to remain closed until 5 o'clock on the forenoon of the next day following". The by-

law, however, while in accord with the petition as to closing on "Wednesday except Wednesdays in the weeks in which there is a statutory holiday other than Sunday" and for closing at 10.30 p.m. on Saturday, went beyond the petition in providing that shops might remain open until 10.30 p.m. on "each day which immediately precedes a statutory holiday". If the day preceding a holiday happened to be Wednesday the closing hour would be 10.30 for which the petition provided no foundation. Thus the failure of the by-law to comply with the terms of the petition rendered it invalid, including the section dealing with Wednesday afternoon closing which was requested in the petition. *Rex v. Grand* (1940) Ontario Weekly Notes, 180.

Action under Quebec Collective Agreements Act Fails to Raise Workman's Wages

The plaintiffs having proved neither the workman's right to the higher rate of wages nor their own right to bring the action, Judge Lajoie in the Magistrate's Court of Quebec District on April 6 dismissed with costs the action of a joint committee under the Collective Labour Agreements Act to enforce payment to a worker of the rate fixed for service men under an order in council relating to garage employees in Quebec City and District which had been made binding on May 28, 1938. He had received only the beginner's wage.

There was no dispute as to the hours and weeks that had been worked during the months of May to September, 1939. The question was whether the worker was a service man for whom the order in council fixes a 25-cent hourly rate or a beginner entitled to 20 cents an hour, the rate at which he had been paid.

The workman in question admitted that he was hired as a beginner and began work in May at the lower rate. On June 5 he obtained a certificate of competency as a service man. The defendant was given no notice of this; the workman continued to do the work and to accept payment of the 20-cent rate. The Court held that there is nothing in the Act to prevent a man holding a certificate of qualification in one occupation from working in another capacity. An employer who has no notice of it cannot be bound by a certificate of qualification changing the category of a worker provided the services rendered are those of the category for which he was hired.

The right given to the joint committee is an exceptional right allowing it to bring action for the benefit of an employee "who has not taken action and caused same to be served within one month from the due date of his salary or wages or who having taken action does not proceed with all possible diligence." The plaintiff in this case did not allege that these conditions had been fulfilled. *Le Comité Paritaire de l'Industrie de l'Automobile de Québec v. Boivin,* Cour de Magistrat, April 6, 1940.

Interim Injunction Against Picketing by Montreal Hat Workers

On April 13 Mr. Justice Decary of the Superior Court of Montreal granted the petition of a hat manufacturer for an interim injunction restraining the officers and members of the defendant union from threatening or intimidating his employees, picketing his premises and soliciting those of his employees who do not belong to the union to stop working for him, the order to remain in effect until the disposition of the petition for a permanent injunction and the action for damages against the defendants. The plaintiff furnished $500 security for costs. *Michaud v. Hat Workers Union Local 93 et al,* Superior Court, Montreal, April 13, 1940.

Quebec Act Incorporating Benefit Society Prevails over Subsequent Amendment to Code of Civil Procedure

On January 30 Mr. Justice Fortier of the Superior Court of Quebec dismissed without costs the application of a woman separated from her husband seeking payment to her of one-half the $48.87 monthly pension due him as a member of the Montreal Firemen's Benefit Association. The question was whether the general provision in the Code of Civil Procedure allowing seizure up to 50 per cent of the salary "in the case of a claim for alimentary pension" would prevail over the particular provision previously inserted in the private Act incorporating the association that pensions and benefits paid by the association are not to be liable to seizure "even for debts of an alimentary nature." The association was interested in safeguarding the privileges of its members in having their money exempt from seizure.

The Court held that if the legislature has allowed the Association to exempt pensions from seizure the same body could not have intended by an amendment to the Code of Civil procedure to deprive it of this right. *Dame Banville v. Romaneda et al* (1940) 78 Rapports Judiciaires de Québec, Cour Supérieure, 130.

Quebec Court of King's Bench Dismisses Appeal of Joint Committee in Construction Industry for Additional Wages for Workmen

In a unanimous judgment on April 12 the Court of King's Bench upheld the judgment of the Superior Court and dismissed the claim of a joint committee in the construction industry in the Eastern Townships for $268.15, the difference between the 20-cent hourly rate received by four workmen and the 35-cent rate with 53½ cents for overtime fixed for labourers under a collective labour agreement covering the construction industry in the district plus a penalty of $44.30, that is, 20 per cent of the amount unpaid.

The defence was that the collective agreement did not apply and that the workers had received the wages to which they were entitled under Order 4 of the Fair Wage Board. The Superior Court agreed with this defence.

The main judgment in the Appeal Court was given by Mr. Justice St. Jacques who dismissed the action but on other grounds. He stated that the action was begun on October 20, 1938, the work having been performed in July and August and on September 1. In the original Statement of Claim there was no allegation that the four workers concerned had not themselves taken action to compel the employer to pay the rate fixed by the agreement which is a statutory condition of the joint committee's right to bring action on their behalf. The joint committee seems to have understood this as on February 24, 1939, before the case was heard, a motion was made for permission to amend its claim. This motion was allowed on March 1, 1939, which was therefore the date on which any right appeared on the part of the joint committee.

Article 37 of the Collective Labour Agreements Act provides that claims are outlawed after six months and therefore the claim by the committee for wages prior to September 1 was barred. The Civil Code, however, states that prescription is to be reckoned by days and the claim for work done on September 1 would be valid if the agreement applied to them. Since on that date the men worked ten hours and were paid 20 cents an hour, they would be entitled under the agreement to 35 cents an hour for eight hours and 53½ cents for two hours or an additional $1.85 for the day. However, the judge held that as the evidence did not show the nature of the work they were doing, that is whether they were engaged on construction or repair work as covered by the agreement or as labourers on the ordinary work of the defendant company, the claim could not be maintained. As to the penalty claimed, there was no basis for assessing the amount since the proper wage rate could not be determined.

Mr. Justice Bond agreed with these reasons and also with those of the trial judge. Mr. Justice Letourneau held that the cause of action was already outlawed when the amendment was made in the Statement of Claim.

Without stating his reasons Mr. Justice Galipeault also agreed that the appeal should be dismissed. *Comité Conjoint de l'Industrie de la Construction du District des Cantons de l'Est v. Noel* (1940) 68 Rapports Judiciaires de Québec, Cour du Banc du Roi 435.

Claim Covered by Quebec Workmen's Compensation Act Cannot be Brought in Superior Court
